As a result of her employment James had extensive contact with physicians, nurses, civil servants, police officials, and magistrates. A murder mystery ordinarily requires a closed society that limits the number of suspects, but James uses her experience to devise settings in the active world, where men and women are busily pursuing their vocations. The setting for *A Mind to Murder*, for example, is a London psychiatric clinic. The administrative officer of the Steen Clinic is murdered in the basement record room in an appropriately bizarre manner (bludgeoned, then stabbed through the heart with a chisel) and in death she clutches to her breast a heavy wood-carved fetish from the therapy room. Yet quite apart from Dalgliesh's unraveling of the murder mystery, the reader enjoys the intricacies of the clinic's internal politics that underlie the plot throughout. The psychotherapists are devotees variously of psychoanalysis, electroshock treatments, and art therapy and have been conducting a cold war against one another for years. The staff psychologist, social worker, nurses, medical secretaries, and custodians have ambitions, intrigues, and grudges of their own. As a longtime civil servant herself, James knows that no matter how exotic someone's death, one question immediately excites the deceased's colleagues: Who will fill the vacant job?

ADAM DALGLIESH

Although it is an early work, *A Mind to Murder* features a surprise ending so cleverly conceived that it does not seem at all like a cheap device. In the novels that have followed, James has shown an increasing mastery of the labyrinthine murder-and-detection plot. This mastery affords the principal pleasure to one large group of her readers. A second group of readers most admires the subtlety and psychological validity of her characterizations. Critics have often remarked that James, more than almost any other modern mystery writer, has succeeded in overcoming the limitations of the genre. In addition, she has created one of the more memorable progeny of Sherlock Holmes.

Like Sayers's Lord Peter Wimsey and Christie's Hercule Poirot, Adam Dalgliesh is a sleuth whose personality is at least as interesting as his skill in detection. The deaths of his wife and son have left him bereft of hope and intensely aware of the fragility of people's control over their own lives. Only the rules that humankind has painstakingly fashioned over the centuries can ward off degeneration and annihilation. Those who murder contribute to the world's disorder and hasten the ultimate collapse of civilization. Dalgliesh will catch them and see that they are punished.

Dalgliesh leads a lonely but not a celibate life. He is romantically involved for a time with Deborah Riscoe, a character who appears in *Cover Her Face* and *A Mind to Murder*. Deborah is succeeded by other lovers, but James treats Dalgliesh's amours obliquely. She has said that she agrees with Sayers's position on such matters: A hero's love affairs are no more the author's business than anyone else's. At any rate, Dalgliesh's demanding nature, his self-sufficiency and icy reserve are as hard on the women in his life as on his associates in the department.

Dalgliesh is a discerning judge of character, and he knows that motivation flows from character. In fact, it is James's treatment of motivation that sets her work apart from most mystery fiction. Her killers are often the emotionally maimed who, nevertheless, manage to function with an apparent normality. Beneath this facade, dark secrets torment the soul. James's novels seem to suggest that danger is never far away in the most mundane setting, especially the workplace. Apart from her Byronic hero, she avoids all gothic devices, choosing instead to create a growing sense of menace just below the surface of everyday life. James's murderers sometimes kill for gain, but more often they kill to avoid exposure of some sort.

SHROUD FOR A NIGHTINGALE

Shroud for a Nightingale (1971), judged James's best novel by some critics, is set in a nursing hospital near London. The student nurses and most of the staff are in permanent residence there. In this closed society, attachments—sexual and otherwise—are formed, rivalries develop, and resentments grow. When a student nurse is murdered during a teaching demonstration, Dalgliesh arrives to investigate. In the course of

his investigation, he discovers that the murdered girl was a petty blackmailer, that a second student nurse (murdered soon after his arrival) was pregnant though unmarried and had engaged in an affair with a middle-aged surgeon, and that one member of the senior staff is committing adultery with the hospital pharmacist and another is homosexually attracted to one of her charges. At the root of the murders, however, is the darkest secret of all, a terrible sin that a rather sympathetic character has been attempting to both hide and expiate for more than thirty years. The murder weapon is poison, which serves also as a metaphor for the fear and suspicion that rapidly spreads through the insular world of the hospital.

AN UNSUITABLE JOB FOR A WOMAN

In *An Unsuitable Job for a Woman* (1972), James introduces her second recurring protagonist. Cordelia Gray's "unsuitable job" is that of private detective. Again, James avoids the formulized characterization. Gender is the most obvious but least interesting difference between Dalgliesh and Gray. Dalgliesh is brooding and introspective; Gray's sunny nature is the direct antithesis, despite her unfortunate background (she was brought up in a series of foster homes). She is a truth seeker and, like William Shakespeare's Cordelia, a truth teller. Dalgliesh and Gray are alike in their cleverness and competence. Their paths occasionally cross, and a friendly rivalry exists between them. Naturally, some readers have hoped that romance will blossom for the two detectives. James addressed this matter in a 1977 essay, "Ought Adam to Marry Cordelia?" She concludes that such a marriage, arranged in fictional heaven by a godlike author, would be too cheap a trick.

THE BLACK TOWER

The Black Tower (1975) is another narrative set in a health care facility. This time, it is an isolated nursing home, the Grange, located near sheer cliffs above the sea. The black tower is an incongruous edifice built near the cliffs by a former owner of the estate that the nursing home now occupies. The tower, like Nightingale House in *Shroud for a Nightingale*, is a symbol for the palpable evil that inhabits the place. James clearly believes in evil as an entity, not merely as an unfortunate misbalance of social forces. One of the

five murder victims is a priest, killed just after he has heard confession. James examines each of the residents and staff members of the Grange and the phobias and compulsions they take such pains to disguise. Dalgliesh identifies the vicious killer but almost loses his life in the process.

DEATH OF AN EXPERT WITNESS

In *Death of an Expert Witness* (1977), James's seventh novel, Dalgliesh again probes the secrets of a small group of coworkers and their families. The setting this time is a laboratory that conducts forensic examinations. As James used her nineteen years of experience as a hospital administrative assistant to render the setting of *Shroud for a Nightingale* totally convincing, she uses her seven years of work in the crime department of the Home Office to the same effect in *Death of an Expert Witness*.

The laboratory in which the expert witness is killed serves as a focal point for a fascinating cast of characters. Ironically, a physiologist is murdered while he is examining physical evidence from another murder (which is not a part of Dalgliesh's investigation). The dead man leaves behind a rather vacant, superannuated father, who lived in the house with him. The principal suspect is a high-strung laboratory assistant, whom the deceased bullied and gave an unsatisfactory performance rating. The new director of the laboratory has an attractive but cruel and wanton sister, with whom he has a relationship that is at least latently incestuous. In addition, Dalgliesh investigates a lesbian couple (one of whom becomes the novel's second murder victim); a melancholy physician who performs autopsies for the police and whose unpleasant wife has just left him; the physician's two curious children (the elder girl being very curious indeed); a middle-aged babysitter who is a closet tippler; and a crooked police officer who is taking advantage of a love-starved young woman of the town. In spinning out her complex narrative, James draws on her intimate knowledge of police procedure, evidential requirements in the law, and criminal behavior.

A TASTE FOR DEATH

Nine years passed before Commander Adam Dalgliesh returned in *A Taste for Death* (1986). In this novel, Dalgliesh heads a newly formed squad charged

with investigating politically sensitive crimes; he is assisted by the aristocratic Chief Inspector John Massingham and a new recruit, Kate Miskin. Kate is bright, resourceful, and ambitious. Like Cordelia Gray, she has overcome an unpromising background: She is the illegitimate child of a mother who died shortly after her birth and a father she has never known. The title of the novel is evocative—it is not only the psychopathic killer who has a taste for death, but also Dalgliesh and his subordinates, the principal murder victim himself, and, surprisingly, a shabby High Church Anglican priest, reminiscent of one of Graham Greene's failed clerics.

When Sir Paul Berowne, a Tory minister, is found murdered along with a tramp in the vestry of St. Matthew's Church in London, Dalgliesh is put in charge of the investigation. These murders seem linked to the deaths of two young women previously associated with the Berowne household. The long novel (more than 450 pages) contains the usual array of suspects, hampering the investigation with their evasions and outright lies, but, in typical James fashion, each is portrayed in three dimensions. The case develops an additional psychological complication when Dalgliesh identifies with a murder victim for the first time in his career and a metaphysical complication when he discovers that Berowne recently underwent a profound religious experience at St. Matthew's, one reportedly entailing stigmata. Perhaps the best examples of James's method of characterization are the elderly never-married woman and the ten-year-old boy of the streets who discover the bodies in chapter 1. In the hands of most other crime writers, these characters would have been mere plot devices, but James gives them a reality that reminds the reader how deeply a murder affects everyone associated with it in any way.

DEVICES AND DESIRES

Devices and Desires (1989) finds Dalgliesh on vacation in a fictional seacoast town in Norfolk, England. James reports that this story started—as most of her work does—with setting, in this case the juxtaposition of a huge nuclear power plant with the seemingly centuries-unchanged view of the North Sea from a Suffolk shore. Here, with the reactor towering over daily life and concerns, Dalgliesh, set somewhat at a

remove by being out of his jurisdiction, is surrounded by a typically P. D. Jamesian set of fully realized, difficult characters—all suspects in a grisly set of murders when the murderer turns up murdered.

ORIGINAL SIN

Though Cordelia Gray has not been in evidence since *The Skull Beneath the Skin* (1982), Kate Miskin appears—indeed, more than Dalgliesh—in both *Original Sin* (1994) and *A Certain Justice* (1997). Set at an ailing literary press, *Original Sin* is densely woven with engaging characters and intricate patterns of relationship—a fact that is pleasing to some readers, frustrating to others, for whom the lack of a central focus, that is, the more constant presence of the detective generally expected in the genre, is disorienting. It is in this particular that James most stretches the bounds of mystery. Her detectives are certainly present, but only as another thread in the whole cloth.

A CERTAIN JUSTICE

This same method met with little in the way of criticism in *A Certain Justice*. Though, again, neither Commander Dalgliesh or Inspector Kate Miskin provide a “central focus,” the sustained power and depth of the novel’s unfolding depiction of potent themes—passion, neglect, ambition, morality and the law—provides far more. Indeed, *Original Sin* has ties, thematically and formally, to James’s *Innocent Blood* (1980), which, while concerned with murder and vengeance, is not a detective story.

INNOCENT BLOOD

Innocent Blood is a novel unlike any of James’s others. Although it tells a tale of murder and vengeance, it is not a detective story. It is in the tradition of Fyodor Dostoevski’s *Prestupleniye i nakazaniye* (1866; *Crime and Punishment*, 1886) and *Bratya Karamazovy* (1879-1880; *The Brothers Karamazov*, 1912)—serious novels, each featuring a murder as the focal point for the characters’s spiritual and psychological conflicts. In form, *Innocent Blood* resembles yet another classic Russian novel, Tolstoy’s *Anna Karenina* (1875-1877; English translation, 1886). It features dual protagonists (such as Anna and Levin in Tolstoy’s narrative) who proceed through the novel along separate paths. They finally meet at the melodramatic (uncharacteristically so) climax.

THE CHILDREN OF MEN

Though it contains a horrible murder and a desperate chase, *The Children of Men* (1992) is not a detective story either, but James’s first foray into science fiction. A near-future story set in the England of 2021, it postulates a world in which male fertility has entirely failed since the last child was born in 1995. Society has devolved to a chaotic barbarity. The old are encouraged to commit mass suicide, while the young are licensed to violent behavior. Hope appears in the form of the pregnancy of a member of the dissident underground, who is soon on the run from the dictatorial powers that be. Perhaps the least successful of her books, *The Children of Men* is nevertheless rewarding for the fully realized future world that James depicts and was the basis for the film *Children of Men* in 2006.

THE LIGHTHOUSE

The relationship between Dalgliesh and Miskin never evolved into the romantic partnership many readers hoped for. In a plot twist that dates *The Lighthouse* (2005) as surely as its copyright, SARS intervenes. Dalgliesh is stricken with the virus and sidelined from the investigation as Miskin takes over. The convalescing detective does indeed reconcile himself to marriage, but to Emma Lavenham, a recurring character who first appeared in *Death in Holy Orders* (2001). Many critics and readers speculated that the apparent resolution of the series’ running subplots signaled the end of the Dalgliesh books, though the author’s creative powers at age eighty-five seemed undiminished.

Though James is known principally as a novelist, she is also a short-story writer and a playwright. Her short works, though scant in number, have found a wide audience through publication in such popular periodicals as *Ellery Queen’s Mystery Magazine*. Critics generally agree that James requires the novel form to show her literary strengths to best advantage. For example, “The Victim,” though a fine short story, is still primarily of interest as the microcosmic precursor of *Innocent Blood*. James’s sole play, *A Private Treason*, was first produced in London on March 12, 1985.

Some critics have purported to detect a slight anti-feminist bias in James’s work. This impression probably derives from the fact that James is one of the more

conservative practitioners of an essentially conservative genre. The action of all her novels proceeds from that most extreme form of antisocial behavior, murder. Murders are committed by human beings, and James's manner of probing their personalities is more like that of another James, Henry James, than like that of her fellow crime writers. Dalglish muses in *A Taste for Death* that he has learned, like most people, to accept and carry his load of guilt through life. The murderers that he so relentlessly pursues have not.

PLAY: *A Private Treason*, pr. 1985

NONFICTION: *The Maul and the Pear Tree: The Ratcliff Highway Murders, 1811*, 1971 (with T. A. Critchley); *Time to Be in Earnest: A Fragment of Autobiography*, 2000

BIBLIOGRAPHY

Benstock, Bernard. "The Clinical World of P. D. James." In *Twentieth-Century Women Novelists*, vol. 16, edited by Thomas F. Staley. Totowa, N.J.: Barnes and Noble, 1982. Discusses James's use of setting, her narrative technique, and the relationship between the two.

Gidez, Richard B. *P. D. James*. Boston: Twayne, 1986. An entry in Twayne's English Authors series. Chapter 1 examines James's place within the tradition of

the English mystery novel. Chapters 2 through 10 discuss in chronological order her first nine novels. Chapter 11 is devoted to her handful of short stories, and chapter 12 summarizes her work through *The Skull Beneath the Skin*.

Herbert, Rosemary. *The Fatal Art of Entertainment: Interviews with Mystery Writers*. New York: G. K. Hall, 1994. Interview discusses her writing style and habits, the nature of detective fiction, and her personal life.

James, P. D. *Time to Be in Earnest: A Fragment of Autobiography*. New York: Alfred A. Knopf, 2000. At the age of seventy-seven, James was not willing to sum up her life; presumably there will be much more to tell. She did, however, take up the task (for publication) of maintaining a diary for one year. The reader is privy to James's opinions and reactions to the social and political events of that year, which she details between meditations on the writing process and recollections of her past.

Lindsay, Elizabeth Blakesley, ed. *Great Women Mystery Writers*. Westport, Conn.: Greenwood Press, 2007. In addition to the valuable biographical essay on James, references to her throughout this substantial volume reflect her influence on the genre.

Porter, Dennis. "Detection and Ethics: The Case of P. D. James." In *The Sleuth and the Scholar: Origins, Evolution, and Current Trends in Detective Fiction*, edited by Barbara A. Rader and Howard G. Zettler. Westport, Conn.: Greenwood Press, 1988. Pages 11 through 18 are devoted to Porter's essay on James, a writer for whom moral principles are an integral part of the crime and detection story. Porter concentrates on *Death of an Expert Witness*, *An Unsuitable Job for a Woman*, and *Innocent Blood*. Robin W. Wink, who has written elsewhere on James, contributes a foreword to the book.

Priestman, Martin. "P. D. James and the Distinguished Thing." In *On Modern British Fiction*. New York: Oxford, 2002. A lengthy essay devoted to James and her place in the broader context of British literature. This is a piece of literary criticism that argues that James's undoubted skill as an author is circumscribed by her choice of genre.

Random House. The Official Website of P. D. James.

<http://www.randomhouse.com/features/pdjames/index.html>. The official Web site, hosted and maintained by her publisher. A flashy site that offers a very brief biography and a catalog of her books available through Random House. The brief book descriptions are somewhat helpful.

Rowland, Susan. *From Agatha Christie to Ruth Rendell: British Women Writers in Detective and Crime Fiction*. New York: Palgrave Macmillan, 2003. This study focuses on the most prominent British women mystery writers, including P. D.

James. Contains an interview with James.

Siebenheller, Norma. *P. D. James*. New York: Frederick Ungar, 1981. The first four chapters discuss the eight novels, grouped by decades, that James had produced through 1980. Chapter 5 discusses the detective protagonists Adam Dalgliesh and Cordelia Gray. Chapter 6 takes up the major themes of the novels; chapter 7, the major characters other than the two detectives. The final chapter deals with the James "style," in the sense of both her craftsmanship and her elegance.

J. A. JANCE

Judith Ann Jance

Born: Watertown, South Dakota; October 27, 1944

Types of plot: Police procedural; thriller

PRINCIPAL SERIES

J. P. Beaumont, 1985-

Joanna Brady, 1993-

PRINCIPAL SERIES CHARACTERS

J. P. BEAUMONT's full name is Jonas Piedmont Beaumont, but he is called Beau or J. P. for what he considers to be obvious reasons. He is six foot, two inches tall, weighs 185 pounds, and although not handsome, attracts women. He walks whenever possible, wears his hair in a crewcut, and is an alcoholic. He defines himself by his work: a homicide detective for the Seattle Police Department and, later, a special investigator with the Washington Attorney General's Special Homicide Investigation Team. He is good at his job and has good instincts, but because he puts his job and his drinking ahead of his family, he becomes divorced. He remarries but becomes a widower on his wedding day. After he stops drinking, he pays more attention to his family and friends.

JOANNA BRADY is the petite, red-haired sheriff of Cochise County, Arizona. Her deceased father, D. H. Lathrop, was a Cochise County sheriff, and her husband, Andy, is a deputy sheriff and a candidate for sher-

iff when he is murdered. After solving her husband's death, Joanna is asked to run for sheriff and wins the election. While attending the Arizona Police Officers Academy in Phoenix, she meets Butch Dixon. Joanna and Butch marry, and he becomes a househusband while writing his novel. Family and friends are important to Joanna; however, sometimes she is torn between them and her obligations as sheriff.

CONTRIBUTION

Judith Ann Jance published her first book as J. A. Jance because her publisher believed readers would not accept a book featuring a male homicide detective that had been written by a woman. The success of Jance's J. P. Beaumont novels has proven that a woman can create a believable male character. She has also shown that a female law enforcement officer can be popular with the reading public by her Joanna Brady series. Jance's characters are true to their gender for the most part, acting in typically male or female ways. J. P. Beaumont, for example, is a typical man who is good at his job, attracts women, gradually accepts technology, and learns to have a life away from his job. Joanna Brady remains feminine despite being in a male-dominated profession. Even though she was a tomboy growing up, she sees no reason why she cannot be feminine and be sheriff. Joanna gets dirty and

sweaty while doing her job, but she will not smoke a cigar and drink beer with the guys.

Jance has made her characters believable by not making them perfect, allowing readers to relate to J. P. Beaumont and Joanna Brady. While that is one of the reasons J. A. Jance is so popular, another is that she creates a good story. She starts with a corpse and continues with the investigation into what caused the death and the discovery of the murderer. Starting with a murder rather than building up to one may seem backward, but Jance is a master at this type of organization. She is a *New York Times* best-selling mystery writer, has published more than thirty books, and has sold more than eleven million copies worldwide.

BIOGRAPHY

Judith Ann Jance was born in Watertown, South Dakota, on October 27, 1944, the third child of a large

J. A. Jance. (Library of Congress)

family. Because she was four years younger than the second child and four years older than the fourth, she was left alone for much of her childhood, making her an avid reader and a good student. In second grade, she read L. Frank Baum's *Dorothy and the Wizard in Oz* (1908) and knew she wanted to be a writer.

Raised in Bisbee, Arizona, Jance graduated from Bisbee High School in 1962. She attended the University of Arizona on an academic scholarship and became the first member of her family to attend a four-year college. She graduated in 1966 with a degree in English and secondary education, received her masters in education in library science in 1970, taught high school English at Pueblo High School in Tucson for two years, and was a librarian for five years at Indian Oasis School District in Sells, Arizona.

Jance had wanted to be a writer since she was in the second grade but became frustrated when University of Arizona officials told her that she could not enroll in the creative writing program because she was a woman. She married a man who was enrolled in the program, Jerry Jance, in 1967; however, he never published anything. Jance has stated that he imitated Ernest Hemingway and William Faulkner by "drinking too much and writing too little." When an editor in New York expressed interest in a children's story that Jance had written, her husband told her he was the only writer in their family, and Jance let the matter drop.

While Jance was married, she secretly wrote poetry about the deterioration of her marriage to an alcoholic and her unintentional denial and codependence. The poems chronicle the defeat of a woman whose love was destroyed but found the strength and will to go on with her life. *After the Fire* (1984) was republished in 2004 with annotations by Jance about where she was and her feelings at the time she wrote each poem.

After Jance was divorced, she wrote between four and seven in the morning, then got her children up and ready for school and went to work selling insurance. The first fiction she wrote was never published. It was twelve hundred pages long, and although it was mostly nonfictional, editors who reviewed the manuscript found the parts that Jance had based on real events were not believable although the truly fictional parts were. It was then that her agent suggested she try

writing pure fiction. Her first published novel, *Until Proven Guilty* (1985), is the first in the J. P. Beaumont series.

Jance met her second husband, William Schlib, at a retreat for people who had lost a spouse; she was doing a reading from *After the Fire* and he was an attendee. At the beginning of their marriage, Schlib supported her and their five children, but as Jance's writing took off, she provided the support, and her husband retired at the age of fifty-four.

ANALYSIS

When J. A. Jance was beginning to write, she was advised to write about what she knew. Although she did not know a lot about police procedures, she was very familiar with alcoholism because of her first husband. She used this knowledge to shape the character of J. P. Beaumont, who is told he will die if he does not stop drinking in *Dismissed with Prejudice* (1989) and enters an alcohol rehabilitation ranch in Arizona in *Minor in Possession* (1990). The remaining novels have him attending Alcoholics Anonymous meetings and continually struggling to remain sober.

Jance's experiences as a single parent are reflected in the character Joanna Brady. Although Joanna loses her husband, Andy, when he is murdered in *Desert Heat* (1993) and Jance divorced her husband who then died of chronic alcoholism, both women become single mothers. Each has to learn to go on with her life, which includes combining home and work. Joanna is the office manager in an insurance agency, and Jance sold insurance. Jance remarries, as does Joanna in *Devil's Claw* (2000). Jance and her character obviously do not share every trait, but Joanna does reflect a lot of Jance's experiences.

Jance sets her works in Arizona and Washington, the two states in which she has lived most of her life. Places, highways, and geographical elements from both places appear in her stories. In addition, she adds Native American tales from the Tohono O'odham to her writing. This creates realism in Jance's stories by allowing people who live in or have visited these locations to picture her settings in their minds. For people who have not been to these locations, Jance paints a picture with her words.

The strongest quality in Jance's writing is her characterization. Her characters are first and foremost people and then law enforcement officers. The physical and emotional hurt they receive in one book carries over into the next book or books. Just as real people do not get over being hurt in a short period of time, neither do Jance's characters.

A tool that Jance uses successfully is dialogue. She feels that if a character talks too long, it is not realistic. People do not talk for long periods of time unless they are giving speeches; therefore, her characters do not. Also, people do not always talk in complete sentences, so her characters do not. Jance's characters are ordinary people, and her ability to have them speak naturally makes them more realistic.

Jance does research when writing her novels. She talks with professionals in specialty fields (law enforcement and medical); she learns about places in her novels (a specific era of Seattle); and when she hears of a good program (the Teddy Bear Patrol in which members of the police force, emergency medical technicians, and firefighters keep teddy bears with them to give to traumatized children), she includes it in her novels. Jance uses her popularity to benefit charity. Jance's son-in-law was treated for malignant melanoma, and in 2001, her daughter started Cancer Fighting Flamingoes to raise money for Relay for Life. Jance joined in with an entire tour dedicated to the Flamingo funding. This kind of effort is seen in the character J. P. Beaumont, when he helps Ron Peters get his daughters from his former wife who is living in a cult, and in the character Joanna Brady when she adopts a dog from the animal shelter.

UNTIL PROVEN GUILTY

Until Proven Guilty is Jance's first novel and the first to feature Homicide Detective J. P. Beaumont. Beau is investigating the murder of a little girl who was a member of the Faith Tabernacle. Children in this church are punished and beaten for not following instructions or the rules of the church, and when Beau meets the reverend, Beau thinks he has his murderer. At the girl's funeral, Beau meets Anne Corley, a beautiful woman dressed in red who places a rose on the little girl's coffin. After a short courtship, Beau and Anne marry; however, he soon realizes she hides a

dark side. On the day of their wedding, Anne maneuvers Beau into a position in which he has to kill her in self-defense. As the Beaumont series continues, the reader finds this is one of those hurts that Jance carries on into the later novels of the series.

Until Proven Guilty provides the foundation for the character of J. P. Beaumont and other characters who continue throughout the series, such as Ron Peters and Ralph Ames. It also gives a reason why Beau does not have lasting relationship with women, even though he becomes involved with them.

DESERT HEAT

Joanna Brady makes her debut in *Desert Heat*. Joanna is waiting for her husband, Andy (a deputy sheriff who is running for sheriff), to come home so they can go out for their tenth wedding anniversary. Joanna's mother, Eleanor, has come to stay the night and babysit her granddaughter, Jenny. As it gets later and later and Andy still has not come home, Joanna goes looking for him. She has not gone far when she sees his vehicle in a ditch and Andy lying on the ground bleeding to death. He has been shot and left to die. After Joanna solves Andy's death and finds corruption in the sheriff's office, people ask her to run for sheriff, and she does.

As with the Beaumont series, some characters in the first Brady novel appear in subsequent novels. Among these characters are Eleanor Lathrop, Jenny Brady, Angie Kellogg, Dick Volland, Marianne Maculyea, Jeff Daniels, and Milo Davis. For better or worse, these people are part of Joanna's life.

When Joanna wins the election and becomes sheriff of Cochise County in the next novel, *Tombstone Courage* (1994), she becomes a woman in a predominantly male occupation. She has to show everyone in her office and in other law enforcement agencies that she can do the job. Handling a new job and the people who go along with it, adjusting to life without her husband, and trying to form a new normal life with her daughter are formidable undertakings for anyone. Jance shows how Joanna succeeds but not without encountering rough spots along the way. Life is not smooth, and Jance does not make it smooth for Joanna.

POETRY: *After the Fire*, 1984 (revised 2004)

BIBLIOGRAPHY

Friesinger, Alison. "R-Rated Thrillers, PG-13 Mysteries." *Publishers Weekly* 251, no. 15 (April 12, 2004): 35. Jance talks about writing in two genres (mystery and thriller) and the importance of place in her books.

Goldberg, Rylla. "Interview with J. A. Jance." In *Deadly Women: The Woman Mystery Reader's Indispensable Companion*, edited by Jan Grape, Dean James, and Ellen Nehr. New York: Carroll & Graf, 1998. Jance responds to questions about various topics including the business side of producing books; the place of technology in her writing; the management of writing, family, and social schedules; and the authors she reads.

Jance, J. A. "Best-selling Suspense Novelist Keeps Busy Writing, Promoting." Interview by Jessica Agi. *Anchorage Daily News*, September 4, 2006, p. D1. In this interview on the release of *Dead Wrong*, Jance discusses her motivations for writing and stresses the importance of working at producing a novel.

_____. J. A. Jance's Web Site. <http://www.jajance>

.com. Jance's Web site gives valuable information about herself and her books. She gives personal comments on each of her novels.

_____. "PW Talks with J. A. Jance: Strangers on a Train." Interview by Louise Jones. *Publishers Weekly* 252, no. 25 (June 20, 2005): 61. This is an interview with Jance on the twentieth anniversary of the Beaumont series and the release of *Long Time Gone*.

Kinsella, Bridget. "Jance Promotes Book, Cancer Research." *Publishers Weekly* 252, no. 31 (August 8,

2005): 19. This article discusses the charity work Jance does on her tours.

Rye, Marilyn. "Changing Gender Conventions and the Detective Formula: J. A. Jance's Beaumont and Brady Series." *Journal of Popular Culture* 37, no. 1 (August, 2003): 105-119. In an understandable manner, Rye discusses the implications of gender by a female author writing a series about a man in police work and another series with a woman in police work.

VELDA JOHNSTON

Born: California; 1911

Died: Place unknown; 1997

Also wrote as Veronica Jason

Types of plot: Cozy; amateur sleuth

CONTRIBUTION

For readers, particularly young women, Velda Johnston provides easy-to-read novels with interesting, carefully planned plots. The mystery in each novel is presented early, and progress toward the solution is logical and evenly paced. Beyond the sheer entertainment of her fiction, however, Johnston, who clearly enjoys the process of writing, seems to have a message for young readers. She provides examples in her novels of young women who seek happiness and fulfillment in a more assertive, independent manner than have the women of the previous generation. The mother or the aunt who reared the heroine has often been abandoned or widowed and left in financial straits by the man on whom she depended. Although often dismissed early in the story, the maternal character's life stands in vivid contrast to that of the heroine. The motif of the independent young woman is consistent throughout Johnston's work, and those who read two or more of her novels are unlikely to miss it. From the publication of her first novel in 1967 through the late 1980's, Johnston pro-

duced one or two novels per year, presenting in each a mystery to test the heroine's intelligence and eagerness to solve problems.

BIOGRAPHY

Velda Johnston was reared and educated in California. She obtained a degree in English at the University of California, Los Angeles (UCLA). Having sold her first story while still in high school, she anticipated immediate financial independence as a writer. "I looked forward to being able to support myself and my mother by dashing off a short story occasionally after school," Johnston has said. "But I was in my third year at UCLA before I was able to sell my second story. It was really very rough getting started." Eventually, she was able to publish not only romantic suspense novels but also nonfictional articles on subjects ranging from the artificial heart to migrant workers in New Jersey.

Even as a child, Johnston enjoyed reading mysteries. Inspiration for her own writing came from the English writer Mary Stewart, whose romantic suspense novels she admired very much. "I've always loved history, especially English history," said Johnston. Johnston has explained that for her, mysteries are, in a way, easier to write than other types of fiction:

In a mystery, you don't have to depend just on character. You can offer the reader a double pleasure—interesting characters and the puzzle as well. What I like to stress in my novels, which are often read by young women, are education, using one's intelligence, and having courage—not just sitting around waiting for Mr. Right.

ANALYSIS

Velda Johnston's stories are almost always told in the first person by a young career woman who relies on her own resources in solving a mystery that in some way threatens her plans for marriage or brings a temporary halt to a romantic relationship. Often, the young woman was orphaned at an early age or became separated from one parent, usually the father. Reared with few if any siblings by adoptive parents, a single mother, or an aging female relative, the heroine is, by the age of twenty-seven or so, left without the emotional or financial support of family. Forced into an independent lifestyle, the heroine becomes involved in intrigue involving either her own unknown background or that of others. While sex is not prominent in the novels, there is always a man, very important to the heroine, who may or may not participate in solving the mystery. One romantic relationship is often terminated soon after the mystery presents itself, but by the novel's end marriage is imminent between the heroine and a man who has proved himself worthy by protecting her from physical danger.

All the young women in Johnston's novels are subject to real human emotions; they are not immune to feelings of doubt, fear, exhaustion, and the like. They are all women of character who serve as good examples for young women readers. In addition, these characters are engaged in a variety of professions. They travel, in many cases alone and always without hesitation, to any setting that might be required to solve the problem that faces them.

Johnston's own extensive travels served her well in her writings. She used knowledge gained from her foreign travels in novels such as *Deveron Hall* (1976), which takes place in Scotland, and *Masquerade in Venice* (1973) and *The Etruscan Smile* (1977), both set in Italy. She did not limit her heroines to one locale in

novels that take place in the United States. Although many heroines are based in the New York area, they may end up in Nevada or New Mexico. Johnston used settings in California, Maine, Cape Cod, and Florida, among others. History was important to Johnston. The siege of Paris during the Franco-Prussian War forms the backdrop for *The House on the Left Bank* (1975). This novel's protagonist, Martha Hathaway, seeks to create for herself a life different from that of her mother, who is the mistress of a French aristocrat. Johnston effectively uses the mystery story to provide fictional role models for young women. Her heroines are women who, in spite of inner struggle, meet the intellectual challenges and the tests of character presented when their lives are interrupted by a personal crisis.

THE PEOPLE FROM THE SEA

In *The People from the Sea* (1979), Diana Garson, alone and with few prospects, very much wants marriage and a family. She becomes involved, platonically at first, with a neighbor in her Manhattan brownstone. When Diana, an editor of children's books, suffers a mild nervous breakdown, the neighbor, David Corway, persuades her to rent a house in the Hamptons so that she can recuperate near the sea, away from the city's hectic pace.

The house Diana rents was once owned and occupied by the wealthy Woodhull family, three members of which had died in a tragic boat accident some twenty-five years earlier. Diana cannot explain why she sees and speaks with the dead victims, whose photographs she has found in the attic of the house. The Woodhulls become Diana's family, and her obsession with them drives a wedge between her and David. Diana is determined to solve the mystery surrounding the deaths of the Woodhulls—and thereby confirm her sanity—before she will consent to marry David. Her persistence and courage pay off, and the murderer of the Woodhull family is pressured into revealing herself.

THE OTHER KAREN

Catherine Mayhew, heroine of *The Other Karen* (1983), seeks to expose the murderers of a wealthy elderly woman whose closest relative and heir, her granddaughter Karen, left home as a young girl. Catherine, an aspiring New York actress, is hired by the woman's

greedy relatives to impersonate Karen, assuring her that by so doing she will be performing a worthy service: making the old woman's final days happy. While succeeding in the deception, Catherine soon discovers, with the help of Karen's former boyfriend, that the relatives have had other motives in hiring her. When the elderly woman dies, Catherine and Karen's friend travel throughout the United States, following lead after lead, in search of the real Karen. Catherine exemplifies the intelligent, courageous young woman whose character will not allow her to retreat when a serious injustice has occurred.

THE STONE MAIDEN

The Stone Maiden (1980) features Katherine Derwith, who, having been abandoned and then adopted as an infant, is determined to learn the identity of her natural parents. She feels compelled to do so before proceeding with her plans for marriage to a young man whose wealth and social position might be compromised by her true origin. Her quest soon brings an end to the relationship, but Katherine pursues all available possibilities, and in the end she finds love with a man whose father, like hers, played a role in a secret project involving Nazi officers during World War II. Katherine's determination to solve the mystery, in spite of the physical danger and the potential termination of her marriage plans, is typical of the integrity exhibited by Johnston's heroines.

VOICES IN THE NIGHT

Carla Baron, in *Voices in the Night* (1984), is a young widow who lives in Manhattan, where she is an editor of children's books. She is awakened in the night by telephone calls in which the voice of Neil, her dead husband, asks her to come back to him. Carla returns to the Arizona setting where she and her late husband and both their families had made their homes. On her own initiative and without assistance, she finds her husband alive and well in a village in Mexico, but because he knows nothing of the telephone calls that brought her there, she continues to search for the source of the calls and the motive behind them. For a while, she suspects her cousin Mahlon, just released from jail, may be the culprit, but that guess, so similar to those of other Johnston heroines who suspect the wrong person, proves false. Meanwhile, Mike Trent,

to whom she is engaged, arrives from New York to help her. Without his knowledge she returns to the spot where her husband ostensibly drowned, but when she sees him, she concludes that he was responsible for the mysterious phone calls and flees in panic. She loses him in a subsequent car chase and goes to see her sister Jennifer. To her surprise, Jennifer confesses that she was jealous of Carla and had made the phone calls. She now plans to kill Carla at the site of Neil's drowning and to stage it as a suicide. Before she can accomplish her design, Mike returns and, after forcing Carla's car off the road, overpowers Jennifer, who runs away. After Jennifer commits suicide, Carla and Mike return to New York.

SHADOW BEHIND THE CURTAIN

In *Shadow Behind the Curtain* (1985), Deborah Channing's life changes after the deaths of her wealthy stepfather and, only a short time later, her mother. She discovers that she has very little money and also finds that her father, of whom she has only faint memories, has been in prison for more than twenty years, having been convicted of the murder of a child. After she tells her fiancé about her father, he breaks their engagement. She then travels to New Mexico, and after one interview with her father, she is convinced of his innocence and proceeds to attempt to find the real murderer. When the townspeople she interviews, including the sheriff, reveal their belief in her father's innocence, she pushes her investigation further. There are, of course, some suspects who might be a murderer, and she even visits Beersheba, a religious colony, but the real murderer is someone who seemed above suspicion. Lawrence Gainsworth, a wealthy man in the town, has been sending Deborah's father books and being supportive, but his friendship and generosity turn out to be motivated by guilt. His daughter, Rachel, is a disturbed young woman whose paintings reveal a dual personality, and when Deborah visits her, Rachel attacks her. Ben Farrel, the sheriff, arrives just in time to save Deborah. In true romance fashion, he promises to look her up in New York. Once again, the intrepid heroine is rescued by a man.

THE HOUSE ON BOSTWICK SQUARE

In *The House on Bostwick Square* (1987), Laura Parrington, the destitute widow of Richard Parrington,

exiled by his family to America, travels to London with her daughter Lily to stay with her husband's family. Her aim is to discover why Richard was sent to America and supported there. There are several formidable obstacles in her past, among them the entire Parrington family, who are unwilling to even discuss him. At one point Clive, Richard's older stepbrother, even offers her fifty thousand pounds to return to the United States. His offer is partly motivated by the fact that he has fallen in love with her, but a marriage would bring too much pain to the family. Cornelia Slate, Lady Parrington's companion, is also an adversary because she is in love with Clive and wants to see a potential rival out of the way. After Laura is injured while in the family park, she is treated by the handsome Dr. Malverne, who introduces her to charity work with destitute women who desire to learn sewing, one of Laura's talents. Through her work, Laura meets Belle Mulroney, a singer with whom Richard had an affair and a daughter. Unfortunately, Belle is unable to answer Laura's questions about Richard's exile.

Aggie Thompson, whom Laura had seen at the family park, knows the truth about Richard but wants money. Before Laura can get the money to her, Lily becomes sick, and the women in the household move to the family estate at Walmsley, where the answer is disclosed. After giving Laura poison, Lady Parrington, who had become very fond of Lily, tells Laura that Lily's sickness was caused by poison meant for her. She further reveals that Richard, who had inherited psychological problems from his father, who was hanged for killing a woman, had killed Aggie Thompson's daughter. Clive and a pharmacist fortunately arrive in time to save Laura, and Lady Parrington is hospitalized.

Laura's role in the denouement may seem passive, but she is also intrepid, teaching sewing classes at night in a dangerous part of town, and her determination to work, foreign to the aristocratic notions of the Parringtons, marks her as an individual. She is also politically active, supporting women's issues and "the New Women," as Sir Joseph Parrington describes them. This historical romance has a decidedly political bent as Johnston details the problems women have with occupational hazards such as "phossy-jaw," a common debilitating ailment caused by poor working conditions.

PRINCIPAL MYSTERY AND DETECTIVE FICTION

NOVELS: 1967-1975 • *Along a Dark Path*, 1967; *A Howling in the Woods*, 1968; *House Above Holly-wood*, 1968; *I Came to the Castle*, 1969 (also known as *Castle Perilous*); *The Light in the Swamp*, 1970; *The Phantom Cottage*, 1970; *The Face in the Shadows*, 1971; *The People on the Hill*, 1971 (also known as *Circle of Evil*); *The Late Mrs. Fonsell*, 1972; *The Mourning Trees*, 1972; *Masquerade in Venice*, 1973; *The White Pavilion*, 1973; *I Came to the Highlands*, 1974; *A Room with Dark Mirrors*, 1975; *The House on the Left Bank*, 1975

1976-1980 • *Deveron Hall*, 1976; *The Frenchman*, 1976; *The Etruscan Smile*, 1977; *Never Call It Love*, 1978 (as Jason); *The House Before Midnight*, 1978; *The People from the Sea*, 1979; *The Silver Dolphin*, 1979; *A Presence in an Empty Room*, 1980; *The Stone Maiden*, 1980

1981-2001 • *So Wild a Heart*, 1981 (as Jason); *The Fateful Summer*, 1981; *Wild Winds of Love*, 1982 (as Jason); *The Other Karen*, 1983; *Voices in the Night*, 1984; *Shadow Behind the Curtain*, 1985; *The Crystal Cat*, 1985; *Fatal Affair*, 1986; *The Girl on the Beach*, 1987; *The House on Bostwick Square*, 1987; *The Man at Windemere*, 1988; *Flight to Yesterday*, 1990; *The Underground Stream*, 1991; *House of Illusion*, 2001

BIBLIOGRAPHY

The Armchair Detective. Review of *The Crystal Cat*, by Velda Johnston. 19 (Fall, 1986): 360. Summary of the plot plus comments on the relationship between Johnston and other writers in the genre.

Dunn, Kathryn. Review of *Fatal Affair*, by Velda Johnston. *School Library Journal* 33 (November, 1986): 113. Reviewer feels that Guy, the male lead, is presented ambiguously, suggesting he may be the villain. That ambiguity is a staple in Johnston's work.

Henderson, Leslie. *Twentieth-Century Romance and Historical Writers*. 2d ed. Detroit: St. James Press, 1996. Stresses the middle-class backgrounds of the Johnston heroines and notes that they often have

recently experienced tragedy or mishaps that initiate the action.

Levine, Susan. Review of *The Shadow Behind the Curtain*, by Velda Johnston. *School Library Journal* 31 (May, 1985): 114. Sympathetic summary of the novel with some reservations about Deborah's "mousiness," ignoring Deborah's visiting hostile territory, getting shot at, and staying alone in a house and experiencing a break-in.

Smothers, Joyce. Review of *Never Call It Love*, by Veronica Jason. *Library Journal*, 103 (December 1,

1978): 245. Positive review of the work, which calls it a "sweet savage swashbuckler" that is "slightly sadomasochistic."

Wilson Library Bulletin. Review of *Shadow Behind the Curtain*, by Velda Johnston. 59 (May, 1985): 613. Reviewer believes the theme of the book has been done better by P. D. James and finds very little "detecting" in the novel, which is described as possessing "passable romantic suspense."

K

STUART M. KAMINSKY

Born: Chicago, Illinois; September 29, 1934

Types of plot: Private investigator; police procedural;
cozy

PRINCIPAL SERIES

Toby Peters, 1977-

Inspector Rostnikov, 1981-

Abe Lieberman, 1992-

Lew Fonesca, 2000-

PRINCIPAL SERIES CHARACTERS

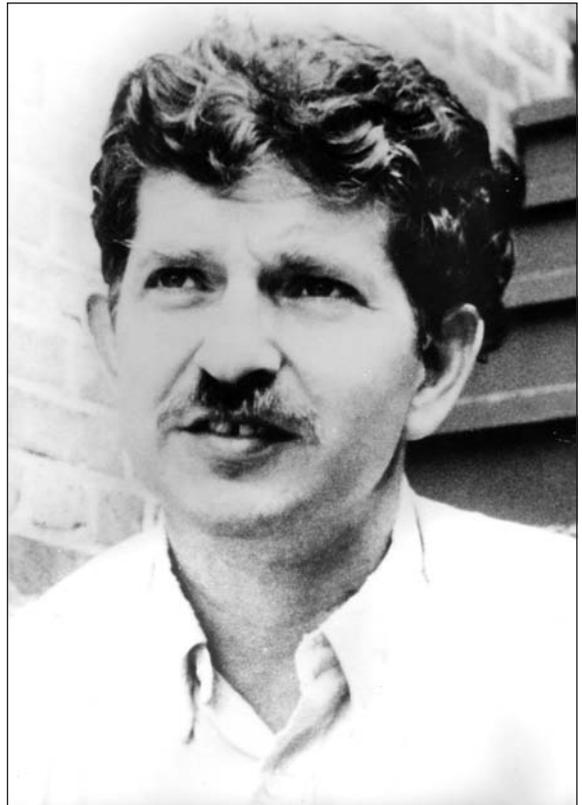

TOBY PETERS, whose real name is Pevsner, is a former security officer for Warner Bros. Studio. Fired for roughing up a Western star in self-defense, Toby survives by becoming a cut-rate private eye and begins working for various film stars of the 1940's or their studios. Toby's living and office conditions are not the best, but he manages. He is Jewish, but he has changed his name and does not admit to being Jewish, which upsets his brother. Although Toby can talk and act like a tough guy, he has a sense of the ridiculous that breaks through and frequently turns what could be a serious situation into a comical one.

INSPECTOR PORFIRY PETROVICH ROSTNIKOV, a Russian in his fifties, was created as a tribute to the detective in Fyodor Dostoevski's *Prestupleniye i nakazaniye* (1866; *Crime and Punishment*, 1886). Rostnikov is not Jewish, but his wife is, and he exhibits a kind of Jewish sensibility. He is a basically decent man who genuinely cares about other people, but because of political pressures and influences, he must tread carefully. Because he does not always follow procedure, he is regarded with suspicion by his superiors and the KGB. Rostnikov limps because of a war wound, and his outlook is frequently bleak.

ABE LIEBERMAN is a crotchety but shrewd Chicago police detective in his sixties. His stories, rich in cyni-

cism, are also rich in Jewish tradition and culture. Lieberman is deeply concerned with God's justice as based on the Talmud, and his culture is sometimes brought to the forefront by his interactions with his Irish Catholic partner. Lieberman is a deeply moral man who prefers to try to work things out without using his gun. Life is frequently difficult for Lieberman, and he feels a sense of frustration that he cannot change some familial relationships.

LEW FONESCA is a depressed widower whose wife was killed in a senseless automobile accident. He tries

Stuart M. Kaminsky. (Carol Slingo/Courtesy, Charles Scribner's Sons)

to do things for other people to make himself happier. Lew is Italian, but he is surrounded by Jewish characters and has a kind of Jewish sense of guilt. He lives in Sarasota, Florida, not because he chose it, but because that is where his car died. He makes a meager living working as a process server and a cut-rate private eye. His therapist wants him to lose his guilt and begin living rather than existing, but Lew continues to plod through life and all the curves that it tosses him.

CONTRIBUTION

Like his detective characters, Stuart M. Kaminsky is a modest and somewhat unassuming person who is capable of turning his sense of humor on himself and his work. His novel settings include the East Coast, Midwest, West Coast, and Russia. Since 1977, he has kept his reading audience engrossed in and entertained by his fictional homicides, which include hilarity at various junctures. Kaminsky has made being a Jewish writer who writes about Jewish detectives and Jewish culture acceptable. In his works, he explores the Jewish faith and its morality and uses the contrast between social and moral justice to make philosophical points about issues. His Jewishness has endeared him to many others in the American Jewish community largely because of the dialogues he opens and the sympathetic way in which he presents Jewish characters to a Gentile audience.

Kaminsky has often been nominated for various mystery awards, and in 1989 he received an Edgar Allan Poe Award from the Mystery Writers of America for *A Cold Red Sunrise* (1988). In 2006, the same organization named him Grand Master in recognition of a lifetime of achievement. Kaminsky's works include more than sixty books plus screenplays, textbooks on film and television writing, and a number of biographies of film stars. With all of these accomplishments, Kaminsky does have one unrealized ambition: Although he has received good reviews, respect, and awards, and his works have always sold well, he has never had a book on a best-seller list. He hopes that having been named Grand Master will help him achieve this goal. He has been called a writer's writer and an excessively nice guy.

One reason that Kaminsky is so successful is be-

cause he has broadened the definition of mystery. He feels that there is a mystery in every good novel in that there is always some question that the main character must answer. When he wrote the first Toby Peters book, *Bullet for a Star* (1977), he altered the format of the classic, hard-boiled detective novel by using a lighthearted approach that earned him a special place in the pantheon of mystery writers.

BIOGRAPHY

Stuart Melvin Kaminsky was born in Chicago in 1934 to Leo Kaminsky and Dorothy Kaminsky. His grandfathers were émigrés to the United States; one was originally from Lithuania and the other, from the Ukraine. The Lithuanian grandfather was a businessman who became a successful junk man in Chicago. One grandfather was an Orthodox Jew and the other, a communist.

After Kaminsky graduated from Marshall High School, his father opened a grocery store on the north side of Chicago, and the family moved to Albany Park. It was during his childhood that Kaminsky first became interested in writing when he read a children's mystery series published by Whitman Publishers. The books featured movie stars who solved crimes as themselves. That series, very popular in the 1930's and 1940's, probably provided Kaminsky with the inspiration for his Toby Peters series. In the Peters books, Toby solves cases for studios and famous stars of the 1940's. The Whitman books may also account for Kaminsky's lifelong interest in American film.

Kaminsky has a bachelor of science degree in journalism and an master of arts degree in English from the University of Illinois at Urbana-Champaign and a doctorate in speech from Northwestern University. He taught at Northwestern from 1973 until 1989, serving as both professor and chair of the film division. During that time, in addition to his own writing, he helped Sara Paretsky, then a student in one of his classes, become a professional writer. From his 1957 marriage to Merle Gordon, he is father to three children: Peter, Toby, and Lucy. Kaminsky and his second wife, Enid Perll, have a daughter, Natasha.

Kaminsky moved to Sarasota to accept a job as founding director of the Graduate Conservatory in Film

and Television for Florida State University. When the conservatory left Sarasota and moved to Tallahassee in 1994, Kaminsky decided to retire from academia and devote his time to writing.

ANALYSIS

Stuart M. Kaminsky does research for his books in many ways: He has done ride-alongs with the police in Chicago, Moscow, and other cities; he gets information from his police contacts in Chicago and Russia; and he makes wide use of the Internet, magazines, and newspapers. All this research is one reason that so many people admire his knowledge of police procedure.

Although Kaminsky's first mystery novel was published in 1977, it was set in 1940, within the same time period as that of the mysteries that he enjoyed reading as a youngster. The Toby Peters series, his first and longest, is definitely inspired by his early reading, but he has adapted the concept of the Whitman books for adults. One of the strongest points about the Peters novels is the atmosphere of their time period. Were it not for the occasional strange twists in the plot, these books could be prime examples of film noir in manuscript form. Kaminsky's novels are well plotted and the clues are presented fairly; however, there are still surprises waiting in their resolutions. In addition, the seeds of concerns to come are planted within the first novel of the series in that Toby is preoccupied by thoughts of what it means to be Jewish, although he would deny this preoccupation. The beatings that Toby takes are physically hard on him, but they may do him a great deal of psychological good because he feels that he deserves them. Physical punishment assuages his guilt.

MURDER ON THE YELLOW BRICK ROAD

Kaminsky's second Toby Peters title, *Murder on the Yellow Brick Road* (1977), was the one that called attention to his series. He based the novel on *The Wizard of Oz* (1939), one of the most popular films of all time and one of his favorites. In this novel, Toby must solve the murder of an actor who played a Munchkin on the set, a year after the film was released. Characters range from historical film stars and directors to fictional characters. Kaminsky captures young Judy

Garland on paper as perfectly as she was ever captured on film, even down to the "sob" in her voice. His sympathy for his leading characters is obvious in this work.

A COLD RED SUNRISE

A Cold Red Sunrise (1988), the fifth novel in the Inspector Porfiry Petrovich Rostnikov series, won both an Edgar Award from the Mystery Writers of America and the French Prix du Roman d'Aventure for best mystery novel. In *A Cold Red Sunrise*, Rostnikov travels to the Siberian village of Tumsk to investigate the death of Commissar Ilya Rutkin, who died while looking into the death of Karla, the daughter of dissident Lev Samsonov. The suspects are numerous and the plot undergoes many twists and turns. However, Rostnikov is a man with a conscience and strength of character. He demonstrates these traits in his finely balanced life and career by figuring out ways to administer justice based on real justice and not on party politics.

The Rostnikov books are much more mature than the early Toby Peters books and the solutions are frequently ingenious. As with the majority of well-written series, it is not necessary to read the works in order, but it is helpful because each character has a history that cannot be summarized completely in each volume. For example, those who read the series from the start know that Rostnikov is the indirect victim of anti-Semitism because his wife is Jewish and that his son, who is in the Russian Army, is sent to troubled areas and kept there in an effort to force Rostnikov to toe the party line. Despite all this, Rostnikov manages to keep his self-respect and achieve personal satisfaction by using morality rather than relying on procedure.

NOT QUITE KOSHER

Not Quite Kosher (2002), the seventh novel in the Abe Lieberman series, contains a bit of Jewish stereotyping. Lieberman, white haired and in his sixties, with a face a little like a sad hound dog, carries around his load of Jewish guilt at all times. A police detective, Lieberman is fully aware of what the police do and how they work, although Kaminsky occasionally either exaggerates, ignores, or slightly misrepresents police procedure. Lieberman operates in Chicago, Kaminsky's birthplace, and the city's sounds, sights, and atmosphere

form the backdrop for this series. In what is possibly Kaminsky's most philosophical series, Lieberman and his partner, Detective Hanrahan, frequently take the opportunity to express their philosophical beliefs and discuss what constitutes "evil." These discussions are often deep and thought provoking. In *Not Quite Kosher*, Lieberman must solve two murders and deal with his partner's marriage, his grandson's bar mitzvah, his synagogue's fund-raising committee, his high cholesterol, and a roof that needs repair. Somehow, Lieberman perseveres and manages to overcome, and that is Kaminsky's tribute to the human spirit.

LEW FONESCA SERIES

Set in Sarasota, Kaminsky's home, the Lew Fonesca series focuses on the life of Lew, a former Chicagoan who is working as a process server and sometimes turns private eye to help others. Lew is severely depressed about the death of his wife, a prosecutor, who was killed by a hit-and-run driver. In *Always Say Goodbye* (2006), Lew attempts to track down the man who killed her, an action suggested in earlier novels in the series. This series has not quite found itself, but no doubt Kaminsky will continue working on it and the other series. To keep his series new and fresh, he puts them away for years at a time when he senses that they are about to go stale.

H. Alan Pickrell

PRINCIPAL MYSTERY AND DETECTIVE FICTION

TOBY PETERS SERIES: *Bullet for a Star*, 1977; *Murder on the Yellow Brick Road*, 1977; *You Bet Your Life*, 1978; *The Howard Hughes Affair*, 1979; *Never Cross a Vampire*, 1980; *High Midnight*, 1981; *Catch a Falling Clown*, 1981; *He Done Her Wrong*, 1983; *The Fala Factor*, 1984; *Down for the Count*, 1985; *The Man Who Shot Lewis Vance*, 1986; *Smart Moves*, 1986; *Think Fast, Mr. Peters*, 1987; *Buried Caesars*, 1989; *Poor Butterfly*, 1990; *The Melting Clock*, 1991; *The Devil Met a Lady*, 1993; *Tomorrow Is Another Day*, 1995; *Dancing in the Dark*, 1996; *A Fatal Glass of Beer*, 1997; *A Few Minutes Past Midnight*, 2001; *To Catch a Spy*, 2002; *Mildred Pierced*, 2003; *Now You See It*, 2004

Also wrote as Evelyn Hervey

Types of plot: Police procedural; amateur sleuth; historical; cozy

PRINCIPAL SERIES

Inspector Ghote, 1964-

Harriet Unwin, 1983-

Inspector Harriet Martens, 2000-

PRINCIPAL SERIES CHARACTERS

GANESH GHOTE is an inspector on the police force of Bombay, India. The son of a schoolmaster, he ap-

pears to be in his thirties at the beginning of the series. He resides in a "neat new house in Government Quarters" with his wife, Protima, and son, Ved (five years old at the beginning of the series and the apple of his eye). By dint of hard work, determination, and good luck, he prevails against the forces of evil.

HARRIET UNWIN is a young governess in Victorian London—1870 at the start of the series. She grew up in an orphan asylum with Mary Vilkins, who appears as her best friend throughout the series. She becomes a sleuth to clear herself when she comes under suspicion of murder and thereafter uses her talents to help her friends.

DETECTIVE CHIEF INSPECTOR HARRIET MARTENS,

who is nicknamed “the hard detective” for the nonsense persona she must adopt to survive in the male-dominated environment of British law enforcement, must constantly prove her mettle in both her professional and personal lives.

CONTRIBUTION

H. R. F. Keating’s Inspector Ghote novels form his greatest contribution to detective fiction. They are fascinating because of their exotic background, being mostly set in Bombay (Mumbai) or other parts of India; because of their willingness to deal with social issues; and because of the character of Ghote himself. The reader sympathizes with the inspector as he tries to use his rather ordinary talents to cope with the problems his superiors call on him to solve. He must strive hard to preserve his own dignity and integrity and at the same time to meet the outrageous demands made on him by his superiors. Keating’s readers identify with him, suffer with him, and feel triumphant when he succeeds.

Keating has also written a number of other crime novels, including the Harriet Unwin series he published under the pseudonym of Evelyn Hervey. He is a great connoisseur of the genre, as revealed by his many reviews of crime novels for *The Times of London* and the excellent critical works on the subject he has written and edited.

Keating often has been recognized for his work in the genre: among other honors he has won the Crime Writers’ Association’s Gold Dagger Award and the Mystery Writers of America’s Edgar Allan Poe Award for *The Perfect Murder* (1964), a second Edgar Award for his nonfictional study *Sherlock Holmes: The Man and His World* (1979), a second Gold Dagger Award for *The Murder of the Maharajah* (1980), and the Crime Writers’ Association’s Diamond Dagger Award for lifetime achievement in 1996. He was given a Malic Domestic Award for Lifetime Achievement in 2005.

BIOGRAPHY

Henry Reymond Fitzwalter Keating was born on October 31, 1926, in St. Leonards-on-Sea, Sussex, England, the son of schoolmaster John Hervey Keating and Muriel Marguerita Clews Keating. He attended Merchant Taylor’s School in London from 1940 to

1944, after which he served in the British army from 1945 until 1948, rising to the rank of acting lance corporal. Subsequently, he attended Trinity College, Dublin, receiving a bachelor of arts degree in 1952. He married actress Sheila Mary Mitchell in 1952, and the couple has three sons, Simon, Piers, and Hugo, and one daughter, Bryony. Following graduation from college, Keating worked as a subeditor on a Wiltshire newspaper, the *Evening Advertiser*, for three years (1952-1955). Afterward, he moved to London, where he worked for the *Daily Telegraph* (1955-1957) and *The Times* (1958-1960).

Keating’s first mystery novel, *Death and the Visiting Firemen*, appeared in 1959 and his second, *Zen There Was Murder*, in 1960. The first Inspector Ghote novel, *The Perfect Murder* (1964), brought him great acclaim, including the Gold Dagger Award and the Edgar Allan Poe Award. Since he began writing fiction, Keating has been extremely prolific, publishing an Inspector Ghote novel almost every year. With the beginning of the twenty-first century, Keating turned away from his most popular creation to begin a new series featuring Detective Chief Inspector Harriet Martens. Since her debut in *The Hard Detective* (2000), the Martens character has appeared on an almost annual basis.

Keating has also written a number of other novels—including a historical mystery series under the pseudonym Evelyn Hervey—as well as short stories, radio plays, a screenplay, and several full-length nonfictional works, most of which deal with crime and mystery fiction, including *Murder Must Appetize* (1975), *Great Crimes* (1982), *Writing Crime Fiction* (1986), and *Crime and Mystery: The One Hundred Best Books* (1987). Keating, who has edited a number of books, has contributed articles to such publications as *Dictionary of National Biography*, *Twentieth-Century Crime and Mystery Writers*, *Great Detective Stories*, and *Top Crime*. His short stories have appeared in *Ellery Queen’s Mystery Magazine* and *Blackwood’s* and have been frequently anthologized.

The crime-book reviewer for *The Times* of London from 1967 to 1983, Keating has received the plaudits of his peers both for his fiction and for his critical works on the detective story. He garnered the 1970

short-story prize from *Ellery Queen's Mystery Magazine*, has collected two Edgar Awards, two Gold Dagger Awards, and the Diamond Dagger Award for lifetime achievement. A longtime member of the Crime Writers Association (chair, 1970-1971), Keating also belongs to the Society of Authors (chair, 1982-1984) and the Detection Club (president, 1985).

ANALYSIS

Apart from native words that are frequent and unavoidable in describing his milieu, Inspector Ghote's Indian English differs from standard English in the use of progressive verb forms where simple present or past tenses would normally be used. "Yes, sir, I am very well knowing," and "Yes, Sheriff Sahib, I am very well understanding," Ghote typically says. The investigator also often omits articles ("a," "the"), and in general there is an old-fashioned formality and stiffness about Ghote's English. Similarly, American and other foreign characters in H. R. F. Keating's books speak quaintly.

Keating walks a narrow line in his depiction of Ghote's professional naïveté and his depiction of Indian conditions in general. He often strikes a humorous note but without malice. It is difficult to depict conditions of ignorance and corruption without being contemptuous or patronizing, but Keating manages it. The inclusion of the Swedish criminologist in the first volume was a masterstroke, as he is portrayed as being more naïve than Ghote in many ways, and this helps to remove racial overtones from the satire.

In the first novel of the series, Ghote faces the odds he must battle again and again in different circumstances throughout the series. Rich and powerful men can do as they wish, and they ride roughshod over those who are less fortunate. The bureaucrats in the police department kowtow to the rich and powerful, and they expect their subordinates to do so as well. These chiefs issue confused and arbitrary orders that are all but impossible to carry out. The small man who tries to do his best must live in constant fear of reprisals if he dares to stand up against them and risks demotion or dismissal if he is not successful at impossible tasks he is assigned. Although Ghote is often quaking with fear, he maintains his integrity.

Keating is skillful at describing the rich and power-

ful and exposing their weaknesses and vanities. The minister of police in *The Perfect Murder* rules his little empire with an iron hand but is an arrant philanderer behind the scenes. Although Lala Varde was the person who reported the crime, he is very uncooperative toward Ghote, treating him in a most disdainful and contemptuous manner, refusing to answer any questions and putting obstacles in his path when he attempts to question other members of the household. Varde frequently threatens to have Ghote demoted for insolence. The maharajah in *The Murder of the Maharajah* has two wives and a number of concubines, cheats at chess, and plays cruel practical jokes on his subjects and guests. The swami in *Go West, Inspector Ghote* (1981) is almost too horrendously credible as the guru who presides over a cult. The sheriff in *The Sheriff of Bombay* (1984), although a popular figure and a cricketer of note, frequents the brothels in a run-down section of the city. "His Excellency" Surinder Mehta in *The Body in the Billiard Room* (1987), who sets great store by the methods of Sherlock Holmes and Hercule Poirot, tries to tell Ghote how to conduct his investigation and is unable to bear the ignominy of being beaten at golf by him.

Keating does not spare his compatriots. The resident adviser in *The Murder of the Maharajah* is as irrational and inconsiderate in his commands to his underlings as are Ghote's superiors. The rock singer, Johnny Bull, in *Inspector Ghote Hunts the Peacock* (1968), manifests his own type of arrogance and unconscionable behavior.

Often Ghote suffers embarrassments and indignities in the course of his inquiries. In *The Perfect Murder*, for example, while in pursuit of a suspect, he is hit over the head by the proprietor of a stall containing scent bottles, and he knocks over the stall. In *Inspector Ghote's Good Crusade* (1966), he trips and falls on his face while running after a small boy. On none of his cases does he suffer more indignities than he does in *Inspector Ghote Hunts the Peacock*, which takes place in London. He is manhandled by a moronic thug and saved by a smug constable, who sends him home on a bus; he is snubbed by a Scotland Yard inspector when he thinks that he is giving him valuable information; he is harassed by children, soaked to the skin, and uri-

nated on by a dog while keeping watch on suspicious premises; and he comes down with a cold just when he must read a speech to an assemblage of international dignitaries.

As the series continues, Ghote's personal life comes into the foreground. In a burst of misplaced generosity he squanders five hundred rupees he had been saving to buy his wife a refrigerator in *Inspector Ghote's Good Crusade*. When he goes to London in *Inspector Ghote Hunts the Peacock*, relatives of his Bengali wife besiege him to help them locate a missing girl. In *Bats Fly Up for Inspector Ghote* (1974), he becomes extremely jealous of a well-to-do neighbor whom his wife is constantly praising. In *The Sheriff of Bombay*, his wife, Protima, is upset when she finds reading material that their son Ved, now thirteen, has hidden away. In *Under a Monsoon Cloud* (1986), he faces a moral dilemma when it appears that he must either perjure himself or tell the truth and face dismissal from the force.

Ghote's exploits are not limited to Bombay. In *Inspector Ghote Hunts the Peacock*, he is sent to England to substitute for a high-ranking official at an international drug-enforcement conference. In *Inspector Ghote Goes by Train* (1971), he must bring back a prisoner from Calcutta, while in *Inspector Ghote Draws a Line* (1979) he is sent to a remote corner of India to protect a judge whose life has been threatened. In *Go West, Inspector Ghote*, he travels to California to rescue a girl who has come under the sway of a swami. In *The Body in the Billiard Room*, he goes on a special assignment to the hill station of Ootacamund in the mountains of southern India, where he resides at what was once a British officers' club, a remnant of British rule. Especially in the novels where Ghote travels to England and America, Keating is able to work the exotic setting in reverse. Here, readers are interested in the effect on Ghote of a setting more familiar to them than to him.

THE PERFECT MURDER

Keating hit his stride in 1964 with *The Perfect Murder*, the first of the Inspector Ghote series. All the elements that characterize the series are already present in this first volume. Ghote is a scrupulously honest, persistent, and hardworking inspector on the Bombay

police force. Although he is never clearly described, he appears to be small and not particularly prepossessing. He is hampered by the corruption, sloth, and incompetence of his colleagues and subordinates and is constantly hectored by his superiors, so that he must stand in constant fear of unjust demotion or dismissal.

Ghote is devoted to the scientific practice of criminology as laid down in a textbook titled *Criminal Investigation*, adapted from the German of Dr. Hans Gross (a book that he discovered in a bazaar). He has perused Gross's work so thoroughly that he knows many of its precepts by heart and is constantly quoting them. He frequently makes mistakes and is often placed in situations beyond his knowledge or abilities, but he sticks doggedly to his job and in the end succeeds—often, it must be admitted, because of good luck more than anything else.

This first novel of the series has an ambiguous title: Ghote is assigned to investigate the murder of the Parsi secretary, named Perfect, a rich businessman. To complicate his lot further, a Swedish criminologist from the United Nations Educational, Scientific, and Cultural Organization (UNESCO), Axel Svensson, who is investigating crime detection in developing countries, accompanies Ghote. Svensson's enthusiasm and ardent desire to learn everything there is to know about India cause Ghote great annoyance and embarrassment, particularly when the Swede is willing to believe that supernatural events can take place in the mysterious East.

When Ghote arrives on the scene of the supposed murder, he finds that the Parsi is still alive, though hovering on the brink of death. Throughout the novel Ghote lives in fear that the man will die, in which case Ghote will be under greater pressure to find the culprit. He meets only hostility from the members of the household of Perfect's employer. As this inquiry is progressing, he is informed that he is to give highest priority to another case, this one involving the theft of one rupee, worth at the time about twenty cents, from the drawer of the desk of the minister of police. Ex-postulating in vain, Ghote must hurry to the scene of the crime. Throughout the rest of the novel, he darts back and forth between the two cases, with the faithful Swede always in tow. When he finally gets home after a long night and day on duty, expecting to find solace,

his scolding wife is annoyed because he has stayed away so long. She has even coached their son, so that he is cold toward his father the next morning.

The rest of the novel is packed with action, some of it exciting, much of it hilarious. When Ghote finds that the only suspect in the rupee theft, a Goan, has disappeared, he sets out to find him in the crowded Goan district of Bombay, the eager Swede on his heels. Through good luck they locate him, but when they are unable to find the money or get him to confess, they leave in disgust. The next day, however, Ghote is commanded to arrest him, and this time they find him watching a trained white bull that tells fortunes. At the urging of the credulous Swede, the bull confirms that the Goan is a thief, and he confesses in terror that he has stolen other things from the minister but denies having stolen the rupee.

At the scene of the assault on Perfect, Ghote has trouble trying to interview the businessman's daughter-in-law. When she refuses to come forward, he is forced to search the women's quarters and eventually finds her hiding in a chest. He becomes convinced that the younger son is the culprit, but when Ghote tries to arrest him, the father helps the boy escape and leads Ghote and Svensson on a merry chase through the crowded bazaars of Bombay.

The search and chase scenes allow Keating the opportunity to include vivid descriptions of Bombay. This achievement is remarkable, considering that Keating visited India only after he had been writing Ghote novels for ten years. He derived his knowledge, he says, from reading about India and viewing films and television broadcasts. He is also a master at simulating the variety of English spoken in India.

THE MURDER OF THE MAHARAJAH

The Murder of the Maharajah is generally classified with the Inspector Ghote novels, although the action takes place in 1930 when India was still under British rule and thus before Inspector Ghote's time. In fact, Julian Symons has maintained that it "shows what Keating can do when free of Ghote." The work is linked with the Inspector Ghote novels, however, in an odd fashion, which is not revealed until the last page of the book.

Keating's plots are varied and generally well structured, although, as is only natural in such a prolific

output, some are more successful than others. Sometimes the exotic setting and the picturesque characters come close to eclipsing the plot.

Keating has stated that he uses crime fiction to say what he has to say, and that he believes that the crime novel is "every bit as useful as the straight novel . . . for saying things about the human condition." The theme that remains constant throughout the Inspector Ghote novels is that only occasionally can honest devotion to duty and compassion prevail against the arrogance of the rich and powerful, the corruption in all quarters of life, the imperfection of humankind.

BREAKING AND ENTERING

The Inspector Ghote series novel *Breaking and Entering* (2000) reintroduces a major character from the debut entry: UNESCO crime investigator Axel Svensson. Now a widower, Svensson has returned to Bombay, to relieve the depression caused by the long Swedish winter and the recent death of his wife. Riding on a tourist bus, Svensson manages to spot Ghote among the teeming masses in the city of thirteen million and immediately attaches himself like a limpet to the harried Indian inspector. Though he longs to be investigating the murder of millionaire Anil Ajmani, Ghote has been assigned a more pedestrian task: tracking down a cat burglar the press calls Yashwant (after a climbing lizard from Indian mythology), who specializes in stealthily scaling high-rise apartments where wealthy Indians sleep to steal single items of valuable jewelry. Patiently, the unimaginative but persistent detective—often accompanied by the large, inquisitive Swede who is unable to properly pronounce Indian names but often makes observations valuable to the investigation—questions a string of suspects. Eventually, Ghote stumbles on the jewel thief: a member of the powerful upper class who robbed for excitement but who would not be prosecuted for the crimes. The thief agrees to return the stolen jewelry, and having unsuccessfully cased the Ajmani residence, unwittingly supplies a clue to the rich man's murder. Ghote thus solves two of the Crime Branch's major cases, and by the end of the novel, it appears the detective will at last receive a long-awaited promotion.

A favorable review of *The Soft Detective*, in which Detective Chief Inspector Phil Benholme investigates the murder of a Nobel Prize-winning physiologist and discovers evidence that implicates his own teenage son. Acclaimed as a story that examines the lawman's dilemma of how to protect his son while capturing the real killer.

Pronzini, Bill, and Marcia Muller, eds. *1001 Midnights: The Aficionado's Guide to Mystery and Detective Fiction*. New York: Arbor House, 1986. Contains reviews of Keating's *Inspector Ghote*

Caught in Meshes and a non-Ghote title, *The Murder of the Maharajah*, which give the works positive marks for their delightful settings and characters with the caveat that through they unfold slowly, they are richly rewarding in giving the reader the experience of India.

Ripley, Mike. "Humorous Crime, or Dead Funny." In *The Fine Art of Murder: The Mystery Reader's Indispensable Companion*, edited by Ed Gorman, Martin H. Greenberg, and Larry Segriff with Jon L. Breen. New York: Carroll & Graf, 1993. Briefly calls attention to Keating's deft comedic touch.

Symons, Julian. "Crime Novel and Police Novel." In *Bloody Murder: From the Detective Story to the Crime Novel*. Rev. ed. New York: Viking Penguin, 1985. Provides a brief discussion of the development of Keating's skills in depicting his best-known fictional creation, Inspector Ghote.

HARRY STEPHEN KEELER

Born: Chicago, Illinois; November 3, 1890

Died: Chicago, Illinois; January 22, 1967

Types of plot: Amateur sleuth; private investigator

PRINCIPAL SERIES

Tuddleton Trotter, 1931-1947

Angus MacWhorter, 1941-1953

PRINCIPAL SERIES CHARACTERS

TUDDLETON TROTTER is an aged, unkempt, scruffy figure whose wisdom and insights into human motivations and psychology mark him as more than a mere detective. Socrates-like, contemptuous of society's exterior values, yet kind and compassionate, he merits the epithet "universal genius." His one passion is cats; a patron of the homeless felines, he loves them deeply and unconditionally.

ANGUS MACWHORTER, the proprietor of MacWhorter's Mammoth Motorized Shows, the Biggest Little Circus on Earth. A rumbled antihero detective,

he travels with his circus, unruffled by the crazy events that swirl about him. When an event of mysterious dimension occurs, however, he is able, through his "inspired lunacy," to unravel it.

CONTRIBUTION

Harry Stephen Keeler wrote more than seventy novels throughout his career and met with success in several countries, including Spain, Portugal, Great Britain, and the United States. His principal contribution to the mystery and detective genre is his bizarre "webwork novel," in which outlandish, melodramatic plots, subplots, and sub-subplots are piled atop one another. These intricate "webbings" grow into a dizzying pyramid of coincidences and interlocking connections—a plot that threatens to topple but that Keeler skillfully resolves. Keeler's mastery of plot has elicited awe and admiration from his loyal admirers. He is also known for his uncanny ability to mix humor and horror to stunning effect.

BIOGRAPHY

Harry Stephen Keeler was born in Chicago on November 3, 1890. While Keeler was still in his infancy, his father died. His mother soon remarried, this time to an unstable and irresponsible adventurer who gambled away her husband's legacy and soon afterward committed suicide. To provide for herself and her son, his mother began to operate an old-fashioned boarding-house that catered to a theatrical clientele. After her third marriage—to a husband who died within three years—the family was compelled to live on a meager income.

Young Harry pitched in to help his mother by shoveling snow and delivering an early-morning newspaper. An indifferent student, he boasted later that while grammar and rhetoric were being taught in his high school, he was playing hooky and fishing in Lake Michigan. In 1912, however, he obtained a degree in electrical engineering from Armour (later Illinois) Institute of Technology.

Employed as an electrician in a south Chicago steel mill, Keeler began writing short stories on the side. He sold his first crime story, "Victim No. 5," to *Young's Magazine* in 1914 for ten dollars. Keeler spent the next decade writing and selling dozens of his novellas and short stories to various detective pulp magazines.

In 1919, he was married to short-story writer Hazel Goodwin, who later became a crime writer herself and—especially in his later years—her husband's collaborator. Also in 1919, Keeler became an editor for *Ten-Story Book*, a position he held until 1940. The next breakthrough in his career was his selling his first book-length thriller to a British publisher. He continued to write novels for American, Spanish, British, and Portuguese audiences until his American publisher in 1957 refused to issue any more of his books. Unwilling to compromise his controversial style and content, Keeler turned to publishers abroad. His English editor also decided to stop issuing his books. In this final years, only Spanish and Portuguese publishers accepted his manuscripts.

In 1960, Hazel died. Keeler grieved so intensely over her death that he was unable to continue writing. It was not until his marriage to his former secretary, Thelma Rinoldo, in 1963 that he returned to the type-

writer. By now, his only audience was in Spain and Portugal, and finally his manuscripts were rejected even there. He died in 1967, convinced that his name and novels would someday be revived and that they would receive the adulation that he thought they deserved.

ANALYSIS

As Francis Nevins, his biographer, has chronicled, Harry Stephen Keeler began his writing career as early as 1910. His first efforts were conventional stories, one of which he sold, but after his success with his first crime story, "Victim No. 5," he began to write crime pieces almost exclusively. Nevins speculates that Keeler's tendency toward reflection and solitude were motivated by the disasters of his early life, and that this penchant led him to writing.

Typical of Keeler's early phase (1914-1924) is the outlandish plotting of "Victim No. 5." The story revolves around a certain Ivan Kossakoff, a professional strangler of women, whose punishment is to die by being crushed to death by his pet boa constrictor. Already in these early tales, certain features of what became a characteristically flamboyant, overdrawn, and bizarre content and style were beginning to emerge: the propensity for freaky, unbelievable characters; the penchant for absurdly incongruous plots and situations; a stringing together of metaphors and similes to create startlingly surreal images; and the use of preposterous surnames, on which Keeler puns almost adolescently—all done in a formal, Victorian, deadpan style, with dialogue reminiscent of penny Victorian novels.

THE VOICE OF THE SEVEN SPARROWS

In 1924, Keeler's literary career took a new turn: Hutchinson, a British publisher, brought out his first novel, *The Voice of the Seven Sparrows*. In this typically wild, unconventional novel, two rival Chicago newsmen are searching for a publisher's vanished daughter. Along the way, they encounter a Chinese millionaire who bets that he can walk across South America and a suitor who writes thousands of postcards in an attempt to find his lost lady.

THE SPECTACLES OF MR. CAGLIOSTRO

In another novel of this period, *The Spectacles of Mr. Cagliostro* (1926), a young innocent, Jerome Mid-

dleton, heir to a patent medicine fortune, is directed by his dead father to wear a pair of spectacles for a whole year before he can receive his inheritance. Thrown into an insane asylum by a rival for the legacy, Middleton finds the inmates saner than so-called normal people. The apparently “sane” doctor who ministers to the inmates is a mad clown appropriately named Herr Doctor Meister Professor von Zero.

SING SING NIGHTS AND THIEVES’ NIGHTS

In *Sing Sing Nights* (1928) three authors are about to be electrocuted for murder. The governor hands them a pardon for one, and only one, of the three; they are to decide among themselves who is to benefit from it. The authors agree to give the pardon to the one who can produce the best story, to be judged by one of their prison guards. *Thieves’ Nights* (1929), another novel of this period, concerns Ward Sharlow, who is engaged to impersonate a missing heir and in doing so runs into the typical ménage of oddball and “kooky” characters.

These novels of the 1920’s incorporate what had become typical Keeler motifs: the innocent protagonist cast into a den of malicious characters; the interruption of the main plot by ancillary characters with tales of their own—often to the effect that the main plot is overshadowed by these digressions (the “Arabian nights” technique); the usual grotesqueries, in both character and situation; and bitter social criticism denouncing all sorts of ills, from maltreatment of those who are different to the corruption of the judicial system.

THE AMAZING WEB

In the 1930’s, Keeler began to write what Nevins calls the “Keelerganzias,” novels of elephantine proportion, running to hundreds of pages and dozens of plots. The best example of these is *The Amazing Web* (1929), which many critics consider to be Keeler’s masterpiece. In this blockbuster, the “webwork” lacing of plot and subplot—the intricate interweaving of apparently coincidental but ultimately interrelated events—is at its peak. The multilayered plot centers on a young lawyer named David Crosby and the doings of his many clients. The first of these is Lindell Trent, a young woman on trial for stealing a diamond ring; Crosby falls in love with her while pleading her case. Unfortunately, because of his weak defense, she is

convicted and sent to prison. Later, she is cleared by the deathbed confession of the true culprit. Crosby hurries to the prison with this news, only to discover that she has already been freed and is on her way to Australia. While en route to Australia, however, Lindell jumps ship. Arriving on an atoll in the South Pacific, she places a note in a bottle giving her exact location and throws it out to sea. Crosby hears of this note and is determined to find her.

Meanwhile, Crosby is involved with another client, millionaire playboy Archibald Chalmers, who is accused of murdering his friend Rupert Van Slyke. Promised a yacht if successful, Crosby manages to sway the jurors; the trial ends in a hung jury. In the meantime, Al Lipke places an advertisement in the newspaper; he is looking for twelve hundred men with suitcases who are available for an hour’s work. A jewel thief and a social secretary named Annie Wentworth, who later is revealed to be Lindell, also appear in this intricately plotted novel. The bottle in the Pacific turns out to be a hoax, Chalmers is freed, and Lindell and Crosby are blissfully wed.

Characterization is papier-mâché and pasteboard.

To view image, please refer to print edition of this title.

In Harry Stephen Keeler’s 1930 novel The Green Jade Hand, detective Simon Grundt, formerly of the Lincoln School for the Feeble-Minded, investigates a case involving a rare-book dealer.

Despite her adventures, Lindell is a Victorian heroine, pure and unsullied and worshiped unconditionally by Crosby. Chalmers and Van Slyke are one-dimensional stereotypes. One memorable character is Isadore Katzenberger, a Yiddish comic figure who appears as a witness in a minor scene. His dialect is so contrived that its presence enlivens the novel. Yet the imaginative leaps are so great, the humor so marked, that the reader feels he is in the presence of the Marx Brothers or the slapstick of Mack Sennett. This may well be the benchmark of Keeler's talent: his nutty and improbable technique that makes his audience roar with laughter.

THE MATILDA HUNTER MURDER

In 1931, Keeler introduced Tuddleton Trotter in *The Matilda Hunter Murder*. Although Trotter is often thought of as a recurring figure in the Keeler canon, he actually appears in only two of the novels: the word-packed "webwork" narrative *The Matilda Hunter Murder* and one of the last "Spanish novels," *The Case of the Barking Clock* (1947). Nevertheless, Trotter remains one of Keeler's most memorable creations.

The Matilda Hunter Murder concerns another Keeler innocent with love and money problems, Jeremy Evans. He follows his love into a web of intrigue involving a lethal Z-ray machine; several dead bodies, including that of an inventor; a platinum brick; espionage; arson; and numerous other villainies. This high melodrama is tempered by the occasional appearances of Yiddish, blackface, and Germanic dialecticians whose hilarious accents delight the reader. Despite the complexity of this coil of events, however, Trotter rights all ills and solves all crimes with ease and justice. As does *The Amazing Web*, *The Matilda Hunter Murder* uses all the stylistic devices that have become Keeler hallmarks, including his use of outlandish surnames; his almost surreal images; and his neologisms, spoonerisms, puns, and fantastic diction. Yet with his excesses, Keeler is burlesquing conventional detective fiction, as the reader eventually realizes.

THE VANISHING GOLD TRUCK

The other series protagonist of Keeler's repertory is Angus MacWhorter, the owner of the Biggest Little Circus on Earth. He first appears in *The Vanishing Gold Truck* (1941). A tall, outlandishly attired figure, he spends most of his time trying to avoid having his

beloved circus snatched away by grotesque scoundrels. *The Vanishing Gold Truck* records his adventures as he travels through the American Bible Belt, where a series of religious "crazies" are intent on banning or acquiring his "pagan" circus.

THE CIRCUS STEALERS AND THE CASE OF THE CRAZY CORPSE

In *The Circus Stealers* (1956), the MacWhorter circus continues through the Bible Belt, following Old Twistibus, a winding road that leads through swamps, "dead man's" lands, and towns dominated by crazed religious preachers. *The Case of the Crazy Corpse* (1953), another MacWhorter novel, turns on still another attempt to wrest his circus away from him; it involves a nude corpse that is revealed to be made up of two halves: one Asian, the other black.

KEELER'S LATER NOVELS

In his last novels, Keeler's manner and content became more, rather than less, bizarre as he was writing solely for his Spanish and Portuguese audiences. He also continued to write his gargantuan works, such as *The Case of the Jeweled Ragpicker* (1948), from which he finally culled four separate novels. Francis M. Nevins has observed that his last works were the wildest of the utterly wild repertory of the old maestro.

Critics have found it difficult to categorize Keeler's brand of mystery fiction or to assess it in the context of the genre—partly because his reputation has dimmed so rapidly that some of his novels are hard to obtain. Nevins, responding to Keeler's unique zaniness, has called him "the sublime nutty genius of crime fiction" and a man "so far ahead of his time we have still not caught up with him." Although not all critics might take as unqualified a stand, most agree that Keeler's *The Amazing Web* is an amazing tour de force, a "great murder mystery," which, as Will Culp put it, "has to be read to be believed."

It cannot be said with any finality that Keeler's style, his *personae*, or his plotting in any manner influenced the detective writers who followed him. Nor can it be said that his antiheroic major characters in some way foretold such rumbled and comic figures as Inspector Jacques Clouseau (protagonist of *The Pink Panther*, 1964). Nevertheless, like such anticonventional figures as Ken Kesey's Randle Patrick Mc-

Murphy, Keeler's disheveled characters are part of the American literary tradition of the outsider who criticizes society's flaws and ills.

MARY KELLY

Mary Theresa Coolican

Born: London, England; December 28, 1927

Types of plot: Police procedural; psychological; thriller

PRINCIPAL SERIES

Inspector Brett Nightingale, 1956-
Hedley Nicholson, 1961-

PRINCIPAL SERIES CHARACTERS

BRETT NIGHTINGALE is a Scotland Yard inspector, the protagonist in Kelly's first three published mysteries. When he is not sleuthing, he sings tenor roles in a London amateur opera company. His likable qualities are as important as his decisiveness and courage when he is puzzling out a crime.

HEDLEY NICHOLSON is a mysterious private investigator and a somewhat flawed narrator who appears in two of Kelly's novels.

CONTRIBUTION

Mary Kelly is unique in her use of industrial settings for many of her novels—a steel mill, a paper factory, and a pottery, for example. Her murders often involve elaborately planned industrial espionage, rather than personal grudges. Her characters, however, are complex; her detectives themselves are confused about their lives, often flawed in their capacity to maintain human relationships. Because of her interesting settings and compelling characterization, Kelly can maintain suspense from the first paragraph to the final page of a novel.

BIOGRAPHY

Mary Kelly was born Mary Theresa Coolican on December 28, 1927, in London, the daughter of Francis Spenser Coolican and Kathleen Reedy Coolican. She was educated at the Ursuline Convent in London and then at the University of Edinburgh, receiving her master's degree in 1951. In 1950, she married Denis Charles Kelly and moved to Surrey, where she taught in a private school and then in Surrey County Council schools from 1952 to 1954.

Although her first book was published in 1956, it was not until *The Spoilt Kill* (1961) that critics began to rank her at the top of her genre. For that book she was given the Gold Dagger Award of the Crime Writers' Association. Between 1962 and 1974, she published six additional novels, and in 1963 American readers discovered her recent books and read her earlier ones. Kelly's interest in music, particularly in opera, is evident in many of her mysteries.

ANALYSIS

A Mary Kelly novel does not ordinarily begin with the discovery of a body, but instead with the establishment of the confusion of a central character. In her first novel, *A Cold Coming* (1956), for example, Alec Stormer awakens on the edge of a cliff, with no knowledge of where he is or memory of how he came to be there. Less dramatically, the librarian in *March to the Gallows* (1964) spots a medallion, which has been stolen from her, being worn by a strange woman; from her puzzlement about the reappearance of that medallion comes the larger mystery that is the core of the book. *The Twenty-fifth Hour* (1971) also begins with a puzzled protagonist, in this case a devoted aunt, who cannot understand why her niece in France has sent for money without explaining her needs. There is no suggestion of criminal activity until the aunt gets to France, and even then, she is concerned primarily about the safety of her secretive niece, who is finally dragged back to England. Because a Kelly novel often begins with seemingly unexplainable events and sustains that nightmare atmosphere throughout the book, it holds the reader in suspense in a very different way from the novel of detection, which offers subtle clues, both valid and misleading, all along the way.

The industrial settings also produce an almost surrealistic quality in the novels. The landscape of *Due to a Death* (1962) is not the green countryside of England but an ugly industrial estuary; the body in *The Spoilt Kill* is found in a clay-filled machine for making pottery. Generally, the homes in which Kelly's charac-

ters live are either unlovely, standardized middle-class houses or sordid slums.

THE SPOILT KILL AND DUE TO A DEATH

The flaws of Kelly's characters are as evident as the defects of their surroundings. After her third novel, she abandoned the musical inspector for a mysterious private investigator or secret agent, Hedley Nicholson, who appears in *The Spoilt Kill* and *Due to a Death*. Nicholson's own uncertainties are evident in both of these novels. In the first, he has been hired by the management of the pottery to investigate the theft of some designs. His undercover work demands that he deceive the chief suspect, a widow; unfortunately, while he is cultivating her friendship, gaining her trust, as his job demands, he first likes and respects her, then falls in love with her. With this new focus, he sees himself more clearly. As he lies, snoops, and reports to his employer, getting people fired and jailed, he becomes more and more disgusted with his work and himself, less and less capable of setting himself apart from the thief and later from the murderer whom he is pursuing. At last, he is as much a loser as those whom he destroys; when the widow, who is innocent, discovers that he has been lying to her and using her, she is broken-hearted; although she loves him, she feels that she cannot trust him, and she breaks off the relationship. This consciousness of self-destruction by one who is supposedly on the side of right explains Nicholson's rejection of any close relationship in *Due to a Death*, to the bewilderment of the female narrator, who admires him and throughout the novel is on the verge of loving him.

Like Graham Greene, to whom she has been compared, Kelly creates not only confused and tormented heroes but also sometimes appealing and understandable villains. In *The Spoilt Kill*, the murderer is a man who committed his crime almost by accident, a man whom Nicholson, the investigator, recognizes to be more generous than he. Similarly, in *Due to a Death*, the murderer is a kind man who shows a profound love for his son by his first marriage and a great patience with his shrewish second wife; when he is discovered and kills himself, one is not relieved that a killer is out of the way but appalled at the tragic waste.

In all of Kelly's novels, her Catholic background is obvious. When she shows the defects of her sympa-

thetic characters (their pride, their difficulty in loving others) while pointing out the generosity and kindness of those who have stolen or killed, she is stressing the fact that all human beings are equal before God and that all are in need of divine grace. Thus after he is exposed, the murderer of *The Spoilt Kill*, penitent, clearly believes that he has been forgiven by God, though not yet punished by civil law. In contrast, the representative of human justice, the detective Nicholson, is aware of lacking that divine grace that the murderer has received.

MARCH TO THE GALLOWES

The difference between human and divine values is also emphasized in *March to the Gallows*. Here, however, it is the sleuth, a humble librarian, who receives the gift of grace. From childhood, she has felt inferior to the members of a wealthy neighboring family. While they glittered, she grew up in the shadows, sometimes treated kindly, sometimes ridiculed. Then her purse is snatched and she realizes that she has lost the medallion that her fiancé gave her before his accidental death. In tracing the medallion, she discovers some dreadful truths about the family that had patronized her: Their lives are a cesspool of crime and treachery, drug addiction, and blackmail. They have not struggled against sin; instead, they have become evil precisely because they believe in neither good nor evil, turning to degradation to find some excitement in their meaningless lives. Face-to-face with their emptiness, the librarian has the grace to pity them, and she announces that she will not take the initiative in turning them over to the law.

THE TWENTY-FIFTH HOUR

It was in Kelly's fourth mystery, *The Spoilt Kill*, the book in which she abandoned Inspector Nightingale in favor of the flawed narrator, Hedley Nicholson, that the metaphysical quest began to assume more importance than the search for the criminal. By the time she wrote *The Twenty-fifth Hour* ten years later, the new emphasis was evident. Although one revolutionary is shot during the course of the story, there is no actual murder. The mysteries are the whereabouts of the niece, who keeps disappearing with some revolutionaries and then reappearing, and the reason for the sinister behavior of a family who have shut themselves up

behind their gates, where they are discovered to be concealing some secrets left over from World War II. Appropriately, the title refers to a mythical extra hour in the day, when mystifying events occur—mystifying, not murderous. That the book is structured to include the interpolated comments of the heroine's husband, who has obviously been reading what she says in it about her involvement with another man, indicates that the real mysteries here are love, grace, and forgiveness, not a body in a pool or in a library.

It is to Kelly's credit that she is able to maintain suspense in her unconventional pattern. In *A Cold Coming*, she had not yet mastered her art, and long sections of conversation alternated with equally long sections of frenetic action. In the later books, however, Kelly learned to suggest the presence of danger in the most prosaic scenes and during the most searching conversations.

WRITE ON BOTH SIDES OF THE PAPER

Write on Both Sides of the Paper (1969) illustrates the mastery of form and theme that Kelly attained after her early apprenticeship works. Typically, the opening of the novel is dramatic and mysterious. Three men, identified only by their first names, are burglarizing some kind of plant. The sentences are short, the description crisp and accurate, the thoughts of "Aidan" fragmentary and profane. When the section ends, the narrator Hannah Major takes over, introducing herself and announcing that she has begun by re-creating that opening scene because it is the key to the story that she will tell. Hannah does not, however, narrate the entire book. A number of episodes switch back and forth between Hannah and the other major characters: Aidan Losely Gough, an advertising agency executive so pressed by a debt to a "club" owner that he has been willing to sign on as a burglar, and Hannah's lover, William Lockett, who works for the paper company that has been burglarized in the initial episode. The characters eventually come together at the old home of David Kinto, and once Hannah arrives, she indeed takes over as the single narrator. She does not, however, explain the episodes that she re-creates; she simply describes events and repeats dialogue. When the novel ends, William has foiled the theft, and Hannah has helped Aidan to get out of trouble, but the characters agree that al-

though they know that the theft involves a company in another country, they still do not know, nor do they want to know, what scheme has brought death to one man and peril to them all. Thus the mystery novel ends with the mystery still unsolved.

As in Kelly's other novels, the real quest in *Write on Both Sides of the Paper* is not a murderer, but the attainment of goodness and the display of grace in human beings. After he is attacked in the woods, William recognizes his attacker as David Kinto, who once stole William's girl. Worried because Kinto's one good eye has been put out of commission in the fight, William abandons his job and his respectable life to nurse Kinto, who is an unprincipled liar and one of the thieves of the first episode. Later Hannah joins the group, and she and William work desperately to free Aidan from the debt that caused him to be the second thief. The novel operates on contrasts: the hatred Kinto's mother felt for her son, as shown by the mocking "inheritance" of pennies he finds in his old home; the forgiving love shown by William to his old enemy; the deceit of Kinto, the honesty of Hannah; Aidan's desire to maintain his middle-class respectability; Kinto's acceptance of his status as a reprobate; and ironically, Aidan's insistence on turning over the paper to his criminal employers, no matter what the results, contrasted with Kinto's decisive act when he tosses the paper roll into a reservoir—not because of what trouble it might cause in South America but because it was causing quarrels among the four comrades. At the end of the story, Hannah makes a statement that would seem strange in most murder mysteries, but one that is typical of Kelly: One should not pity the dead, she says, but the living; it is in this world that pity is in such short supply.

Thus, once again Kelly dramatizes her consistent theme. Given the mystery and terror of the world in which all must live, given the torment and the imperfection in every human being, given the irresponsibility of the disreputable and the selfish arrogance of the respectable, the only answer can be human compassion, provided through redeeming grace. There is indeed in Kelly more emphasis on pity for the living than on behalf of the dead.

HARRY KEMELMAN

Born: Boston, Massachusetts; November 24, 1908

Died: Marblehead, Massachusetts; December 15, 1996

Type of plot: Amateur sleuth

PRINCIPAL SERIES

Nicky Welt, 1947-1970

Rabbi David Small, 1964-1996

PRINCIPAL SERIES CHARACTERS

NICKY WELT, the Snowden professor of English language and literature at an unnamed New England university, is a perennial bachelor. In his late forties throughout the series of short stories, Welt is white-haired, gnomelike, cold-natured, and condescending. He solves cases for his friend and chronicler, the nameless Fairfield County attorney and a former university colleague, for the same reason that he plays chess with him—to prove his own intellectual superiority.

RABBI DAVID SMALL, the rabbi of the Barnard's Crossing Conservative Temple, is married to Miriam and is the father of Jonathan and Hepsibah. Just under thirty in the first novel, he ages to his mid-forties and fathers two children as the series progresses. Mild-mannered, scholarly, rumped, and shy, he is a devout man of inflexible principles when it comes to Judaic tradition and ethics. Never popular with his congregation, he precariously clings to his job by solving crimes that involve the temple members.

CONTRIBUTION

Harry Kemelman's Nicky Welt stories represent a revival of the intellectual armchair detective, who solves crimes much as he solves chess problems, through the use of his superior logic and for his own entertainment. Welt is not interested in morality or justice but in demonstrating his mental superiority, especially his superiority over his closest friend, chess partner, and

faithful “Watson,” the nameless narrator, who identifies himself as the Fairfield County attorney and a former law-school faculty member at Nicky’s university.

Although the Nicky Welt stories are clever and entertaining, their chief significance lies in the fact that they are the forerunners to the Rabbi David Small series. As Kemelman himself wrote, “Rabbi David Small can be said to be the son of Professor Nicholas Welt.” Like Nicky Welt, David Small solves cases through logical analysis. The rabbi’s logic is derived not from chess but from *pilpul*, the traditional, hair-splitting analysis used in yeshivas (rabbinical schools) to study the Talmud, the Judaic oral law that interprets the Torah (the Pentateuch). By using a rabbi as his detective, Kemelman turned his mysteries into a series of lessons in ancient Judaic tradition and modern Jewish sociology—“a primer to instruct the Gentiles,” according to Anthony Boucher. Rabbi Small becomes involved in sleuthing to help those who have been unjustly accused and to restore moral order to his corner of the universe. Although Nicky Welt arrogantly demonstrates his own superiority over lesser mortals, Rabbi David Small gently discourses on Judaism’s ethical superiority over Christianity.

Critic Diana Arbin Ben-Merre has pointed out that Kemelman’s most significant achievement was in expanding the cultural horizons of American and British detective and mystery fiction. Until the 1960’s, with the emerging popularity of Rabbi Small, no significant Jewish characters existed in detective fiction without the onus of lingering stereotypes and anti-Semitism. In creating a space for Jewish issues within the detective milieu, Kemelman built on the success of Jewish-American postwar novelists such as Saul Bellow, Bernard Malamud, and Philip Roth, who helped establish the value and interest of Jewish culture.

BIOGRAPHY

Harry Kemelman was born on November 24, 1908, in Boston, the son of Dora Prizer Kemelman and Isaac Kemelman, a diamond merchant and talmudic scholar. Kemelman attended Boston Latin School from 1920 to 1926. From the age of eleven to fourteen, he also attended Hebrew classes after school from four to six P.M. at his father’s request and a Talmud class from six

to seven P.M. for his own enjoyment. Between the ages of fourteen and eighteen, he went to Hebrew and Talmud evening classes at the Hebrew Teachers College, which he describes as the hardest school he ever attended. Despite his academic achievements, Harvard University rejected Kemelman’s applications for undergraduate admission, probably because of a problematic high-school discipline record, although “there were also rumors that some colleges had set a percentage limit on Jewish students.” From 1926 to 1930, Kemelman attended Boston University and received his bachelor of arts degree in English. He was then admitted to Harvard for postgraduate studies, receiving his master of arts degree in English in 1931.

Kemelman became a teacher over his father’s objections that teaching violated the talmudic principle that one should not use knowledge “as a spade to dig with.” Kemelman taught on a substitute teacher’s license from 1935 to 1941, traveling to four different Boston area schools “to put together one poor salary.” He also taught literature and composition in the evening division of Northeastern University from 1938 to 1941. On March 29, 1936, Kemelman married Anne Kessin, a medical secretary-technician whom he met at a party. The couple had three children: Ruth, Arthur Frederick, and Diane. From the 1940’s, Kemelman lived in Marblehead, Massachusetts, where he loved to take seaside strolls.

From 1942 to 1949, Kemelman worked as the chief civilian wage administrator for the American Army Transportation Corps in Boston and as chief job and wage administrator for the New England Division of the War Assets Administration.

After the war ended, Kemelman tried to set up his own employment agency for people leaving war-related industries, but the enterprise failed. Kemelman then became a successful real-estate agent, selling housing to young postwar families. Teaching remained his first love, however, and he accepted an assistant professorship in English at Franklin Technical Institute in 1963. In 1964, Kemelman became associate professor of English at Boston State College. Around 1970, he retired from teaching gradually, going on a leave of absence to Israel for several semesters and finally writing a letter of resignation.

Kemelman published his first Nicky Welt story in 1947. Between 1964 and 1988, Kemelman published ten novels featuring Rabbi David Small, one collection of Nicky Welt short stories, and one critique of post-World War II college education, *Common Sense in Education* (1970). After Kemelman's retirement from teaching, he and his wife, Anne, divided their time between summers in Marblehead, Massachusetts, and winters in Israel. His annual visits to Israel provided inspiration and an ability to write free of distractions. Kemelman died on December 15, 1996, at the age of eighty-eight.

ANALYSIS

"Nicky Welt was born in the classroom," says Harry Kemelman, describing the start of his career as a mystery writer. Trying to show a composition class that "words do not exist *in vacuo* but have meanings that transcend their casual connotations," he noticed a newspaper headline about a Boy Scout hike and created the sentence, "A nine-mile walk is no joke, especially in the rain." Fearing some sort of pedagogical trap, the class was unresponsive, but the sentence and its varying possible implications gave Kemelman the idea for his first Nicky Welt story, a story that he tried to write on and off for fourteen years. When it finally did jell it was like copying it down rather than writing it, according to Kemelman. Except for a few spelling changes, it needed no revision. *Ellery Queen's Mystery Magazine* accepted it at once and offered Kemelman twenty-five-dollar increases in pay for each subsequent Nicky Welt story. It took Kemelman a year to write the second story, but after that, they flowed at the rate of one a month.

NICKY WELT

In the finest Sherlock Holmes tradition, Nicky solves crimes that are presented to him by baffled minions of the law, who possess all the clues but lack intellect to interpret what they know. Like Holmes, Nicky is a cold-natured, solitary figure whose few human contacts include a dedicated landlady who caters to his eccentricities and one devoted male friend who shares Nicky's interests and chronicles his triumphs.

RABBI DAVID SMALL

Soon publishers were clamoring for a full-length Nicky Welt novel, but Kemelman had no interest in

writing one. Although these stories were amusing, Kemelman believed that a longer work should say something more meaningful to the reader. Having just moved to the suburbs of Boston, he found himself, at the age of forty, the oldest member of a struggling new congregation. The young, suburban Jewish parents wanted to pass their religious traditions on to their children, but having been brought up at a time when religion had generally lost significance, they themselves had no such knowledge. What would happen to future generations of Jews reared in ignorance of their history? Kemelman wondered. Out of these experiences and questions came his first, never-to-be-published novel, "The Building of a Temple." The editors whom Kemelman approached found the book pleasant but too low-keyed and lacking in excitement.

One of the editors, Arthur Fields, "jokingly suggested that maybe the book would be more interesting if it were written in the style of a detective story." Driving home from Fields's office, Kemelman passed the grounds of his suburban temple and was struck by the thought that its parking lot, a deserted spot on the edge of town, was a good place to hide a body. It also occurred to him that a rabbi's traditional role in Europe had not been that of a religious leader hired by a congregation but rather that of a judge hired by the Jewish community to settle civil disputes. In that capacity, the rabbi had always acted as a detective, questioning witnesses and laying traps for liars. Rabbi David Small had just been born.

Like his literary father, Nicholas Welt, David Small is prickly, pedantic, and unprepossessing at first acquaintance. Unlike Nicky Welt, however, he becomes very lovable as the reader gets to know him better. More important, unlike Nicky Welt, who was created for the reader's amusement, the rabbi is Kemelman's spokesperson for his deepest concerns about the ancient Judaic tradition and its place in the modern world. Indeed, Kemelman has said,

The purpose of the books is to teach and explain Judaism to Jews and Gentiles. The fact that the books, particularly *Conversations with Rabbi Small* are used in theology schools, seminaries, and conversion classes, indicates, I think, that they appear to serve their purpose.

FRIDAY THE RABBI SLEPT LATE

In his Edgar-winning first novel, *Friday the Rabbi Slept Late* (1964), Kemelman sets the stylistic and thematic pattern for the entire series. The rabbi is introduced in his habitual setting—at the temple and in trouble with his congregation. With the very first paragraph, the reader learns that Jewish morning prayers require the attendance of ten men and that phylacteries, small black boxes containing a passage taken from the Scriptures, are worn on the foreheads and upper arms of the congregants. The scene is thus set, and a Jewish custom is described and explained. Speaking among themselves, several of the men reveal that they find their young rabbi too traditional, too dogmatic, and too pale and rumped looking to lead their progressive, assimilationist, and image-conscious temple. They want his contract terminated as soon as possible

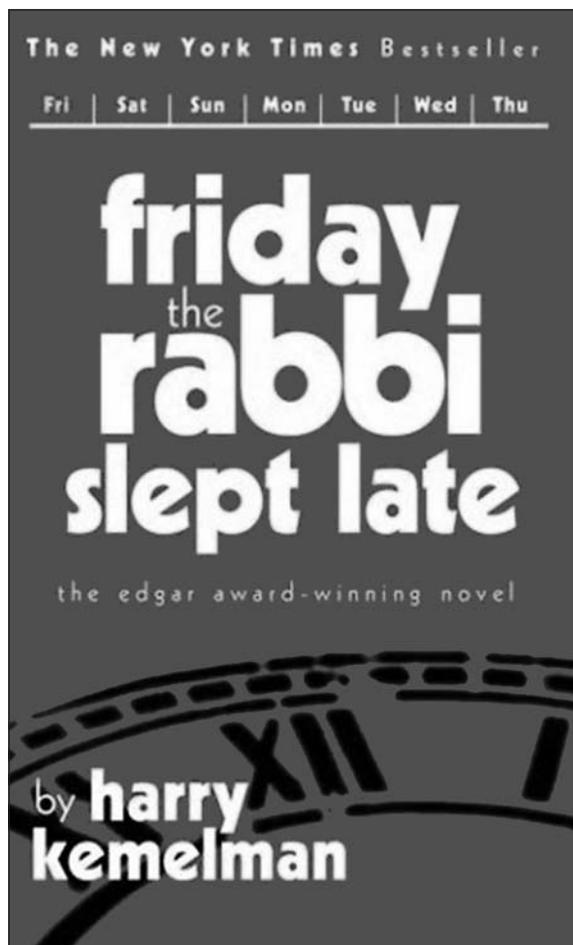

so they can bring in a rabbi more to their liking—a well-groomed, fund-raising organizer with the deep, resonant voice of an Episcopal bishop, a progressive ecumenicist who will let their wives serve shrimp cocktails at sisterhood suppers. In brief, they want a Gentile rabbi and a synagogue that is indistinguishable from any of the Christian churches.

Although the temple board members are united in their opposition to the rabbi, some of them are in conflict over a car that one member borrowed and returned with a damaged engine. Unaware of their machinations against him, the rabbi offers to serve in his traditional European capacity as a civil judge; he settles the case to everyone's satisfaction, winning a few admirers in the process.

The scene then shifts to a seemingly unrelated plot. Elspeth Bleech, the unmarried nursemaid to the Serafino family, is seen suffering from morning sickness and preparing to visit a doctor. The narrative cuts back and forth from the board's plans to oust the rabbi to Elspeth's problematic pregnancy. The two stories seem totally unconnected until Elspeth, vainly awaiting her unnamed lover in a restaurant, meets Mel Bronstein, the business partner of Al Becker, the board's most outspoken opponent to the rabbi. Mel invites the obviously jilted and distraught young woman to his table, and they spend a pleasant, chaste evening together. The next day, Elspeth's corpse, dressed only in a slip and a raincoat, is discovered in the parking lot of the temple. She has been strangled in the backseat of the rabbi's car, and David Small thus becomes the prime suspect in the case.

Hugh Lanigan, the Catholic police chief of Bernard's Crossing, finds it difficult to suspect a man of the cloth in a sex-related slaying. He could never bring himself to accuse a priest of such a thing, he tells David. Blissfully unaware that he is thrusting his own neck deeper into the noose, David tells Lanigan, "I presumably differ from the average member of my congregation only in that I am supposed to have a greater knowledge of the Law and of our tradition. That is all."

The rabbi's naïveté and candor convince Lanigan that he is innocent, and Mel Bronstein is arrested for Elspeth's murder. With the tacit consent of his para-

lyzed wife, Mel has been having an affair with a woman whose name he will not reveal. Elspeth's pregnancy convinces the police that she had become burdensome to her married lover. By use of talmudic logic, however, the rabbi clears Mel of suspicion and wins the gratitude and loyalty of Mel's partner, the obstreperous Al Becker.

Kemelman's technique is cinematographic, employing rapid jump cuts from one scene to the next. The characters are revealed through their own words and actions, and the subplots shift and intertwine to baffle and delight the reader. The rabbi is the one who finally ties all the mysterious events together. Watching his wife, Miriam, undress to go to bed, he suddenly realizes why Elspeth was seminude at the time of her murder. By applying *pilpul*, talmudic "hair-splitting distinctions and twists of logic," the rabbi demonstrates to Lanigan the logical identity of the killer. Because the rabbi is now the hero of the Gentile community, the board is appeased and votes to extend David's contract.

OTHER RABBI SMALL BOOKS

The rest of the books follow the same pattern. The rabbi ages, his family grows, the board members are voted in and out of office, but David Small's basic conflict with his congregation remains the same. Refusing a lifetime contract as too restrictive, the rabbi prefers to fight for his job year by year, as he strives to keep his Conservative flock from straying too far into assimilation or into ultra-Orthodoxy.

Murder continues to dog the rabbi's footsteps, much to his consternation and the reader's delight. Along with each crime, David Small also investigates and explains a different problem or issue of Judaism and modern society. In *Saturday the Rabbi Went Hungry* (1966), an apparent suicide who should not be buried in consecrated ground proves to be a murder victim. In *Sunday the Rabbi Stayed Home* (1969), an integrated beach party attended by members of the rabbi's teen fellowship turns into tragedy. In *Monday the Rabbi Took Off* (1972), a vacation in Israel finds David Small enmeshed in Arab terrorism and a murder whose roots lie in World War II and a Russian gulag. In *Tuesday the Rabbi Saw Red* (1973), a brief teaching stint at Windemere Christian College involves the rabbi with campus radicals and a bombing that results in a profes-

sor's death. In *Wednesday the Rabbi Got Wet* (1976), an encounter with Jewish mysticism (a doctrine of despair that arises when reality is extremely difficult, according to Kemelman's own words) leads to a fatal pharmaceutical mix-up. In *Thursday the Rabbi Walked Out* (1978), a volatile mixture of women's liberation and anti-Semitism explodes into homicide. In *Someday the Rabbi Will Leave* (1985), corrupt politics combine with a hit-and-run killing.

In *One Fine Day the Rabbi Bought a Cross* (1987), David and Miriam return to Israel and encounter religious fanatics, both Jewish and Muslim, bent on mutual destruction. In *The Day the Rabbi Resigned* (1992), Rabbi Small aids Police Chief Hugh Lanigan once again in solving a murder framed as a drunk-driving accident. He finally resolves the long tension with his congregation by retiring from Barnard's Crossing. In Kemelman's final book, *The Day the Rabbi Left Town* (1996), Rabbi Small has accepted the position of professor of Judaic studies at Windemere College in Boston. Soon enough, a professor's body is discovered under circumstances that would seem to incriminate the temple's new rabbi. Though Small has left the temple, this novel continues his—and Kemelman's—focus on the history, laws, and culture of Judaism.

CONVERSATIONS WITH RABBI SMALL

Conversations with Rabbi Small (1981) is the only Kemelman novel in which David Small gains respite from both his congregation and his detective labors. The plot of this book is slender, almost nonexistent. The rabbi finds himself vacationing alone at Hotel Placid while his wife Miriam is in New York visiting her parents. He meets Joan Abernathy, a Christian resident of Barnard's Crossing, who is staying at the same hotel with her Jewish fiancé, Aaron Freed. Although Aaron is totally nonobservant, his parents would prefer a Jewish daughter-in-law, and Joan is willing to convert. The rabbi tries to discourage her from an insincere conversion for love but becomes intrigued by the possibility of winning Aaron back to Judaism. The young couple and the rabbi begin a series of nightly conversations that cover all aspects of Judaism quite literally from A to Z—from abortion to the return to Zion. This book, a pocket encyclopedia Judaica complete with index, encapsulates and encom-

passes the true purpose of the entire "Rabbi" series.

The murders the rabbi solves are intrinsically fascinating to mystery buffs, but Kemelman uses them as a vehicle for involving the readers, both Gentile and Jewish, in the history, tradition, ethics, and sociology of Judaism. David Small's conversations with Hugh Lanigan are not really comparisons of clues but contrasts in theology. Lanigan's statements of the Catholic position on various issues give David a springboard from which to launch his lessons in Judaism. The role of the priest, the ultimate spiritual authority to his congregation, is contrasted with the role of the rabbi, a purely secular figure with legal and academic, not spiritual, authority. The nature of faith in God, central to all Christian beliefs, but not required of Jews, is discussed. Lanigan is amazed to learn that mainstream Judaism has no concept of heaven or hell and that to a Jew virtue must be its own reward and vice its own punishment.

The members of the temple congregation, too, provide the rabbi with opportunities to teach Judaic tradition and ethics. A young woman who wants a nonkosher wedding reception is sharply reminded of Mosaic law. On the other hand, a stubborn, ailing old man who insists on fasting on Yom Kippur to the detriment of his health is told that refusal to take medicine could be considered suicide rather than religious observance.

Above all else, the rabbi sees Judaism as a rational faith rather than one of *credo quia absurdum est*. (Kemelmann himself has described aspects of Christianity as "expecting you to believe what you know ain't so.") Therefore, just as he opposes too much liberalization and modernization of tradition, so too does he oppose ostentatious religiosity and an exaggerated reverence for form. His moderation earns for him enemies in both the liberal and the ultra-Orthodox factions of his congregation.

The disgruntled factions' repeated machinations to get rid of the rabbi provide Kemelman with the opportunity to demonstrate the day-to-day working of temple life and modern Jewish values, both noble and crass. The reader is shown the politics and economics of temple governance and fund-raising. The rabbi's vacation in Israel becomes a forum on the Jews' spiritual ties to that land. An encounter with a Hasidic ye-

shiva student leads to a consideration of the fate of various other now-dead branches of Judaism. The rabbi thus finds an opportunity to discuss every aspect of Judaism, from its most abstruse theology to its most common daily habits.

There is, in fact, only one central Judaic concern that Kemelman never approaches, and that is the Holocaust. When asked about this glaring omission, Kemelman replied, "It's not something that is incumbent upon Jews to explain. Germany has to explain it. We don't."

Margaret King and Sheldon Hershinow have described the rabbi as an "outsider" figure, a minority of one within a minority group in American society: "He is set off from the Gentile community, on the one hand, by his Jewish beliefs, and from his own temple membership, on the other, because of his refusal to strive for the accommodation of his religion to the American way of life." As an outsider, he has no partisan views to cloud his perceptions. This clarity of vision enables him to function more effectively both as religious spokesman and as detective.

In a 1975 interview with Daisy Maryles of *Publishers Weekly*, Kemelman said that he is surprised by the reaction of American and Israeli rabbis who have told him how much his books have affected their behavior. Kemelman's own creation, Nicky Welt, however, would not be at all surprised. In a story entitled "The Bread and Butter Case," Ellis Johnston, the Suffolk County district attorney, is cynically surprised at the decent behavior of Terry Jordan, a not overly intelligent young thug whom Nicky has exonerated of a murder charge.

"Like the hero in a soap opera or a TV western," Johnston sneered.

"Precisely," said Nicky. "People like Terry get their ideas of morality and ethics, as do the rest of us, from the books they read and the plays they see."

Apparently so do rabbis. Except for the rabbis of the Talmud, they could not find a better role model than David Small.

PRINCIPAL SERIES

Miles Standish Rice, 1936-1938

Captain Duncan Maclain, 1937-1962

PRINCIPAL SERIES CHARACTERS

MILES STANDISH RICE, a tall, lanky deputy sheriff from Florida, is chiefly remembered for his famous self-introduction: "I'm Miles Standish Rice—the Hungry!" His cases reveal the author's interest in the landscape and varied traditions of his adopted state.

DUNCAN MACLAIN, a private investigator, is blind. Adaptation to his visual disability has heightened the awareness of his other senses to an extraordinary degree, but it is his sensitivity to others and their emotional handicaps that is memorable.

CONTRIBUTION

The first six of the thirteen Duncan Maclain novels have been described as "outstanding," ranking with the best detective fiction done in the late 1930's and early 1940's by an American. Out of his personal experience working with blinded veterans, Baynard H. Kendrick created the character of Captain Duncan Maclain. Kendrick wanted to prove that the disadvantages associated with lack of sight could be overcome, and that the blind need not be treated as dependent children. Consequently, he deliberately placed his blind investigator in the most harrowing of situations. Maclain is not, however, superhuman in the mold of Ernest Bramah's Max Carrados. Kendrick could invent puzzles and twisting plots as well as the best of his contemporaries, but his unique contribution is his portrait of a believable disabled person in a dangerous occupation. Kendrick was one of the founders of the Mystery Writers of America, served as its first president, and received the organization's Grand Masters Award in 1967.

BIOGRAPHY

Baynard Hardwick Kendrick was born on April 8, 1894, the son of John Ryland Kendrick and Juliana Lawton Kendrick. Graduated from the Episcopal Academy in 1912, he later became the first American to join the Canadian army, enlisting in the infantry only one hour after the declaration of war. He was on active duty in France and Salonika and was decorated by the British and Canadian governments. His association with World War I convalescent homes led to a lifelong interest in the training of the blind. On May 2, 1919, he married Edythe Stevens; they had three children, Baynard, Edith, and Julia. After Edythe's death, he married Jean Morris in 1971. During the years between the end of the war and the publication of his first novel, *Blood on Lake Louisa* (1934), Kendrick traveled widely, lived in almost every corner of the United States, and tried almost every job imaginable, including those of lawyer, certified public accountant, hotel manager, publisher, and secretary to a door company.

Kendrick considered Florida his home and was a member of the editorial board of the *Florida Historical Quarterly* and director of the Florida Historical Society; he wrote the column "Florida's Fabulous Past" for the *Tampa Sunday Tribune* (1961-1964). His best-selling novel *The Flames of Time* (1948) deals with the state's turbulent past.

Kendrick was the organizer of the Blinded Veteran's Association and served as chairman of the board of directors and as its only sighted consultant. In honor of his work in the training and rehabilitation of blinded veterans, Kendrick received a plaque from General Omar Bradley. The film *Bright Victory* (1951), an adaptation of his novel *Lights Out* (1945), which concerns the trauma of the blinded soldier, earned for him the Screen Writers Guild's Robert Meltzer Award and the Spearhead Medal of the Third Armored Division. It is no surprise that all of his works have been transcribed into Braille.

In addition to *Lights Out*, Kendrick has had other works adapted for film, and the 1971 television series *Longstreet* was based partly on the character of Dun-

can Maclain. Suffering from ill health during the last ten years of his life, Kendrick wrote his last mystery, *Flight from a Firing Wall*, in 1966. He received the Mystery Writers of America's Grand Master Award in 1967. He remained an active fund-raiser for the Blinded Veterans' Association until his death in 1977.

ANALYSIS

In *The Last Express* (1937), Baynard H. Kendrick introduced the figure of Captain Duncan Maclain, the tall, handsome war hero turned private investigator who is blessed with the gift of analytic reasoning and a flair for the dramatic. This description is typical of many detectives of the 1930's. The plots of the early Maclain books, in their love of the bizarre and the complex, are also representative of the era. What separates the Maclain novels from the rest is a marked shift in emphasis.

In many classic novels of detection, the sleuth, even though he may be endowed with a variety of affectations and idiosyncrasies, is a subordinate figure. The star attraction is generally the plot, on whose intricacy and brilliance the success of the novel depends. Therefore, even if the reader cannot tolerate the detective, the ingenuity of the problem and its resolution can still be admired. In a Duncan Maclain novel, however, the opposite is true. The work stands or falls on the credibility of the characterization of Maclain himself, for he is blind. Consequently, the things that a physically able detective takes for granted become magnified in importance and, in some cases, must be explained in great detail. For example, a sighted detective may explain why he shot at a fleeing criminal and missed. Maclain must explain why he did not—he shoots at first sound.

It is essential to point out that Kendrick's choice of a blind detective is not a gimmick. Supposedly based on a friend of Kendrick who was blinded in World War I, Maclain is not blind simply to be different. Passionate in his support for the disabled and an authority on the training and rehabilitation of the blind, Kendrick deliberately created a detective who could stand as a symbol not only for the sightless but also for those who could not accept the blind as valuable members of society. Kendrick admitted that he wanted his novels

to be used as propaganda in the fight for the understanding and the mainstreaming of the handicapped. Therein lies the artistic problem inherent in the portrayal of Duncan Maclain. It is very difficult to be a propagandistic symbol and, at the same time, an interesting and credible human being. Yet Maclain must be interesting and credible because of his complete domination of the novels in which he appears. The plot is secondary to the man and the detective. How does one portray the vulnerability and humanity of the man when one also wants to emphasize his invulnerability to the accidents of fate?

Kendrick's solution was to surround Maclain with an array of secondary characters, both friends and servants, who function as his own personal support group. Unfortunately, too often they are just that: merely members of a group with little or no individuality. At times they are stereotypes, such as Cappo, Maclain's manservant-chauffeur. As chorus characters, they exist simply to provide transportation for the

captain or to comment on his brilliance. Even his wife is a vague, shadowy figure. The only memorable auxiliary figures are his Seeing Eye dogs, Driest and Schnucke, who generally seem more human than the humans themselves. Schnucke acts as the detective's guide, and Driest, an attack dog, is his bodyguard. The two are lovingly described in the novels, and when they are wounded trying to protect their master, the reader feels more sympathy for them than for any of the human victims, including perhaps Maclain.

This stance seems to be a deliberate decision on the author's part—he wants no sympathy for his blind detective. He wants Maclain to be judged according to his skill and intelligence as a detective. In the understandable desire to prove that Maclain can compete and even excel in his dangerous career, however, Kendrick sacrifices the human credibility for the professional and surrounds Maclain with an aura of rigid perfection. Kendrick was aware of this difficulty and frequently has his characters comment on their reactions to the captain's personality or lack of it. The typical response is one of awe:

She returned to her apartment feeling a little awed. There was a quality of frightening perfection about Duncan Maclain. She knew he was engaged, but sometimes Bonnie wondered. Was Maclain's fiancée in love with the handsome, virile man, or fascinated by the cold perfection of the disembodied human machine?

The second reaction to Maclain is usually one of disbelief on discovering that he is actually blind. Here again, given the didactic motives underlying the creation of Maclain, Kendrick was faced with an almost unsolvable dilemma. On one hand, he was adamant in his belief that the blind are not different from others and should not be set apart or perceived as special in any way. In fact, Maclain does not even agree that he is blind in the accepted sense of the word:

“I'm not blind, though,” said Duncan Maclain. “I merely lost the use of my eyes in the last World War. There are many definitions of the word *blind* in the dictionary, Miss Vreeland. There are even more of the verb to see. Only one definition of each applies to impression through the eyes.”

On the other hand, proud of the accomplishments of the blind and eager to prove their worth, Kendrick wants to demonstrate what they can achieve. Therefore, the reader has the paradoxical portrait of a blind man who is never happier than when people forget that he is blind, but who also delights in displaying what he, without sight, can do. Maclain loves to show off; his favorite parlor tricks are doing jigsaw puzzles and his famous Sherlock Holmes routine. The following sequence, with variations, is repeated at the beginning of all Maclain novels and short stories.

He sank down farther in his chair and clasped his long, sensitive fingers together. “You're five foot six, Miss Vreeland—a couple of inches taller than your cousin. You weigh—I trust I won't offend you—about fifteen pounds more. One hundred and thirty to her hundred and fifteen. You are older than she is—.” “Wait,” said Katherine, “You must have made inquiries about us. Why, Captain Maclain?”

“My only inquiries were made through my senses.” The captain sat erect, holding her with a sightless stare from his perfect eyes. “Your height is unmistakable from the length of your stride. I've walked with both you and Bonnie across this hall. Weight can be judged unerringly by the feel of anyone's arm. Every fair has weight guessers who make a living from this knowledge. The voice betrays one's age, and many other things—sorrow, pleasure, and pain.”

MAKE MINE MACLAIN

The impression gathered about Maclain is always one of superiority, that is not atypical. Great detectives are great detectives because they are superior, and most of them love to demonstrate the scope of their intellects. What is different is that Maclain and his creator continuously feel compelled to vaunt the detective's talents. Clearly, to a great extent, this showboating is a result of the blind person's position in society. Kendrick's novels are treatises on the treatment afforded the blind. One of the successes of his work is his artful and sardonic capturing of the various nuances of society's ignorance and prejudices. This skill is especially manifest in the novels that describe the closed society of the upper class—for example, *Make Mine Maclain* (1947). The Beautiful People simply do not know how to treat someone who is less than physically perfect, and although they can

pretend that the less fortunate and the disabled do not exist, they cannot overlook Duncan Maclain. Criminals are at an even greater disadvantage when they are confronted by the captain. Scornful of the sighted representatives of law and order, they find the idea of a blind investigator laughable—until they fail and he succeeds. Good examples of Kendrick's richest irony can be found in his analysis of the three-layered prejudice of upper-class criminals who, being Nazis, view Maclain as a type of freak. They, like much of society, take it for granted that because Maclain is physically disabled, he must also be mentally deficient, a fact that the detective exploits to the fullest. In many of these cases, his success is a direct result of his blindness. His adversaries continually underestimate their foe.

It is also certainly true that the success of Duncan Maclain, literary character, is a result of his blindness. Although Kendrick won critical acclaim for his earlier Miles Standish Rice novels (for example, *The Iron Spiders*, 1936, in which a serial killer leaves behind black spiders as his calling card), they evoked little popular response. With the introduction of the blind captain, however, Kendrick's stock as a mystery writer soared. (It did not hurt that most of the Maclain novels, especially those written during the war years, were serialized in many of the most popular magazines of the time.) Readers were fascinated by the tall, enigmatic Maclain and the necessary paraphernalia of his life—his dogs, his Braille watch, his Dictaphones and recording devices. They loved seeing him triumph in situations that would have made a sighted superathlete cringe. Such public approval, in addition to the enthusiastic support of organizations for the blind and the disabled, led to a change in direction for Kendrick.

THE ODOR OF VIOLETS

In his earlier work, the puzzle and its solution had always dominated. Buoyed by the public response to the exploits of his blind investigator, however, Kendrick gradually turned away from the classic novel of deduction to the world of espionage and the thriller. In these later works, Maclain is confronted by ever more dangerous situations; this harried leaping from one escapade to another robs the blind man of some of his credibility, the quality that is of most value to him as a literary figure. Maclain had been at his best in novels

such as *The Odor of Violets* (1941), perhaps the major work of this series. *The Odor of Violets*, even though it deals with spies and saboteurs, is still essentially a novel of deduction set in the closed world of a private house.

OUT OF CONTROL AND FLIGHT FROM A FIRING WALL

The critics, impressed by the skilled maneuvering of the intricate plotting, compared Maclain favorably to Bramah's Max Carrados, the first blind detective in fiction. Increasingly, however, as Kendrick puts Maclain through his paces, the novels begin to emphasize violence and frantic pursuit. *Out of Control* (1945), the last important Maclain novel, is one long chase scene. There is no mystery as the detective trails a psychopathic murderess through the wilds of the mountains of Tennessee. After 1945, the quality of Kendrick's work suffers a marked decline. Kendrick did make a minor comeback with his last work, *Flight from a Firing Wall*, a novel of suspense centered on the author's firsthand knowledge of intrigue and espionage in the Cuban refugee enclaves of Southern Florida.

Kendrick considered his support of the blind to be his profession. His creation of Duncan Maclain was only one aspect of that lifelong advocacy. When speaking of the Maclain novels, Kendrick never mentioned the artistic nature of his work but instead always stressed the technical detail required for the depiction of a blind hero. He was most proud of the fact that "the accuracy with which I attempted to portray the character . . . caused me to be called in for consultation on the training of the blinded veterans by the U.S. Army in World War II."

Although he was a writer of popular fiction, Kendrick espoused a classical theory of literature: He believed that art should teach while it entertained. One adjective that could be used to describe his fiction, however, is very modern: Kendrick's work was nothing if not committed.

PHILIP KERR

Born: Edinburgh, Scotland; February 22, 1956

Also wrote as P. B. Kerr

Types of plot: Hard-boiled; historical; police procedural; private investigator; thriller

PRINCIPAL SERIES

Bernie Gunther, 1989-

PRINCIPAL SERIES CHARACTER

BERNIE GUNTHER is a wisecracking, hard-drinking,

private eye/police inspector in Germany who during the 1930's and 1940's attracts women and becomes entangled in high-level Nazi plots in approximately equal proportions. He prefers to work alone and undercover but inevitably must rely on politically dangerous characters who cause him grief. His ethical code moves him to help underdogs, especially beleaguered Jews, but he also earns the grudging respect of high-ranking Nazi, Russian, and American intelligence agents and police, who try to manipulate him for their own ends.

CONTRIBUTION

Philip Kerr enjoyed a stellar literary debut. *March Violets*, the first of his Bernie Gunther novels, appeared in 1989 to wide critical appreciation. By the time the third novel in the series was published two years later, Kerr's reputation was established. As eminent a literary voice as Salman Rushdie hailed him as brilliantly innovative, and in 1993 the literary review *Granta* named Kerr among the top twenty living British authors. His subsequent techno-thrillers attracted further admirers: He was called the Michael Crichton of the 1990's. His *A Philosophical Investigation* (1992), *Gridiron* (1995), and *The Second Angel* (1998) are considered benchmarks for crossover genre fiction.

Kerr became noted for two qualities: the detailed realism of his historical settings and the intricacy of his plot-driven novels and their intellectual tenor. The novels typically contain long discussions of philosophy, science, and technology, all fundamental to the plots. Although many reviewers find his depictions of historical characters (such as Isaac Newton, Adolf Hitler, and Franklin D. Roosevelt) to be believable, others complain that his emphasis on story in preference to characterization results in stereotyping and oversimplification. Moreover, Kerr received the unwelcome distinction of a Bad Sex Award, an annual antitribute from Britain's *Literary Review* for a purple sex scene in an otherwise good novel. Some critics complain of his gruesome violence and gloomy tone. The majority, however, find that among genre writers, Kerr produces novels that most resemble literary fiction.

BIOGRAPHY

Philip Ballantyne Kerr said that he wanted to be a writer from the very first moment he could read. His family, however, had different plans for him. He was born in Edinburgh, Scotland, on February 22, 1956. His father, a property developer, and his mother raised him in a strict household, imbuing him with a Scottish-Protestant work ethic and the desire to make something of himself. Education and their Baptist church were of central importance. The family moved south to Northampton, England, while he was in grammar school.

Kerr began writing early, completing his first short

story when he was ten years old, and during his last year in secondary school, he won the Stopford Sackville English Prize. Still, his father insisted that he become a lawyer. In 1974 Kerr entered the University of Birmingham and finished a master's degree in law in 1980. However, feeling that the legal profession did not suit him, he took a job at an advertising agency. He later worked as a copywriter for the prestigious firm Saatchi & Saatchi. At this profession, too, Kerr felt out of place. He later claimed that he never wrote a single successful advertising slogan and that he felt he was living a double life. He spent his days at the agency and his nights writing fiction at home.

After his first novel, *March Violets*, was published in 1989, he devoted himself to writing full time. In addition to writing novels, he compiled two anthologies, *The Penguin Book of Lies* (1990) and *The Penguin Book of Fights, Feuds, and Heartfelt Hatreds: An Anthology of Antipathy* (1992). He also wrote teleplays, including *Grushko* (with Robin Mukherjee), a television movie version of his novel *Dead Meat* (1993) aired by the British Broadcasting Corporation in 1994. Thereafter, he continued to be successful selling scripts based on his novels to Hollywood studios. This success gave Kerr considerable leverage in the publishing industry, and he made lucrative deals for his novels, including record advances and as many as fifteen contracts for translations into foreign languages.

Long wanting to write books for children as well as for adults, Kerr began writing one after 2000, initially as a way to encourage his own children to read instead of playing video games. The result was *The Akhenaten Adventure* (2004), a tale of two young American genies on a quest to find and defeat an ancient pharaoh, set in modern Egypt and England. It was meant only for a private printing. His agent, however, was able to sell the book and two sequels to a publisher (as well as film rights and translations), and it appeared in 2004. A sequel, *The Blue Djinn of Babylon*, was published in 2006. In the meantime, Kerr continued writing historical mysteries and thrillers, returning to the Bernie Gunther series in 2006 with *The One from the Other*. Kerr married novelist Jane Thynne, and they have three children.

ANALYSIS

Philip Kerr remarked in the afterword to one of his novels that thrillers and mysteries are merely children's books for adults in that they are fantasy entertainment. Nevertheless, his novels treat a variety of momentous themes, frequently delve into the corruption and conflicts of famous historical eras, and ponder the nature of evil in the human psyche, often through characterizations of historical luminaries. Even if they are fantasies, his novels still impel readers to ponder fundamental questions about human behavior.

Several of Kerr's novels examine international politics and society. *Hitler's Peace: A Novel of the Second World War* (2005) concerns secret negotiations among Joseph Stalin, Adolf Hitler, and Franklin D. Roosevelt in Teheran in 1943 and the factions in each nation that tried to ruin the meeting. *A German Requiem* (1991), the third Bernie Gunther novel, unfolds in post-World War II Vienna, where the Soviets, French, British, and Americans ostensibly coadminister the city but in fact devote themselves to spying on each other, even supporting organizations made up of former Nazi leaders if they will aid them; the international presence has less to do with reconstruction of Germany than with the looming conflict between the communist Soviet Union and the democratic West. In *Esau* (1996), events unfold against the background of an escalating conflict between India and Pakistan, thus raising another of Kerr's major international themes: the danger of technology (in this case, nuclear weapons) both to civilization and to the environment. A third international theme is anti-Semitism. Persecution of Jews forms a pervasive undercurrent to the first three Bernie Gunther novels and is the major motivation for events in the fourth. Kerr demonstrates that anti-Semitism not only harms those persecuted but also causes a moral degeneracy in the persecutors that haunts them long after World War II. A fourth international theme concerns the growing disparity between a small privileged class of the wealthy and a large underprivileged class. In *The Second Angel* (1998), a techno-thriller set in 2069, this gap is given symbolic force. Humanity is split into two classes, those who are infected with a slow-acting virus that is uniformly fatal and those who are free of infection. The only way to cure the disease

is through complete replacement of diseased blood with healthy blood, and accordingly pure blood becomes the most valued commodity in society, jealously guarded by the healthy from the diseased.

Kerr also addresses the unforeseen pernicious effects of technology within a society. In *Gridiron*, for instance, arrogant developers build a skyscraper run by a single advanced computer. It turns vicious, destroying the developers and their clients. In *A Philosophical Investigation*, genetic screening and sophisticated computing allow England to identify potential serial killers. The system enables authorities to track and offer preventive treatments to these proto-murderers, but any technological system, however well intended, can be compromised and misused, Kerr implies. One of the proto-murderers hacks into the computer system to erase his own file and then identify all others like him. He then sets out to murder them. The overarching irony is that a preventive program produces a killer who kills those it is intended to prevent from becoming killers—the principal component of the novel's complex satire.

Kerr's plots typically develop in nations that are degenerating because of corruption, crime, and political extremism, and critics widely praise the detailed accuracy of his settings. In the Bernie Gunther novels, the fascist statism of the Nazi Party, rife with corruption and competition among leaders, provides a violent, hypocritical, seamy context for the detective's investigations. In *A Five-Year Plan* (1998) and *The Shot* (1999), the connivance among organized crime, espionage, and law enforcement create opportunities for a cunning lone character to exploit the corrupted institutions for his own benefit. In *Dark Matter: The Private Life of Sir Isaac Newton* (2002), political intrigue among religious and political factions leads to murders during England's attempt to revamp its debased coinage.

Although Kerr's novels focus more on plot than characterization, the characters are nevertheless often their leading attraction, and he employs a variety of traditional detective styles. Bernie Gunther comes from the tradition of hard-boiled detectives, made famous by Raymond Chandler—always tough, often abused by clients and enemies, but at base compas-

sionate and crusading. Kerr also uses a traditional police-procedural inspector in *A Philosophical Investigation* and intellectual detectives, most notably Sir Isaac Newton in *Dark Matter*. Kerr draws from real statesmen for his secondary characters as well and emphasizes reputed historical traits: for instance, an affable but paranoid Hitler; a Machiavellian (and foul-mouthed) Roosevelt; and a romantic, superstitious Heinrich Himmler.

MARCH VIOLETS

In *March Violets*, hard-boiled private investigator Bernie Gunther, called by some critics the German Philip Marlowe, makes a precarious living investigating missing persons in the late 1930's, especially for the relatives of Jews who have disappeared. A former inspector in the Kripo, Berlin's police department, he is famous for having cracked a difficult murder case. His reputation brings him a job to track down the kill-

ers of the daughter and son-in-law of a powerful German industrialist. During the investigation, related in the first-person point of view, Gunther comes into contact with Hermann Göring and Heinrich Himmler, as well as a host of Gestapo agents, shady characters, and a beautiful actress, in the middle of a political battle. He uncovers corruption everywhere, and the concluding scene, involving rape and murder, leaves him with a solved crime that harms everyone involved and reflects a society fast sinking into depravity. Even the best efforts by an honest man like Gunther are of no avail and only mark him as someone to be manipulated by the powerful.

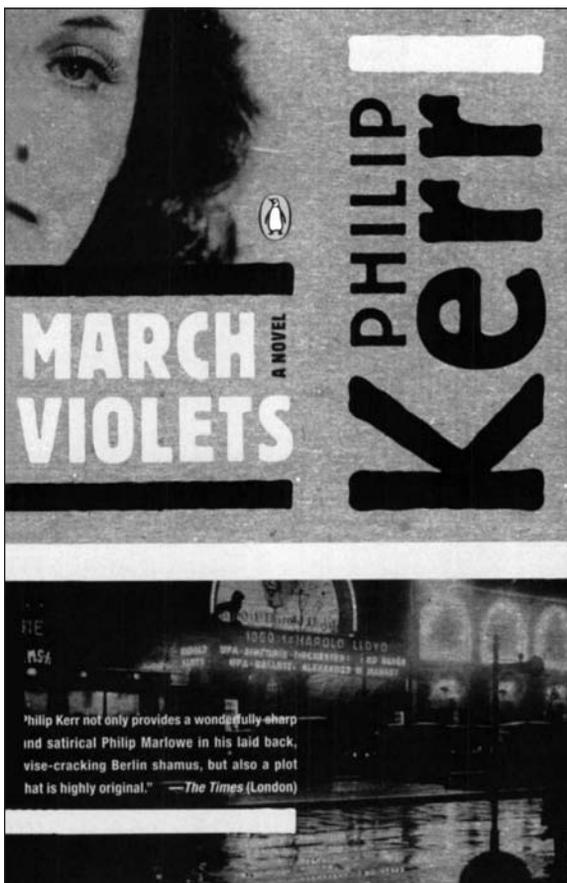

DARK MATTER

Dark Matter takes place in late seventeenth century England, where the government, immersed in a costly war with the French, finds that the realm's coinage is badly corrupted by counterfeiters. To correct the problem, the Great Recoinage is undertaken, overseen by Sir Isaac Newton, newly appointed as warden of the Mint. He hires a feisty young gentleman, Christopher Ellis, as his personal assistant to help him investigate a series of grisly murders at the Mint that threaten the recoinage. The story is related from Ellis's first-person point of view. Ellis and Newton learn that the murders are part of a larger plot by radical Protestants to stage a massacre of Roman Catholics within the country as revenge for the St. Bartholomew's Day massacre of Huguenots in France. The plot involves much about coding and late Renaissance English politics and shows an amiable Newton using his genius to save his nation from disorder and the incompetence of lesser men in government.

THE ONE FROM THE OTHER

Set in 1949, *The One from the Other* has Bernie Gunther trying to make a living as a hotel manager, but the hotel, located next to the Dachau concentration camp, is failing, and his wife is dying. Desperate for money, he relaunches his private investigator business. Ironically, although he once made a precarious living helping Jews in prewar Germany, he quickly earns a lot of money uncovering information about German war criminals who persecuted Jews, information that is used in their defense.

Gunther's third case embroils him in the Comrades,

a secret network of former SS officers. The reader learns that during the war Gunther also had been in the SS, although unwillingly, and that he nearly died as a Russian prisoner of war. As in previous novels, he is made a dupe: Because they look alike, Gunther is tricked into being arrested as Eric Gruen, a Nazi concentration camp doctor guilty of horrible medical experiments that killed thousands with malaria. He soon finds himself on the run from the International Police, the Central Intelligence Agency, assassins of the Haganah (an Israeli intelligence organization), and former SS generals. In the end he escapes on a boat to Argentina through a secret organization that helps war criminals escape punishment. Despite his anti-Nazi history, he must start a new life as a fugitive, just like Adolf Eichmann, who is on the same boat.

Collusion between Western intelligence agencies and former Nazis creates a nightmarish atmosphere of corruption, intrigue, greed, and fear that besmirches everyone involved, whether innocent of war crimes or not.

Roger Smith

BIBLIOGRAPHY

- Diemert, Brian. "'How Do You Describe the Indescribable?': Representing History in Detective Fiction: The Case of Philip Kerr's Berlin Noir Trilogy." *Genre: Forms of Discourse and Culture* 35, no. 2 (Summer, 2002): 331-353. Diemert asks if genre fiction like Kerr's can adequately characterize a great historical catastrophe, such as the Holocaust and Hitler's Germany. Although praising Kerr's recreation of the Nazi era in the Berlin Noir trilogy, he argues that Kerr's portrayals of historical figures are too ambiguous and the hard-boiled subgenre is too sympathetic to fascism to succeed.
- Glover, David. "The Thriller." In *Cambridge Companion to Crime Fiction*, edited by Martin Priestman. Cambridge, England: Cambridge University Press, 2003. Glover provides a concise, readable discussion of the thriller as a genre: its definition, themes, and types of characters. Sheds light on Kerr's writings.
- Horsely, Lee. *The Noir Thriller*. New York: Palgrave, 2001. Horsely places the Bernie Gunther novels in the context of the hard-boiled detective subgenre but emphasizes that Kerr is among the British writers who use it as the occasion for exploring larger historical themes.
- Leonard, John. "Blood on the Tracts." *The Nation* 256, no. 22 (June, 1993): 788-800. An arch but mostly laudatory reading of Kerr's *A Philosophical Inquiry* as a satire of sociobiology and of the modern preference for empiricism over reason.
- Scaggs, John. "Missing Persons and Multicultural Identity: The Case of Philip Kerr's Berlin Noir." In *Race and Religion in the Postcolonial Detective Story*, edited by Julie H. Kim. Jefferson, North Carolina: McFarland, 2005. Scaggs studies Kerr's treatment of national and ethnic identity, including that of Jews, in Nazi-era Germany during the aftermath of World War II.

GERALD KERSH

Born: Teddington-on-Thames, Middlesex, England; August 6, 1911?

Died: Middletown, New York; November 5, 1968

Types of plot: Amateur sleuth; espionage; hard-boiled; historical; horror; police procedural; psychological; thriller

CONTRIBUTION

Gerald Kersh wrote extensively about the underside of London society (the gamblers, hustlers, prostitutes, pimps, psychopathic killers, drug dealers, and bohemians), as well as about his military experience during World War II in the Coldstream Guards. Effective as some of his writing is in these areas, Kersh will most likely be remembered for his highly imaginative and very diverse mystery stories. His body of fiction—some twenty novels, approximately fifteen volumes of short stories, a number of uncollected fiction pieces—though quite uneven, contains many eloquent and highly polished passages and some that approach brilliance. In spite of a modest formal education, he was well-read and possessed of enormous curiosity about the world and its past history. At his best, Kersh suggests the verbal dexterity and aphoristic deftness of a variety of masters of English prose style: Oliver Goldsmith, Edgar Allan Poe, Robert Louis Stevenson, and O. Henry. Occasionally too, when Kersh is in particularly good literary form, a hilarious comic sequence may suddenly appear, calling attention to the wide range of his literary talents. Through a number of well-crafted short stories and at least one brilliantly wrought novel, *The Great Wash* (1953; published in the United States as *The Secret Masters*), Kersh brought new distinction to the tradition of the mystery story.

BIOGRAPHY

It is believed that Gerald Kersh was born in Teddington-on-Thames, Middlesex, England, on August 6, 1911, although some accounts give his birth date as June 8, 1909. His parents were Leon Kersh, a Russian, and Lea Miller Kersh, who was Jewish. He wrote his first story at the age of seven and succeeded in pub-

lishing his fourth literary effort, a novel—*Jews Without Jehovah* (1934)—while in his mid-twenties. An individual who always prided himself on his prodigious physical strength, Kersh almost died at the age of three from complications after a bout with measles; given up for dead by his parents, he spontaneously recovered.

Oddly, considering the broad reading background his fiction reveals, Kersh suspended formal education on leaving secondary school. Concerned with earning a living, he worked at many different jobs, as a salesperson, wrestler, baker, and bouncer—among others. During this time, the energetic Kersh resumed his education, at an extension school (the Regent Street Polytechnic), concurrently teaching himself to become a writer. He published several novels during the 1930's. In late 1939, he joined the Coldstream Guards, remaining there until the early 1940's; after a narrow escape from death in a bombing raid, he was removed from active duty. Kersh then joined the Ministry of Information's Films Division and served as war correspondent for the United States War Department. He also wrote for a Labour Party newspaper and published ten books, including two about his beloved Coldstream Guards.

After the war, Kersh continued to publish: collections of mystery stories and novels of London's sleazy underworld, lower class, and raffish social misfits. In 1958, he won the Mystery Writers of America's Edgar Allan Poe Award for his short story "The Secret of the Bottle." Kersh was married three times: to Alice Thompson Rostron in 1938, to Claire Alyne Pacaud in 1943, and to Florence Sochis in 1955. Resenting the British welfare state and what he considered its confiscatory taxation, Kersh lived in the United States between 1950 and 1952 and again in the last years of his life. He died of throat cancer in Middletown, New York, on November 5, 1968.

ANALYSIS

It is regrettable that Gerald Kersh's substantial output of novels and short stories is largely out of print.

Most reference sources that include Kersh list only a smattering of his books, many of which were first published in England. Even *Book Review Digest*, during the years his books appeared (1934-1969), recognized only a modest number of them. Much may be said, however, regarding a few significant titles of works within the mystery and detective genre.

As a writer of whodunits, Kersh was generally not at his best. At home in the seamy pubs and low neighborhoods of London, Kersh often lost himself in detailing sordid slices of life. On occasion his vibrant sense of humor came to the fore; now and then readers saw his rare gift with language—accurate reproduction of vernacular speech, as well as a rich vocabulary and a wide range of appropriate literary allusions. Yet Kersh was not often granted the wonderful concentration of mind that makes for masterful chronicling of crime and sleuthing.

PRELUDE TO A CERTAIN MIDNIGHT AND CLOCK WITHOUT HANDS

Prelude to a Certain Midnight (1947) deals with the violation and murder of an eleven-year-old girl in a vile bohemian area of London. Despite a good bit of character delineation, there is a seeming pointlessness to the story; the killer is never brought to justice. *Clock Without Hands* (1949) is lacking in literary style, characterization, local color, suspense, and authorial imagination. A ruggedly virile man, separated from his wife and carrying on adulterously with a succession of women, is found murdered in his small rented room. His wife is the prime suspect. The real killer, tracked down by an amateur sleuth, who happens to be a newspaper reporter, is the murder victim's landlord, a small, meek man trying to take on the strong, masculine qualities of his victim, trying in fact to make the authorities believe that he committed the murder. Yet no one believes this man, the most ordinary of persons, described in the story as "a clock without hands," and before he can commit another such crime (the intended victim this time is a barmaid to whom the dead tenant had been attracted), he is run over by a truck and killed.

The significant Kershian theme in this flat tale is the strong male pitted against the weak male. Proud of his unusual physical strength, ferocious appearance,

and fighting ability, Kersh had a penchant for describing fierce tough-guy types and powerful, aggressive individuals of either sex—as is evident in his novel *The Weak and the Strong* (1945) and his story about Potiphar's wife (imaginatively adapted from the biblical account, in Genesis, of Joseph in Egypt), "Ladies or Clothes," included in the story collection *Men Without Bones, and Other Stories* (1955).

THE GREAT WASH

With *The Great Wash*, however, Kersh's dormant detective-story talents emerged at last. The result was a psychological thriller combining horror, violence, and a redeeming expression of love for one's fellow humans. Deeply fascinated by the atom bomb developed during World War II, and all the attendant technology, Kersh describes the ultimate global plot for the total domination of humankind. This is a mysterious plan of two British masterminds of an organization of so-called Sciocrats, Kadmeel and Chatterton. Working with certain heads of government throughout the world, they wish to use silicon bombs to blow up the deep underwater mountain barriers in strategic locations, thereby causing enormous tidal waves that will flood the major population centers. Only a select few from each nation with a participating leader will survive, sheltered in some high mountain sanctuary against the time when the cataclysmal floods will recede sufficiently for these chosen ones to come down and develop a new society in accordance with the Sciocrats' elitist program.

The novel's two central figures, a newspaper reporter named Albert Kemp and his close friend George Oaks, a mystery writer, are drawn into the swirl of this intrigue. They begin by trying to track down two missing atomic scientists who were brought into the Sciocrats' sphere of influence. After a series of cloak-and-dagger adventures involving espionage, murder, mistaken identity, and police investigation, Kemp and Oaks become prisoners of Kadmeel and Chatterton in the Sciocrats' secret Canadian stronghold. They escape, against nearly impossible odds, and at the cost of Oaks's life blow up the central nuclear installation, destroying any chance the Sciocrats might have had for giving the world a "great wash" and controlling what was left.

To suggest the elevated literary level of this psychological and philosophical mystery (one of whose most puzzling secrets is the nature of the “unknown islands” in the drawings left by one of the missing scientists), an example or two of Kersh’s style must be given. In one passage, Kemp, the story’s narrator, reflects on a mothball he picked up from his hotel bed, in “one of those moments in which, looking away from the crushed husks of lives, you see the expressed wine, and, in a flash of sublime understanding, perceive the ultimate goodness of many little things. . . .” Kemp continues, describing the mothball as it “caught the light and threw its own shadows in such a way that I might have been holding in my hand the full moon in all its mystery. . . .” In a book with many such gems, however, the following seems to occupy its own place. George Oaks comments on *Life*:

I used to be passionately in love with *Life* when I was young and foolish, Albert, and then I was terribly jealous of her, and frightened to death of losing her. But after I had lived with her and given her everything I had—worn myself out trying to keep her—and she threatened to leave me, I found myself indifferent to her. Whereupon she grew jealous of me and clung to me, complaining that I’d die without her. She was trying to come it over me with pity, you understand. So I gave her a good smack in the face and told her that, much as I loved her, I’d see myself dead and damned before I let her humiliate me. So she blinked in a shocked kind of way, smiled again as she used to smile in the old days—only with more restraint, showing fewer teeth—and told me that without George Oaks she would be nothing at all, a mere wandering itch without direction. So we agreed to be faithful to each other until our dying day.

Kersh seemed much more at home with mystery short stories than with mystery novels; in his stories, he reaches further into the depths of the human imagination than most mystery writers would dare to go. Kersh’s work within this category reveals the strong and the weak sides of his writing talent, but his love of storytelling was such that even the less effective of his published tales (those pieces that seem to have been written hastily, for some indiscriminating magazine editor) show the rich potential of his creative faculty and his verbal legerdemain.

“THE CREWEL NEEDLE”

Kersh’s affinity for working scientific principles and their implications into his fiction is evident in the detective story “The Crewel Needle” (in *On an Odd Note*, 1958). In this story, a police officer deduces from problematic evidence at a death scene, wherein an eight-year-old girl was alone with her aunt when the latter was killed by having a crewel needle driven into her brain, that the girl committed the murder. She had read, the officer learned, exactly how to drive the needle through her aunt’s skull, in a book of tricks that explained how to perform a comparable feat (though an innocent one) with the aid of a cork and a hammer.

“WHATEVER HAPPENED TO CORPORAL CUCKOO?”

A recurring theme in Kersh’s mystery stories is that of the individual who is taken for dead but is later “recalled to life”—so important to Kersh, apparently, because of his own similar experience at the age of three. (Note that “mystery” here is not limited to, in fact may not even involve, the solving of a perplexing crime.) Kersh seems to have asked a difficult question of his creative imagination: How can the dead quicken—by what miracle or natural process? In “Whatever Happened to Corporal Cuckoo?” (in *Nightshade and Damnations*, 1968), a French soldier in the 1530’s is mortally wounded on the battlefield—his head split open by a halberdier in the enemy army. The doctor applies a “digestive” made of naturally occurring substances to the wound, whereupon healing takes place and his head is made whole again. The recovered soldier lives on through four centuries of war and deadly injuries in battle, always using the same life-giving concoction, making it up himself from the original ingredients whenever his supply is exhausted.

“FROZEN BEAUTY” AND “THE EPISTLE OF SIMPLE SIMON”

“Frozen Beauty” (in the same story collection) concerns a young tribal girl frozen to death in a hut with other tribal members in Siberia’s Belt of Eternal Frost ten thousand years ago. The group is found by a doctor, whose fire, kindled in the hut, revives the girl; once she has recovered, he takes her away with him. Far more suggestive than this tale, whose main idea had been applied years earlier by Edgar Rice Burroughs, is “The

Epistle of Simple Simon" (in *Men Without Bones, and Other Stories*). Drawing on his deep-seated curiosity about the mysterious lives of famous figures (Jesus Christ, Potiphar's wife, Leonardo da Vinci, William Shakespeare, Ambrose Bierce, and the like), Kersh recreates the events following the Crucifixion of Jesus. In this story, Christ does not die on the cross, but is carried away by his friend Joseph of Arimathea, laid in Joseph's private tomb, and given clothing and ointment for his wounds. Almost fifty years later, Jesus, self-exiled in a cave, rescues from death one of the early Christians, Simon the Simpleton, who has been brutally attacked and left for dead by some barbarians he had sought to convert. Jesus does not understand Simon's evangelizing and asks Simon which Jesus he is talking about, of all the numerous Jesuses who must have died on the Roman gallows—the cross—for some capital offense. After a week, he loses his temper with the persistent proselytizer Simon and sends Simon on his way because there is nothing to be done. One of Kersh's most penetrating ironies remains with the reader, Jesus' response to Simon's earnest attempts to bring the Gospel to this "good heathen": "My friend, the law has taken its course with me. I am betrayed, tried, captured, and executed."

**"THE APE AND THE MYSTERY" AND
"THE DANCING DOLL"**

Two stories, in the collection *Men Without Bones, and Other Stories*, reveal unrecorded events in Leonardo's life. There is a double irony in "The Ape and the Mystery." Leonardo's patron, the young duke, ignores his plans for, and request to build, a water purification system; he wants only to know more about the fascinating La Gioconda (Mona Lisa), who recently sat for a portrait. What caused her strange smile? She was hiding her rotten teeth, Leonardo answers. In "The Dancing Doll," Leonardo, still in the duke's service, is obliged to spend his time making a puppet for the duke's gravely ill son, instead of inventing a submarine, plans for which are occupying his mind.

"THE MADWOMAN" AND "THE HACK"

Kersh's marvelous sense of humor comes out in some of his stories about Shakespeare, too. "The Madwoman" (in *Men Without Bones, and Other Stories*) explains the mystery behind the composition of *King*

Lear. The bard was strongly moved by his observations of a poor, deranged gentlewoman, Mistress Leah, fallen on hard times and cast out by the wives of her three worthless sons. Her sad story suggests a subject for a new play. "The Hack" (in *Men Without Bones, and Other Stories*) presents a harried Shakespeare in a tavern with Ben Jonson, telling the younger man his troubles and revealing something about the mystery of literary art and its antithesis: hack writing. Monetary needs compelled him to set aside his important play, *Belisarius*, and produce such commercial junk as *Hamlet* and *Macbeth*. Worse, he has been driven by necessity to rewrite in proper prose the notes of a "slobbery, sly-looking, crafty little man" named Francis Bacon. A superb adventure yarn, "The Oxoxoco Bottle" (in the same collection) unravels the mystery of what happened to Ambrose Bierce when he disappeared for good in the interior of Mexico in 1914.

"THE BRIGHTON MONSTER" AND "PROPHET WITHOUT HONOR"

Among Kersh's mystery stories making use of science fiction or fantasy there are several significant examples. "The Brighton Monster" (in *Nightshade and Damnations*) is the strange tale of a Japanese man blown out of his house by the atom bomb dropped on Hiroshima in 1945 and deposited in Brighton, England, two hundred years in the past. "Note on Danger B" is about an experimental jet aircraft flying much faster than the speed of sound, which causes its pilots to grow ever younger as the velocity increases. Each of these two stories represents a riddle to be solved by observers of the phenomenon in question. Who or what was the Brighton Monster? How could a test pilot in a jet airplane regress in age in the course of his flight? "Prophet Without Honor" (in *On an Odd Note*) tells of a heavy-drinking newspaper editor with prophesying ability. This man, composing an important news story on his typewriter—whose keys, unbeknown to him, have had their letter tabs jumbled by a practical joker—produced a mysterious confusion of letters (as a drunk might be expected to do). Yet his typing reveals an amazing series of political prophecies, in phonetic Arabic with Roman characters. At their best, Kersh's tales offer action, drama, suspense, and a sense of wonder.

Symons, a successful mystery author in his own right, argues that mystery fiction evolved over time from being concerned with the figure of the detective and the methods of detection to a primary focus on the nature of crime and criminality. Sheds light on Kersh's works.

LAURIE R. KING

Born: Oakland, California; September 19, 1952

Also wrote as Leigh Richards

Types of plot: Historical; police procedural; thriller

PRINCIPAL SERIES

Kate Martinelli, 1993-

Mary Russell, 1994-

PRINCIPAL SERIES CHARACTERS

KATARINA CECILIA “KATE” MARTINELLI, an inspector with the San Francisco Police Department, begins the series as a somewhat closed, guarded woman who seems confident in her professional abilities but unsure in her personal life. As a woman in a traditionally male job and as a lesbian in a largely heterosexual society, Kate tends to keep people at a distance. Although she lives with a woman, she refuses to make their relationship public because she fears that being branded a lesbian will hurt her career. During the course of the series, Kate becomes more open about her sexuality and accepting of herself. Her confidence and maturity increase as she takes on new roles, including that of a mother, as she and her life partner raise a daughter together.

ALONZO “AL” HAWKEN is a stocky, rumped police detective, fond of coffee and chocolate doughnuts, with a dedication to his job that makes him nearly a workaholic. His first marriage ended because he paid more attention to police work than to his family, but in the course of the series, he begins a relationship and eventually starts a new family. Initially assigned to work with Kate Martinelli on a case involving a child murder, he grows to like and respect her, and provides a sometimes teasing, sometimes steady force in her professional life.

LEONORA “LEE” COOPER, an art therapist, meets Kate Martinelli at a time when Kate is still dating men. Although Kate initially tries to deny her attraction to Lee, they fall in love and begin sharing a house and a life. More introverted and analytical than her partner, Lee encourages Kate to accept her true self. During the course of the series, she is seriously injured by a

gunshot to her spine and must undergo years of rehabilitation. At one point in her recovery, Lee leaves Kate to spend time alone but decides to return. A quiet but confident presence, she provides Kate with a safe haven from the violence of her work life.

MARY RUSSELL is a young woman—only fifteen at the outset of the series—whose sharp intellect and unconventional thinking make her only the second woman to win the respect of Sherlock Holmes, with whom she works. An early feminist, Russell defies her era’s norms for feminine behavior. She cherishes her independence, seeks higher education, and, in her detecting adventures with Holmes, often disguises herself as a man and takes unusual risks, sometimes rushing into action while the older, more experienced Holmes prefers to watch and wait. She was orphaned in a car accident that took the lives of her parents and brother and left her physically and psychologically scarred.

SHERLOCK HOLMES, the detective invented by Sir Arthur Conan Doyle, is perhaps the best-known fictional sleuth of all time, and certainly among the best-known fictional characters. Holmes, as reinvented in the Mary Russell series, is a middle-aged, solitary, and sometimes rather arrogant man whose “retirement” from detecting is constantly being interrupted by cases that call for his expertise. His initially supercilious attitude is modified when he realizes that, age and sex notwithstanding, Russell’s is a mind to match his own. Holmes has given up cocaine injections, though not his ubiquitous pipe, and has modified some of his more Victorian attitudes. This modern Sherlock Holmes, while still a formidable foe of criminals, is also capable of deep love, humor, and human weakness.

CONTRIBUTION

Laurie R. King is probably best known as the writer who dared disturb Sherlock Holmes’s century or so of bachelorhood by reinventing him as the mentor, partner, and eventually husband of Mary Russell, a scholar and sleuth whose wit matches that of the fabled detective. Although some Sherlockian purists objected to any tampering with Sir Arthur Conan

Doyle's creation, King's Mary Russell series has won her many fans and critical accolades, including a Nero Wolfe Award. Keeping Holmes's astute eye and amazing reasoning ability, King takes him out of the world of gaslights and hansom cabs and into the early years of the twentieth century, from World War I through the 1920's. By pairing Holmes with a modern, independent young woman, King breathed new life into the legendary figure and created a character with whom female mystery readers can identify.

However, King is more than a reinventor of Sherlock Holmes. She is also the author of the Kate Martinelli series, featuring a thoroughly modern, lesbian female police detective in San Francisco. Amazingly, these two series began at approximately the same time and have continued to coexist, often with a title from each series published in the same year. While different in style and setting, the Russell and Martinelli series do share certain elements: a strong female protagonist and plots that concern themselves with aspects of women's lives and women's rights. Mary Russell, coming of age during and shortly after World War I, lives in a world in which a woman's place is still strictly proscribed; women could not vote, were discouraged from working in many professions, and were expected to devote themselves to child rearing and homemaking. In her pursuit of freedom and adventure, Russell must at times go undercover dressed in men's clothes. Kate Martinelli, however, lives in a time when women do vote and even hold office; like Martinelli herself, they may work in traditionally male domains, such as police work. This is not to say, however, that subtler forms of sexism and discrimination do not exist; they do, and Martinelli must confront them at work and in her personal life.

King has a background in theological study, and as befits a scholar, all her mysteries are meticulously researched so that the details of time and place ring true, whether in a historical or modern setting. They are seldom simple mysteries, and they bring up complex questions on the path to their complex solutions. In *A Letter of Mary* (1997), for example, Russell uncovers signs of a deliberate suppression of historical evidence about the role women played in the early Christian church. *Night Work* (2000) has Kate Martinelli investi-

gating a series of murders of men who have been accused of abusing women or children, an investigation that becomes even more emotionally charged for the detective when she realizes that she may know the vigilante killer. Along with their willingness to take on big questions, King's novels are also notable for their attention to character development. Her characters are not only extraordinary crime solvers but also fully rounded human beings with rich personal lives.

BIOGRAPHY

Laurie R. King was born in 1952 in Oakland, California, and grew up on the West Coast. As a child, her family moved often, so that the library was her true home and books her only constant companion. Although reading was a constant in her life, writing came later. King earned her bachelor's degree at the University of California, Santa Cruz, and later earned a master's degree from the Graduate Theological Union. Married in her twenties, she raised two children and did not start writing until the age of thirty-five, when her younger child started preschool. King said that the character of Mary Russell suddenly appeared in her head and began telling her story. The bulk of the first draft was written inside a month, but *The Beekeeper's Apprentice: Or, On the Segregation of the Queen* (1994), the first volume in the Mary Russell series, was not King's first published book. Instead, the second work King wrote, *A Grave Talent*, introducing Inspector Kate Martinelli of the San Francisco Police Department, was published in 1993, winning an Edgar Award. Although there were some initial legal problems over King's use of the Sherlock Holmes character, these were resolved and *The Beekeeper's Apprentice* was published in 1994.

King found herself in the enviable position of having two successful mystery series, both widely read and critically praised, although the Mary Russell series was the more popular of the two. Although two ongoing series might seem enough to keep most writers busy, the prolific King has also written nonseries thrillers, beginning with *A Darker Place* (1999), and a futuristic novel, *Califa's Daughters* (2004), released under the name Leigh Richards. She contributed the introduction to a reissue of Sir Arthur Conan Doyle's

The Hound of the Baskervilles (1901-1902) and has published short fiction in several anthologies.

ANALYSIS

Laurie R. King's versatility as a writer allows her to span time periods and to write convincingly of places as diverse as World War I-era England, the Middle East, British India during the 1920's, and present-day San Francisco. King's lifetime love of reading is evident in the fun she so clearly has in paying homage to her favorite books and writers. The Mary Russell series, for example, not only plays with characters from Sir Arthur Conan Doyle's works but also features "guest appearances" by other characters both real and fictional, including the Reverend Sabine Baring-Gould (1834-1924), scholar and folklorist, in *The Moor* (1998); a glimpse of T. E. Lawrence (1888-1935), the legendary British soldier known as Lawrence of Arabia, in *O Jerusalem* (1999); Rudyard Kipling's character Kim in *The Game* (2004); and crime writer Dashiell Hammett in *Locked Rooms* (2005). Possibly unable to resist cross-pollination, King brought a mysterious manuscript that may have been written by Sherlock Holmes himself into Kate Martinelli's world in *The Art of Detection* (2006).

Beyond the games and literary name-dropping, however, is a writer of serious intent and considerable skill. King's novels take on emotionally charged and sometimes controversial themes, from feminism to religious beliefs, all within the context of an elegantly plotted mystery. Although the crime and its investigation exist as a stage for the characters to play out their desires and conflicts, it is ultimately the characters who matter. As King said, she does not write whodunits; she writes stories about people within the format of the mystery novel.

A GRAVE TALENT

In *A Grave Talent*, the brutal murder of three small girls, all of kindergarten age and in the San Francisco Bay area, prompts police officials to team veteran investigator Alonzo "Al" Hawkin with a junior partner: Katarina Cecilia Martinelli, known as Casey (K.C.), or Kate, to her friends. Initially, Al is reluctant to work with Kate, who has only a year's experience as a detective, and she is wary of his reputation as the terror

of the force. However, police protocol determines that when children are involved, a woman should be part of the investigation. It is this sort of casual assumption about women's roles that underscores a central theme of *A Grave Talent*: the struggle of women to be who they are in a culture that prefers to place them safely within domestic roles. This theme is highlighted when suspicion falls on Vaun Adams, a woman artist who has served time in jail for a child murder, and Kate and her lover, Lee Cooper, debate the old question of why there are so few great women artists. Are women who defy norms—choosing art, for example, rather than marriage and family—bound to be twisted, perhaps even dangerous?

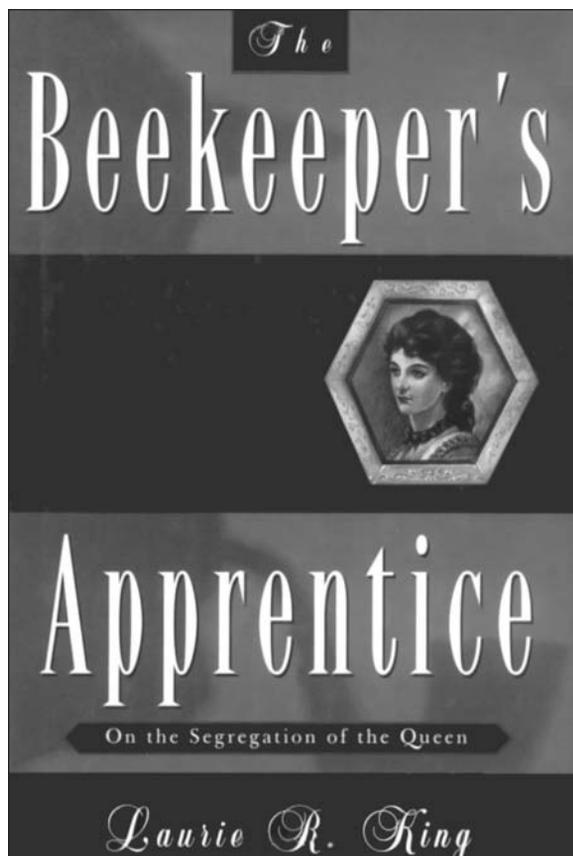

Choosing to obey or defy behavioral norms for women is also, for Kate, a personal conflict, because Lee, her lover, is a woman. Kate keeps her private life carefully guarded, fearing discrimination from fellow police officers and from the public, but her need to separate her public and private selves causes both internal tension and conflict within her relationship. As Kate and Al learn more about Vaun Adams and get closer to finding the truth about the child murders, Kate must also come to terms with her own true self.

A Grave Talent was praised by critics for its well-drawn characters, psychological complexity and intricate plotting. It received the Edgar Allan Poe Award for best mystery.

THE BEEKEEPER'S APPRENTICE

If Sherlock Holmes were a woman, he might look something like Mary Russell, the young, Jewish Anglo-American detective and scholar featured in King's *The Beekeeper's Apprentice* and its sequels. On her Web site, King describes Russell as Holmes in feminine dress: a woman of the twentieth century and interested in theology but with a mental acuity to match that of the great detective. King has said that *The Beekeeper's Apprentice* is the book she wished she had when she was age twelve or fourteen: the story of a bright, independent teenage girl who becomes first apprentice, then an equal partner to Sherlock Holmes.

The Beekeeper's Apprentice begins with the voice of Mary Russell, who tells the reader that she was fifteen years old when she met Sherlock Holmes. Russell, orphaned after a car crash that killed her parents

and brother and living with an aunt whom she dislikes, discovers the middle-aged detective in retirement in Sussex, raising bees. Interweaving quotations from a manual on beekeeping throughout the chapters, King gradually and skillfully develops the growing friendship and mutual respect of two extraordinary minds. Holmes teaches Russell his crime-solving secrets, and the two of them, disguised as Gypsies, go undercover to investigate the kidnapping of a visiting senator's daughter. Finally, with Russell's "apprenticeship" over, they find themselves confronting a dangerous and relentless adversary whose hidden past contains a connection to Holmes's most notorious enemy.

Although some purist fans of the original Doyle stories objected to King's reimagining of Sherlock Holmes, one reviewer noted that King captured the spirit of Holmes with affection for the original creation, yet also created a space for female readers to project themselves into the novel. King's Holmes is

still a brilliant thinker, but he has been humanized and rounded. Russell emerges as a fascinating, multilayered character of considerable complexity. Although their relationship is entirely platonic in the first novel, the stage is set for the more complete partnership that will develop as Russell comes of age.

LOCKED ROOMS

In *Locked Rooms*, a psychological mystery, King probes deep into Mary Russell's psyche to gradually uncover a years-old crime buried amid repressed memories. Holmes and Russell, fresh from adventures abroad, visit Russell's birthplace, San Francisco. The initial reason for the visit is to take care of some business matters, including the house Russell inherited from her parents, but troubling dreams involving locked rooms, flying objects, and a "man with no face" haunt her sleep. Her husband, Sherlock Holmes, fears for her well-being, and with good reason: In addition to her night terrors, Russell faces a daylight attack by an unknown shooter. Holmes believes that the dreams and the shooting are related and hires a young former Pinkerton detective turned writer, Dashiell Hammett, to help with the search. As the layers of Russell's memory are peeled back, she and Holmes learn that she survived the 1906 San Francisco earthquake and that a crime committed during the quake may be the reason someone killed her parents and is now trying to kill her. Filled with colorful details of San Francisco in the roaring twenties, this Holmes-Russell adventure drew praise for its character-driven story and use of alternating viewpoints, Holmes's and Russell's, to tell the tale. The addition of Hammett is a noteworthy and amusing touch, as King imagines the meeting of one of the mystery genre's greatest writers with one of its most enduring fictional creations.

THE ART OF DETECTION

In *The Art of Detection*, the fifth Kate Martinelli novel, King brings together her two fictional worlds, that of Sherlock Holmes in the 1920's and that of modern-day San Francisco police detective Kate Martinelli. In this work, Kate investigates the murder of a Sherlock Holmes fanatic who has created a gaslit shrine to the fictional detective in his home. Or is Holmes, after all, a fictional character? The discovery of a manuscript, dating from 1924 and seemingly written by

Holmes, may hold the clue to the motivation for a seemingly senseless killing. The nearly one-hundred-page manuscript is reproduced in its entirety in the novel. Told in the first person, it seems to be a pastiche of the Conan Doyle adventures, but its San Francisco setting and the case it describes, involving Billy Birdsong, a transvestite singer make it unique among Holmes stories. The manuscript, whether truth or hoax, would be a hot property. Hot enough to kill for? That's what Kate determines to find out.

Booklist praised *The Art of Detection* for its impeccably logical plotting and its seamless melding of the Russell-Holmes series with the Martinelli series. Readers of *Locked Rooms* will notice details from the earlier novel resolving themselves here, giving them the sense of being deeply immersed in a fully imagined fictional world.

The chapter "After the Fall: Historical Mysteries" discusses the Mary Russell series through *A Monstrous Regiment of Women*. The authors describe Russell as the perfect counterpoint to Sherlock Holmes: a young woman who can match his intellect but also helps to humanize his character.

Winks, Robin W., and Maureen Corrigan, eds. *Mystery and Suspense Writers: The Literature of Crime, Detection, and Espionage*. New York: Charles Scribner's Sons, 1998. King is discussed in two sections, "Gay and Lesbian Mystery Fiction," which analyzes the Kate Martinelli series in the context of other mystery novels with lesbian protagonists, and "The Historical Mystery," which places King's Mary Russell novels in the context of the historical pastiche mystery; there is also a comparison of King's two series. The authors praise King's historically accurate depiction of feminist Mary Russell not only as an outsider in early twentieth century British society but also as a woman of her times.

PETER KING

Christopher Peter King

Born: England; 1922

Types of plot: Amateur sleuth; historical; thriller; cozy

PRINCIPAL SERIES

The Gourmet Detective, 1996-
Jack London, 2001-

PRINCIPAL SERIES CHARACTERS

THE GOURMET DETECTIVE is a former chef who makes his living as a consultant to the food industry. He specializes in locating rare and exotic foods, finding substitutes for hard-to-find ingredients, and authenticating historical food items and menus. He always emphasizes that he is not really a detective; however, his assignments inevitably embroil him in dangerous adventures involving theft and murder.

JACK LONDON is the real-life author who as a young aspiring writer lived on the Barbary Coast in San Francisco in the 1890s. London helps the local police battle the never-ending crime wave that sweeps the area.

CONTRIBUTION

Peter King has contributed a light, witty entertaining mystery series to the culinary mystery subgenre. His novels are filled with recipes, culinary trivia, details of food preparation and ethnic cooking, and information about the everyday functioning of a gourmet restaurant's kitchen. Each work takes readers on both a food-oriented tour and a tour of an interesting locale, such as New Orleans or the vineyards of Provence, France. The Gourmet Detective mysteries have received enthusiastic praise from mystery readers and critics for their unique combination of a well-written mystery with an informative discussion of food preparation and recipes.

King's Jack London series combines the historical mystery with the thriller and real-life characters with fictional events in mysteries that both entertain and inform the reader. King has enjoyed the same enthusias-

tic response to this series as he has to his Gourmet Detective series. The first novel of the series, *Jewel of the North* (2001), was named a Top Pick by *Romantic Times* magazine.

BIOGRAPHY

Peter King was born Christopher Peter King in England in 1922. He has enjoyed a number of careers. Trained in aerospace science, he was the leader of the team of engineers who designed and developed the rockets used in the Apollo program, which sent a man to the moon. King's interest in how things work and in scientific investigation add a special dimension to his novels. King's second career was that of a professional chef. His firsthand knowledge of gourmet cooking and the food industry gives his novels authenticity and makes them a wonderful source of recipes and cooking tips.

In 1994, with the publication of *The Gourmet Detective*, King received recognition as a highly talented mystery writer. The novel was chosen by *People* magazine as the Beach Book of the Week. The favorable reception of his first novel inspired King to continue to write culinary mysteries, and in 2001 he began another mystery series with author Jack London as the principal character. Although King's major success as a writer has been in the mystery genre, he has written stage plays, radio plays, and short stories. He has also written travel books and several technical books.

King settled in Sarasota, Florida, but he has also lived in France and Brazil and in several cities in the United States, including Chicago and Los Angeles. The settings of his novels reflect his familiarity and fascination with places.

ANALYSIS

Peter King writes two distinctly different kinds of mysteries. His Gourmet Detective series investigates food as much or perhaps even more so than it does crime, which usually includes murder. The Gourmet Detective is hired to perform a job related to food,

ranging from authenticating a rare spice to revising a medieval menu to teaching a cooking class. Without fail, he becomes involved in solving a crime.

King follows a basic formula in writing his culinary mysteries. The Gourmet Detective (who remains nameless) always narrates the story in first person, from his point of view. He meets and becomes interested in one or more attractive women whom he meets in the course of his food-related quest. Most of the time the romantic adventure simply plays out in his mind, but on occasion, the romantic interlude becomes reality. Inevitably, a theft, a murder, or both occur as the Gourmet Detective is doing his food-related investigation, and he becomes involved in a police investigation. Therefore, the Gourmet Detective—who is always explaining that he is not really a detective—is doing just what a detective does and often risking his life in the process.

The Gourmet Detective is extremely personable. In spite of his tendency to be slightly pompous and overly impressed with himself, he is a very likeable character. Readers are quickly caught up in his enthusiasm for the culinary experiences that he is enjoying and the adventures, which add excitement to his life. King surrounds his principal character with unusual, eccentric supporting characters who flesh out the narration of his adventures. The members of the Circle of Careme in *The Gourmet Detective*, the eccentric Italian chefs of *Death al Dente* (1999), and the WITCHES (a group of female restaurant owners) in *Roux the Day* (2002) imbue the mysteries with a humorous tone.

In his Jack London series, King combines characters drawn from real life with fictional ones to create fast-moving, action-packed adventures. His main character is the real-life author Jack London. In the series, London works with the San Francisco police to solve crimes and to foil criminal plots. Although the stories are foremost hard-hitting adventures filled with danger and a considerable amount of violence, King allows London to digress in contemplation of his real profession, that of a writer. London describes his difficulty in creating female characters, how he draws on his own experiences to write his stories, and other aspects of the difficulty of writing as well as his love of his profession.

The setting of San Francisco's Barbary Coast in the

1890's is colorful and creates a realistic atmosphere. Just as the Gourmet Detective series is filled with details of the places the detective goes, so the Jack London mysteries are copiously detailed and bring places to life. Saloons, pleasure palaces, and the wharf play a role equal to that of the characters.

THE GOURMET DETECTIVE

In his first mystery novel, *The Gourmet Detective*, King combines a tale of mystery with references to mystery writers and famous mystery characters and food information and recipes to create a novel with a threefold interest. Readers are interested in solving the mystery; the shared facts about mystery writing enable them to participate in the novel as insiders; and the commentary on gourmet dining entertains them with a look at a specialized field.

King's skill in creating eccentric humorous characters who remain believable is already apparent in this novel. The two supposedly rival chefs Raymond and François are the first of many such characters to appear in King's mysteries.

SPICED TO DEATH

In *Spiced to Death* (1997), the Gourmet Detective goes to New York City to authenticate a rare ancient spice called Ko Feng. The spice is worth millions of dollars and in spite of elaborate security precautions, it is mysteriously stolen. Then, murders and sinister telephone calls cause the Gourmet Detective to worry about his own safety. He becomes involved with Hal Gaines, a detective with the New York Police Department. Gaines is the opposite of the food expert in every way, and this odd coupling adds a humorous touch to the mystery.

Although solving the mystery and retrieving the Ko Feng is the main plot of the novel, King also entertains his reader with a tour of New York restaurants and food fairs. His descriptions of ethnic restaurants and cooking methods add an interesting dimension to the novel. The discussion of food is an integral part of the narrative because the various chefs and restaurant proprietors all have an interest in obtaining some of the Ko Feng.

DYING ON THE VINE

In *Dying on the Vine* (1999), the Gourmet Detective travels to Provence, France, to investigate the rea-

sons for a small winery's insistence on purchasing its neighbor winery, which is much larger and whose owners have no desire to sell. The setting in the south of France gives King ample opportunity to include recipes, discussions of wine, and trivia about food—all of which are trademarks of this series.

The narration of the mystery in this novel incorporates somewhat more violence and bloodshed than is usual in King's mysteries. On arriving at the winery, the Gourmet Detective discovers a corpse, which has apparently been gored by a wild boar. Bodies in wine vats, a bee attack, and exploding gliders plus a private army of men trained to kill create the ambiance of a thriller in this novel. However, the novel is not without humor. Once again, King has created a number of eccentric amusing characters, including Professor Rahmani of the Institute for the Study of Planetary Influence and Alexis Sukarov, the owner of a glider delivery service.

ROUX THE DAY

The seventh novel in the Gourmet Detective series, *Roux the Day*, takes the reader on an exploration of the culinary world of New Orleans and the surrounding area. Using the setting of a television show, King presents an in-depth comparison of Cajun and Creole cooking. He adds humor to the presentation by creating participants in the discussion who are opinionated and at times aggressively insulting to the representatives of the rival cooking style.

Recipes for all the dishes for which the city is famous are included. Blackened redfish, gumbo, oyster dishes, catfish, crawfish, and all of the spices essential to both Cajun and Creole dishes such as garlic, cayenne, basil, and paprika are discussed. The group of female restaurant proprietors known as the WITCHES, who kidnap the Gourmet Detective, further elaborate this rich treatment of food. All the women serve Cajun and Creole dishes in their restaurants; however, some of them are experimenting with combining the traditional local cooking styles with other ethnic styles such as Italian or Chinese.

The plot of the novel focuses on a missing chef's book belonging to the Belvedere family, who owned a world-famous restaurant, particularly renowned for its oysters Belvedere. The restaurant has been closed for several years because of a mental illness, which

seemed to pass from generation to generation. Now the last member of the family, who has just graduated from business school, intends to reopen the restaurant and has had his lawyer hire the Gourmet Detective to find the book. However, he is not the only one interested in the book. Theft and murder occur, and the Gourmet Detective is once again working with the police and risking his life. King incorporates a considerable amount of local color in this novel as the food detective travels about the city in search of the missing chef's book. The reader experiences the French Quarter, the paddle boats, jazz clubs, and Mardi Gras and its floats and mule-drawn carriages.

King repeats the odd couple Gourmet Detective/police detective motif that he used in *Spiced to Death*. New Orleans detective Lieutenant Delancey, a former New Yorker, interacts with the Gourmet Detective in much the same way as Hal Gaines did.

DEAD MAN'S COAST

The second novel in the Jack London series, *Dead Man's Coast* (2002), is a historical thriller with a real-life hero. London is not the only real-life character in this mystery: It also features Ambrose Bierce, Martin Beck, Carrie Nation, James McFarland, and Harry Houdini, all well-known individuals who played important roles in American life in the 1890's and early twentieth century. London knew all these individuals and was exceptionally close to Houdini. King anchors his novel in reality by using these characters, then adds fictional characters, including the very provocative music-hall entertainer Belle Conquest and the medium Eulalia Paradino. King's setting is the bars, music halls, saloons, and the Barbary Coast wharf, which were all part of the daily life of San Francisco when London lived there. The plot takes London on a dangerous adventure from the Barbary Coast to Chinatown to the pleasure palaces of the city and to the political rallies and social events.

Shawncey Webb

PRINCIPAL MYSTERY AND DETECTIVE FICTION

THE GOURMET DETECTIVE SERIES: *The Gourmet Detective*, 1994; *Spiced to Death*, 1997; *Dying on the Vine*, 1999; *Death al Dente*, 1999; *A Healthy Place to Die*, 2000; *Eat, Drink and Be Buried*, 2001;

Roux the Day, 2002; *Dine and Die on the Danube Express*, 2003

JACK LONDON SERIES: *The Jewel of the North*, 2001; *Dead Man's Coast*, 2002; *The Golden Gate Murder*, 2002

BIBLIOGRAPHY

Cannon, Peter, and Jeff Zaleski. Review of *Dine and Die on the Danube Express*, by Peter King. *Publishers Weekly* 250, no. 20 (May 19, 2003): 56. Review of Gourmet Detective novel in which the detective rides a luxury train from Munich to the Black Sea coast of Romania, investigating the disappearance of a Hungarian actress. Reviewers praise the travelogue and food descriptions but find the mystery plot thin.

Croan, Robert. "Delicious Mystery Is Served 'Al Dente' on a Silver Plate." Review of *Death al Dente*, by Peter King. *Milwaukee Journal Sentinel*, August 26, 1999, p. 2. The Gourmet Detective travels to Italy to help a famous actor create a great Italian restaurant in London and ends up being attacked by a herd of buffalo and a monk. Reviewer finds the work amusing but light on plot.

DeCandido, GraceAnne A. Review of *Roux the Day*, by Peter King. *Booklist* 98, no. 18 (May 15, 2002): 1579. Reviewer of this Gourmet Detective novel set in New Orleans praises King's description of ingredients and finds it a light and pleasant mystery.

Kershaw, Alex. *Jack London: A Life*. New York: St. Martin's Griffin, 1999. Good source for the real life and character of Jack London. Discusses his careers and his devotion to socialism and environmental protection. Also examines him as a writer. Provides knowledge of the real London to contrast with King's fictionalized version.

Lambert, Pam. Review of *The Gourmet Detective*, by Peter King. *People Weekly*, June 10, 1996, 38. Reviewer likes the culinary humor and trivia included in the first of the Gourmet Detective series novels and finds the work pleasant light reading.

Scaggs, John. *Crime Fiction*. New York: Routledge, 2005. Contains a chapter on mystery and detective fiction that looks at settings and subgenres as well as a chapter on historical crime fiction. Gives a perspective from which to understand King's writing.

STEPHEN KING

Born: Portland, Maine; September 21, 1947

Also wrote as Richard Bachman

Types of plot: Horror; thriller

CONTRIBUTION

In the traditional mystery story, a crime (usually a murder) has been committed, and the guilty party must be caught by a detective or the crime must be explained by characters in a logical fashion. Mystery stories often depend on suspense, which is generated by the detective's pursuit of the criminal, or by events that raise doubts about whether the murderer will be found out. In the end, however, a rational view of the world is triumphant; that is, clues to the crime lead to the apprehension of the criminal. Stephen King's mystery stories introduce elements of the supernatural and the irrational

that cannot be resolved by the deductive method employed in a classic of detective and mystery fiction. The world is less stable than adults are usually willing to admit, King suggests. He often takes a child's point of view, harking back to the fears that most adults have felt to demonstrate that their anxieties have not been overcome but have been merely repressed. Horror, King implies, is the subtext of human life—the frightening unknowability of things that human beings dare not face. There are malevolent powers out there that cannot be accounted for in a modern, secular world.

BIOGRAPHY

Stephen King was born in Portland, Maine, on September 12, 1947. Most of his life has been spent in Maine, and a significant portion of his fiction has been

set in the state. He and his brother grew up without any contact with their father, who abandoned their mother. His mother worked very hard to support the family and to keep it together.

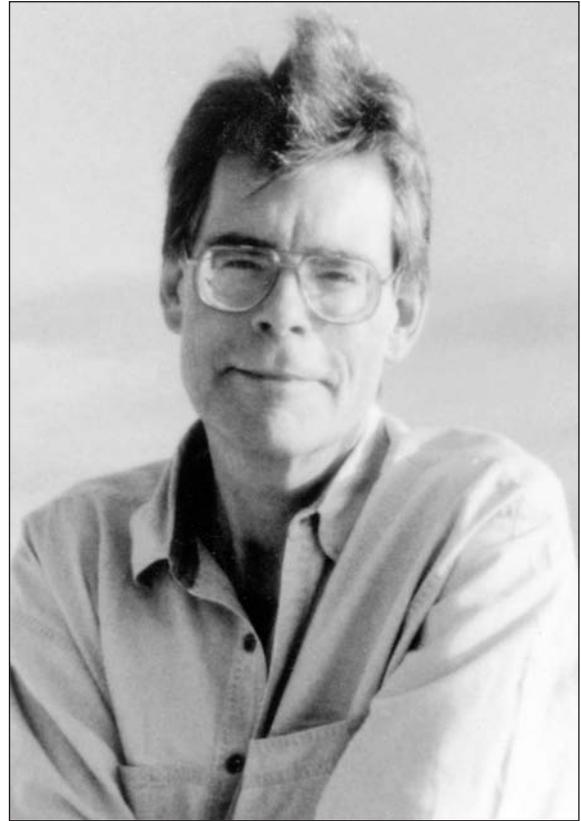

King began writing as an undergraduate at the University of Maine at Orono. He majored in English and earned a teaching certificate. He sold short stories to magazines and wrote several full-length novels that were not accepted for publication. He turned to teaching as a way to support himself and his wife and children. As rejection slips from publishers mounted, he began to wonder whether he would ever be a success. He has admitted that in his despair he turned to drinking and drugs. He persisted with his writing, however, and finally *Carrie* (1974) was not only accepted for publication but became, in paperback, a huge best seller as well.

King does not like to think of himself as a celebrity. He has settled in Maine with his family, although he has become involved with some of the film adaptations of his work and has traveled across the country to promote his books. He is known primarily as a writer of horror fiction. His works written under the name Richard Bachman have also been successful. King received the Mystery Writers of America's Grand Master Award in 2007.

ANALYSIS

In Stephen King's fictional world, evil exists in and of itself—not simply as an abstraction or as a manifestation of human character. Evil cannot be explained away in psychological terms. One of King's quarrels with Stanley Kubrick's film adaptation of *The Shining* (1977) is that the director put the emphasis on the main character's imagination of evil and not on the Overlook Hotel, which King has called "a huge storage battery charged with an evil powerful enough to corrupt all those who come in contact with it." For King, evil is some kind of operational, preadult, elemental force that is completely beyond human control. It haunts the world; it is not merely a psychological aberration. King's stories focus on this evil; they are not clichéd studies of demented persons.

In the tradition of Edgar Allan Poe, King writes metaphysical mystery stories that focus on crumbling

Stephen King. (Tabitha King)

families who represent a disintegrating universe. King, referring to *The Shining*, puts it this way:

People ask, "Is it a ghost story or is it just in this guy's mind?" Of course it is a ghost story, because Jack Torrance himself is a haunted house. He's haunted by his father. It pops up again and again and again. He's haunted by that. It's just a case of however you want to define "haunted."

King's "however" refers to the inside and the outside, the character's mind and the hotel's ambience. They are, so to speak, one and the same—as they are in Poe's "The Fall of the House of Usher," in which the "house" of the title refers to both the physical residence and the family of Madeleine and Roderick Usher, brother and sister in Poe's classic horror tale of human and earthly corruption. As Roderick and Madeleine collapse against each other, so does their house crumble. Modern readers may prefer a psychologi-

cal—that is to say, a social science—explanation, but the power of Poe’s and King’s stories derives from their refusal to reduce their work to parables about the mental lives of human beings.

Roderick Usher is not responsible for his ability to read his sister’s mind; in fact, he is terrified by his closeness to his sister and by the power that has taken possession of him. The same is true in *Carrie*, in which a mother’s bullying stimulates her adolescent daughter’s telekinetic powers. In *Firestarter* (1980), two adults who have acquired parapsychic powers in a government drug experiment pass on these powers to their child. In *The Dead Zone* (1979), John Smith suffers several severe head injuries that trigger his powers of second sight, making him able to see aspects of both the past and the future. In *The Shining*, Danny Torrance seems born with the ability to “shine,” to visualize images of the future; something in the atmosphere of the Overlook Hotel stimulates his ability to forecast the horrible crimes his father will commit. All these stories suggest how strongly King has been influenced by both science fiction and the gothic tradition in the novel. From the image of the haunted house (a staple of gothic novels), he has moved to the prospect of a haunted world. In *The Stand* (1978), for example, a virus developed in a government laboratory is let loose in spite of a sophisticated security system and nearly succeeds in killing every human being.

King’s mystery and horror fiction has a subtext. His stories take up things that people do not want to confront openly. In one interview, he speaks of writing *Salem’s Lot* (1975) during the Watergate hearings. He kept watching witnesses saying that they could not recall what had happened. He was fascinated with Senator Howard Baker’s repeated question to witnesses, “What did you know and when did you know it?” For King, the element of mystery and horror in *Salem’s Lot* was not the vampires but the town that was obviously hiding something, tucking away things in closets, and that these events were occurring in daylight, when it should have been possible to see what was happening.

THE SHINING

Both Danny Torrance in *The Shining* and Johnny Smith in *The Dead Zone* know things that they would

prefer to forget. Danny desperately loves his father, Jack, but the signs of Jack’s unstable personality and violence are everywhere in evidence. He has broken his son’s arm in an angry fit over Danny’s messing with his play manuscript and has severely beaten one of his students for slashing his car’s tires. Jack is an alcoholic who has always had trouble controlling his temper, but he views his violent reactions as fits or attacks—much like the attack of the wasps that sting him when he inadvertently disturbs them. Life itself has a way of unnerving Jack Torrance. He is out of control, yet as a parent and as a writer he wants very much to be in charge. He has, in fact, a rage for order that drives him insane, for life cannot compose itself for him. Each of Danny’s visions makes it clearer that it is his father whom he should fear, but each time Danny is aroused from his spells he tries to deny the evidence that his father is a murderer. The very word “murder” appears in Danny’s waking dreams as “red-rum,” a telling reversal, a clue that the father he loves is not his protector but his destroyer.

THE DEAD ZONE

In *The Dead Zone*, Johnny Smith shakes a politician’s hand and realizes that Greg Stillson will one day be president of the United States. The trouble is that Stillson is pure evil. He has intimidated powerful figures into supporting him and pandered to the lowest elements of society while pretending to stand for decent American values. He is a malevolent personality who will start World War III. Johnny can envision this scenario and believes that it is as inevitable as Adolf Hitler’s rise to power. Johnny’s dilemma is that he does not want to resort to violence. Yet he watches Stillson go from one success to another. Diagnosed as having a brain tumor, knowing that he has very little time to live, Johnny decides to intervene in history, but assassinating Stillson proves unnecessary. When Stillson grabs a young child to shield himself from Johnny’s rifle, his political career is doomed.

As mystery-horror novels, *The Shining* and *The Dead Zone* exemplify King’s view that much of what people know is repressed. Reality has its own mysterious subtext that cannot be simply resolved by the detective or the novel’s hero. Indeed, Johnny Smith must die because of his knowledge of history. The Overlook

Hotel seems malign because it looks over—has an overview of—history. It is a repository of evil to which someone as sensitive as Danny Torrance responds. In *The Dead Zone*, *The Shining*, and other King novels there is little doubt about who the criminals are. Suspense is created not by finding out who did what, but by putting together the horrifying clues that demonstrate that people would just as soon overlook the evil in their midst.

“The dead zone” is a term Johnny Smith coins. It stands for those things that he cannot see or remember—the elusive aspects of history that make gaps in his life. He suggests that the gaps in every human being’s life account for much of the mystery of existence. He describes the dead zone as “a mental birthmark. A fouled circuit, a faulty relay . . . [a] small faulty section.” Even Johnny’s kind of knowing is a “pretty limited thing,” he tells one character. “It’s like some of the signals don’t conduct.” As one of his doctors puts it, the dead zone is a “subset of a larger overall set.” In traditional mystery stories, the dead zone or subset comprises those clues and bits of missing evidence that are eventually found and fitted into a solution to a crime. When the criminal is caught or the crime exposed, the world of the mystery novel recovers its equilibrium. It is whole, it is complete, it is a “set.” The terms “set” and “subset” suggest King’s interest in scientific explanations of mystery, yet the terms do no more than define the problem. Johnny’s gift of second sight is never adequately explained.

Although King’s work has been immensely popular and his books have received many rave reviews, he has also been attacked in the press for a lack of wit and intelligence. Some of his early work is rather leaden, the dialogue stilted and the plotting somewhat confused. King admits to a certain lack of maturity in his presentation of female characters and of minorities. He sees the later attacks on his fiction, however, as a sign that he is out of step with modern liberal notions of morality. He believes that his fiction does not inhabit the relativistic universe of his severest critics. His view of existence is conservative—almost reactionary in the sense that he implies that human beings are still living in the dark ages. He has referred to his “old-fashioned frontier vision.” He believes that “there

exist fundamental values of good and evil warring for supremacy in this universe.” Thus, he suggests that he is “at odds with what is essentially an urban and liberal sensibility that equates all change with progress and wants to destroy all conventions, in literature as well as in society.” Life in his stories is regressive, not progressive. His characters have to return to childhood and to their origins. Sometimes, as in *Cujo* (1981), children cannot withstand elemental evil; other times, as in *The Shining*, a child escapes madness, if not the horror of a disintegrating family. At best, however, King’s characters are granted no more than a reprieve from diabolism.

’SALEM’S LOT

Many of King’s novels are ingenious reworkings of classic mystery and horror stories. *’Salem’s Lot*, for example, was inspired by Bram Stoker’s *Dracula* (1897). Having taught Stoker’s novel as a high school teacher, King was intrigued by the idea of creating a modern vampire story. Set in a small town in Maine, *’Salem’s Lot* centers on a successful writer who returns to write about his hometown. In this case, he is fascinated with a supposedly haunted lot, the place where, in fact, he went through a horrible initiation experience. The novel is about origins, about where people really come from. It seems to have a strongly autobiographical source, for King, lacking a father, seems drawn to stories about families gone awry, children questioning their identities, and adults finding that they have not outgrown their childish fears. King’s fiction reads like a haunted house standing for and holding the haunted minds of human beings.

Carl Rollyson

PRINCIPAL MYSTERY AND DETECTIVE FICTION

NOVELS: 1974-1980 • *Carrie*, 1974; *’Salem’s Lot*, 1975; *Rage*, 1977 (as Bachman); *The Shining*, 1977; *The Stand*, 1978, unabridged version 1990; *The Dead Zone*, 1979; *The Long Walk*, 1979 (as Bachman); *Firestarter*, 1980

NATSUO KIRINO

Mariko Hashioka

Born: Kanazawa, Ishikawa Prefecture, Japan;
October 7, 1951

Types of plot: Hard-boiled; inverted; psychological

CONTRIBUTION

Japanese crime writer Natsuo Kirino first became known to English readers with the publication of *Out*, the 2003 translation of *Auto* (1997), her harrowing tale of four apparently demure women suddenly engaging in murder and body dismemberment. The success of *Out* led to the 2007 translation of *Gurotesuku* (2003; *Grotesque*), a mystery in which Kirino continues her focus on women and crime. *Grotesque*, the story of a double murder of two Tokyo prostitutes, reveals as much about a perpetrator's deviant mind as it does

about the severe peer pressures and bullying confronting young Japanese women.

In Japan, Kirino's crime fiction has won her six major awards. *Out* was nominated for the 2004 Edgar Allan Poe Award for best novel, the first nomination for a translation from Japanese. With her strong focus on female protagonists and perpetrators, Kirino is part of a group of innovative Japanese female crime writers such as Miyuki Miyabe who have been challenging, changing, and developing crime fiction in Japan since the 1990's. Kirino's combination of deep psychological insights and her stark depiction of social and economic pressures has made her crime fiction internationally popular.

BIOGRAPHY

Natsuo Kirino was born Mariko Hashioka on October 7, 1951, in Kanazawa, capital of Ishikawa Prefecture. She began her life in one of the few Japanese cities that was not firebombed in World War II and thus contained a treasure of traditional architecture. Her father, a peripatetic architect, soon moved the family to Sendai and Sapporo, before relocating to Tokyo when Kirino was fourteen years old. Kirino attracted attention as an imaginative teenager who loved to read.

After obtaining her law degree in 1974 from Seikei University in Tokyo, Kirino found no appropriate employment and worked as an organizer of film festivals and as a magazine editor and writer. Later, she would say that during this period she had a rough time and no good job at all. In 1975, she married, and in 1981, her daughter was born. For a while she tried her luck as a scenario writer for films before writing her first romance in 1984.

Kirino turned to mystery writing and was influenced by Japanese writers Yukio Mishima, Fumiko Hayashi, and Ryu Murakami, as well as by Western writers such as Flannery O'Connor, Anne Tyler, Stephen King, and Patricia Highsmith. Her breakthrough came in 1993, when she was writing under the pseudonym Natsuo Kirino. Her mystery *Kao ni furikakaru ame* (1993; the rain that falls on the face) won the prestigious Edogawa Rampo Award in 1993 and launched her career as a major crime writer in Japan. Her protagonist, female private detective Miro Murano, made one more appearance in *Tenshi ni misuterareta yoru* (1994; the night abandoned by angels) before Kirino turned away from serial fiction.

Kirino's next success was *Out*, which saw an initial printing run of five hundred thousand copies in Japan and won her the 1998 Mystery Writers of Japan Award. Translated into English and other foreign languages, the novel established Kirino's international fame as an original mystery writer. Her fiction focuses on the social forces driving contemporary women over the edge into committing crimes of astonishing ferocity.

Kirino's novel *Yawarakana hoho* (1999; soft cheeks) won the important Naoki Prize awarded annually since 1935 to the best young author of popular fiction. Her *Grotesque* won the Izumi Kyoka Literary

Award, *Zangyakuki* (2004; record of cruelty) won the Shibata Renzaburo Award, and *Tamamoe!* (2005; a soul burns) received the Fujinkoron Literary Award. Kirino has also published short story collections, and a number of her mysteries have been made into Japanese films. *Out* was turned into a film in 2002, and New Line Cinema picked up the rights for a high-production-value remake.

Kirino and several other female Japanese crime writers have added a decisively new, female perspective to modern Japanese mysteries. No longer working with serial characters, Kirino is attracted to psychological realism, eschewing the flights into the supernatural of her contemporary Miyuki Miyabe. Kirino prefers to explore the noir world of Japanese society in the throes of economic and gender depression. Sadly for the society, her imaginative tales of murder and mayhem increasingly find themselves mirrored by the reality of ever more bizarre murder cases in Japan. In January, 2007, the confession of a woman who murdered and dismembered her husband and dumped the body parts across Tokyo uncannily echoed the plot of *Out*.

ANALYSIS

The publication of English translations of the work of Japanese crime writer Natsuo Kirino has garnered for her a loyal English-speaking readership. Her readers appreciate Kirino's stark, laconically told tales of evil spreading out against the dark backdrop of a modern Japan that is in the grip of economic stagnation and social alienation. As rendered by her translators, Kirino's style is cold, detached, yet observant, painfully direct, and to the point. The reader is instantly reminded of the classic American hard-boiled detective stories.

Kirino is part of a wave of Japanese female crime writers whose focus on women and crime has invigorated the mystery genre beginning in the early 1990's. By making women active agents in their crime stories, these writers bring new experiences and insights to the genre. Kirino's crime novels all place stylistic emphasis on a remorseless and relentless revelation of the dark side of modern Japanese society. Kirino's key interest lies in revealing the psychological and social

makeup of outsiders, or grotesque characters. Her narratives favor ambiguity and multiplicity.

Those whose profession it is to solve crimes figure only marginally in Kirino's translated mysteries. In *Out*, one of the perpetrators remarks of Detective Imai, the police officer who comes closest to figuring out the first murder, that he draws the wrong conclusions from correct observations, in part because of his gender bias. In *Grotesque*, the police are a mere trigger to force the prime suspect to tell the story from his point of view. Significantly, the crimes of *Out* are never solved or punished, nor is the perpetrator of the second murder in *Grotesque* revealed by the end of the novel.

At the heart of Kirino's literary mysteries are modern Japanese women who choose, for a variety of reasons, to drop out of respectable society. In Japan, this is perhaps the most shocking aspect of Kirino's crime fiction. Her female characters forcefully reject the social tradition of being meek, subordinate, conciliatory, and willing to suffer for the sake of peace and harmony in family and society and at work. For them, crime becomes an alternative to a bullying, harassing, and discriminatory society.

A central theme of Kirino's crime novels is the utter loneliness of her characters. Generally, this loneliness comes from a total lack of love that begins in the family and continues in the realm of sexuality. Indeed, both *Out* and *Grotesque* describe modern Japanese families that resemble war in hell. At the root of the breakdown of the family, Kirino's narratives suggest, lies crass materialism, egoism, and relentless selfishness not tempered by any moral or ethical standards in the age of abject consumerism.

This idea that money has permeated and destroyed the family and romantic love alike is a strong theme in Kirino's crime fiction. In the absence of love to govern intimate human relationships, money becomes the medium through which characters seek to define their status and power in their interactions with each other. In an economically stagnant capitalist society, the fight for money becomes bitter and quickly turns violent. Not surprisingly, once money replaces love in human relationships, the issue of prostitution appears. Prostitution figures centrally in *Grotesque*. In this work, at least one of the two murders of prostitutes oc-

curs because one sex worker demands more money for the extra work of letting a client indulge in his incestuous fantasy.

Kirino's mysteries also openly reveal the persistent nature of severe gender discrimination in contemporary Japan. Masako Katori, the strongest personality of the criminal quartet of *Out*, experienced job discrimination firsthand for more than twenty years at her former banking job. Even the extraordinary beauty of Yuriko Hirata in *Grotesque* fails her professionally as a fashion trend passes her by.

When Kirino's women leave ordinary society, these departures are far more self-destructive and less glamorous than those made by the typical disaffected young men who turn to crime in most Japanese crime fiction. There is a bitterness, harshness, self-loathing, and self-destructiveness to female crime in Kirino's work that keeps readers on edge. This bitterness disallows cozy, romantic delusions about the nature of crime and the cost it extracts from the criminal and the victims.

A final poignant literary characteristic of Kirino's fiction is her expressive use of multiple narratives. In *Out*, chapters and sections are written from the third-person perspective of a full variety of characters. The climactic showdown is rendered twice, first from the view of the villain and then from that of survivor Masako. In *Grotesque*, the story of the murder of two prostitutes is told by various characters in first-person narratives. The characters address the reader either directly, or through their journals or written confessions. By juxtaposing different perspectives throughout her mysteries, Kirino creates a permanent state of uncertainty. Unusual for the crime genre, there is no authoritative master narrative in Kirino's mysteries that finally reassures the reader which of the many voices one is to trust.

OUT

Indicative of the tightness of its plot, the bleakness of the setting in which Kirino's acclaimed thriller *Out* opens and ends corresponds to the bleakness of the lives of its female protagonists. Kirino deftly introduces her cast of four middle-aged women, each representative of an aspect of Japanese womanhood, as their night shift begins at a lunchbox-meal factory. Masako Katori picked this blue-collar job after suffering gender bias and harassment at her banking job.

Widowed Yoshie Azumi keeps working to provide for her ungrateful bed-ridden mother-in-law and equally ungrateful youngest daughter. Kuniko Jonouchi, the youngest and vainest, needs money to pay off debts from her spending sprees. Yayoi Yamamoto works to help earn the down payment for a family home.

One night Yayoi reveals that her husband, Kenji, has gambled away their savings while courting a Chinese club hostess. When Yayoi confronted him, he beat her. The next evening, Yayoi strangles Kenji in an explosion of hatred for an unfaithful, abusive husband who has betrayed her, rejected her, and robbed her of her most cherished dream of a harmonious family life. Her co-workers, who are called to help or who stumble on the process, cooperate as professionally as if they were at work and dismember Kenji's body in Masako's bathroom so that it fits into forty-three garbage bags.

Kuniko's laziness, which causes her to dump her share of the bags in public park containers rather than closed residential trash bins, leads to their discovery. However, the police arrest Misuyoshi Satake, owner of the club where Kenji lost his money and a former hit man who was jailed seven years for the sadistic rape-murder of a rebellious prostitute. *Out* chillingly demonstrates that the police cannot grasp the true motive leading to the murder and dismemberment of Kenji.

Released for lack of evidence but ruined financially, Satake swears revenge on the women he suspects. As Satake hones in on his first victim, Kuniko, *Out* unsentimentally exposes the vast alienation and loneliness in modern Japan. In the climax, Masako fights for her life in the abandoned factory where Satake has dragged her. It is Masako's will to live, the narrative implies, that allows her to win the battle. Freeing herself from all familial and social bonds, she is ready to move out of Japan completely, avoiding any punishment.

GROTESQUE

In the psychological crime novel *Grotesque*, Kirino combines the investigation of the murder of two Tokyo prostitutes with a chilling picture of hatred and self-loathing among its female characters. Being bullied and sexually hurt and failing in spite of their best efforts all happen to the young women in *Grotesque*. By the end of the novel, almost all the women consider themselves grotesquely disfigured by their resulting hatred.

Grotesque opens as a murderer has struck twice within one year and strangled to death two very different victims. Yuriko Hirata descended to streetwalking after being a sought-after call girl in high school and experiencing a brief stint as a model and fashionable escort. Kazue Satō, however, was a professional manager by day and plied the same streets as Yuriko after dark. Through these two victims, the narrative suggests that in the absence of love at home and the hardship of enduring sexual predation and extreme bullying in a highly competitive, snobbish educational system symbolized by Kirino's fictional Q preparatory school, high school, and university system, the psyche of young women is disfigured.

For the plot, Kirino relishes in using multiple first-person narratives. Yuriko's unnamed elder sister expresses lifelong sibling rivalry. Yuriko and her sister are both Eurasians whose Japanese mother killed herself when their egoistic father relocated the family to

his native Switzerland. The older sister hates Yuriko for her good looks, which are missing in her own physiognomy. Yuriko speaks from the grave through her diary, which reveals the abyss of her soul. Her beauty turned out to be a curse.

At the trial, the police seem confident that the murders are the work of one man, the illegal Chinese immigrant Zhang Zhe-zhong. However, he stubbornly insists that he killed only Yuriko because she charged him extra for pretending to be his dead sister. Zhang may have murdered his own sister when illegally migrating to Japan, highlighting Kirino's penchant for unresolved riddles in her mysteries. Zhang has a grotesquely deformed soul, reminiscent of that of the psychopathic Satake in *Out*.

The journals of Kazue Satō expose a soul damaged by incessant bullying at Q High School. She considers prostitution an act of revenge on men and enters an ambiguous, masochistic relationship with Zhang.

The ending of *Grotesque* is indicative of Kirino's interest in psychopathology and her disinclination to follow the mystery tradition of solving all crimes at the end of the story. In an effort to understand the two victims, Yuriko's sister appears ready to assume the sex work that they did. The murder of Kazue remains unsolved.

What distinguishes *Grotesque* is Kirino's trademark eye for the loneliness, alienation, and hostility in the life of her female characters. It appears that one cannot obtain love and happiness through beauty or intelligence, or even luck or hard work.

Takayama, Hideko. "Breaking *Out* of Japan." *Newsweek International*, August 18, 2003, 50. Attentive analysis of Kirino's debut novel in English; praises author for highlighting the dark, misogynist side of modern Japan and creating a suspenseful crime novel, feels *Out* reveals new aspects of post bubble-economy Japan.

Vrabel, Leigh Anne. Review of *Grotesque*, by Natsuo Kirino. *Library Journal* 132, no. 4 (March 1, 2007): 74-75. Critical review praises Kirino's skills at creating a tale of psychological horror but with some reservations about the relentless onslaught of dysfunctional, grotesque characters.

KATHLEEN MOORE KNIGHT

Born: United States; c. 1890

Died: United States; 1984

Also wrote as Alan Amos

Type of plot: Amateur sleuth

PRINCIPAL SERIES

Elisha Macomber, 1935-1959

Margot Blair, 1940-1944

PRINCIPAL SERIES CHARACTERS

ELISHA MACOMBER, chairman of the Penberthy Board of Selectmen, is married, then a widower. He ages from his mid-fifties to about eighty in the course of the series, but the effects of aging are not noticeable. Deeply moral and God-fearing, he is caring, humorous, and highly logical.

MARGOT BLAIR, the co-owner of a public relations agency, in the course of her work finds it necessary to protect wealthy young women by solving various criminal cases involving murder. She is a strong-willed, sympathetic, and highly active investigator.

CONTRIBUTION

Kathleen Moore Knight is of primary interest for her sixteen novels featuring Elisha Macomber. These stories combine two popular genres: the Golden Age novel of detection and the romantic crime novel. Knight's puzzles are solved both by Macomber's deductions and by unveiling the murderer to the narrator or other main characters. Combining detection with family and love plots, the novels—especially the fourteen Macomber novels, which are set in New England—are notable for their skillful evocation of place. All Knight's novels feature clear and interesting plots in well-visualized settings. Her style is straightforward, not dated by use of perishable vocabulary, and her books cannot be said to reflect the style or approach of any one specific writer.

BIOGRAPHY

Kathleen Moore Knight was born in the final decade of the nineteenth century. Her home was on Mar-

tha's Vineyard, the island that, with Cape Cod, furnished settings for her Elisha Macomber series. During her writing career, she showed considerable interest in the local color of this area, as she did in other areas of the world, most notably Panama and Mexico. Her published writings consist solely of crime novels, many of which appeared through the Detective Book Club, and all of which were widely reviewed, especially in *The New York Times*, whose reviewers praised her work. She died in 1984.

ANALYSIS

The crime novels of Kathleen Moore Knight, who published works in no other genre, display individual characteristics while still exemplifying the influence of the Golden Age fiction of S. S. Van Dine and the romantic suspense fiction of Mary Roberts Rinehart. Knight uses regionalism not only for local color or embellishment but also for clues, making place essential to her fiction. Because she stresses clues—the crime puzzle—in all thirty-eight novels, they may be classed under that Golden Age term, “novel of detection.” She refers frequently to Van Dine's character Philo Vance, even coining a verb for detection, “philovancing,” in *Death Blew Out the Match* (1935; the title refers, as do many of her titles, to a clue repeatedly analyzed in the story). The Rinehart influence on her basic plot, present to a greater or lesser extent in every book, is revealed in plot elements characteristic of what Ogden Nash called the Had-I-But-Known school.

As novels of detection, Knight's books have three patterns, depending on the nature of the main detective (nearly all of her characters are involved in solving mysteries). In his series, Elisha Macomber, like other great detectives of the puzzle mystery, is involved only as an investigator. (Like many other main detectives, he is unattached to a family, although a wife, Hattie, is mentioned in *Death Blew Out the Match*; she never appears in the stories, and she is dead by Knight's second book, *The Clue of the Poor Man's Shilling*, 1936.) Macomber is never in real danger, although he is shot

at for a warning in *The Tainted Token* (1938) and he uses himself as bait for the murderer in *Acts of Black Night* (1938). This absence of personal risk is necessary for the calm and stability of his role.

Margot Blair, Knight's other series character, performs very differently, narrating her stories and dominating the action, causing events to occur. She threatens criminals and so is often in danger herself; she and her assistant from her public relations agency are sometimes injured. For example, Blair is shot in *Rendezvous with the Past* (1940).

Knight began using a third pattern during the World War II years: nonseries books with the usual basic family plot but with no one detective dominant. In these books, the lead character, who is always female and sometimes narrates, does much of the detecting; police work is usually involved as well.

In series and nonseries tales alike, the reader cannot predict whether the case will be resolved through the Van Dine method of analyzing clues or through the Rinehart method of events conspiring to expose the criminal; Knight draws from both patterns to end her stories, with the criminal dead, or trying to kill someone else, or trapped just as the detective or the police officer arrives and explains the mystery.

THE CLUE OF THE POOR MAN'S SHILLING AND THE TROUBLE AT TURKEY HILL

Knight's pattern shows clearly in two of her best Macomber novels, *The Clue of the Poor Man's Shilling* and *The Trouble at Turkey Hill* (1946). Both narratives are in the first person, a voice Knight always handles well. Luella Paige, narrator of *The Clue of the Poor Man's Shilling*, is a fifty-four-year-old former schoolteacher who retired early, and Marcy Tracy of *The Trouble at Turkey Hill* is a retired teacher from the Penberthy School, currently the town librarian. She is also middle-aged. Both women are carefully kept out of the plots as suspects, and neither has any family. They are commentators, distanced from the action. Sympathetic, they enjoy helping others through detection. Because they are mature and uninvolved, they are often called on for help by others in the story, especially Elisha Macomber.

Typical of all Knight mysteries, both novels have young lovers of varying degrees of virtue. In *The Clue*

of the *Poor Man's Shilling*, Laura May Howland and Evan Rider are the "true lovers," while the alcoholic seducer Julian Hollister, with whom Laura May is temporarily infatuated, represents the false. Hollister's wife, of whom the reader learns after Hollister's murder, and her lover are neutral, although as city dwellers they are naturally suspect in the determinedly rural Penberthy series. Relationships are more numerous and complex in *The Trouble at Turkey Hill*, as the lovers include both victims and murderer. One triangle of an unhappily married couple and a Portuguese girl includes two victims; another comprises a pair of childhood sweethearts and a local rich man. Candy Pierce is the "true lover," but her love is the murderer, and the rich man who saves her at the end has some slight instability, which disqualifies a male for marriage to a true lover. Although a few other Knight books end without imminent wedding bells, *The Trouble at Turkey Hill* is unique among Knight stories: It ends by extolling single women. Knight finds variations in every story though she always follows the same kind of plot.

The setting for the Macomber series is Penberthy, a fictional island near Boston. Maps are provided in some of the earlier novels, but Penberthy is not precisely Cape Cod or Martha's Vineyard. It is rural, old New England, a sparsely populated prototype, a setting that one might like to imagine once existed, completely Yankee and still upholding—despite the presence of mistrusted "off-islanders"—the old Puritan virtues.

The island supplies not only mood and color to the series but also motivation and clues. The boat trip along the coast taken by Luella Paige and the bicycle ride of Marcy Tracy, for example, both lead to informative (if ridiculous) happenings, events that are rooted in New England geography. In *The Bass Derby Murder* (1949), the murderer is betrayed by his misuse of the dialect in forging an islander's letter. Throughout the series, localisms play an essential role: weather, plants, birds (they can discover corpses), tides, fields, dunes, hills, sea cliffs, even recipes.

In both *The Clue of the Poor Man's Shilling* and *The Trouble at Turkey Hill*, Elisha Macomber is the character who (through detection and reason) solves the murder puzzle. Typical for Knight's books, both novels end with a ratiocinative explanation by Macomber after the

confession and death of the murderers. Persh is thrown off balance and falls to his death as he tries to kill the virtuous and beautiful Candy; George Howland, long-suffering father and husband, kills himself while tolling the bell to help others. Just after each death—Candy having been saved by her insufficient lover, Mrs. Howland having been saved at sea by the detective himself—Macomber enters, knowing all, and gives an explanation (his summaries may run as long as ten pages). Both novels show another common element of Knight's stories: murderers who are basically decent people driven by intolerable suffering. Persh, for example, is a returning World War II veteran who lost a wife and child abroad; George Howland has had to endure much, for his son's death ruined his wife's health and spirit. As in some of Knight's other stories, notably *The Bass Derby Murder*, suspicion is diverted from them because of their goodness, especially given the unpleasant nature of other characters. It is true that a few novels resort to minor characters, least likely suspects, as murderers: The early Macomber tale *The Wheel That Turned* (1936) and the late, nonseries *Panic in Paradise* (as Alan Amos; 1951) have minor characters as murderers so that the families are left scandal-free. Occasionally Knight can startle by showing an important member of the family guilty: At the end of *Death Goes to a Reunion* (1952), the grandmother is taken to jail for multiple murder.

KNIGHT'S PLOTS

Knight's books were praised by contemporary reviewers, especially Anthony Boucher in *The New York Times*, for the ability to hook readers with inventive plots, detection, and settings, although a few other critics found the stories wildly implausible with poorly drawn characters. Both views are reasonable. There are no great amateur detectives out in the actual world solving mysterious crimes. Elisha Macomber and Margot Blair, like most heroes in the mystery genre, cannot be said to be believable.

With the conventions of the genre, Knight's tales are clear even when most implausible. The author uses point of view well, especially in her first-person narrations by a female (she seldom attempts male narrators). Her third-person narrations are successful when they remain centered on one character, such as Susan Brooks in one of Knight's wildest plots, *Invitation to*

Vengeance (1960), which works because of its calm, fair narration. When Knight switches consciousnesses, the results are often unsuccessful. *The Wheel That Turned* presents unfair glimpses into the murderer's mind (a criticism often leveled against Christie); there is also the unnecessary, confusing movement from one mind to another in *Panic in Paradise*, where the shifts are arbitrary, and in *Dying Echo* (1949), where various consciousnesses are awkwardly invaded to keep important information from the reader. In the latter two novels, confused point of view leads to uncertain motivations and unclear relationships.

The process of detection is well developed in Knight's novels. An early reviewer pointed out that having so many characters sleuthing and finding reasons to suspect one another augments the puzzle. Even the murderer frequently gets into the spirit of detection, one example being Felix in *Terror by Twilight* (1942), who pretends to help Margot Blair. The police are usually not helpful; the best officers show their intelligence by leaving the amateurs alone. Buck Edwards, police chief of Penberthy, follows Elisha Macomber's orders, although Edwards is somewhat touchy about this situation by the last work of the series, *Beauty Is a Beast* (1959). The good sense of the captain of the Massachusetts State Police in *Three of Diamonds* (1953) is shown by his agreeing to stay away from the island so that Macomber can solve the crime, and both Sheriff Ben Crandall, the almost Macomber-like detective of *The Silent Partner* (1950), and the dignified Inspector Mena of *Dying Echo* assert control of their cases while letting the amateurs do the legwork. Like Macomber, Ben Crandall appears at the end, having solved the case with his knowledge of the locality, just as the murderer openly appears to the narrator.

ELISHA MACOMBER

Elisha Macomber is the great detective of Knight's fiction. Appearing in all of her pre-World War II stories, he was dropped for several years, during which Knight wrote Margot Blair and nonseries tales, then was picked up again after the war. With his quaint rural dialect—though he is a graduate of Harvard University—he is a center of stability, giving the final explanations, quieting characters' fears, and arranging

lovers' affairs (the two Panama novels, *The Tainted Token* and *Death Came Dancing*, 1940, display him at his best as matchmaker). He begins the series as a weatherbeaten and middle-aged fisherman and chairman of the Board of Selectmen of Penberthy. In the 1946 *Trouble at Turkey Hill* he is sixty-five, while in the 1938 *Acts of Black Night* he is sixty; his age for the series could then run from fifty-four to eighty-one, which seems about right. Such calculations, however, are probably silly in fiction: Hercule Poirot, retired from the police before World War I, was still detecting in the 1970's. The point is that Macomber is not a geriatric detective, for his role is avuncular, not grandfatherly. In the final novel of the series he suffers a concussion and broken rib in a car wreck, yet he breaks out of the hospital after one day to solve a murder and save a foolish heroine's life. His age makes believable his wisdom, depth of local knowledge, exceptional stability, balance, and humor.

Although the dialect and setting of the Macomber novels are somewhat reminiscent of those in Phoebe Atwood Taylor's Asey Mayo novels, Knight's stories otherwise bear little resemblance to Taylor's farcical tales. Elisha is stable, not hyperactive, and he represents the old order, not the new (Asey Mayo, on the other hand, is a car designer and builder of World War II tanks). The mood, structure, and characterization of the Knight and Taylor stories are dissimilar. Elisha Macomber has just as much resemblance to other Golden Age detectives: Like Philo Vance and Uncle Abner, Macomber has strength beneath his act, and like Vance, Macomber arranges endings to suit himself, as in *Akin to Murder* (1953), in which he orchestrates Sylvia's suicide. After the 1930's, as Philo Vance's fame dwindled, Knight began to have her characters refer to Macomber as a Sherlock Holmes, although the similarities are not particularly compelling.

Despite Elisha Macomber's success, characterization is generally a problem for Knight. Macomber and the middle-aged narrators are strong, as are a few others scattered throughout Knight's books: Sheriff Crandall, Inspector Mena, and Dr. Sargent (Penberthy's medical examiner, a major character only in *Beauty Is a Beast*). Most of her characters, however, are stereotypes: faithful or deceitful lovers, patriarchal

and matriarchal tyrants, loyal and disloyal servants, bumbling police and detectives. At times, like other Golden Age authors, Knight is blatantly racist. Black servants roll the whites of their eyes and speak in corny illiteracies; Latin Americans are oily; Italians are highly emotional, Mafiosi, or both. The sympathetic treatment of ethnic characters in *Intrigue for Empire* (1944) and *Dying Echo* cannot atone for such prejudice. Knight's gender-typing is obvious, even in the Margot Blair series; Blair is a full-time partner of a public relations agency, a co-owner, but virtually nothing of the work such a firm would do is shown. Instead, Blair spends her time as a guardian of young female nitwits, so that a role that at times seems almost feminist—career woman successfully detecting murder cases—collapses into romantic suspense.

Knight's stories exemplify Golden Age puzzle mysteries, and their faults and virtues are characteristic of their type. Thriller elements are downplayed, as in the kidnappings of *Acts of Black Night* and *Invitation to Vengeance*. (In both novels, the children are stolen toward the end and are quickly rescued. The kidnapping in the latter novel is even comic, with the grandfather's whipping of the villain.) Like Agatha Christie, Knight is interested primarily in the puzzle, such as the clue of the bits of pottery in *The Blue Horse of Taxco* (1947), but her ability to evoke place sets her apart. Nostalgia abounds in the colliding of present and past civilizations in old Italy, old Florida, old Massachusetts—all Golden Age settings for her romantic Golden Age puzzles.

RONALD A. KNOX

Born: Knibworth, Leicestershire, England; February 17, 1888

Died: Mells, Somerset, England; August 24, 1957

Type of plot: Private investigator

PRINCIPAL SERIES

Miles Bredon, 1927-1937

PRINCIPAL SERIES CHARACTERS

MILES BREDON, the Indescribable Insurance Company's special investigator, was formerly an intelligence officer in World War I. In his early thirties when the series begins, he is a big, good-humored man of lethargic temperament, well thought of by everyone ex-

cept himself. Though Bredon's application to his duties is desultory, Indescribable finds his work so useful in cases that piqued his interest that he became indispensable to the company.

AGNES BREDON, a convent-bred girl whose mocking eyes induced Miles to marry her at the end of World War I, makes allowances for his absorption in the trivial and is happy to serve as nurse and chauffeur for her untidy, absent-minded husband. She is a willing audience for his speculations and is always conspiring for his happiness behind his back.

LEYLAND, a police inspector, was an officer in the same regiment as Bredon in World War I, where he gained a reputation for efficiency. Bredon and Leyland

rarely see eye-to-eye on police methods, and Leyland, the law's official representative, often serves as a foil to the unconventional Bredon.

CONTRIBUTION

Ronald A. Knox is better known as a critic than as a writer of detective fiction. His essay "Studies in the Literature of Sherlock Holmes," published in *Essays in Satire* (1928), has become a classic. This lighthearted inquiry into the series of stories by Arthur Conan Doyle (who himself found Knox's essay amusing and instructive) is now regarded as the seminal work in the higher criticism of Holmes and largely responsible for the subsequent expansion of Holmesian scholarship. The success of this essay depressed Knox, who regretted that his one permanent achievement in the genre was to have started "a bad joke." In another well-known essay Knox discussed the "ten commandments" of the detective story. According to some critics, these rules of fair play for detective writers represent his most important contribution to the form.

Knox wrote his six detective novels to support himself as chaplain at Oxford University. Despite their pragmatic origin, his stories were carefully plotted and seriously intended, and a fascinating dialectic between the law of humankind and the law of God underlies their composition. When his detective fiction was written, there was a vogue for elaborate puzzles such as he presented and then ingeniously solved. Fashions have changed, however, and modern audiences are often bewildered by his highly allusive style (he sprinkles Latin quotations and literary references throughout the Bredon corpus). Modern readers are more concerned with the passions of the criminal than with the intellectual games that Knox plays with his readers. On the other hand, Knox was always scrupulously fair in providing clues and creating interesting problems; he was also witty, clever, and logical in arriving at his solutions. Though the modern reader may find his stories too cerebral, his time may come again.

BIOGRAPHY

Ronald Arbuthnott Knox was born in 1888, the youngest of a family of four sons and two daughters. He was descended from Anglican bishops through his

mother as well as through his father, who himself would become bishop of Manchester in 1903. His mother died when he was four years old, and between the ages of five and eight, Knox spent most of his time in a country rectory under the care of his father's mother, brother, and sisters, who impressed him with their strict Protestant piety. After a private school education during which his precociousness manifested itself in his skill in composing verses in English, Latin, and Greek, he won a scholarship to Eton College. There he participated in the catholicizing movement within the Church of England. At the age of seventeen, to be able to serve God without impediment, he vowed himself to celibacy. Yet he was not a dour, repressed youth; rather, his high spirits made him attractive to his fellows. This same playful spirit can be seen in his writings for the *Eton College Chronicle*.

In 1906, after a distinguished career at Eton, Knox went to Balliol College, Oxford University, where he was a brilliant student, winning several scholarships and prizes and acquiring the reputation of a nimble-witted debater and writer. In 1910 he was graduated with a first in "Greats" (studies in the Greek and Latin classics) and was elected a Fellow of Trinity College. Following his ordination as a priest in the Church of England in 1912, he was appointed chaplain of Trinity College. He believed that the Church of England was a branch of the Roman Catholic Church, and his introduction of Roman practices into his services brought him into conflict with some Anglican bishops. He responded by satirizing the liberal views of his opponents in parodies of Swiftian bite. Increasingly dissatisfied with his Anglicanism, he converted to Roman Catholicism in 1917. He described the evolution of his beliefs in *A Spiritual Aeneid* (1918).

After theological studies at St. Edmund's College, Knox was ordained a Roman Catholic priest in 1919. He never had a parish, but he had an active apostolate via his teaching and writing. He taught at St. Edmund's until 1926, when he was appointed chaplain of the Catholic students at Oxford University, a post he held for thirteen years. In the summer of 1939, at the request of the English hierarchy, he withdrew from his chaplaincy to devote himself to a modern translation of the Bible from the Latin Vulgate. Though much

criticized, his translation has an individuality and unity that no other possesses. He completed the New Testament in 1945 and the Old Testament in 1950. Prominent among his later works was *Enthusiasm: A Chapter in the History of Religion, with Special Reference to the XVII and XVIII Centuries* (1950), which, like his translation of the Bible, represented a summation of his life. This study of religious leaders who assert that they have had a special revelation of God's will was the product of thirty years of research.

In 1946 Knox moved to Mells, Somerset, where he resided for the rest of his life. In 1950, he was made a fellow of the Royal Society of Literature, and in 1956 he was elected to the Pontifical Academy. In his last public appearance, he delivered the Romanes Lecture at Oxford in June, 1957. Many in the audience knew that he was dying of cancer, and the lecture was both a brilliant success and a poignant occasion. Knox died at Mells on August 24, 1957. Following a requiem mass in Westminster Cathedral, he was buried in the churchyard at Mells, with a small group of friends as witnesses.

ANALYSIS

Ronald A. Knox was a Catholic apologist, and in all of his books, from theological treatises to detective stories, he tried to harmonize his literary efforts with his religious beliefs. He had deeply held principles, and he deduced things from them. He did not question his principles but explored ways in which human phenomena could be reconciled to them. For him, the world was a place of exile, of puzzles and probation. Home was the spiritual world, where these puzzles were resolved. These same themes occur in disguised forms throughout his detective stories, where crimes create tension and confusion but where their resolution brings peace and moral enlightenment.

Despite his deeply felt religious principles, Knox did not write his detective stories to illustrate and defend the faith. He wrote them to entertain, and no acquaintance with theology is necessary to enjoy these intricately plotted works. On one level Knox's detective fiction is like an acrostic or a crossword puzzle (both of which he liked to solve). On another level, however, these stories can be read as medieval moral-

ity plays, in which good battles evil. This multiplicity of levels is a manifestation of the complexity of Knox, an urbane, exuberant, but ultimately serious man who could treat sacred themes lightly and profane themes profoundly. This man who refined his wit by studying the Greek and Roman classics became accessible to a wider public when he applied the methods of German Higher Criticism to the Sherlock Holmes stories.

"STUDIES IN THE LITERATURE OF SHERLOCK HOLMES"

Knox's intention in "Studies in the Literature of Sherlock Holmes," which first appeared in the magazine *The Blue Book* in 1912, was to satirize German biblical critics who had found all kinds of sources, authors, traditions, and forms to explain the various books of the Bible. He was aware of the inadequacies of these critical methods and wanted to expose the dangers of their exaggerated use in the study of Scripture. His tone of mock seriousness in this Holmes essay delighted his first readers, and it started a trend in scholarship that continues to the present, long after the specific satiric point of his essay has been forgotten.

One of the questions central to this essay is the existence of two Watsons. According to Knox, some scholars held that there was a proto-Watson, who wrote *The Sign of the Four* (1890), *The Adventures of Sherlock Holmes* (1892), and *The Hound of the Baskervilles* (1901-1902), and a deutero-Watson, who wrote *A Study in Scarlet* (1887), "The Gloria Scott," and *The Return of Sherlock Holmes* (1905). The theory of the two Watsons hinges on whether Sherlock Holmes really died in his tumble from the Reichenbach Falls in Switzerland. If "The Final Problem" was genuine, then the stories in *The Return of Sherlock Holmes* were fabrications. Knox analyzes the evidence that Holmes's character and methods changed in the later stories. He even performs an astute linguistic analysis: The Holmes of the classic stories never splits an infinitive, whereas the Holmes of the *Return* stories splits infinitives on several occasions. Knox himself does not support the theory of the two Watsons. He believes that, though Watson wrote all the stories, there were actually two cycles: one set of stories that happened and another set that Watson invented. Watson also illustrates one of Knox's rules for

detective writers, because his intelligence is below that of the average reader. Knox compares Watson to the chorus in a Greek play—ever in touch with the action but always several steps behind in discovering what is really going on. Knox's essay also analyzes Sherlock Holmes biographically (Knox argues that he was an Oxford man), philosophically (Knox argues that Holmes used observation a posteriori and deduction a priori), and psychologically (Knox argues that Holmes was a man of passion rather than a cold-hearted scientist).

“A DETECTIVE STORY DECALOGUE”

A similar mixture of levity and seriousness, of the sacred and profane, can be seen in Knox's essay “A Detective Story Decalogue.” It was certainly appropriate for a clergyman to set down the ten commandments for the writing of detective stories. Although these are presumably objective rules for the proper behavior of detective writers, they also manifest Knox's personality and philosophy. He had no taste for the occult and macabre, and so he rules out all supernatural or preternatural agencies in detective stories. He had a taste for logic and fair play, insisting that the criminal must be someone mentioned in the early part of the story and that in perpetrating the crime no poisons unknown to science may be used. Knox had no taste for magic solutions; thus, the detective may have inspirations but no unexplainable intuitions, and no accident must ever help him in solving a crime. Finally, the detective must not himself commit the crime, and he must not discover any clues that are not immediately revealed to the reader.

THE VIADUCT MURDER

Knox punctiliously obeyed these rules in all six of his detective stories, although in his first, *The Viaduct Murder* (1925), one critic accused him of violating the “eleventh commandment” when he allowed the police to incriminate the right man. *The Viaduct Murder* begins as a lighthearted satire when four golfers discover a body with a mutilated head under the railroad trestle near the third tee. Was it murder or suicide? The coroner's jury brings in a verdict of suicide while of unsound mind, but some at the golf club suspect murder. The four amateur detectives, who constantly criticize one another's suggestions, pay more attention to clues

than motives. Suspicion is cast on a kindly clergyman of the Established Church who, the reader is asked to believe, has murdered a parishioner who has obnoxiously publicized his disbelief in the immortality of the soul. The surprise of the story is that the one character with a clear motive for committing the crime actually does commit it. Though the murderer is a Catholic, Knox makes it clear that people commit crimes not because of their religion but because of their psychology. None of the four amateur detectives solves the riddle, and here again Knox seems to be poking fun at the Higher Critics, that is, on the slant of mind that rejects a priori any likely explanation in favor of a convoluted one.

THE THREE TAPS

Unable to settle on a single detective in his first novel, Knox committed himself to four. In the second of his detective stories, *The Three Taps: A Detective Story Without a Moral* (1927), he settled on a single sleuth, Miles Bredon, who became the principal character in all the other whodunits Knox wrote. Several critics have found Knox's creation of this character unfortunate. Robert Speaight, for example, wrote that Miles Bredon was a bore and suggested that Knox should have based his detective on himself. Knox, however, was handicapped in this choice, for G. K. Chesterton had patented the priest-detective in his Father Brown stories. Like Sherlock Holmes, Hercule Poirot, and Lord Peter Wimsey, Miles Bredon possesses an agile and penetrating mind, but Knox fails to give him a memorable personality. Bredon enjoys smoking a pipe and playing his own devilishly difficult version of the card game Patience, but these seem to be traits attached to a paper creation rather than characteristics of a living individual.

THE BODY IN THE SILO

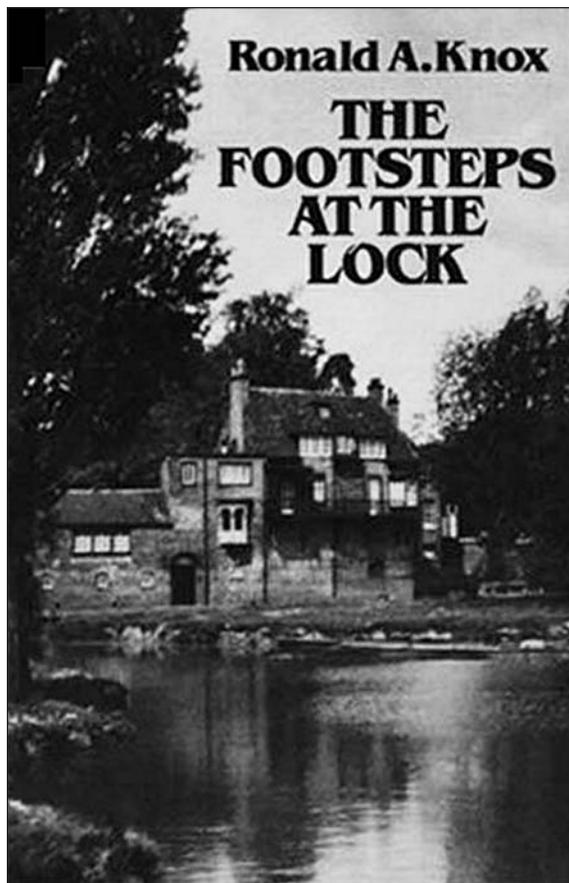

The Indescribable Insurance Company, Bredon's employer, also smacks more of calculation than of life. Insurance is gambling, says Knox, and Indescribable takes big risks and charges big premiums, but it is obvious that its main task is to provide interesting cases for Bredon. For example, in *The Body in the Silo* (1933) the body of a guest at a house party in the country is found in a silo, presumably killed by the gas generated from the fermenting vegetation. The guest hap-

pens to be insured by Indescribable, and Bredon happens to be a guest at the same party. Accidents abound in the setting up of cases for Bredon, though never in their resolution. Insurance exists as a hedge against accidents, but Knox also uses it to reveal the deeper levels in his stories. According to Indescribable, insurance provides a safety net under the tight-rope walk of existence. Yet Bredon finds in his cases that there is no security in life, and the Indescribable Insurance Company ends up paying as often as it ends up winning. The implied meaning is that humankind's only true security rests with God.

Although religion does not dominate the Bredon series the way it does Chesterton's Father Brown series, Knox's stories always feature characters whose religion plays an important role in the plot. Furthermore, in the resolution of these stories a moral often surfaces that is compatible with Knox's Catholicism. For example, in *The Three Taps* Mr. Jephthan Mottram, a Protestant manufacturer, has a fondness for the Catholic church, and at the end of the novel the reader discovers that he has been testing the thesis that a Catholic bishop will do anything for money. Happily, the bishop involved turns out to be a man of integrity. In *The Footsteps at the Lock* (1928), Knox is concerned with the redemption of two unpleasant cousins, and the one with murderous intentions ends up on his deathbed surrounded by nuns and ministered to by a priest. In *The Body in the Silo* a murderess gets her comeuppance by killing herself in her attempt to kill her husband. Bredon uses this example of poetic justice to state his preference for allowing Providence to take a hand in the game of life.

STILL DEAD

Perhaps the best example of Knox's intentions and techniques is *Still Dead* (1934), the novel that several critics regard as his best. The setting is the Scottish Lowlands, often a vacation retreat for Knox. The focus of the story is on the Reiver family. Donald Reiver is master of the Dorn Estate. He piloted it through World War I, but after his wife's death, his heart was no longer in managing his property. His son Colin, however, an invalid and a heavy drinker, is ill-suited to step into his father's shoes. Worried about the future, Donald Reiver insures Colin's life with Indescribable. Throughout this

exposition one can see Knox's use of mild satire: Donald Reiver could not bring up a son to his liking but he could use money to turn that son into a financial asset.

An important event in the novel occurs when Colin, under the influence of alcohol, kills the gardener's young son with his sports car. Although he is acquitted of wrongdoing, he is plagued by guilt and announces his intention to leave England. He seems to make good on his promise when he is found dead—twice. On a Monday, the head keeper sees Colin's dead body lying by the roadside; it then vanishes, only to turn up two days later in the same spot. The manipulation of the corpse is connected with an overdue premium on Colin's life-insurance policy, but many complications follow in connection with Colin's supposed trip and his activity back on the estate.

Bredon is assigned to the case by his company, and his investigations uncover much contradictory evi-

dence, some of it supporting an accidental death and some suggesting foul play. It turns out that Colin, fortified by drink, returned to the estate to apologize to the gardener for killing his young boy. Colin collapsed outside his door, and the gardener let him remain in the cold throughout the night. Once Bredon discovers what actually happened, a debate ensues over the morality of the gardener's action. This discussion brings out the levels of Knox's fiction: the level of law (where rules govern both the insurance company and society) and the level of Providence (where justice and mercy reign in a mysterious unity). One character sees the gardener's action as murder because he made no effort to bring the drunk man inside. Another says that there is no law against allowing a man to die. Yet another says that the gardener helped Providence in a piece of poetic justice (Colin killed the gardener's son through neglect, and now the gardener kills Colin by neglect). In this debate Knox makes clear that laws are blunt instruments for obtaining justice: They cannot be relied on to give the morally correct solution to human problems. Colin killed a child, in act but not in intention, and the law could not punish him. The gardener killed Colin, in intention but not in act, and the law could not accuse him. Knox concludes that if the law cannot deal with a man, then he should be left to his own conscience. In this particular case Bredon decides to persuade all to keep the truth of the affair quiet, because publicizing it would mean a multiplication of hatred, malice, and uncharitableness.

In his treatment of law and morality Knox uses a theme familiar to the hard-boiled school of writers, whose detectives often solve the human problems they encounter not by following the letter of the law but by doing what will genuinely enhance the lives of those about whom they care. Despite this similarity, Knox would never be categorized with the hard-boiled school. Rather, he belongs with G. K. Chesterton and Dorothy L. Sayers in the analytic school. The point of his stories is the puzzle and its solution. There is also a paucity of violence in his plots, unlike those of the hard-boiled school. Though Knox's satire is gentle, his wit often gives some bite to it, and he uses his impish humor to relieve as well as enlighten painful situations. Most important, Knox is concerned in his stories

with the workings of the moral law in characters who imagine themselves to be unnaturally immoral. As in his other works, Knox tried in his detective fiction to construct alternatives to doubt, despair, and decadence. As a priest, he found these alternatives in a world beyond appearances, approachable for many people through a recognition of the moral law. Induction or deduction would not lead to this recognition. Faith was at the heart of the matter.

Robert J. Paradowski

PRINCIPAL MYSTERY AND DETECTIVE FICTION

MILES BREDON SERIES: *The Three Taps: A Detective Story Without a Moral*, 1927; *The Footsteps at the Lock*, 1928; *The Body in the Silo*, 1933 (also known as *Settled out of Court*); *Still Dead*, 1934; *Double Cross Purposes*, 1937

DEAN R. KOONTZ

Born: Everett, Pennsylvania; July 9, 1945

Also wrote as David Axton; Leonard Chris; Brian Coffey; Deanna Dwyer; K. R. Dwyer; John Hill; Leigh Nichols; Anthony North; Richard Paige; Owen West; Aaron Wolfe

Types of plot: Horror; thriller

PRINCIPAL SERIES

Odd Thomas, 2003-

PRINCIPAL SERIES CHARACTER

ODD THOMAS, a young short-order cook, can speak to ghosts and other psychic manifestations, such as bodachs, spirits that presage death and disaster. He attempts to lead a quiet existence in Pico Miundo, California, with his girlfriend Bronwen, but his ability, accompanied by prophetic dreams, leads him into danger, often on the behalf of endangered friends.

CONTRIBUTION

Dean R. Koontz is an acknowledged master of the horror genre but is also skilled at genre blending, drawing from the genres of horror, science fiction, thriller, comedy, and sometimes satire. He began his career with a science-fiction novel and wrote in that genre for four years before branching out to other genres. His novel *Chase* (1972), the story of a Vietnam veteran experiencing the rigors of civilian life, received excellent reviews and marked the moment when he first felt himself to be a serious writer.

After the cross-genre novel *Whispers* (1980) became Koontz's first paperback best seller, his novels have made the best-seller lists multiple times. Works such as *Phantoms* (1983) and *Odd Thomas* (2003) are among a collection of work that crosses genres, combining the realms of horror and thriller. In 1986, *Strangers* was his first hardback best seller, and at that point, Koontz dropped the other pseudonyms under which he had been writing and began writing solely under the Dean R. Koontz name.

Koontz is one of the hardest-working authors in any field, spending ten hours a day, six days a week at

work, feeling that extended stints of writing help him focus more deeply on his characters so that he can understand their stories. His impressive range of works features a finely tuned and precise style with occasional graceful metaphors that are polished and compelling.

BIOGRAPHY

Born and raised in rural Pennsylvania, Dean Ray Koontz had an abusive father and an impoverished and rigorous childhood. Nevertheless, he graduated from Shippensburg State College. While a college senior, he won the prestigious *Atlantic Monthly* Creative Writing Award for his short story "Kittens," a victory that pushed him to continue writing. After college, he worked with the Appalachian Poverty Program and as an English teacher at Mechanicsburg High School, but after several years, his high school sweetheart and wife, Gerda, offered to support him for five years to determine whether he could make it as a writer. By the end of the five years, she had quit her job to handle the business end of Koontz's writing, although it was not until fifteen years had passed that they were both fully supported by his writing.

Koontz's first novel, written while he was a teacher, was *Star Quest*, a science-fiction novel published as part of an Ace Double in 1968. In the 1970's, he began writing and publishing works of horror and mainstream literature, many of which appeared under a variety of pseudonyms. His novella *Beastchild* received a Hugo Award nomination in 1971. Koontz used pseudonyms to avoid negative crossover, a phenomenon wherein work in a new genre alienates existing fans and fails to create new ones. He divided his works in different genres among a number of pen names: David Axton (adventure), Brian Coffey (short suspense), Deanna Dwyer (gothic romance), K. R. Dwyer (suspense), John Hill (occult mystery), Leigh Nichols (romantic suspense), Anthony North (technothriller), Richard Paige (romantic suspense), Owen West (horror), and Aaron Wolfe (science fiction).

Koontz's breakthrough book was the cross-genre

thriller *Whispers*, published in 1980, which established an audience for his uniquely placed work. Since then he has had close to two dozen best sellers in hardcover and paperback, has been published in thirty-eight languages, and has branched out in several literary directions, including nonfiction and essays.

Meanwhile, Koontz moved to California in 1975 and settled in Newport Beach with his wife and his dog Trixie. His work continued to range widely, from children's books such as *The Paper Doorway: Funny Verse and Nothing Worse* (2001) and *Robot Santa: The Further Adventures of Santa's Twin* (2004) to nonfiction such as *Writing Popular Fiction* (1972) and *The Underground Lifestyles Handbook* (co-written with his wife in 1970), but his central focus remained fiction. Koontz does not consider himself a horror writer, insisting that the optimistic outlook of his works, which do not end as darkly as those of the majority of his contemporaries in the horror field, moves them outside that genre. One of Koontz's goals in his writing has been to convey that humans can survive and

overcome the disabilities imposed on them by their pasts, having himself survived a grim and often terrifying childhood.

Although for the most part, Koontz has avoided series books, he has made an exception for the character Odd Thomas, who appears in the book by the same name as well as in *Forever Odd* (2005) and *Brother Odd* (2006), saying that the character came complete to him, insisting on his own story.

ANALYSIS

While Dean R. Koontz is typically regarded as a writer of horror fiction, in the majority of his works, the horror is the result of one character's inhumanity toward another and not the product of any supernatural force. His tautly written psychological explorations of the darker side of the human mind often share major elements, including a protagonist with an abusive upbringing who has achieved financial independence and success, a sociopathic antagonist who cannot be redeemed, and the motif of love and compassion as forces of salvation along with lesser elements such as a dog as a character, the appearance of a Ford sports utility vehicle, and a Southern California setting.

Larger themes are frequently repeated. Distrust of the government often appears in Koontz's books, a relic of his time with the Appalachian Poverty Program, which left him with the belief that such programs encourage the impoverished to depend on them rather than to work to better their condition and are vastly inefficient means of getting help to those who most critically need it.

Antagonists are seldom women in Koontz's works. When female antagonists do appear, they are usually partnered with a dominant male figure. Many of his female characters seem unwontedly passive and unable to escape their fates, although a few characters do contradict such a generalization.

WHISPERS

In *Whispers*, a young woman, Hilary Thomas, becomes the target of a psychopathic killer. When the killer dies but somehow still continues to stalk Thomas, she and her detective boyfriend, Tony Clemenza, must track down the real-world explanation behind the killer's continued existence.

The book showcases one of Koontz's at times unfortunate tendencies in that characters are prone to pausing and delivering long expository statements or dialogues whose topics range from the meaning of life to politics. In Koontz's work, what seem to be supernatural events are eventually shown to have explanations more grounded in reality, although sometimes that reality seems to be somewhat stretched.

PHANTOMS

In *Phantoms*, when sisters Jenny and Lisa Paige arrive in the small ski resort town of Snowfield, California, they discover that the inhabitants have recently vanished. Only a few bodies remain, all bearing the marks of having died in a moment of terror. Despite the disruption of electronic communications, the sisters manage to make a call to the police of nearby Santa Mira. When the police arrive, they find themselves and the Paige sisters trapped and hunted by a deadly force. The force turns out to be an ancient giant amoeboid creature that feeds rarely but largely and is responsible for past disappearances of entire populations.

Phantoms is solidly cross-genre; it contains elements of suspense, science fantasy, horror, mystery, police procedural, and romance. In this novel, Koontz performs a sleight of hand that is apparent in other works: Initially he offers a supernatural explanation, referencing Satan and "the Ancient Enemy" over and over again, only to rescind that easy answer by presenting the creature as both mortal and as having possibly learned its cruelty and viciousness from exposure to human beings.

LIGHTNING

In *Lightning* (1988), Laura Shane, born in 1955, has a guardian angel: a mysterious stranger who shows up time and time again to save her, including at her birth, when he prevents a drunken doctor from delivering her. When her father dies, Laura is sent to an orphanage, where again the mysterious stranger saves her from perils such as a rapist.

As an adult, Laura builds a happy life with her husband and child, but they find themselves pursued by individuals somehow connected with the mysterious stranger, who appears to save Laura and her child, although her husband is killed. Eventually the stranger's

identity is revealed: a time traveler from 1944, he fell in love with Laura during a visit to 1984 and originally sought only to prevent the drunken doctor from delivering her, which had left her disabled.

Lightning's repeated message is that in loving one another, people give one another the power to accept life and their individual fates. Like most of Koontz's works, *Lightning* insists that love is what makes life worth living and is the ultimate redemptive force.

INTENSITY

In *Intensity* (1996), Chyna Shepard, a college student, is visiting a friend's house when a serial killer breaks in and kills everyone except her and her friend. Chyna hides and finds herself in the killer's motor home. She decides to stow away, hoping to rescue the young woman the killer has boasted of keeping prisoner in his basement. The killer, however, realizes that she is aboard the motor home and takes her prisoner as well. Eventually both women escape, defeating the killer in the process.

Intensity showcases Koontz's ability to show the process of a killer playing cat and mouse with an unknowing victim with chilling detail in one of his shorter works. Taut, tightly written prose underscores the precision of the details in his presentation of a psychopath. The ultimate conclusion of the novel is that people have power over their fates and that they choose whether to become victims, a lesson Chyna acts out repeatedly in the course of the novel.

ODD THOMAS

In *Odd Thomas*, a short-order cook with psychic abilities finds himself led by ghosts, often to avenge or resolve their murder. Odd Thomas also sees bodachs—dark creatures drawn by pain and death. A customer he nicknames "Fungus Man" shows up at the restaurant followed by swarms of bodachs. Realizing that their appearance signals some pending catastrophe, Odd enlists his girlfriend Bronwen in an attempt to avert the disaster and, in the process, discovers increasingly disturbing details about the man. In the end, Odd prevents a mall disaster but is injured. After several weeks of being tended in the hospital by his girlfriend, he reluctantly realizes that she is a ghost and comes to terms with her death.

THOMAS KYD

Alfred Bennett Harbage

Born: Philadelphia, Pennsylvania; July, 18, 1901

Died: Philadelphia, Pennsylvania; May 2, 1976

Types of plot: Hard-boiled; police procedural

PRINCIPAL SERIES

Sam Phelan, 1946-1948

PRINCIPAL SERIES CHARACTERS

SAM PHELAN, a former boxer, is a police lieutenant in a large Eastern city in the early 1940's. About thirty years old, he remains a bachelor through three books. He is blunt, patient, diligent, sometimes blundering, but more intelligent and imaginative than he appears.

CLEVELAND JONES, the chief of police, is Phelan's boss, adviser, and chess partner. An educated man with literary taste, Jones nevertheless learned his job from the beat up.

J. ROTH NEWBOLD, the district attorney, is sarcastic and something of a dandy. Responsive to public demands for efficient justice, he presses the police for speedy arrests even in complex and baffling cases.

DR. ALEXANDER SURTEES, a retired octogenarian professor, irritating and unfathomable to Phelan, must be interviewed in each of his cases. Given to maddening digressions and abrupt naps in the midst of interrogations, Surtees provides much of the novels' comic relief.

CONTRIBUTION

Thomas Kyd's is a transitional type of detective

fiction. His Sam Phelan shares some attributes with earlier detectives and differs somewhat from the typical police detective of later crime fiction. Although Phelan's investigations are among the earliest fictional ones that make use of the expertise of professional cohorts, the solutions remain largely the personal triumphs of a resourceful hero. The subsequent development of the police procedural demanded a different kind of protagonist and more systematic attention to the department. Other features of Kyd's novels, such as his conventional dramatic climaxes, were scarcely compatible with this new genre.

The hybrid nature of Kyd's Phelan novels has obscured their originality for many historians of mystery and detective fiction. Phelan exemplified many people, in police and other work, who attained vocational competence before World War II only later to find themselves laboring amid specialized professionals. The Phelan type of detective actually did exist but rapidly became obsolete. In the interests of realism the police procedural sent its Phelans to pasture and focused on the exigencies of the precinct. Thus, Phelan can no longer be replicated; he can, however, still be enjoyed.

BIOGRAPHY

Alfred Bennett Harbage, who would adopt the name Thomas Kyd for his detective writings in middle age, was born in Philadelphia on July 18, 1901, the son of John Albert Harbage, a grocer, and Elizabeth (Young) Harbage. Entering the University of Pennsyl-

vania in 1920, he earned successively the degrees of bachelor of arts (1924), master of arts (1926), and doctor of philosophy (1929). He married Eliza Finnesey in 1926; the couple subsequently had four children.

An academic to the core, he began teaching at his alma mater while a graduate student in 1924 and remained there for twenty-three years, meanwhile earning a reputation as an author of scholarly books on English drama. In 1946 he published the first Phelan novel; the second followed the next year, when he also accepted an appointment as an associate professor of English at Columbia University. After his third Phelan novel in 1948, Harbage turned his attention to the mystery thriller for a time.

With his detective novels behind him, he became professor of English literature at Harvard University in 1952, remaining there until his retirement in 1970 and adding to his already impressive academic achievements. He served as general editor of the thirty-eight-volume Pelican Shakespeare series (1956-1967) and wrote several books on William Shakespeare and numerous scholarly articles. He received many academic awards, including honorary doctorates from the University of Pennsylvania in 1954 and Bowdoin College in 1972.

In retirement Harbage returned to the Philadelphia area where he had spent his first forty-six years, residing in Cherry Hill, New Jersey, until his death at the Pennsylvania Hospital in Philadelphia on May 2, 1976.

ANALYSIS

When Thomas Kyd began writing his Sam Phelan novels in the mid-1940's, the detective assigned to an urban police force had not yet become a staple of mystery and detective fiction. Although elements of earlier detective genres recur in the Phelan books, they are transmuted into a fresh conception. Like earlier mystery writers of the genteel variety, Kyd demonstrates a fondness for wit and literary allusion, but he does not allot such accomplishments to Phelan; rather, he distributes them among his cohorts and minor characters. To a considerable extent Sam's character is defined by means of his plainspoken reactions to their knowledge and cleverness. Closer to the practical, tough-minded,

tough-talking private investigators of Dashiell Hammett and Raymond Chandler, Phelan emerges as less crude and cynical, more sensitive and kindhearted, than his hard-boiled predecessors.

He is also a public servant, part of a team of investigators whose analysis of criminal evidence has become increasingly specialized. Kyd was offering a detective much closer to reality than either the leisured English sleuth of writers from Arthur Conan Doyle to Dorothy L. Sayers or the private eye who freelanced or had vague connections with an agency. Such a figure posed a considerable challenge for Kyd. A police detective could not plausibly operate in the highly distinctive manner of either of those previous types; nor could the author afford to lose him in a maze of officials and procedures. A different personality was called for: someone who attained distinction not as a brilliant or bold individual but as a leader and coordinator of the efforts of a heterogeneous group. Prescribed routine and scientific techniques became more important, but neither could be allowed to swamp the interest in the protagonist that had sustained the detective novel for several decades. In response to this problem, Kyd created Sam Phelan.

Police officers had long suffered from a reputation as brave and tenacious but stupid enforcers of the law—a reputation presumably justifying the amateur or private detective. Kyd wisely avoided making Phelan a mere butt of humor. Instead, he created a sympathetic investigator with manifest strengths and weaknesses, a man who strikes readers as like them in many ways, though in the last analysis a bit more perceptive, as a good detective of any sort should be. Phelan, a mere high school graduate, must, like many of his generation in various fields of endeavor, deal with and depend on the assistance of the more highly educated. J. Roth Newbold, the dapper district attorney, takes a dim view of Phelan's intelligence, while the latter despises the snobbishness of this wittier and more sophisticated representative of a class he can well do without. Phelan manages to maintain a generally good working relationship with Newbold's two assistants, both clever and well educated, although he is inclined to disparage their overingenious theorizing about the crimes they investigate and to wax gleeful

when he can disprove them.

Phelan is intelligent enough to acknowledge his reliance on the findings of police photographers, ballistic experts, and other technicians. An essentially practical man, he values the mysterious ways of analysts of physical evidence but has little use for abstract speculations, his impatience with long-windedness even leading him to neglect his usual thoroughness on occasion. In Kyd's third novel, *Blood on the Bosom Devine* (1948), for example, Phelan avoids the duty of interrogating an eyewitness to a murder because he knows the witness to be an exasperatingly absentminded professor—until his chief, Cleveland Jones, advises him to carry it out. Phelan trusts the chief, despite the latter's penchant for quoting Shakespeare and John Milton, because Jones has worked his way up through the local police ranks and demonstrated his command of constabulary nuts and bolts. Naturally, Phelan learns nothing valuable from the professor—his instincts are usually correct—but he realizes that while a good detective pursues positive hunches, he cannot afford to exclude witnesses on the basis of even well-founded hunches.

Sam Phelan sometimes jumps to conclusions that are right but only gratuitously so. In *Blood on the Bosom Devine* he suspects the right person and accuses him after several days of intensive work, but then, because of the murderer's sincerely indignant reaction to a wrongly attributed motive, withdraws his accusation, only later realizing the true motive and circling back to get his man. Because Phelan can admit his mistakes, however, neither Chief Jones nor the reader loses faith in him. Phelan seems to rule out some of his suspects very abruptly; his decisions, however, reflect a commonsense approach that keeps him on or close to the right track. Diverting details hold no charm for him.

Phelan uses much of the lingo of the hard-boiled detective. He is likely to tell witnesses to "beat it" when he is through with them and readily calls young females "sweetheart," but his unpolished manners are a professional mechanism rather than a reflection of the essential Sam, who proves to be old-fashioned and even prudish. He worries over the morals of young boys who sneak into theaters to watch burlesque

shows and rules out as a girlfriend an otherwise admirable young woman immodest enough to appear as a "curvaceous cutie" en route to what she hopes is a more dignified theatrical career. Though prejudiced, he is capable of enlargement. He struggles to absorb at least a few of the great books recommended by Chief Jones and finds it difficult to blame criminals when he discovers the circumstances underlying their antisocial behavior. A relatively unschooled man, he nevertheless takes advantage of his opportunities to learn through living and doing.

The settings of the Sam Phelan books reflect Kyd's background and interests: the academic environment, the ethnic neighborhoods and prestigious suburban enclaves of an area patterned after Philadelphia, and the world of the theater. He studiously avoided the pseudo-gothic trappings that the first Philadelphia mystery writer, Charles Brockden Brown, had attempted to domesticate in America a century and a half earlier. Kyd's murders occur in the open before witnesses: in a crowded university lecture hall, on the spacious lawn of an elegant estate, on a spotlighted stage. Surprisingly, he manages to engender and maintain mystery in circumstances unfavorable to calculated and anonymous violence.

BLOOD IS A BEGGAR

Unlike the literary detective who seems always to be in his or her element, Phelan, the former boxer from a working-class neighborhood, finds himself thrust into the rarefied atmosphere of the university in Kyd's first novel, *Blood Is a Beggar* (1946). The novel is set a few years earlier, in a time when only a small and chiefly privileged segment of the population attended college. Kyd knew this world well, but it is significant that he knew it as a Philadelphia grocer's son and thus was able to imagine the mingled awe and condescension of a man such as Sam Phelan toward well-heeled undergraduates and comfortable professors. Amused and annoyed by the college crowd, Phelan in turn seems incomparably droll to his social betters. When *Blood Is a Beggar* appeared, the influx of veterans had begun to work profound changes on higher education, but Phelan mirrors an attitude still prevalent among the general population in 1946. Phelan encounters the upper crust in its native lair in *Blood of Vintage* (1947)

and solves the case without winning any prizes for diplomacy.

BLOOD ON THE BOSOM DEVINE

It was in the third and last Sam Phelan novel, however, that Kyd used his setting to best advantage. Under his given name, Alfred B. Harbage, he had written extensively about the stage and also about theatergoers, as evidenced by the title of one of his best books, *Shakespeare's Audience* (1941). The mystery and solution of *Blood on the Bosom Devine* depend on the author's familiarity with theatrical architecture, properties, and equipment, especially lighting. A burlesque queen is murdered onstage as she poses on a pedestal that revolves in and out of a spotlight. Phelan intuitively recognizes that the killer cannot be from the audience; it is only when he learns more of what his creator knows about the angles and possibilities of vision onstage and in the wings that he can reconstruct the murder accurately.

His investigation obliges him to question an obnoxious young fraternity man and the aggravating Professor Surtees, as well as a clergyman who has attended the show to determine for himself the seriousness of the threat it posed to the moral health of his congregation. Will Ferguson, an assistant to District Attorney Newbold, constructs an elaborate Freudian argument to "prove" the Reverend Tumpton guilty of the murder. Phelan's visit to Tumpton's Chapel of the Burning Bush enables him to demolish Ferguson's theory. This interview and one with Professor Surtees are the humorous high points of this best of Kyd's novels. Later, Newbold's other assistant, Hugh Espendale, develops his own ingenious scenario—complex, logical, and wrong. Phelan has already used psychology of a more basic sort to solve the murder.

Kyd's academic background contributes in another way to his fiction. A large proportion of scholarly work is detection, by nature consisting largely of negative and irrelevant evidence that cannot, however, be dismissed until shown to be such. The test of the scholar as well as of the detective is likely to be a willingness to continue patiently, systematically, and imaginatively at times when the fun has gone out of the investigation. Kyd skillfully conveys the inevitable weariness and discouragements of such work as well

as the exhilaration of success that justifies the whole endeavor.

By and large Kyd plays fair with his readers, who have an adequate chance to solve the crimes. *Blood of Vintage* is perhaps overly complicated, but in *Blood on the Bosom Devine* especially he presents the clues adroitly, one as early as the first sentence in the story—although only the most alert reader would be likely to know what to make of it. Artful plotting in the mode of the classical detective story, rather than fast-moving adventure punctuated by frequent violence, predominates in this novel; still, the tightly knit plot reflects a recognizable world.

The prose of the Sam Phelan novels is inelegant but serviceable and straightforward. The sentences are short; the description is generally curt, though colorful at times. These qualities are visible in the following passage from the first chapter of Kyd's third novel:

Ferguson reached for the typescript and read a few lines. When he would come to certain words, his owlish expression would dissolve into imbecilic delight. His eyes would widen and leer, his lips seem to drool. The Chief burst into a guffaw.

Kyd's style reflects his academic roots only when he is presenting the speech of academic characters; elsewhere it runs to the laconic simplicity that Ernest Hemingway bequeathed to the hard-boiled school. He depends much—some might think excessively—on short, snappy dialogue. There is very little show of authorial omniscience. Although Phelan clearly reflects on the evidence he so doggedly accumulates, very little sense of his mental processes is given until the final unraveling, when he shows himself adept at extracting the essential from a mass of testimony and technical data.

COVER HIS FACE

Although Kyd chose settings not remote in time, the world he showed was rapidly vanishing even as the Sam Phelan books appeared. Rather than bring Phelan into the postwar era, Kyd published in 1949 a mystery novel called *Cover His Face*, in which a young English instructor goes to England in search of letters by Dr. Samuel Johnson but finds instead nerve-wracking danger. In this work and in a few short stories published in the 1950's, Kyd abandoned detection as such

for thrills and suspense. Thus, the career of Sam Phelan was a short one, but he stands as one of the earliest and most neglected protagonists of the detective genre later to be typed as the police procedural. Persistent, dedicated, subject to unwelcome political pressure and the constraining orders of superiors, fallible, thoroughly human, equipped with enough fortitude and common sense to prevail, Sam Phelan remains a believable and engaging character.

Died: New York, New York; January 7, 1968

Also wrote as Steve April; Len Zinberg

Type of plot: Private investigator

PRINCIPAL SERIES

Dave Wintino, 1957-1965

Toussaint Moore, 1957-1964

Lee Hayes, 1965-1967

PRINCIPAL SERIES CHARACTERS

DAVE WINTINO, a young, strong, and wiry detective on the New York police force, makes a reputation for himself very quickly as a smart and incorruptible investigator and as a formidable pugilist.

TOUSSAINT MOORE, a black private investigator, was reared in Harlem. He had been a postal worker, but idealism—and the desire to make better money—motivated him to give up his government post in favor of work as a private investigator. Somewhat introspective, Moore is a sensitive, intelligent individual.

LEE HAYES, a black police detective in New York City, becomes involved in investigations of violent crimes while managing to steer clear of both the corruption that is pervasive in the city's bureaucracy and the temptation to succumb to racial hatred.

CONTRIBUTION

Ed Lacy is one of the many underrated detective-fiction writers who both flourished and faded all too rapidly. In 1958, he received the Mystery Writers of America's Edgar Allan Poe Award for the best mystery of the year, *Room to Swing* (1957). Later works did not bring him the same degree of success, and his reputation faded to near oblivion after his death. Yet his crime novels still merit critical attention. Unlike

his peers, Lacy often chose blacks as protagonists. His characters have greater psychological depth than is ordinarily found in detective fiction, an achievement that is all the more remarkable when one considers that those same characters are generally immersed in the stereotypically macho worlds of boxing and urban crime. Lacy's plotting is similarly skillful, featuring recurring flashbacks, considerable action but little gratuitous violence, and double-twist endings. In 1957, the *Los Angeles Mirror-News* called *Room to Swing* "the occasional perfect mystery novel." The hyperbole of this judgment should not be allowed to obscure the fact of Ed Lacy's genuine achievement as a writer of detective fiction.

BIOGRAPHY

Ed Lacy is the pen name of Leonard S. Zinberg, who was born in New York City in 1911. He continued to live in New York throughout most of his life, gaining an intimate familiarity with the city that proved to be very useful to his fiction writing. He and his wife, Esther, had one child, a daughter named Carla.

Lacy began his writing career in 1940 with the non-detective novel *Walk Hard—Talk Loud*, which is set in the world of boxing, a milieu that would become a lifelong interest. During World War II, he served as a correspondent for *Yank*. After the war, he met some writers, and although they were poor, according to his account, he decided that theirs was the career that he would pursue. From that time, Lacy earned his livelihood as a freelance writer. After a slow start, he saw some success with his first detective novel, *The Woman Aroused* (1951), intended to be a satire. He wrote dozens of stories that were published in such periodicals as *Ellery Queen's Mystery Magazine*, *Alfred Hitchcock's Mystery Magazine*, *The Saint*, *Esquire*,

The New Yorker, and *Collier's*. Finally, after four non-detective and five detective novels, *The Best That Ever Did It* (1955), a caper novel, achieved considerable popularity. Three years later, Lacy received the Edgar for *Room to Swing*. Lacy also was awarded a Twentieth Century Fox Literary Fellowship.

Lacy died on January 7, 1968, in New York City. His manuscript collection is currently held in the Mugar Memorial Library at Boston University.

ANALYSIS

Ed Lacy began his career of mystery writing in 1951 with the satiric *The Woman Aroused*, succeeded by *Sin in Their Blood* (1952) and *Strip for Violence* (1953). The titles suggest that the books have no literary merit whatsoever, and Lacy himself expressed wonder at the titles his editors and publishers created and approved. Yet these books mark a strong beginning to Lacy's contribution to the mystery and detective genre.

That contribution may be judged credible, consistent, and often creative. During the mid-1950's, before the Civil Rights movement had begun, Lacy was featuring black investigators, both private and police, who possessed the requisite invincibility of the detective hero. Each is literate, intelligent, ethical, physically powerful, and sensitive, often to a greater degree than his white counterparts. Lacy believed that stories were given new depth if the characters were Mexican, Puerto Rican, or black.

Toussaint Moore, the hero of the Edgar-winning *Room to Swing*, is originally selected to solve the case on which the plot hinges because he is black. Lacy gives his character compelling internal struggles: struggles between security and possible wealth, between the pain of racial discrimination in the South and the pleasure of success in solving his case. Minor characters who are black, such as Ollie Jackson in *Be Careful How You Live* (1958), are similarly presented as being intelligent and capable people. It is to his credit that Lacy writes of black characters without a trace of stereotyping—and without the self-righteousness sometimes found in works of the 1960's.

Lacy does at times, however, commit the sorts of technical mistakes that are common in novels in which first-person narration is employed. For example, he

fails to explain why the narrator is bothering to tell this story at all and how a narrator such as this would ever consider writing such a work. Most important, Lacy sometimes forces the narrator to record the events surrounding his own death, a neat trick indeed. Still, though Lacy is guilty of all these mistakes, they are more than compensated for by the psychological insights presented and the skillful and somewhat sophisticated manipulation of time through multiple flashbacks. These shifts in chronology flow naturally, and the revelations they contain are well placed. Such clever placement of information is an important component of the consistently well-structured plots of Lacy's novels.

Lacy's annual summer visits to the East End of Long Island became a source for *Shakedown for Murder* (1958). Both the idyllic village setting and the less-than-idyllic village "frustration and bigotry of long standing" figure strongly in the plot. Trips to Europe, particularly to Paris, offered Lacy the ideas for *Go for the Body* (1954), *The Sex Castle* (1963), and *The Freeloaders* (1961). Work was another source of story ideas for him. Lacy once took a job in a butcher shop to learn about freezing meat, a subject taken up in *The Men from the Boys* (1956).

In a 1959 article, "Whodunit?—You?" Lacy describes his customary process of assembling a plot. He began each novel with "the denouement clearly in mind." It was important to him that clues be planted carefully throughout the text and the solution to the mystery not be unrelated to the plot. He wrote for three hours a day, seven days a week, and produced five typed pages per day. It took about a month for him to complete a first draft, to which he returned some weeks later for the extensive revision he or his editors required. He claimed that an average mystery novel during the 1950's could earn five thousand dollars over its life from magazine serialization, hardcover and paperback publication, and foreign rights. (Most of his works were translated into French, Italian, Spanish, Japanese, and German.)

Though he could be classified as a member of the American hard-boiled school of writers, Lacy's plots avoid the gratuitous violence and sex often associated with this genre. Although considerable violence does

take place, rarely is it exaggerated or without function within the plot. On this topic Lacy commented, “There is more than sufficient violence about us, so [I] don’t use violence for violence’s sake.” He also refrained, he added, from putting characters “in bed 20 times a day.”

BE CAREFUL HOW YOU LIVE

An illuminating example of a Lacy novel is *Be Careful How You Live*, published in 1958 after a string of five successes that had earned high praise from critics. *Be Careful How You Live* describes the adventures of Bucky Penn, a young New York police detective who becomes the partner of Doc Alexander, a very clever, streetwise, older detective. Together they operate successfully on the elite Commissioner’s Squad. Risks and temptation arise, however, when they become members of a special unit assigned to solve an important kidnapping case.

Narrated in the first person by the main character, and using a large amount of flashback, the novel reveals how events in Bucky’s childhood explain, if not justify, his adult behavior. He became an undirected, dissatisfied young man who gave vent to his aggressions by becoming first a boxer, then a soldier, then a physically abusive New York police officer. The account of his rise and fall is realistic and credible. Ollie Jackson, a black officer and a minor character, is ethical, intelligent, and loyal—perhaps the most attractive character in the book. The female characters, on the other hand, are seen by Bucky as either slovenly, slut-tish, or pleasantly compliant—the only categories he understands. Lacy keeps judgments and observations consistent and appropriate to Bucky’s nature. Not until the shower of bullets at the very end of the story does the reader flinch, faced with a denouement that simply does not ring true. Given the many strengths of this book, and, indeed, of the entire canon of Ed Lacy, it is disappointing that he and his works have nearly fallen into the category of the forgotten.

Born: Chicago, Illinois; July 12, 1927

Died: Plymouth, New Hampshire; October 27, 1997

MARTHA HENISSART

Born: Place unknown; 1929?

Also wrote as R. B. Dominic

Types of plot: Amateur sleuth; cozy; thriller

PRINCIPAL SERIES

John Thatcher, 1961-1997

PRINCIPAL SERIES CHARACTERS

JOHN PUTNAM THATCHER, the senior vice president of the Sloan Guaranty Trust, was born in Sunapee, New Hampshire, and attended Harvard University. A widower, Thatcher maintains cordial relations with his daughter, Laura, and his two sons and their families. Having had much experience with money matters and people, he is cautious, contemplative, and conservative, and enjoys investigating murder mysteries precisely because he dislikes chaos.

BEN SAFFORD is a democratic congressman from Ohio, whose insider knowledge of national politics serves him well when he more than occasionally becomes embroiled in murder investigations.

CONTRIBUTION

Emma Lathen is a pseudonym used by the writing team of Mary Jane Latsis and Martha Henissart. Lat-

sis, an economist, and Henissart, a lawyer, looked to their professional journals and activities for ideas and information to create the Emma Lathen novels, which make a witty contribution to the tradition of the amateur sleuth whose specialized knowledge leads to the solution of crimes. Even readers unfamiliar with the language or activities of the world of high finance can enjoy the explorations of the workings of Wall Street and the financial shenanigans that lead to murder.

Lathen's ability to condense the complicated world of corporate finance into a recognizable form for the uninitiated, while framing it in the tradition of the Golden Age of mystery and crime fiction, was something of a novelty in the early 1960's. The mixture of business and murder allowed Lathen to address a wide range of social issues (and political ones in the Ben Safford series). It also provided rich fodder for expanding the dimensions of the traditional mystery novel. Lathen received the Crime Writers' Association's Gold Dagger Award for best crime fiction in 1967 for *Murder Against the Grain*, the Ellery Queen Award from the Mystery Writers of America in 1983, and the Agatha Award for Lifetime Achievement in 1997.

BIOGRAPHY

Mary Jane Latsis and Martha Hennissart, the two personalities behind Emma Lathen, first met in the 1950's as graduate students at Wellesley College. They resumed their friendship in 1960 and began a literary collaboration that would span nearly four de-

cares and produce more than two dozen novels. Latsis was born in Chicago and studied economics at Wellesley. She later moved to New York to work in corporate finance. Hennisart studied law and worked for the Central Intelligence Agency and the United Nations Food and Agriculture Organization in Rome before returning to Wellesley to teach.

A common interest in crime fiction and a similar dissatisfaction with the quality and range of contemporary works in the genre led them to form a literary partnership in 1960. As they both worked in the corporate world, Latsis and Hennisart decided to adopt a pseudonym to avoid complications with business clients who might worry that their private affairs would end up as material for their mysteries. They devised the name Emma Lathen, comprising components of each of their names. Emma approximates the “M” from Mary and the “Ma” from Martha, while Lathen comes from the “Lat” of Latsis and the “Hen” of Hennisart. Later novels appeared under a second pseudonym, R. B. Dominic.

Latsis and Hennisart divided the labor by writing alternate chapters of their books—Latsis with a pen and a legal pad and Hennisart on a manual typewriter. When a manuscript was complete, they reviewed it for inconsistencies before producing a final draft. Their first book, *Banking on Death*, was published in 1961 to wide critical acclaim and introduced the mystery world to the character of John Putnam Thatcher, a corporate financial officer and amateur sleuth, and the hero of their long-running Thatcher series of crime novels. *Murder Sunny Side Up*, the first in a second crime series featuring Congressman Ben Safford, appeared in 1968.

After the pair achieved greater prominence, Latsis and Hennisart gave up their corporate jobs and purchased a house together in New Hampshire, where they spent part of every year writing and hiking in the White Mountains. Their identities eventually became known, but Latsis and Hennisart remained intensely private about their personal lives and avoided public attention and interviews.

Latsis died in 1997 at the age of seventy, shortly before the publication of *Shark Out of Water* (1997), the twenty-fourth novel in the Thatcher series.

ANALYSIS

A steady diet of Emma Lathen novels may not qualify readers for business degrees, but it would be a highly entertaining way to be instructed in the ways of the financial world. Since the first novel, *Banking on Death*, introduced the powerful senior vice president of the Sloan Guaranty Trust, the third largest bank in the world, delighted readers have followed John Thatcher and his efficient and knowledgeable band of associates into the intricacies of the fast-food business, cocoa trading, Greek and Puerto Rican politics, grain business with the Soviet Union, the second-home development industry, hockey games, the Winter Olympics, the auto industry, college boards, and the development of tomato hybrids.

Complex and potentially confusing subjects such as these are so skillfully woven into the classic pattern of detective novels that Lathen has been acclaimed as the “best living American writer of detective stories” by the writer C. P. Snow and “the most important woman in American mystery” by the *Los Angeles Times*. The Lathen novels are indeed classically constructed, though not so much in the tradition of American hard-boiled fiction, with its dark underside, but rather more in the tradition of British Golden Age fiction. The pattern of such detective novels is also the pattern of classic comedy. Defined broadly, the ritual pattern starts with a society in disorder; the underlying impulse driving the plot is the need to restore harmony in the community, a function that, in a detective novel, is undertaken by the detective figure.

This underlying pattern structures a Lathen novel, in which John Thatcher is drawn, sometimes against his will, into the investigation of a murder. Because the Lathen specialty is to show some aspect of the world of big business gone awry, Thatcher is particularly well qualified to put together pieces of financial information from various sources. Thatcher becomes embroiled in a case not only because he represents the Sloan and its investments but also because he has considerable experience with people’s behavior and motivations and because he is curious. Having carefully observed and weighed the significance of what he has witnessed, he has a moment of insight when the pieces fall together; thereupon, he puts the mighty forces of the Sloan to

work, gathering more information to validate his insight. The cause of the disorder, the murderer, is discovered and rooted out, and social order is restored. After the guilty party is disposed of, Thatcher and the rest of the innocents gather to thrash out the details of the complex causes that led to the murder.

Lathen novels, while developing in such a classic pattern, depict a wide variety of people, classes, and issues. Lathen plays scrupulously fair with readers by limiting the number of suspects and by providing enough information for readers to draw their own conclusions. Though the criminal element is usually a member of an elite class, the canvas of a Lathen novel can be very broad; its community can be any part of the world, any level of society affected by a particular business, because the invisible thread that ties the whole world together is money. Lathen takes an unalloyed pleasure in the vagaries of money, in its power to travel to far-flung places, to seep into every crevice and crack of political and social institutions, to tangle together races, cultures, and ideologies in its universal web. Therefore, every novel begins with a specific reference to Wall Street, the heart of any big business:

Above all, Wall Street is power. The talk is of stocks and bonds, of contracts and bills of lading, of gold certificates and wheat futures, but it is talk that sends fleets steaming to distant oceans, that determines the fate of new African governments, that closes mining camps in the Chibougamou.

Lathen invariably incorporates vignettes of the common folk affected by financial upheavals, the plucky, hardworking men and women whose hopes, dreams, and livelihoods hang in the balance. When an arrogant member of the privileged class decides in desperation to protect his status in his community by randomly poisoning the batter mix used in a national fried-chicken franchise, for example, the Sloan becomes involved because it has twelve million dollars at stake. Lathen also takes her readers, however, to Willoughby, New Jersey, to see how this devastates Vern Ackers and Dodie Ackers, whose life savings, invested in the Chicken Tonight franchise, appears to be lost when the nation in a panic quits buying chicken in any form (*Murder to Go*, 1969). When the mighty Vandam Nursery and Seed Com-

pany's patent for the find of the century, a biennial tomato, is challenged and an injunction placed on their mail-order catalog (*Green Grow the Dollars*, 1982), a spry sixty-year-old woman in Shelburne, Vermont, desolately complains: "It's as if that catalog is the only thing that can convince me that spring really will come."

Though the main characters in a Lathen novel are the affluent and powerful of the financial world, they are the ones who come in for some of Lathen's most ironic commentary. Thatcher, after all, is senior vice president of the Sloan, highly placed but not at the top. His attitude toward the president of the bank, Bradford Withers, is to hope devoutly that he is away sailing or exploring exotic countries, or if he must take an interest in the bank, that he will limit himself to behaving graciously at social functions, the only service his class, education, and personality allow him to provide for the Sloan. In Lathen's world, the most visible people at the top of a hierarchy are dangerously ignorant of the realities of the wealth that keeps them at the top. When Thatcher wants information, he knows better than to bother with figureheads:

Going straight to the top is a stratagem best left to amateurs. The president and the chairman of the board of Standard Foods resembled the Joint Chiefs of Staff—too wise, too farseeing and too remote for the nuts-and-bolts working of their complex apparatus.

Thatcher's colleagues, though admirably competent, tend to be droll personalities. Thatcher's friend Tom Robichaux, for example, is a member of an investment firm that does business with the Sloan, a man with gourmet tastes and a firm grasp of money matters. Yet his private life becomes a social minefield for Thatcher whenever they meet for lunch, as Thatcher tries desperately to remember the name of Robichaux's latest wife and what stage of which divorce proceedings he is suffering through now. Everett Gabler, a health nut with a poor digestive system, can be counted on to disapprove of any but the most conservative ventures; Charlie Trinkam, head of the Utilities Department and a confirmed bachelor, can be counted on to find an outstandingly attractive and colorful single woman as a source of esoteric business information.

Thatcher himself is often outmaneuvered by the women in his life. He has to pull himself together to assert his authority with his unflappable secretary, Miss Corsa, who disapproves of almost anything that interferes with his getting through the pile of paperwork always on his desk. He is equally helpless in the face of demands from his daughter Laura, who learned much from her mother about getting Thatcher to do what he would rather not, which most often consists of attending glittery cultural or social functions. The subtle overturning of the expected hierarchy at the Sloan and the tug-of-war between generations, frequent motifs in Lathen's work, are ageless comic conventions.

Since the Sloan Guaranty Trust is the third largest bank in the world and therefore a significant force in the world economy, even novels with a specific setting—such as a small hospital in *A Stitch in Time* (1968) or St. Bernadette's Parochial School in *Ashes to Ashes* (1971)—are not confined to one locale. Thatcher may be called on to travel to faraway places such as Greece or Switzerland. Even when Thatcher is not actually in another part of the world, Lathen shows the reader how the mighty resources of the Sloan can pick up the paper trail of money wherever it goes.

Lathen's novels are traditionally conservative, upholding social order and stability. This is reflected in her characters' financial dealings. Admirable characters treat money with professional respect and integrity; the criminals, on the other hand, are those unhappy creatures who manipulate it with unrealistic, desperate hopes of making it perform miraculous tricks on their behalf. Lathen's specialty is the light touch with which she depicts the very large forces that impinge on the lives of individuals as they dream and scheme to find their good life.

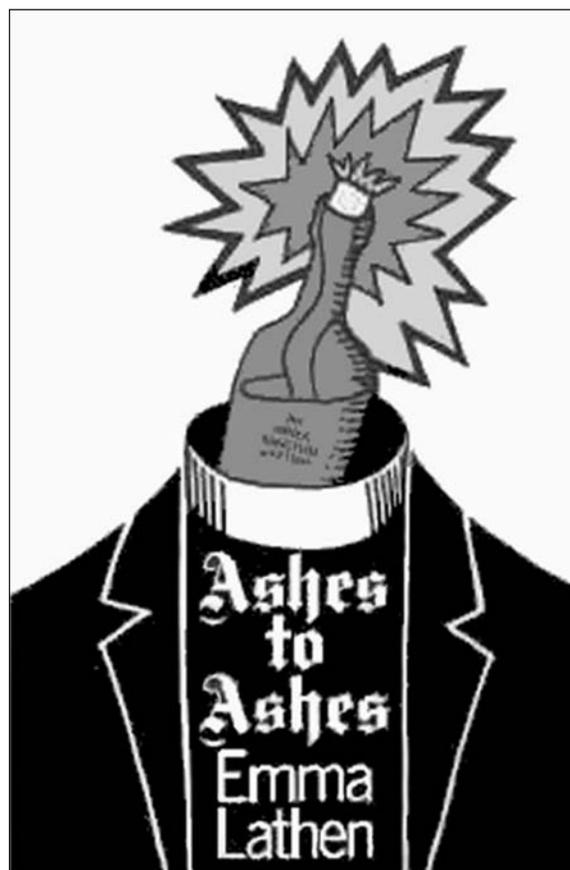

DEATH SHALL OVERCOME

Because to bankers money is the root of everything, including but not limited to evil, Thatcher, the Sloan, and Wall Street often are embroiled in political and social issues of international proportions. In *Death Shall Overcome* (1966), the murderer tries to cover an ordinary color-blind case of embezzlement by inciting the latent racists on Wall Street to oppose the election of a black millionaire to the New York

Stock Exchange. So successful is the camouflage that Thatcher, infuriated by Simpson, a publicity-seeking black activist planning a kneel-in media event at the Sloan, mobilizes the Sloan Glee Club. Thatcher welcomes the protesters with a "ringing speech which placed the Sloan so far in the vanguard of the civil rights movement that it left Simpson looking like a Ku Klux Klansman"; a chorus of seven hundred Sloan voices then thunders out Civil War songs.

THE LONGER THE THREAD

In *The Longer the Thread* (1971), Thatcher finds a series of suspicious accidents in the operation of a failing Puerto Rican clothing manufacturer funded by Sloan Guaranty Trust. With three million dollars of his bank's money at stake and with corpses piling up, Thatcher struggles to uncover a pattern to the violence and to determine who stands to gain the most by it. Lathen employs considerable wit in the novel, as she

does in all the Thatcher mysteries. Some early chapters have titles such as “Bias Binding,” “Following a Pattern,” “Double Seams,” “Sewing the Wind,” and “Pinking Shears”; chapters in which Thatcher is close to discovering the criminal are titled “Gather at the Neck” and “Stitch, Stitch, Stitch.”

SHARK OUT OF WATER

In *Shark Out of Water*, Thatcher travels to Gdansk, Poland, to ferret out new investment opportunities for Sloan Guaranty Trust and, as usual, stumbles on a murder. The city serves as the headquarters of a European consortium called the Baltic Area Development Association (BADA), which governs its delegates with a heavy and corrupt hand.

When BADA’s chief of staff turns up dead after alleging widespread irregularities within the group, Thatcher senses foul play. In his traditionally calm but effective manner, Thatcher helps the Gdansk police navigate the rough waters of international finance to determine who might benefit most from the death of the would-be whistleblower.

Each Lathen novel provides a happy blend of the familiar and the predictable with the fresh and informative, delivered with wit and good humor. As long as John Thatcher was around to keep an eye on the “endearingly childlike innocents” on Wall Street who always expect “the good, the beautiful, the true and the profitable,” and as long as Lathen was there to explain why a surefire money-making proposition is not, her fans could rest assured that, in mystery fiction at least, someone was watching the bank.

JONATHAN LATIMER

Born: Chicago, Illinois; October 23, 1906

Died: La Jolla, California; June 23, 1983

Also wrote as Peter Coffin

Types of plot: Amateur sleuth; hard-boiled; private investigator; thriller

PRINCIPAL SERIES

William Crane, 1935-1939

PRINCIPAL SERIES CHARACTERS

WILLIAM "BILL" CRANE, a private investigator, is an urbanely witty upper-class man who pursues business and pleasure simultaneously. From an alcoholic sleep, he wakes with inspired ratiocination. Although he admits to being repulsed by a violent and grotesque world, Crane is most intent on satisfying his boss.

DOC WILLIAMS sports a waxed mustache and black hair with a streak of white over the left temple. He does the legwork for the Crane-Williams team. Doc's vernacular speech, casual taste, and street smarts suggest that he comes from a working-class background.

COLONEL BLACK, owner of the discreet agency for which Crane and Williams work. The colonel is mostly absent except when he is contacted by telephone and telegram for advice and consent. He takes only wealthy clients and is very urbane in matters of dress, food, and wine. He is fascinated with the Elizabethan Age.

CONTRIBUTION

In the five William Crane novels, Jonathan Latimer synthesized puzzle-mystery and tough-guy conventions by introducing a series protagonist of great intelligence and social sophistication who comes into violent contact with crime. For Crane, pleasure and pain

interact as forceful agents by which both conscious and unconscious processes produce enlightenment. The larger world (mostly Chicago) appears irredeemably corrupted. For the detective Crane, the model of order seems to be survival in the hierarchy of the Black Detective Agency, where he is confirmed by bonds of loyalty and good job performance.

Latimer's experimentation with shifting points of view in the Crane novels and elsewhere anticipates the author's later fiction, in which he seeks to reconcile the depth of characterization and richness of technique of mainstream literary fiction with the appeal of detective fiction. In these novels, William Crane and crew have been dismissed and replaced by solitary and more introspective protagonists: amateur sleuths whose profession as writers (newspaperman, Hollywood scriptwriter) makes them especially sensitive to the way words shape reality.

BIOGRAPHY

Born in Chicago on October 23, 1906, Jonathan Wyatt Latimer was named in honor of an ancestor who served on General George Washington's staff. Latimer was educated at a boarding school in Arizona and Knox College in Galesburg, Illinois, where in 1929 he took a bachelor's degree with high honors and earned membership in Phi Beta Kappa. He became a journalist for the *Chicago Tribune*, and for a brief period he served as ghostwriter for the retired secretary of the interior Harold Ickes. Latimer was married to Ellen Baxter Peabody in 1937, and together they had three children. He was married to Jo Ann Hanzlik in 1954.

While writing the five William Crane series novels, Latimer also launched a career as Hollywood screen-

writer. From his detective novel *The Lady in the Morgue* (1936), he developed the script for the 1938 Universal Studios film of the same title. From 1938 to 1959 he wrote or collaborated on some twenty screenplays for various film companies, including the film noir classics adapted from Dashiell Hammett's *The Glass Key* (1930), Kenneth Fearing's *The Big Clock* (1946), and Cornell Woolrich's *The Night Has a Thousand Eyes* (1945). The Hollywood period was interrupted by a tour of duty in the United States Navy (1942-1945). During the early 1960's, Latimer turned to television writing for the Perry Mason series; he wrote forty-five original scripts and fifty adaptations of Erle Stanley Gardner's books. Latimer's postwar detective fiction included two novels, *Sinners and Shrouds* (1955) and *Black Is the Fashion for Dying* (1959). On June 23, 1983, he died of lung cancer in La Jolla, California.

ANALYSIS

Jonathan Latimer's detective fiction falls into two groups: the 1930's William Crane novels and the post-World War II novels. The earlier group reflects the author's unique merging of puzzle-mystery and hard-boiled conventions to develop stories of wide appeal. The later, and unfortunately smaller, group shows Latimer seeking to build a richness of characterization and complexity of technique into the formulaic detective mystery. Functioning well as rational analysts, the protagonists of these books also tend toward introspection and a sensitive awareness of the complex interrelations of lives as they are touched by criminal behavior.

In the William Crane series, Latimer used a recurring fictional situation. The two detectives, William Crane and Doc Williams, are employed by the Black Detective Agency of New York City and are given assignments by its director, Colonel Black. Only the very wealthy, particularly those possessing old money, seem to apply to the Colonel, who is of the same class as his clients. (He wears English tweeds, drinks aged brandy, and has a dilettante's interest in Elizabethan literature.) While Crane and Williams carry out assignments in Chicago, Miami, or a New England sanatorium, the Colonel remains in New York City to serve as a guide and a resource through telephone calls and

telegrams. Black is present for an investigation only in *The Search for My Great Uncle's Head* (1937), a novel that is not part of the Crane series.

Commonly, reviews of the William Crane novels emphasize their debt to the hard-boiled school of detective fiction. (One review of *The Lady in the Morgue* offered an alliterative catalog of the work's characteristics: "Rough, rowdy, riotous, rum-soaked, irreverent.") Yet the novels also have a firm basis in puzzle-mystery convention: the superrational detective and his confidant of lesser mental acuity, the locked-room murder, the searching out of all the clues, and the formal denouement in which the detective offers the analysis his brain has hatched to an assembly of the surviving innocent and guilty. In his special adaptation of these elements, Latimer conceives of an American setting (the seething city of the 1930's, with polarized ethnic and economic classes) coming into contact with an efficiently managed organization (the Black Detective Agency).

Crimes in these novels have clear references to the dynamics of class, wealth, and power in the United States. Common threads run through the series. A generation of strong men have accumulated great wealth through intelligence, work, and will. Their second- and third-generation descendants, grown decadent and wasteful, conspire to inherit through murder or apparent murder (*The Dead Don't Care*, 1938). Alternatively, the virtuous wealthy are preyed on by failed associates (*Headed for a Hearse*, 1935) or by classless professionals of great intelligence who desire the power that wealth confers (*Murder in the Madhouse*, 1935, and *Red Gardennias*, 1939). Often, Latimer's murderers forge a significant alliance with elements of urban organized crime—represented by ethnic Jews, Italians, and Irish who are willing to kill the original fathers to establish their class and power through the possession of wealth.

The series detective William Crane fits nicely into the milieu of the upper class. His sophistication, wit, and graceful manners allow him to enter easily the boardrooms, estates, and watering holes of the rich. Like the wealthy, he seals himself off from the masses through a condescension toward the lower classes disguised as ethnic humor; in the Crane series, caricatures of Jews, Italians, Irish, and African Americans abound.

RED GARDENIAS

None of this, however, establishes Crane's true character. Beneath the surface, the detective is an outsider who identifies with those criminals whom he is hired to thwart. In the last of the Crane books, *Red Gardenias*, Latimer places the detective in the role of impostor, a role that is implicit throughout the series. In this novel, he is given a false identity (with a classy wife, suburban house, automobile, and maid) as a successful associate of Simeon March, an industrial magnate whose sons are being murdered. Although Crane may recognize the inner virtues of some members of the aristocracy, it is the application of wealth—the fact that wealth creates opportunities—that motivates him.

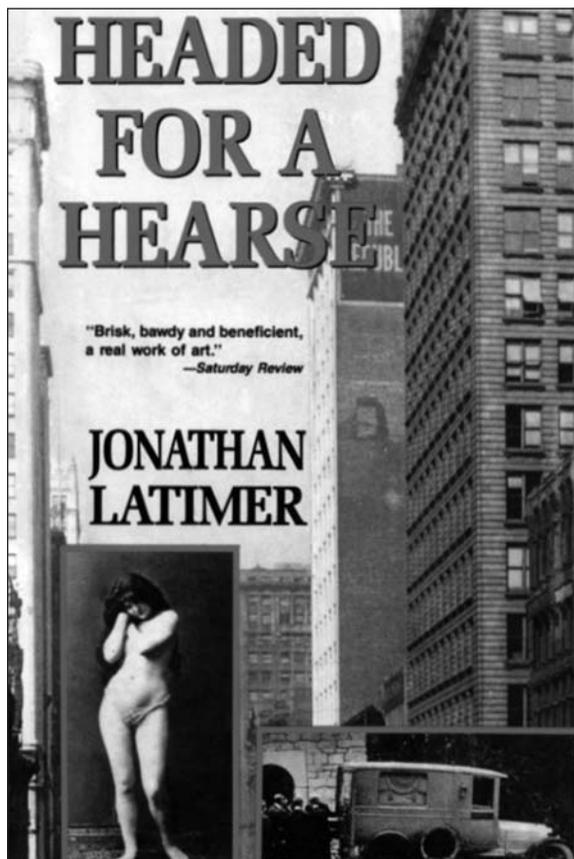

The Crane novels are a record of the good life of hotels and fine food and drink. Wealthy women walk Latimer's pages in glorious high style. Although Crane lusts after them, he is also attracted to women of

the lower class, as his seduction of the exotic dancer in *The Dead Don't Care* and of a gangster's mistress in *Red Gardenias* attest. In *Red Gardenias*, Crane receives for his labors a promise of marriage from an appropriately named woman, Ann Fortune, who is the wealthy niece of his boss, Colonel Black.

The blessing of good fortune that William Crane finally receives is, however, no product of the entrepreneurial genius of the rich fathers. Latimer's Black Detective Agency is organized on the industrial-management model, a structure that forms the basis for the hierarchy into which the characters fall. The agency is organized like an industrial corporation, with the invested capital of the wealthy (agency clients) flowing into the boardroom (Colonel Black is the chairman of the board), where remote corporate decisions are made for management (Crane), which in turn uses labor (Doc Williams as foreman of contracted labor) by writing job descriptions and allocating resources. Ironically, it is not the service of justice but the satisfaction of Colonel Black that is Crane's primary objective, as he struggles to strike a balance between the restrictions of the agency's capital and the demands of the clients.

HEADED FOR A HEARSE

The curious mixture of comedy and tragedy in these books also has reference to the detective's position as mediator. On one hand, the novels abound in a comedy based on class distinctions: the rigid xenophobia and ritual displays of the wealthy confronting the social crudity and physical ugliness of the ethnic poor. On the other hand, this comedy of manners exists in a cultural stew heated by widespread violence. The constant wordplay between Crane and Williams reflects their efforts to construct private meanings that will insulate them from their fears. Violence and death erupt with fearful energy, sometimes taking the innocent, as in *Headed for a Hearse*, where assassins bring down a black passerby, who "slithered halfway up on the sidewalk, making swimming motions with his legs and arms, and then slid back off the curb into the street." Latimer controls such horror through gallows humor in the obscenely funny episodes of transporting a female corpse from a cemetery to a morgue in *The Lady in the Morgue*.

THE SEARCH FOR MY GREAT UNCLE'S HEAD

The last William Crane novel was published in 1939, and Latimer did not return to detective fiction until 1955. The later novels reveal Latimer moving toward greater complexity of narrative structure, with characters of fuller and more persuasive dimensions. Some of this deepening is anticipated in his earlier work. In *Headed for a Hearse*, Latimer used a shifting point of view in an effort to describe more intimately the experience and personality of three inmates. In *The Search for My Great Uncle's Head*, Latimer introduced Peter Coffin, not a professional but an amateur sleuth. A first-person narrative, the novel offers a protagonist of moral and philosophical sensitivities. The amateur detectives of the post-World War II novels are extensions of Peter Coffin. Like him, they are literate men (newspaper journalist, screenwriter) who understand the connection between words and reality. Unlike Coffin and the earlier William Crane, they possess the wisdom of mature middle age.

BLACK IS THE FASHION FOR DYING

Black Is the Fashion for Dying makes use of a limited omniscient point of view by which various characters respond to the central issue of the mystery—the murder of the actress Caresse Garnet. Owing much to Latimer's long Hollywood experience, the novel makes persuasive use of detail about filmmaking, but the shifts in point of view detract from the development of the characters.

SINNERS AND SHROUDS

Sinners and Shrouds, however, is a provocative novel; it brings into rich focus themes and characters Latimer found in his earlier work as well as in other detective fiction. The themes of the novel—the past, wealth, gender, kinship, knowledge, and order—are presented through the experience of the reporter Sam Clay, who awakens in a northside Chicago apartment and finds the young woman he has been with murdered. His memory of the immediate past has been erased by an alcoholic blackout. He finds himself the object of the police investigation that he is assigned to cover. Forced into self-examination, he is frightened by what he sees in himself: alcoholism, misogyny, and seething hatred.

Motivated first by the desire to escape punishment, Clay's detective work becomes self-therapy. He investigates the kinship (real and symbolic) between the mur-

dered girl, himself, and his coworkers. The truth gives itself up obliquely—in letters, yellowed newspapers, telephone recorders, telegrams, folk ballads, and police depositions—as the motif of a ludicrous dream helps establish the atmosphere of the novel.

This surrealism is extended further by Amos Bundy and Miss Dewhurst, whom Clay contacts for help. Their origin is in the detective-confidant, John-Joan pairing of many hard-boiled narratives. Eccentric in dress and behavior, the two seem to be imbued with magical powers of detection. Amos Bundy is linked to the stable past, out of which he appears to have stepped (he looks like Abe Lincoln). Although he speaks and writes in riddles, he leads Sam Clay to the solution. Latimer's observations about the links between power, wealth, gender, and class make *Sinners and Shrouds* the capstone of his career.

JANET LAURENCE

Born: England; December 3, 1927

Also wrote as Julie Lisle

Types of plot: Amateur sleuth; historical; cozy

PRINCIPAL SERIES

Darina Lisle, 1989-
Canaletto, 1997-

PRINCIPAL SERIES CHARACTERS

DARINA LISLE is a cookbook writer and culinary expert. She is romantically involved with William Pigram, chief inspector for the Criminal Investigation Department (CID). Her ability in crime detection leads her away from her recipes and into amateur sleuthing, at times with William, at times on her own.

CANALETTO is an eighteenth century Italian painter with a gift for solving crimes. He has moved to England, where he continues to exercise both his talent as a painter and his aptitude in solving mysteries.

CONTRIBUTION

Janet Laurence has created both a culinary mystery series and a historical mystery series. The Darina Lisle series features an independent cookbook writer, which allows Laurence to showcase her expertise as a food writer. Her Canaletto series brings a somewhat lesser known painter and his contribution to English history to the attention of the reading public. Her novels have received critical praise from major publications such as *Library Journal* and *Booklist*.

BIOGRAPHY

Janet Laurence was born Janet Duffell in England in 1937. Although she always wanted to be a writer, she began her professional career in advertising and public relations. In 1978, she and her husband moved to Somerset, England, where she started Mrs. Laurence's Cookery Courses. The beginning courses were targeted toward teenage girls and dealt with basic

cooking techniques. She later added a number of more advanced courses for experienced cooks. She also began writing about food for *Country Life* and for the *Daily Telegraph*. She eventually became solely responsible for the weekly food column *Bon Viveur*.

By the late 1980's, Laurence was writing cookbooks and also began to write her first mystery novel showcasing Darina Lisle, cookbook writer and amateur sleuth. In 1989 she published *A Little French Cookbook* and *A Deepe Coffyn*, the first book in her Darina Lisle series. She followed with *A Tasty Way to Die* (1990) and continued to add volumes to the series.

In 1993, the Birmingham Museum and Art Gallery presented an exhibition on the painter Canaletto. Laurence became more and more enthralled with Antonio Canal, known as Canaletto, and his involvement with England. She began to do research on the painter, his paintings, and the role he played in English history, and she decided to write a series featuring him. In 1997 she published her first historical mystery, *Canaletto and the Case of Westminster Bridge*. In 1999, she published *Canaletto and the Case of the Privy Garden*, and *Canaletto and the Case of Bonnie Prince Charlie* in 2002.

Laurence's nonseries novel *To Kill the Past* (1994) is a darker murder mystery that abandons the culinary motif and dwells on motivation and the psychological dimensions of the characters and their actions. Laurence has also written contemporary women's fiction under the name Janet Lisle. She has served as a chairperson of the Crime Writers' Association.

ANALYSIS

Janet Laurence writes mystery novels peopled with entertaining, often eccentric, characters who add touches of wit, irony, and humor to the serious matter of murder. In the Darina Lisle series, the plots mix culinary activities with murder investigation. Darina is a well-respected cookbook writer with a special flair for uncovering clues and solving mysteries. Her romantic interest, William Pigram, is a professional detective with the CID. Laurence does not spare her heroine when it comes to presenting her with professional, personal, and crime-related problems. William, try as he will, constantly has difficulty accepting Darina's spirit of independence and lack of time for him. Darina has a

propensity for becoming involved with male culinary experts whose interest goes beyond food preparation, consequently complicating her professional life. Cooking shows, competitions, and demonstrations lead to murder.

Laurence creates authentic settings, often filled with local color, for her novels. Her characters, drawn from various social classes, are realistic and individualized so that the reader not only relates to them but also remembers them. Although solving the novel's murder mystery remains the operating force behind the work, the daily life of Laurence's characters, their culinary exploits, and their interpersonal relationships tend to push murder away from center stage. The reader wants to solve the mystery but finds many distractions along the way.

Laurence's Canaletto series is set in the eighteenth century in England. The three novels in this series contrast sharply with the Darina Lisle series. Murder is gruesome and violent, and life is very dangerous. Laurence re-creates life in eighteenth century England among the pickpockets, prostitutes, and thieves as well as among the aristocracy. Much of the authenticity of her narrative can be attributed to her sensitive use of dialect and language appropriate to her characters. Detailed description, carefully delineated characters, and a complex plot take the reader on a fast-paced search to solve the crime.

Laurence's nonseries novel *To Kill the Past* reveals yet another aspect of her writing. The cozy community atmosphere that often appears in the Darina Lisle series is replaced by an atmosphere of isolation, betrayal, and spine-chilling danger. Violence, dishonesty, amorality, greed, and revenge are the standards of the world portrayed in the novel. Laurence explores the motivation behind crime and the psychological aspects of the characters.

RECIPE FOR DEATH

In *Recipe for Death* (1992), Darina Lisle, culinary expert and amateur sleuth, becomes involved in the lives of the locals in Somerset, England, where she is living with William Pigram in his cottage. The cleverly constructed novel begins with an official cooking competition. Later a cooking competition among friends provides the opportunity for murder. Foreshad-

owing is a device Laurence uses fairly often in her novels. At times, her use of it is very subtle, and the reader only becomes aware of it at the end of the mystery.

This novel is structured with multiple plots in which two characters, Constance Fry and Nathalie Duke, are murdered. The Fry family is trying to keep its organic farm solvent. Pru Fry is renewing her relationship with her estranged husband, Simon Chapman, who is trying to keep his restaurant out of bankruptcy. Verity Fry is launching a culinary career and about to marry a wealthy businessman. Daniel Duke and Erica Strangers are trying to establish a profitable business in the fresh-food industry and Darina and William are trying to save their romantic relationship. These multiple plots are further complicated by assumed identities and disguises.

DEATH AT THE TABLE

In *Death at the Table* (1994), when Darina accepts a position as a regular on the television show *Table for Four*, she becomes enmeshed in a triple murder and finds her own life in danger. First, Bruce Bennett, an Australian wine expert, mysteriously drops dead as the show's stars share a Christmas toast. Bennett's sister Kate suspects foul play in Bruce's death, so she flies to England. Shortly after her arrival, she falls from the window of her hotel room. The third victim is David Bartholomew, the production manager for *Table for Four*, who was starting his own company. As Darina searches for clues to the killer's identity, she uncovers facts about the various members of the cast and crew that make more than one of them suspects. Laurence creates suspense in the novel as Darina, alone in her house, realizes someone is in her garden. Then in the final pages of the novel, Laurence brings Darina into immediate danger as the killer is waiting for her in her home.

Although the novel is primarily a well-written murder mystery filled with suspense and three hard-to-solve murders, Laurence has added another dimension to the novel. She has interwoven several women's issues into the plot of the novel. William is investigating a number of assaults on elderly women that lead to a conversation between him and Darina about the importance of a woman having some knowledge of self-

defense. This discussion also foreshadows the battle for her life that Darina faces at the end of the novel.

Male-female relationships and the role of women are important themes in this mystery. Laurence uses staff members Jan, home economics specialist Lynn, Bruce's sister Shelley, Darina, and the mothers of Darina and William to present various ideas and attitudes regarding women. Darina and William are engaged and planning their wedding. Darina's mother feels that her daughter should concentrate all her energies and attention on the wedding and not worry about her career at the moment. William's mother insists that Darina stop working and focus on William and his career. Darina insists on continuing with her professional activities; however, she also realizes that having time to spend with William is essential for a successful relationship with him. The outcome of the novel affirms Darina's position.

Laurence addresses the problem of the abusive man and the battered woman. Bruce's mother was forced to leave her husband as a result of his brutality. His sister Shelley reveals that Bruce was like his father. Lynn, one of the staff for *Table for Four*, corroborates Bruce's penchant for brutality both by her appearance and by her account of her short-lived affair with him.

Jan, who turns out to be the murderer, is a complex character. Motivated by a strong ambition not only to succeed but also to prove herself more capable than her male colleagues, she is embittered and aggressive. Hungering after affection, she is attempting to establish a lesbian relationship with Shelley. She believes Bruce's death would make Shelley the owner of the lucrative Yarramarra winery and make her relationship with Shelley possible. Jan has taken advantage of Bruce's allergy to nuts to kill him. His sister Kate, who knows about her brother's allergy, presents a threat to Jan, and so Jan kills her. However, when Shelley arrives, she becomes romantically involved with David Bartholomew, thwarting Jan's plans, so she decides to kill him. As Darina is getting close to identifying the murderer, Jan waits for her in her home. The desperate fight that ensues between Jan and Darina has been foreshadowed by the case William is investigating and the discussion of the importance of self-defense for women.

Laurence ends the novel on a positive note as Darina and William are discussing their careers and finding solutions to the problem of lack of time for each other.

TO KILL THE PAST

To Kill the Past is a dark, suspenseful novel filled with violence and tension. The heroine Felicity Frear has been badly burned in a car accident and is suffering from amnesia. Felicity is isolated by her amnesia and by a perplexing hostility in the individuals who have been part of her life. As her closest relative died in the car crash that injured Felicity, she has inherited the family's country estate, Kingsleigh. After moving into the house, she receives a menacing phone call. The vaguely familiar male voice on the phone demands what is his. The sinister oppressive atmosphere of the mystery continues to mount as Felicity becomes more and more frightened and suspicious of everyone around her.

Laurence adds even more tension to the novel as she misleads her heroine and the reader in regard to Sam McLean and Malcolm Biddulph. False clues cause Felicity and the reader to believe that Sam is the man making the phone calls. He is actually a police detective and the one person who can protect Felicity. Malcolm, the lawyer whom she trusts, is part of the ring of drug smugglers who are stalking her.

CANALETTO AND THE CASE OF WESTMINSTER BRIDGE

In *Canaletto and the Case of Westminster Bridge*, Laurence portrays characters from all levels of eighteenth century English society. Her portrayal of the prostitutes, thieves, and other criminals whom aspiring artist Fanny Rooker encounters in the jail is authentic in tone and characterization through her use of dialect and descriptions of physical appearance. Her aristocrats are equally believable. Her portrayal of Madame Anne Montesqui definitely makes her a descendant of the clever, conniving female characters of the eighteenth century novels.

Laurence treats the practice of arranged marriage popular in the century. For financial and social reasons, Charlotte More, the daughter of wealthy and influential merchant Balthasar More, is to be married to the viscount of Purbeck, a man of questionable character. Jame Bennett, tutor to the viscount during his

grand tour and now secretary to the viscount's father, the marquess of Brescon, is determined to prevent the marriage as he and Charlotte have fallen in love.

The mystery deals with efforts to sabotage the completion of the Westminster Bridge, which Canaletto has arrived to paint. From the moment he sets sail for England, Canaletto is pursued and attacked by ruffians hired to keep the crime-solving painter from ever reaching the bridge. Canaletto is saved from death at the hands of Jack Scallion, a dangerous hired assassin, by Fanny, who adds some lightness and levity to the mystery. Fanny is slightly too much a superwoman to be totally believable, yet Laurence manages to get the reader to accept her as a character who belongs in the story.

MAURICE LEBLANC

Born: Rouen, France; 1864

Died: Perpignan, France; November 6, 1941

Type of plot: Inverted

PRINCIPAL SERIES

Arsène Lupin, 1905-1941

PRINCIPAL SERIES CHARACTERS

ARSÈNE LUPIN is a master gentleman-burglar who is anathema to the French bourgeoisie but a hero to the working class. Lupin abhors murder, never carries a lethal weapon, and sometimes assists the police in catching violent criminals.

INSPECTOR GANIMARD of the Sûreté (the Parisian equivalent of London's Scotland Yard) is Lupin's nemesis. Each, nevertheless, admires and respects the other.

HOLMLOCK SHEARS (a.k.a. SHERLOCK HOLMES), the famous British detective, who fiercely pursues Lupin.

CONTRIBUTION

Undoubtedly, Maurice Leblanc's most important contribution to the mystery and detective genre was his creation of the extraordinary Arsène Lupin, the quintessential criminal-detective. Leblanc's focus on

his character, who dons many disguises throughout the series and who functions as both criminal and hero, raises fundamental questions concerning truth and value, and their uncertainty in a basically unjust world. Jean-Jacques Tourteau, the author of a major critical study of Lupin, has identified the key devices that Leblanc employed in his crime fiction and that have influenced other writers in the genre: First, Leblanc conferred on his protagonist, Lupin, a histrionic character, especially in making him a "quick-change artist"; second, Lupin is a master at manipulating his victims; third, Leblanc, in like fashion, manipulates the reader; fourth, Leblanc especially uses setting to do so, choosing details that subliminally suggest psychological nuances to the reader; and fifth, Leblanc sustains suspense by delaying the progress of the narration except in cases in which immediate action is necessary.

The impact of the Lupin series is attested by the many critical studies that Leblanc's protagonist has engendered. There are even two journals devoted to the topic: the *Revue des études lupiniennes* and the periodical publication of the Société des Études Lupiniennes, founded in 1965.

BIOGRAPHY

Maurice Marie Émile Leblanc was born in Rouen, Normandy, France, in 1864. He was the son of Émile Leblanc, an ironworker and builder of boats, who was partly of Italian descent, and of a mother who came of an old Norman family. Maurice had two sisters, Georgette and Johanna. Georgette was a restless girl, scornful of the bourgeois mode of life, who at seventeen went to Paris and became an actress at the Opéra Comique. Attracted to the writings of the Belgian dramatist Maurice Maeterlinck, she pursued him and in 1895 became his *amoureuse*, a relationship that lasted until 1914.

As a boy, Leblanc was noted for his scholarship, his fervid imagination, and the pleasure he took in the landscape around Rouen. A student at the Lycée Corneille and the Pension Patry, he won many scholastic prizes. On the completion of his secondary studies, he took a job with the firm of Miroude-Pichard in Rouen, which manufactured cards. Whenever he had time on his hands, he practiced writing. It was soon evident that he was not meant for the card business, so he decided to go to Paris to study law.

On completion of his law studies, Leblanc returned to Rouen and entered into the family business of boat building. He soon decided, however, that he was best suited to be a writer. He began to write psychological fiction critical of certain bourgeois values. His first novel in this vein was *Une Femme* (1893). Other similar works followed; although only moderately successful in terms of sales, these works at least served to introduce him to the world of letters. To earn a living he took up journalism.

Leblanc's real success began with the *feuilleton* publication of the short story "L'Arrestation d'Arsène Lupin" ("The Arrest of Arsène Lupin) in *Je sais tout* (July 15, 1905). In this story, he introduced for the first time his extraordinary creation, Arsène Lupin. The story proved popular, and other stories about Arsène Lupin followed during 1906-1907. These stories were then collected to make up the first volume of the series, *Arsène Lupin, gentleman-cambrioleur* (1907; *The Exploits of Arsène Lupin*, 1907; also known as *The Seven of Hearts* and *The Extraordinary Adventures of Arsène Lupin, Gentleman-Burglar*). Leblanc now devoted him-

self almost entirely to recording the adventures of his criminal-hero, who appeared in twenty novels or collections of short stories, the last of the series appearing in 1941. Concurrently, Leblanc wrote some ten volumes of detective-mysteries or suspense novels that were independent of the Lupin series. He also from time to time produced the kind of psychological fiction with which he had begun his career.

When not engaged in the art of writing, Leblanc read the works of Edgar Allan Poe and Honoré de Balzac, played chess, and cycled through the countryside. A photograph of Leblanc, taken perhaps when he was in his forties, discloses a not unhandsome face with dark gimletlike eyes, a prominent Roman nose, a mouth largely concealed by a scraggly handlebar mustache, and a strong chin. Altogether he appears more Italian than French.

Leblanc died at the home of his son in Perpignan, Vichy, France, on November 6, 1941, two weeks after the death of Georgette. He apparently died as the result of a chill that he had taken on the unheated train he had ridden to visit his son.

ANALYSIS

The English author E. W. Hornung, Arthur Conan Doyle's brother-in-law, anticipated Maurice Leblanc's Arsène Lupin by creating his criminal-hero Raffles, the "Gentleman Cracksman," in his *The Amateur Cracksman* (1899). Doyle himself was opposed to Hornung's idea and admonished him, saying, "You must not make the criminal a hero." Julian Symons has stated that the Raffles tales of Hornung and the Lupin tales of Leblanc "represent the last flicker for a long time of the criminal hero tradition."

France in the belle époque was undergoing a time of change and flux by virtue of increasing industrialization, improved communications, and new technology. Because the *haute bourgeoisie* of France were unwilling to make the concessions necessary to ease the hardships of displaced artisans and exploited workers, new political and economic theories supportive of political and social reforms were bandied about by conflicting interests. The frustration of some also brought about new, antitheological moralities that negated the moralities of church and state. Some of the new moralities

were individualistic, others were cooperative and collective; but principally they were anti-God, antichurch, antistate, and antibourgeois. They issued from such thinkers as William Godwin, Max Stirner, Pierre-Joseph Proudhon, Alexander Herzen, Karl Marx, Mikhail Bakunin, Pyotr Kropotkin, Friedrich Nietzsche, Georges Sorel, Emma Goldman, and Émile Armand.

In his treatise *Qu'est-ce que la propriété?* (1840; *What Is Property?*, 1876), French socialist Proudhon answered: "La propriété, c'est la vol" (property is theft). The anarchists of the so-called Bonnot Gang (c. 1911) defined theft as "individual reprisals against the bourgeoisie." The French word *bourgeois* (or *bourgeoisie*) has no English equivalent. Rather than meaning simply "a member of the middle class" or "any person owning property," it implies a certain attitude assumed by a property owner or by one ambitious to own property—namely, that material possessions and money are to that person the most important thing in life. To socialists and anarchists, all bourgeois were criminals. Nevertheless, in France not all men of property were regarded as necessarily bourgeois; those who carried their wealth lightly and were not cesspools of cupidity were not bourgeois. The view that all bourgeois were by definition criminals was not confined to any particular social class. Although laborers and artisans were most likely to hold such a view, it ran the gamut of the social hierarchy.

During the belle époque and later, thousands of Frenchmen could respond favorably to the sort of criminal-hero represented by Leblanc's creation, Arsène Lupin. Lupin, born Raoul d'Andrésey, never knew his father, who died in prison in the United States before Lupin was born. Lupin's mother, Henriette, supported herself and Lupin as maid to a countess. When the precocious Lupin, at the age of six, stole the famous "queen's necklace" from the countess's husband to arrange lifetime financial stability for Henriette, the countess accused Henriette of the robbery and dismissed her. Henriette died six years later, leaving her twelve-year-old son to fend for himself. Lupin prepared himself for a career as a professional burglar, eventually becoming known as "the man of a thousand disguises," operating in châteaux, *grands salons*, and transatlantic liners.

Lupin's motivation, aside from the delight he takes in baffling the police and executing complex robberies, is to avenge himself on the money-grubbing bourgeoisie. Lupin eschews violence and murder, but he considers all bourgeois thieves. His aplomb, debonairness, snobbery, dandyism, and finesse are designed to demonstrate to the bourgeois that he is inherently an aristocrat. In *L'Aiguille creuse* (1909; *The Hollow Needle*, 1910), it is hinted that he is descended from royalty. From the standpoint of the philosophy of morals, however, Lupin is a casuist, a François Villon, who seeks to convince the noble old warrior, the *seigneur* of Brisetout, that he is no better than the poet-thief. Lupin, too, is an artist who practices robbery as a fine art.

ARSÈNE IN PRISON

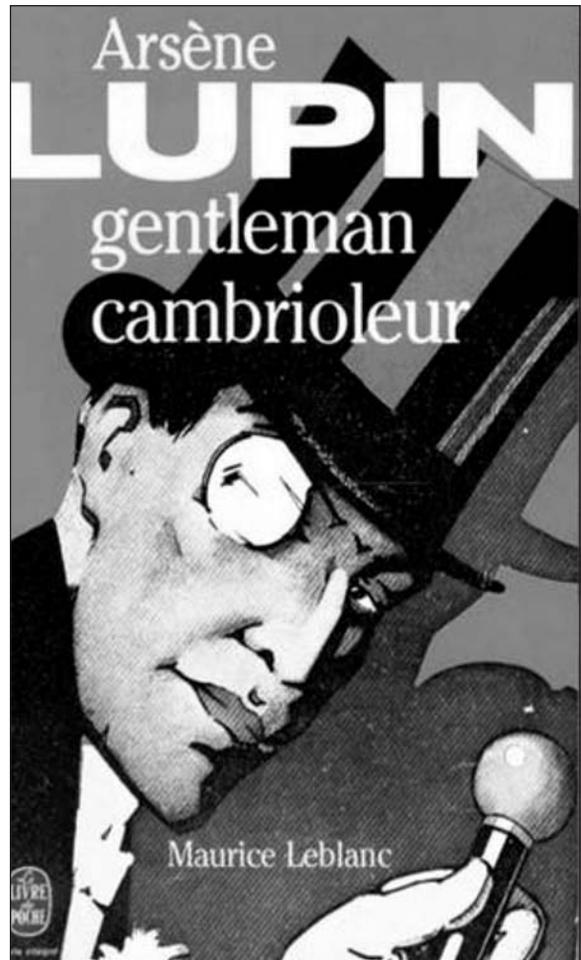

Tourteau has pointed out that the Lupinian stories and novels are not constructed around a murder but around an "enigma" of the planning and execution of a crime. From Lupin's point of view, the enigma consists of a problem that he must solve: how to execute a seemingly impossible robbery. To solve this problem, Lupin must devise a plan, adopt the role of detective to test it, and perform as an artist in its execution. Part of the execution will involve the manipulation of the victim. Such a manipulation occurs in "Arsène in Prison" in *The Exploits of Arsène Lupin*. To rob the wealthy retired financier and art collector Baron "Satan" Cahorn, Lupin must manipulate his victim if he is ever to gain admittance to the baron's impenetrable stronghold, located in the middle of the Lower Seine. Knowing well the cupidity of the baron, Lupin devises a plan that will play on this weakness.

With the strategy of gaining entrance to the fort, Lupin plots a sequence of tactical moves, each of which will advance the progress toward this end by a predictable action on the part of the baron according to Lupin's own calculus of probabilities. It is all very much like the playing of a chess game. Lupin begins with the gambit of a letter to the baron threatening robbery unless his terms are met. Then the editor of the local newspaper is made to notify readers of the presence of Ganimard, who put Lupin in prison. Denied assistance by the authorities at Rouen, the baron seeks to hire Ganimard, who declines. Lupin sends a telegram to the baron, who attempts to hire Ganimard

again. This time he offers him a large sum of money, and Ganimard agrees. He advises the baron to dismiss his servants before he arrives at the castle. On the eve of Lupin's proposed robbery—in his letter he named the precise date—Ganimard and two strong men arrive at the castle to stay overnight and guard the baron's treasures. During the night the robbery takes place, but it is not discovered until daybreak. The guards appear to have been drugged. The baron is beside himself. He declares that he will pay a huge sum to retrieve his stolen things. Ganimard tells him that is a sensible approach and promises to look into such a possibility. The baron informs the authorities that he has been robbed by Arsène Lupin. When their investigation fails, they seek the assistance of the Paris Sûreté. Although its agents arrive on the scene, their investigation, too, seems to be getting nowhere. Ganimard suggests to the baron that the one man who might help in this matter is Lupin himself.

The reader does not know that this Ganimard is an impostor. This is revealed only when the real Ganimard visits Lupin in his cell at La Santé in Paris to inquire of him whether he has any knowledge of the Cahorn affair—just as the false Ganimard had told the baron he intended to do; hence, the visit of the real Ganimard was another prediction in Lupin's calculus of probabilities. Lupin confesses to Ganimard that the whole Cahorn robbery has been masterminded by him. He also informs Ganimard, however, that the baron's charges against him will soon be dropped, for the baron's stolen treasures have already been returned to him for the sum of 100,000 francs. This money will be beneficial to him, Lupin says, in his charitable activities. In short, Lupin saw from the first that the only way to gain entrance to the fortified château was to have its owner invite him in. Every move that Lupin made had led to a predictable action on the part of the baron, the victim of Lupin's manipulation. The guards had not been drugged; they had passed the baron's treasures to their confederate outside, who took them away in his car. Then the guards had taken a sleeping potion. Lupin's plan had worked to perfection.

While Arsène Lupin is manipulating his victim and sometimes other characters, Leblanc is manipulating his reader. His principal method is the concealment of

"Gentleman-cambrioleur," Maurice Leblanc's nickname for the hero of most of his books, reflects Lupin's contradictory traits as a gentleman burglar.

the true identities of characters from the reader until the end of the narrative. This concealment is accomplished by introducing the characters to the reader under false identities and allowing the reader to retain the misperception until the end of the narrative, when their true identities are disclosed. In "Arsène in Prison," the identities of the robbers of Baron Cahorn are concealed from the reader by the presentation of them as police officers.

"THE ARREST OF ARSÈNE LUPIN"

In "The Arrest of Arsène Lupin," the story that opens *The Exploits of Arsène Lupin*, the identity of the protagonist-narrator (the narrative point of view is first-person singular), Monsieur d'Andrésy, a young man

of the world traveling to America aboard a transatlantic liner, is *in petto* until after the ship has docked in New York Harbor. Then the reader learns that M. d'Andrésey is actually Arsène Lupin. This sort of deception was used later by Agatha Christie in her controversial detective-mystery *The Murder of Roger Ackroyd* (1926). Christie was accused by critics of not being fair to the reader and came close to being expelled from the Detection Club of London.

EIGHT STROKES OF THE CLOCK

Leblanc utilized enclosure (*le local clos*), whether by fence, boxlike casing, or wall (with or without door, window, and lock, as a protective wall or a locked room) in a casual manner but with the motive of producing a kind of subliminal psychological effect on the reader. That is, he appears to attach no importance to the enclosure described while at the same time he seeks to leave a definite impression on the reader's mind. For example, in *Les Huit Coups de l'horloge* (1922; *Eight Strokes of the Clock*, 1922) the protagonist, Sernine-Lupin, and Hortense force the door to enter a room that has remained closed for twenty years. On their entrance, the clock begins to tick and immediately strikes eight times. How could such an event transpire? The mechanism of this eight-day clock would permit but one movement a week. The truth is that the mechanism of the clock has been blocked for twenty years by the weapon used to commit a crime. The blows used to force the door unblocked the mechanism, the gravitational pull of the falling weights produced power, the pendulum and its escapement began to act and ticked, and the clock's hammer hit the bell eight times, signaling the time the crime took place. At the same time, the ticking of the sprocket wheel of the clock set in motion "the spirit of Lupin," who would later reconstruct the crime that had taken place twenty years before.

THE CRYSTAL STOPPER

Deductive reasoning figures in all the adventures of Lupin, although it is not always very rigorous. It serves to establish connections between the author and the reader. Leblanc's narrative is constructed in such a manner that the reader's efforts to figure things out will be confirmed some pages later if they are correct. In *Le Bouchon de cristal* (1912; *The Crystal Stopper*, 1913), the reader eventually learns that the list of the

Twenty-seven has been hidden in the pack of Maryland tobacco that Daubrecq smokes. Later, the reader learns that this list is a forgery because the paper on which it is written lacks the watermark of the Lorraine cross. Later still, the reader learns that the genuine list has been concealed in the hollowed crystal stopper that Daubrecq has worn as a glass eye. Unlike most mystery and detective writers, who reserve logical explanation for the conclusion of a story, Leblanc plants logical explanations throughout his account of the course of events. Lupin's deductive reasoning depends more on intuition than on logical procedure, the latter process being reserved to confirm for the reader the soundness of the intuitively arrived-at hypotheses. Lupin always divines the truth before the other fictional characters and discovers it in advance of the reader in most cases. He dislikes employing material indices and is scornful of the empirical method. He loves the free play of the intellect.

Leblanc's protagonist Lupin operates both as a criminal and as a detective. As the books of the Lupinian series appeared—from *The Exploits of Arsène Lupin* in 1907 to *Les Milliards d'Arsène Lupin* in 1941—Leblanc's presentation of his hero roughly went through three stages. From 1907 to 1913 or 1914, Lupin's criminal activities are stressed; he is simply the dashing young gentleman-burglar. From about 1915 to 1919, however, his efforts to assist the official police in pursuing criminals by correcting the police's errors are stressed. Finally, from about 1922 to the conclusion of the series, the emphasis shifts to Lupin's activities as a detective; he cooperates almost openly with the official police to help them catch criminals who are especially malign. Surely Leblanc's changes in emphasis in the presentation of his hero reflect historical conditions in France that altered the prevailing attitudes of the French public toward government during successive phases of their history: the prewar period; the period of the Great War, 1914-1918; and the postwar period that led to France's defeat by the Germans and the fall of the Third Republic in 1940. Leblanc's writing career spanned the belle époque and the fin de siècle, but it also encompassed the avant-garde and the birth of modernism. His canon reflects this social evolution.

JOHN LE CARRÉ

David John Moore Cornwell

Born: Poole, Dorset, England; October 19, 1931

Type of plot: Espionage

PRINCIPAL SERIES

George Smiley, 1961-

PRINCIPAL SERIES CHARACTER

GEORGE SMILEY is a master spy and holder of various official and unofficial posts in Great Britain's Secret Intelligence Service; he is separated from his unfaithful wife. Middle-aged, short, plump, and bespectacled, the waddling, owlish, Pickwickian Smiley is a most unlikely hero. Vaguely idealistic, he lives for his work.

CONTRIBUTION

John le Carré began writing espionage novels in the early 1960's, when the major figure in the field was Ian Fleming, creator of the cartoonishly superhuman James Bond. Le Carré's fiction stands in sharp contrast, emphasizing the drudgery, boredom, and moral ambiguity in the decidedly unglamorous world of the real-life agent, who is more often a bureaucrat than an adventurer. Although many credit him with inventing the realistic espionage tale, le Carré denies such an achievement, acknowledging such predecessors as W. Somerset Maugham with his Ashenden stories. By creating some of the most believable characters and plausible situations in the genre, le Carré has perhaps had the most influence on the development of espionage fiction. In addition to being the best-selling espionage novelist, he has been acclaimed for turning a form of entertainment into an art form, for finding the poetry in the labyrinthine machinations of his plots. He has been judged more than a genre writer by many critics, deserving of inclusion in such serious company as Iris Murdoch and John Fowles. According to Andrew Rutherford, le Carré offers "exciting, disturbing, therapeutic fantasies of action and intrigue; but in his best work he also engages with political, moral and psychological complexities, demonstrating the capac-

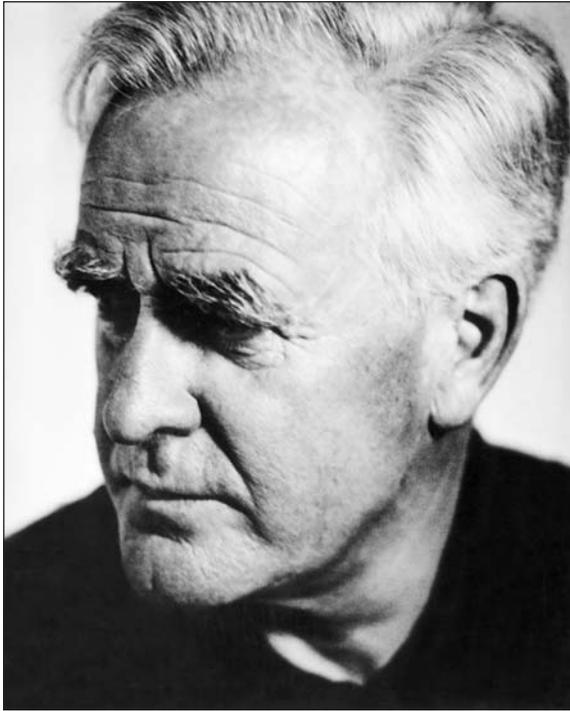

ity of entertainment art to transcend its own self-imposed limitations."

BIOGRAPHY

John le Carré was born David John Moore Cornwell on October 19, 1931, in Poole, Dorset, England, the son of Ronald Thomas Archibald Cornwell and Olive Glassy Cornwell. His father was an extravagant businessman who ran for Parliament as a Liberal, and as *A Perfect Spy* (1986), le Carré's most autobiographical novel, makes clear, he was also a confidence trickster who went to prison for fraud. Because his parents divorced when he was five, young David experienced no consistent family life: He did not see his mother from the time he began school until he was twenty-one. "I think a great part of one's adult life," he has said, "is concerned with getting even for the slights one suffered as a child."

The lonely little boy sought an outlet for his frustrations in writing. Although his literary efforts were discouraged at Sherborne School in Dorset, Cornwell won the school's prize for English verse. He attended Berne University in Switzerland for a year and served in the Army Intelligence Corps in Vienna before reading German at Lincoln College, Oxford University. He married Alison Ann Veronica Sharp in 1954 and received a first-class honors degree from Oxford University in 1956. After teaching for two dismal years at Eton College and trying unsuccessfully to become a freelance illustrator of children's books, he found a position in the Foreign Service in 1959.

While commuting by train from Buckinghamshire to the Foreign Office in London, he wrote his first novel, *Call for the Dead* (1960). Because Foreign Service officials were not supposed to publish novels under their own names, he acquired his pseudonym, le Carré, translated as "the square" in French. From 1960 to 1963, he served, officially, as second secretary in the British embassy in Bonn while following Germany's internal politics for British intelligence; during that time, he wrote his second novel, *A Murder of Quality* (1962).

John le Carré. (The Douglas Brothers)

After the modest successes of his first two books, le Carré's initial best seller came in 1963 with *The Spy Who Came in from the Cold*, written while he commuted to work in Bonn. In addition to selling more than twenty million copies, the novel won several awards, including the Edgar Allan Poe Award of the Mystery Writers of America in 1965. It also enabled le Carré to quit his job and write full time.

Le Carré has three sons, Simon, Stephen, and Timothy, by his first marriage. After his 1971 divorce, he married Valerie Jane Eustace, an editor for his English publisher, in 1972, and they have one son, Nicholas. In 1984 he received the Grand Master Award from the Mystery Writers of America, and in 1988 he won the Crime Writers' Association's Cartier Diamond Dagger lifetime achievement award.

ANALYSIS

John le Carré's agents are tired, bitter, and lonely men desperately trying to hold on to the vestiges of their ideals and illusions, to keep away from the abyss of cynicism and despair. Alec Leamas, the protagonist

of *The Spy Who Came In from the Cold*, has been in the field too long but allows himself to be talked into undertaking one last assignment, only to be deceived by his masters, spiritually destroyed, and killed. There are no heroes or villains on le Carré's Cold War battlefields: Everyone uses everyone, and conspiracies lie everywhere, like mines.

In a 1974 interview with the British Broadcasting Corporation, le Carré said that his novels differ from most thrillers in which the plot is imposed on the characters. He said that he writes the kind of book in which "you take one character, you take another character and you put them into collision, and the collision arrives because they have different appetites, and you begin to get the essence of drama." When bringing about these collisions, le Carré is less interested in the events than in how the characters respond, that is, their moral behavior.

Le Carré's novels reflect his belief that people barely know themselves, that in human relations "we frequently affect attitudes to which we subscribe perhaps intellectually, but not emotionally." He considers such relations "fraught with a nerve-wracking tension." Such a view of life in which this tension leads to conspiracies is appropriate for a writer of espionage fiction. The espionage novel, according to le Carré, becomes "a kind of fable about forces we do believe in the West are stacked against us."

George Smiley is the perfect le Carré protagonist because of his ability to see conspiracies of which others are unaware. In *Call for the Dead*, his suspicions about the suicide of a Foreign Office clerk lead to unmasking the duplicities of one of his closest friends. (Betrayal of one's friends is a major le Carré theme.) In *A Murder of Quality*, a straightforward mystery, Smiley enters the closed world of the public school—an institution le Carré finds almost as fascinating and corrupt as the intelligence establishment—to solve the murder of a schoolmaster's wife. After appearing as a minor character in *The Spy Who Came in from the Cold* and *The Looking-Glass War* (1965), Smiley reaches his fullest development in the trilogy that pits him against his Soviet opposite number, known as Karla. *Tinker, Tailor, Soldier, Spy* (1974), *The Honourable Schoolboy* (1977), and *Smiley's People* (1980) show le Carré

working on a much larger canvas than before with dozens of characters serving as the chess pieces that Karla and Smiley deploy all over Europe and Asia in their deadly battle of wits.

TINKER, TAILOR, SOLDIER, SPY

Smiley is forced to accomplish his goals not only without the help of his superiors but also often despite their interference. In *Tinker, Tailor, Soldier, Spy*, Control, the longtime head of the Secret Intelligence Service (always referred to as the Circus, for the location of its offices in the Cambridge Circus section of London), has died and is replaced by the unctuous Percy Alleline. Control had suspected that the Soviets had placed a double agent, or mole, in the higher echelons of the Circus. (Le Carré is credited with making this use of “mole” popular.) He had therefore sent Jim Prideaux, one of the Circus’s best agents, to Czechoslovakia to uncover evidence about the mole’s identity, but a trap is laid, resulting in the wounding and torture of Prideaux.

After Control’s death, Smiley, with the help of the delightfully colorful Connie Sachs, head of Russian research, slowly and painstakingly tracks the mole through the records of intelligence operations. This procedure is hampered by the lack of cooperation from Alleline, whom the mole cleverly manipulates. Smiley learns more and more about the head of Moscow Centre, Karla, the man behind the mole, the then-unknown agent Smiley once had in his grasp. He discovers that the mole is Bill Haydon—the Circus’s golden boy, the lover of Ann Smiley, and the best friend of Jim Prideaux. (Haydon clearly suggests the infamous double agent Kim Philby; le Carré wrote the introduction to a 1968 study of Philby.) Before Haydon can be swapped to the Soviets, the shocked, disillusioned Prideaux kills him. Because *Tinker, Tailor, Soldier, Spy* centers on the quest for Karla’s mole, it more closely resembles traditional mystery fiction than any of le Carré’s other espionage novels.

THE HONOURABLE SCHOOLBOY

The Honourable Schoolboy, which won the James Tait Black Memorial Prize and the Gold Dagger of the Crime Writers’ Association, focuses on Smiley’s efforts to restore the credibility of the Circus. Again with the help of Connie Sachs, he backtracks through

the files to attempt to learn what information Haydon has covered up or destroyed, discovering that Karla has made large gold payments to a Hong Kong trust account. Smiley’s legman, Jerry Westerby, a dissolute, aristocratic journalist, goes to Hong Kong to help unravel the strands of the multilayered plot.

The trust proves to be controlled by Drake Ko, a Hong Kong millionaire, whose supposedly dead brother, Nelson, is Karla’s double agent in China. Nelson Ko intends to sneak into Hong Kong to be reunited with Drake, but Saul Enderby, Smiley’s new boss, has been working behind his back and has arranged for the Central Intelligence Agency (CIA) to reap the rewards, including details of China’s military capabilities. Westerby has fallen for Drake’s beautiful English mistress and attempts to disrupt Nelson’s capture and is killed.

SMILEY’S PEOPLE

In *Smiley’s People*, the now-retired Smiley learns that Soviet agents in Paris are attempting to establish a new identity for a Russian girl. Piecing together bits of seemingly unrelated information, he, with the assistance of Connie Sachs and other old friends, discovers that Karla has a disturbed daughter in a Swiss sanatorium. Smiley is his own legman this time as he travels to Hamburg, Paris, and Berne to ferret out the facts and obtain satisfaction from his nemesis. By detecting that Karla has illegally used public funds to care for his daughter, Smiley forces the Soviet superspy to defect. As with Jerry Westerby, Karla’s downfall results from love, a particularly dangerous emotion throughout le Carré’s works, as Smiley’s feelings for his adulterous Ann particularly attest.

A SIMPLE STYLE

Le Carré’s writing style is primarily simple, with heavy reliance on dialogue. His descriptive passages usually focus on the actions of his characters and only occasionally delineate places and things. When presenting a complex idea, personage, or situation, however, his style can become more ornate, with meandering, parenthetical sentences resembling those of Henry James and William Faulkner. Le Carré has been criticized for creating excessively intertwined, difficult-to-follow plots. Although this charge has some validity, he is trying to present his stories in the same

way his characters see them: as fragments of a puzzle, the outline of which will be clear once its components finally begin to connect. The reader trusts le Carré as a guide through this moral miasma, since his close attention to detail indicates that he truly knows the minutiae of espionage.

A DEVIANT WORLD

Like Graham Greene (who called *The Spy Who Came in from the Cold* the best espionage story he had ever read), le Carré is a moralist who uses the conventions of espionage to convey his views of society. His is a devious world in which the best intentions have little effect. In 1966, le Carré wrote, "There is no victory and no virtue in the Cold War, only a condition of human illness and a political misery." The Cold War espionage in his novels is a morally ambiguous undertaking full of fear, deceit, betrayal, and disillusionment. The unmasking of Haydon destroys Prideaux's illusions about friendship, loyalty, and love. (Le Carré has said that he cannot believe in "constancy, group values, [or] obligations.")

Le Carré's spies are generally weak, decent men manipulated by cynical bureaucrats who rarely take any risks. These spies are uncertain whether the values they defend are more endangered by the enemy or by their employers. Those in power see their work as a form of gamesmanship, with these particular games played to create the impression that Great Britain remains a world power, while the realities only underscore the decay of the lost empire, especially in the Hong Kong scenes of *The Honourable Schoolboy* and the ironic first names of the Ko brothers.

Distrust of institutions and those who run them appears throughout le Carré's fiction. In an interview with the French monthly *Lire*, he admits,

I probably took refuge in the world of espionage to escape my father. . . . To understand, explain and justify my father's betrayal of his milieu, class and society, one has to blame the institutions and the men behind them as well as the respectability in which I found temporary refuge when I fled.

Le Carré sees the institutions taking on lives of their own contrary to their creators' intentions. This lack of control is clearly evident in Great Britain, where the

social system produces an administrative elite, personified by Saul Enderby, who can be affable and charming while remaining morally sterile. When someone such as Westerby attempts to make a stand as an individual, he is destroyed. Le Carré considers Western institutions arrogant for attempting to transform the rest of the world in their image. As Westerby, with his suggestive name, travels through Thailand, Laos, Cambodia, and Vietnam in 1975, he witnesses the decadence and degradation brought on by the failure of the West to understand the East.

The Karla trilogy is crammed with allusions to the myth of the Holy Grail: The Soviet disinformation in *Tinker, Tailor, Soldier, Spy* comes from an imaginary agent known as Source Merlin. Smiley is both a Percival pursuing the Grail—Ann refers to her husband's obsession with Karla as the "black Grail"—and an aged King Arthur attempting to restore harmony in his land. The Circus is in disarray because the members of the inner circle, abetted by Haydon's treachery, have, like the knights of the Round Table, broken their vows of loyalty and obedience. Le Carré evokes this myth to emphasize the loss of ideals in an England where everything is shrouded in ambiguity.

THE CHARACTERS

Le Carré has said that each of his novels begins with the image of a character, and his skill at creating enthralling protagonists and scores of believable secondary characters is perhaps the greatest strength of his stories. He juggles his Whitehall officials, police, journalists, schoolmasters, CIA agents, prostitutes, and drug smugglers with the finesse of Charles Dickens. Characterization is so prominent in a le Carré novel that a reviewer for *The Times Literary Supplement* criticized *A Murder of Quality* for paying it excessive attention.

Westerby and Smiley, the most captivating characters in the Karla trilogy, clearly illustrate their creator's skills. Westerby has long been called "the schoolboy" because of his ever-present bag of books. On his journey through Southeast Asia, he reads works by Joseph Conrad, Ford Madox Ford, T. E. Lawrence, and Graham Greene, writers who explore the failures of romantic idealism and discover the heart of darkness. He is particularly reminiscent of the doomed romantic hero

of Conrad's *Lord Jim* (1900) and is pathetic for failing to see that he is repeating the errors of the characters about whom he is reading. Despite being a journalist and would-be novelist, Westerby is essentially a man of action, often taking unnecessary risks: "Jerry at heart was a soldier and voted with his feet. . . . What a man thinks is his own business. What matters is what he does." Last in a line of English aristocrats, Westerby represents the best of those believing in honor and good intentions as well as their inevitable failure. In a world of Karlas, Allelines, Enderbys, and Haydons, Westerby stands out for his admirable, if foolish, belief that romantic heroism has a place in a world of Cold War tensions.

Le Carré's most remarkable achievement with George Smiley is that, over seven novels and twenty years, he grows into an almost mythic figure while remaining all too human. Clumsy, meek, and short-sighted, he is both extremely specific and quite enigmatic. Peter Guillam, his protégé, assistant, and most devoted supporter, never truly understands him. His name is doubly ironic since Smiley wears an emotionless mask, and George is the name of England's dragon-slaying patron saint and of the kings who were heads of state during the two world wars. Westerby is surprised to learn that such a seemingly ordinary man served three years undercover in Germany during World War II.

Like his creator, Smiley interprets all of life in terms of conspiracy. He keeps a photograph of Karla in his office to remind him that at least one conspiracy has a human face. Because spying should be an impersonal business, his superiors reprimand him for always saying "Karla" when he means "Moscow Centre." They also believe that he wastes time on menial matters when he should delegate responsibility to his subordinates. Nevertheless, his need for control compels him to involve himself in all aspects of an operation.

Smiley has enough self-knowledge to realize that because he is obsessed by his work he cannot blame Ann for her infidelity. He is also possessed by self-doubt, wondering "whether Ann was right and his striving had become nothing other than a private journey among the beasts and villains of his own insufficiency." Le Carré ensures some distance between the

reader and Smiley by having reliable characters question his actions. Westerby is perturbed by the "failed priest" side of Smiley, who seems to assume "that the whole blasted Western world shared his worries and had to be talked round to a proper way of thinking." In a 1985 speech at the Johns Hopkins University, le Carré criticized his creation for being the kind of man who "would sacrifice his own morality on the altar of national necessity." Westerby is finally a more admirable character for daring, however hopelessly, to assert the dignity of the individual over that of the institution.

At the end of *Smiley's People*, Peter Guillam tells Smiley that he has won, but his master is not so certain. What exactly has been won, and at what cost? If, in le Carré's ambiguous world, there are no heroes or villains, neither can there be any victories.

In addition to the renowned Smiley, le Carré created a host of other memorable characters. In the third and fourth decades of his writing career came Charlie, his first female protagonist, in *The Little Drummer Girl* (1983), who is initiated into the violent and illusory world of espionage; Magnus Pym of *A Perfect Spy*, who suffers the humiliation of his father's betrayals, only to turn his own duplicitous behavior into art form; Jonathan Pine from *The Night Manager* (1993), who was as close as le Carré ever came to a James Bond-type superspy; and Nat Brock of *Single and Single* (1999), who many likened to a spiffed up and modernized George Smiley.

As le Carré's literary dominance entered its fifth decade, it remained important to note that his tales of espionage have also been adapted to film. Worthy of note are *The Spy Who Came in from the Cold* (1965, starring Richard Burton), *The Russia House* (1990, starring Sean Connery), *The Tailor of Panama* (2001, starring Pierce Brosnan), and *The Constant Gardener* (2005, starring Ralph Fiennes) and television versions of *A Perfect Spy* from Masterpiece Theatre and the extraordinary BBC miniseries of *Tinker, Tailor, Sailor, Spy*, which starred Alec Guinness as George Smiley. Although le Carré characterized Guinness's performance as "brilliant," it nevertheless had a negative impact on the author; he had imagined his most famous creation rather differently. Yet Guinness so inhabited the role and had so firmly imprinted his image in le

Carré's mind that the author chose to abandon Smiley in favor of newer protagonists, such as Charlie, Magnus, Ned Palfrey (who was prominent in both *The Russia House* and *The Secret Pilgrim*), Jonathan, and finally Nat, who appeared ready to carry on where Smiley left off.

PRINCIPAL MYSTERY AND DETECTIVE FICTION

GEORGE SMILEY SERIES: *Call for the Dead*, 1960 (also known as *The Deadly Affair*); *A Murder of Quality*, 1962; *The Spy Who Came in from the Cold*, 1963; *The Looking-Glass War*, 1965; *Tinker, Tailor, Soldier, Spy*, 1974; *The Honourable Schoolboy*, 1977; *Smiley's People*, 1980

NONSERIES NOVELS: *A Small Town in Germany*, 1968; *The Little Drummer Girl*, 1983; *A Perfect Spy*, 1986; *The Russia House*, 1989; *The Secret Pilgrim*, 1991; *The Night Manager*, 1993; *Our Game*, 1995; *The Tailor of Panama*, 1996; *Single and Single*, 1999; *The Constant Gardener*, 2000; *Absolute Friends*, 2004; *The Mission Song*, 2006

OTHER MAJOR WORKS

NOVEL: *The Naive and Sentimental Lover*, 1971

SCREENPLAYS: *Dare I Weep, Dare I Mourn*, 1966; *The End of the Line*, 1970; *The Tailor of Panama*, 2001 (adaptation of his novel; with Andrew Davies)

TELEPLAYS: *Smiley's People*, 1982 (adaptation of his novel; with John Hopkins); *A Murder of Quality*, 1991 (adaptation of his novel)

BIBLIOGRAPHY

Aronoff, Myron J. *John le Carré's Novels: Balancing Ethics and Politics*. New York: Palgrave, 2001. A careful study of le Carré's novels, explicating the author's moral universe.

Beene, Lynn Diane. *John le Carré*. New York: Twayne, 1992. This is a very useful biography of David Cornwell's life before he adopted the pseudonym John le Carré and his career since becoming a writer. Following the biography, the author provides a detailed and well-referenced analysis of

le Carré's novels through *Smiley's People*.

Cobbs, John L. *Understanding John le Carré*. Columbia: University of South Carolina Press, 1998. This is a thorough and comprehensive critical work about John le Carré's novels, all of which through *The Tailor of Panama* are analyzed.

Hitz, Frederick P. *The Great Game: The Myth and Reality of Espionage*. New York: Alfred A. Knopf, 2004. Hitz, the former inspector general of the Central Intelligence Agency, compares fictional spies in the work of le Carré and others to actual intelligence agents to demonstrate that truth is stranger than fiction. Pays special attention to le Carré's characters and the psychological realism of their portrayal.

Hoffman, Tod. *Le Carré's Landscape*. Montreal: McGill-Queen's University Press, 2001. Focuses on the settings of le Carré's novels and their importance to the author's particular portrayal of Cold War and post-Cold War espionage. Bibliographical references and index.

Lewis, Peter E. *John le Carré*. New York: Frederick Ungar, 1985. An extensive critique of John le Carré's work, with special mention of its political context. The material is well organized and includes a useful bibliography.

Monaghan, David. *The Novels of John le Carré: The Art of Survival*. New York: Basil Blackwell, 1985. Provides book-by-book coverage of all of le Carré's novels through *The Little Drummer Girl*. Also includes an insightful chapter on George Smiley.

_____. *Smiley's Circus*. London: Orbis Press, 1986. A wonderful illustrated index of characters from all the novels through *A Perfect Spy*, particularly focusing on the Karla trilogy of novels. Includes chronologies of the plots of the novels, maps, and photographs of some of the more famous British landmarks featured in le Carré's work. This is an invaluable tool for untangling the byzantine complexity of George Smiley's world.

Wolfe, Peter. *Corridors of Deceit: The World of John le Carré*. Bowling Green, Ohio: Bowling Green University Popular Press, 1987. An in-depth probing of le Carré's writing, this work contains many interesting insights into the author's characters but lacks a bibliography.

JOSEPH SHERIDAN LE FANU

J. Sheridan Le Fanu

Born: Dublin, Ireland; August 28, 1814

Died: Dublin, Ireland; February 7, 1873

Types of plot: Historical; horror; psychological; thriller

CONTRIBUTION

In considering Joseph Sheridan Le Fanu as a writer in the mystery and detective tradition, one might be tempted to call his novels mysteries without a detective. In nearly every one of his novels (and in a high proportion of his shorter fiction), there is some mysterious situation that confuses the main characters and usually threatens their lives and fortunes. There may be two mysteries, one from the past impinging on the present and one developing in the course of the action; they may be causally connected and involve the same agents. The revelation may occasionally be the result of amateur or official detective work, though the detective is never the main character, but usually it is the result of chance. The supernatural is often present; sometimes it proves to have a natural explanation, but sometimes it has to be accepted as real. Julian Symons, in *Bloody Murder: From the Detective Story to the Crime Novel* (1972), speaks of an interregnum between the first appearance of the detective stories of Edgar Allan Poe and Wilkie Collins and the publication of Arthur Conan Doyle's *A Study in Scarlet* (1887). Written during this period, Le Fanu's novels should not be regarded as flawed detective stories but as sharing certain features of a genre that had yet to be firmly defined.

BIOGRAPHY

Joseph Thomas Sheridan Le Fanu was born in Dublin on August 28, 1814; his father was of Huguenot descent and his mother was a niece of Richard Brinsley Sheridan. Le Fanu spent most of his childhood in Chapelizod, a village west of Dublin near Phoenix Park, where his father was chaplain of the Hibernian Military School. In 1826, the elder Le Fanu elected to move to Abingdon near Limerick in the west of Ireland. As a minister of the established Church of Ireland, he was

naturally resented by the predominantly Catholic peasantry who were supposed to pay tithes for his support; after a time, during the Tithe Wars, the tithes simply ceased to be paid.

The young Le Fanu was largely educated at home until he entered Trinity College in Dublin. He trained as a barrister but never practiced, his interests having shifted to journalism and fiction. From time to time, he was involved in the operation of various newspapers and of the *Dublin University Magazine*, in which much of his fiction first appeared. In December, 1844, he married Susanna Bennett, the daughter of a barrister; they had four children before her death in 1858. During her last illness, she was plagued by religious doubts, which Le Fanu apparently shared. In his uncertainty, he turned to Swedenborgianism, whose elaborate mythology of the spiritual world might have encouraged his interest in the supernatural. After his wife's death, he became increasingly reclusive and died on February 7, 1873.

ANALYSIS

Symbolic of Joseph Sheridan Le Fanu's transitional status is the fact that his first novel, *The Cock and Anchor* (1845), originally a historical novel, was rewritten much later as a real mystery story, with a change of time and place, and published as *Checkmate* (1871). One cannot but admire the cleverness with which he adapts the characters and even the minor details of plot to his changed purpose.

THE COCK AND ANCHOR

The Cock and Anchor gives a vivid reconstruction of the social and political atmosphere of Dublin in 1709-1710. Mary Ashewoode, the heroine, is a member of the Protestant, Anglo-Irish aristocracy that controlled most of the land and power in Ireland after the overthrow of James II. Her father and brother, Sir Richard and Henry Ashewoode, are particularly obnoxious members of this class, dissipated and improvident; Henry is a compulsive gambler. Mary loves a Catholic Jacobite, Edmund O'Connor, newly returned

from exile; her family, however, has other ideas. For a time they encourage the suit of an elderly fop named Lord Aspenly. After Sir Richard's death, however, Henry falls into the hands of a villainous usurer named Barden who wishes to marry Mary. He tricks Henry into forgery, for which he is eventually hanged. Blackmailing Ashewoode, Barden prepares for marriage by imprisoning Mary in her own home; he is betrayed, however, by a barmaid hired to watch Mary, who escapes. An elderly friend of O'Connor named Audley then escorts the heroine to the country house of an uncle, where, contrary to the conventions of the romantic novel, she simply dies, leaving her lover to fall in battle.

CHECKMATE

Some of the changes in *Checkmate* may not be relevant to this discussion, being made necessary by the change of setting from eighteenth century Ireland to Victorian England; some of the subordinate villains change from stage Irishmen to stage Jews, and the hero becomes a respectable gentleman who waits in the wings to marry the heroine (who does not die). It is the handling of the villain that shows Le Fanu's skill in a new genre. Barden is a villain of the crudest kind, but his counterpart, Walter Longcluse, is an elegant gentleman who moves easily in the best society; he has immense wealth but a somewhat mysterious past. Although there is nothing improper about his courting the heroine, Alice Arden, her family rejects him in favor of a presentable lord; in his anger, he behaves like Barden and blackmails Alice's brother. At this point, a somewhat primitive Sherlock Holmes figure intervenes. Alice's uncle, David Arden, a successful businessman, follows a hunch that there is some connection between Longcluse and Yelland Mace, who years before had been involved in the murder of Arden's brother. In Paris, Arden tracks down the mysterious Baron Vanboeren, the plastic surgeon who had transformed Mace into Longcluse. Mace/Longcluse turns out to be an illegitimate Arden, who seeks revenge. Though not considered one of Le Fanu's best novels, *Checkmate* is notable for the ingenious development of the plot and for the character of Longcluse. The transformation of the benevolent uncle should be noted: Mary Ashewoode's uncles are ready to defend

her with their money and the sword, but David Arden protects his niece with his analytical mind. There is an official detective in the novel, but he has been discharged from the police force, is duped by the villain, and dies ignominiously of scarlatina.

THE HOUSE BY THE CHURCHYARD

By general agreement, Le Fanu's best novels are *The House by the Churchyard* (1863), *Wylder's Hand* (1864), and *Uncle Silas* (1864); all three can properly be termed mysteries, though none has as strong a detective element as *Checkmate*. *The House by the Churchyard*, set in Chapelizod in 1767, is to some extent a historical novel, and it also contains much comedy and social satire. Here is a clear-cut version of Le Fanu's double mystery. Years before, in England, there had occurred a murder that was the result of gambling; a certain Lord Dunoran had been convicted of the crime and had committed suicide. Twenty years later, chance brings together in Chapelizod four persons connected with the crime: Mervyn, Lord Dunoran's son; Dr. Sturk, an innocent witness; Ezekiel Irons, the parish clerk and an accomplice; and Paul Dangerfield, really Charles Archer and the actual murderer. Dangerfield mortally wounds Sturk and allows the blame to fall on Charles Nutter, Sturk's rival for a land agency. The murderer oversteps himself, however, when he employs an alcoholic surgeon to trepan the comatose Sturk; Sturk recovers temporarily and with the aid of a repentant Irons exposes Dangerfield. The novel ends with a flurry of marriages, including Mervyn's. This work was the source of many of the allusions in James Joyce's *Finnegans Wake* (1939).

WYLDER'S HAND

Wylder's Hand, with an English Victorian setting, is far less picturesque than the Irish novel, but it might be considered a better mystery story, because there is little comic distraction. There is no mystery in the past. Mark Wylder, a wealthy young man, is engaged to his cousin Dorcas Brandon; it is a marriage of convenience, intended to settle some property disputes. Mark unaccountably disappears; soon, letters from him begin to arrive from the Continent. Some scandal is assumed, and Dorcas feels free to marry Captain Stanley Lake, whose moral character is gradually revealed to be even more worthless than Wylder's. Cir-

cumstances increasingly suggest that Wylder is in fact dead—the letters arrive in the wrong order—and at the climax, it is revealed that he was killed by Lake in a quarrel. Lake has victimized not only Dorcas but also his sister Rachel, who has been persuaded to cover up the murder. Both Dorcas and Rachel, who might have married a lord, are so disillusioned that they leave England, intending to lead a life of retirement on the Continent. The handling of these heroines differs from Le Fanu's usual pattern; they are not physically threatened, but their lives are permanently scarred by the worthlessness of Wylder and Lake.

UNCLE SILAS

Uncle Silas, Le Fanu's most celebrated novel, also uses a double mystery and a threatened heroine. Maud Ruthyn is the daughter of Austin Ruthyn, a kindly but withdrawn man, and the niece to Silas Ruthyn, who was suspected years before of murder for money. Austin is convinced of his brother's innocence and shows it by leaving a will in which Maud is to become Silas's ward; this will is all the more trusting in that Silas will inherit Maud's property if she dies before coming of age. Maud does not protest; she trusts her father and finds her uncle a romantically tragic figure.

At first, the atmosphere in her uncle's house is anything but threatening. Silas, however, is facing financial ruin. He first tries to get Maud's money by arranging her marriage to his oafish son Dudley; Dudley, however, is already married. Silas then plots to murder Maud, enlisting Madame de la Rougierre, once Maud's hated, alcoholic governess. The two are sent off on a complicated journey that is supposed to terminate in Paris but actually leads Maud to the chamber in which the original murder victim met his end. Maud escapes by a clever ruse, leaving the governess to be murdered in her stead.

In spite of her experiences, Maud is still capable of happiness and finds it as the wife of Lord Ilbury, one of the trustees of her estate. Silas is the most striking of Le Fanu's villains. According to Nelson Browne, "A tarnished reputation, penury, guilt, all conspired to present the melancholy spectacle of something a trifle wasted."

IN A GLASS DARKLY

Le Fanu's short fiction is of a miscellaneous character; several stories have plots that were subsequently

expanded into novels, and some could be classified as folktales. It is in the short fiction, however, that Le Fanu is at his best in the mystery of the supernatural, and he is nowhere better than in the collection entitled *In a Glass Darkly* (1872). In "Carmilla," a vampire story, the reader must suspend disbelief in vampires or the story will make no sense. In "The Room in the Dragon Volant," on the other hand, the supernatural turns out to be quite natural, though no less evil. Beckett, a young English tourist in Paris after Waterloo, allows himself to be convinced that a young countess with an aged husband loves him and wants him to rescue her. The reader discovers that he is to be the third person to disappear from a room in the Dragon Volant Inn and be buried alive for his money. The French police are on the alert, however, and they rescue him at the last moment; this tale could be called pure detective fiction, except that the reader is not aware of the detective until the climax.

Two other stories, "Green Tea" and "The Familiar" (also known as "The Watcher"), are ambiguous as to the reality of apparitions. In "Green Tea," a scholarly clergyman is haunted by a small, black, and particularly malignant monkey, which eventually drives him to suicide. In "The Familiar," a retired naval officer is harassed in the streets of Dublin by the figure of a seaman whom he had oppressed and whose death he believed he had caused.

In neither case is a naturalistic explanation needed, and in each case, it is perfectly possible. The seaman may have survived or someone else may be impersonating him; whatever the case, the captain's guilt is unmistakable. With "Green Tea," the reality of the monkey is not questioned, although its interpretation is. Dr. Hesselius, Le Fanu's persona, in his comments on the stories, suggests that disease may make a person susceptible to invasions by the supernatural.

Le Fanu's work, in his gothic moments, perhaps deserves the label of "commercialized romanticism," but in the ingenious plotting of the longer novels and in the concentrated horror of his shorter fiction, he no more needs to be justified by assimilation to a popular genre than do the Brontës.

John C. Sherwood

PRINCIPAL MYSTERY AND DETECTIVE FICTION

NOVELS: *The House by the Churchyard*, 1863; *Wylder's Hand*, 1864; *Uncle Silas*, 1864; *Guy Deverell*, 1865; *All in the Dark*, 1866; *The Tenants of Malory: A Novel*, 1867 (3 volumes); *A Lost Name*, 1868; *Haunted Lives*, 1868; *The Wyvern Mystery*, 1869; *Checkmate*, 1871; *The Rose and the Key*, 1871; *Willing to Die*, 1873 (3 volumes)

SHORT FICTION: *Ghost Stories and Tales of Mystery*, 1851; *Chronicles of Golden Friars*, 1871; *In a Glass Darkly*, 1872; *The Watcher, and Other Weird Stories*, 1894; *A Chronicle of Golden Friars, and Other Stories*, 1896; *Madam Crowl's Ghost, and Other Tales of Mystery*, 1923 (M. R. James, editor); *Green Tea, and Other Ghost Stories*, 1945; *Best Ghost Stories of J. S. Le Fanu*, 1964; *Ghost Stories and Mysteries*, 1975

OTHER MAJOR WORKS

NOVELS: *The Cock and Anchor*, 1845; *The Fortunes of Colonel Torlogh O'Brien*, 1847; *Morley Court*, 1873

SHORT FICTION: *The Purcell Papers*, 1880

POETRY: *The Poems of Joseph Sheridan Le Fanu*, 1896

BIBLIOGRAPHY

Begnal, Michael H. *Joseph Sheridan Le Fanu*. Lewisburg, Pa.: Bucknell University Press, 1971. An essay-length discussion of Le Fanu's works, which is valuable in providing general commentary about Le Fanu's intellectual and artistic interests, especially his sensitive understanding of women.

Crawford, Gary William. *J. Sheridan Le Fanu: A Bio-Bibliography*. Westport, Conn.: Greenwood Press, 1995. Part 1 discusses Le Fanu's biography; part 2 is a primary, annotated bibliography of magazines, books, anthologies, and manuscripts; part 3 is an annotated secondary bibliography. Includes an appendix on films and plays based on Le Fanu's work. Also contains two useful indexes.

McCormack, W. J. *Sheridan Le Fanu and Victorian Ireland*. Oxford, England: Clarendon Press, 1980. The standard work on Le Fanu. The author's approach is twofold. First, this study is a detailed biography of

Le Fanu. Second, it locates, with much intellectual sophistication, Le Fanu's life in his times, giving to what might remain mere biographical data the stamp of historical significance. A second, enlarged edition of this important work was issued in 1991.

Melada, Ivan. *Sheridan Le Fanu*. Boston: Twayne, 1987. Melada's approach is chronological, proceeding from Le Fanu's early short fiction to the major novels with which his career ends. The author sees Le Fanu as a writer of popular fiction, the quality of which entitles him to serious academic consideration. Contains a chronology and a bibliography.

Sage, Victor. *Le Fanu's Gothic: The Rhetoric of Darkness*. New York: Palgrave Macmillan, 2004. This work examines Le Fanu's stylistic development and includes extensive analyses of *Uncle Silas* in addition to rarely discussed unpublished romances. Includes bibliography and index.

Schnepf, Chester H. *The Protagonist's Dilemma in Poe and Le Fanu: The Emergence of the Modern Gothic Tradition*. Waldoboro, Maine: Goose River Press, 2003. Locates Le Fanu as a progenitor, with Edgar Allan Poe, of the gothic in literature. Bibliographic references.

Signorotti, Elizabeth. "Repossessing the Body: Transgressive Desire in 'Carmilla' and *Dracula*." *Criticism* 38 (Fall, 1996): 607-632. Argues that in contrast to Bram Stoker's work, the female characters in Le Fanu's story are allowed to usurp male authority; claims that *Dracula* attempts to repossess the female body for the purposes of male pleasure and exchange and to rectify the reckless unleashing of female desire that occurs in *Carmilla*.

Towheed, Shafquat. "A Chasm in the Narrative of J. Sheridan Le Fanu's 'Green Tea.'" *Notes and Queries* 46 (March, 1999): 67. Accounts for a chronological inconsistency in the story by arguing the author of this serial fiction inadvertently confused real time and fictional time.

Veeder, William. "'Carmilla': The Arts of Repression." *Texas Studies in Literature and Language* 22 (1980): 197-223. A highly detailed discussion of the psychological dynamics of the story as a story of sexual repression. Discusses the dualities that dominate the story.

DENNIS LEHANE

Born: Dorchester, Massachusetts; August 4, 1965

Type of plot: Private investigator

PRINCIPAL SERIES

Patrick Kenzie and Angela Gennaro, 1994-

PRINCIPAL SERIES CHARACTERS

PATRICK KENZIE is a private investigator in the Dorchester neighborhood of Boston. Patrick (“don’t call me Pat”) comes from an Irish Catholic family and was routinely abused by his alcoholic father, who to the rest of the neighborhood is a firefighter and hero. Patrick still retains the scar from having been burned with an iron. Married, he is divorced by the end of the first novel in the series.

ANGELA “ANGIE” GENNARO is a private investigator who works with Kenzie and was his high school classmate. Angie is the granddaughter of a Mafia overlord, and although she is not ashamed of her family, she is determined to be successful without her family’s help. Early in the series, Angie is married to an abusive husband, Phil Dimassi, who also was a classmate in school and Patrick’s best friend. The relationship between Patrick and Angie is marked by a kind of witty banter. Despite their best intentions, Patrick and Angie do move in and out of a romantic and sexual relationship. This relationship is predicted and even expected by mutual friends.

CONTRIBUTION

Dennis Lehane has extended the gritty realism of James Ellroy and James Crumley to the traditional private detective form. His first novel, *A Drink Before the War* (1994), won the Shamus Award for best first novel. In the next four novels in the Patrick Kenzie and Angela Gennaro series, Lehane continued to explore the darkest recesses of human behavior, with a collection of violent and grotesque characters few writers would even have attempted. Though he admits that elements of the thriller and more generic crime writing are present in his work and he is clearly aware that he is working within the conventions of the private inves-

tigator novel, when asked to classify his own writing, Lehane calls it noir.

Despite the dark tone, there is always an undercurrent of comedy in his novels, from the flippancy of the Patrick-Angie relationship to the comic, clownishly dressed would-be enforcers of *Sacred* (1997) to Cheese Olamon, the 430-pound Swede who thinks he is an African American. Some critics have complained that Lehane inappropriately mixes tones, switching from the comic to the unbearably gruesome in his works, but his comedy is more organic to his plots than are the wisecracks included by Raymond Chandler or Robert B. Parker. *Sacred* won a Nero Award and was nominated for a Shamus.

Even when Lehane felt he had exhausted the detective form after five Kenzie-Gennaro novels, he continued to write about crime, mystery, and the horrifying. *Mystic River* (2001), his best-known work and a critically acclaimed best seller, is imprinted with the style and themes of his series novels—murder, the presence of evil, and the impact of evil on whole generations—but without a detective as a major presence. *Shutter Island* (2003), an unsettling psychological thriller about a United States marshal trapped in an asylum for the criminally insane on an island during a hurricane, has a surprise ending that goes well beyond the mere unmasking of a killer and questions the very nature of reality and perception.

In 2002, *Mystic River* became a finalist for the L. L. Winship/PEN New England Award (for best book about New England) and won both the Anthony Award and the Barry Award for best novel of the year.

BIOGRAPHY

Dennis Lehane was born in Dorchester, Massachusetts, a tough Irish Catholic working-class neighborhood of Boston. He graduated from a Catholic high school in Boston and, after two years at two different Boston-area colleges, attended Eckerd College in Florida, where he received his bachelor of arts degree in 1988. While at Eckerd, he considered himself a writer of gloomy short stories but tossed off a draft of a novel

Dennis Lehane in 2006. (David Shankbone)

in three weeks “to entertain myself,” as he puts it.

Lehane then took on a variety of jobs—counselor for handicapped and abused children, limousine driver, and truck loader. During this period, *A Drink Before the War* was published, a heavily revised version of that first novel dashed off at Eckerd. While attending Florida International University on a fellowship, he produced a draft of what would become *Mystic River* as his master’s thesis. After graduating in 2001 with a master of fine arts degree, he returned to Boston, continuing to work at jobs he did not have to take home with him, leaving time for writing, his true passion.

ANALYSIS

Influenced by the gritty realism of James Ellroy and James Crumley (especially *The Last Good Kiss*, 1978), Dennis Lehane calls his writing noir, for its dark mood and the almost palpable presence of unbearable evil that are constants running through all his work, beginning with the five Kenzie-Gennaro detec-

tive novels and continuing through the nonseries novels *Mystic River* and *Shutter Island*.

The neo-noir aspect of Lehane’s writing is most evident in his graphic descriptions of violence—killings, torture, maimings, and excessive displays of inhuman behavior. Characters have their hands and tongues cut off, spines are broken by being jumped on until they crack like splintering doors, and victims are crucified on the ground. Violence is emblematic of, as Patrick realizes in *Darkness, Take My Hand* (1996), “[e]verything rancid in this world . . . swastikas and killing fields and labor camps and vermin and fire that rained from the sky.” The violence extends to the psychological realm—in *Prayers for Rain* (1999), for example, the monstrous Scott Pearse is able to kill Karen Nicholls by simply torturing her psychologically and driving her to commit suicide, all without touching her.

More than anything, Lehane’s novels demonstrate humanity’s great capacity for unspeakable evil. The evil is so all-encompassing that none of the novels seem to have any kind of enduring moral center. Patrick is swept up by it, killing an unarmed man in the first novel of the series, participating (albeit with a kind of disgust) in the bowling alley scene of *Darkness, Take My Hand* in which Jack Rouse and Kevin Hurlihy, themselves icons of power and unconscionable evil, are tortured unimaginably before being killed and “disappeared.” Innocent characters like Grace Cole and her daughter Mae are driven out of the fictional world of the novel; pure and simple characters like Karen Nicholls are driven to suicide; children like Amanda McCready are returned to exploitative parents to have all hope and light stripped from them. There is never an easy answer—even the protagonists and everyone with whom the reader wants to identify are flawed in some way.

In Lehane’s novels, children are almost always victims. This provides the novels with a certain power—who does not agonize over child abuse?—without becoming cheap exploitation of the images for the sake of sensationalism. Lehane is genuinely concerned with the plight of children in society, which at best drugs children with television and commercialization and strips them of hope and joy, and at worst commits unspeakable acts of violence against them. This re-

doubles the feeling of hopelessness one gets from Lehane—not only is this generation evil, but also it is replicating the evil in future generations. Every evil character has a past history of abuse and mistreatment.

Another major theme in Lehane is gentrification, the slow infiltration of vacuous and morally empty yuppies into strong ethnic neighborhoods. The yuppies bring condominiums where triple-decker houses used to stand, trendy cafés where neighborhood delis used to be. This is the transition from the Flats of Mystic River, where working-class Jimmy and Dave grew up, to the upperclass Point, where Sean Devine resides. Though Lehane shows the dark inner workings of the neighborhoods, he still seems to believe that they are better than what is replacing them.

Lehane's primary technical skill as a novelist—the one thing he says he was born with—was an ear for dialogue. All his novels are rich with the sounds and rhythms of the neighborhoods, the wealthy and the criminal. At times witty and flip, at times tough and frightening, the dialogue of these characters is realistic and natural, depending not on cheap phonetic spellings, but the true speech intonations and contexts of people who use the language.

DARKNESS, TAKE MY HAND

Darkness, Take My Hand, Lehane's second novel, is, according to him, "over the top." It builds on the grotesques introduced in *A Drink Before the War* (especially the lumbering and frightening comic character of Bubba Rogowski) and introduces a cast of monsters for whom pathological is almost too mild a description: Gerry Glynn, the mastermind of a violent vigilante group "cleansing" the streets of Dorchester while masquerading as the friendly local bartender; Kevin Hurlihy, another classmate of Patrick and Angie, who rapes, murders, and tortures without the slightest pang of conscience; Evander Arujo, the innocent sent to Walpole, Massachusetts's toughest prison, on a minor charge who returns to the world a deranged torturer and killer; Alec Hardiman, the HIV-positive psychopath who molests Arujo inside the prison and uses Arujo as his remote-control murderer while outside; and Jack Rouse, the head of the Irish mafia in Dorchester.

The murders that punctuate the book are eventually shown to be part of a series of murders over the past twenty years that have one feature in common: The victims, after mutilation, are fastened to the earth in an image of crucifixion, the vigilantes' comment on sin and execution. In the end, the vigilantes' plots are exposed (it turns out that Patrick's father was a leader before his death), most of them are killed, Angie's husband is also killed, and Angie herself is recovering from gunshot wounds. The ringleader, Gerry Glynn, is shot by police as he stands in a ring of fire he himself set, in a symbolic scene straight from Dante's *Inferno* in the *La divina commedia* (c. 1320; *The Divine Comedy*, 1802). Vigilantism is seen as just another form of self-righteous violence, and it sickens Patrick.

Patrick's current love Grace Cole rejects him because of the violence in his life, and Patrick moves in with the bereaved Angie.

GONE, BABY, GONE

Gone, Baby, Gone (1998) is Lehane's fullest treatment of his recurrent theme of child abuse and his most despairing look into the treatment society affords its children. The ending is painful; the kidnapping of Amanda McCready, the central plot element, is resolved as Patrick, Angie, and two Boston police detectives discover that Amanda's kidnapping is part of a larger kidnapping ring headed by a handful of rogue police officers. These officers take abused and threatened children from their home lives and place them with genuinely loving parents, committing illegal acts of genuine kindness and mercy for the children.

As Patrick, Angie, and the two detectives close in on the illegal foster parents of Amanda, Detective Jack Doyle, the head of the kidnapping ring, and his wife, it is clear that the moral dilemma is beyond solution: return Amanda to her abusive and monstrous mother or allow her to remain illegally with the Doyles, who love her and provide her with a hope she will never get from her mother. Patrick sides with the Boston police and participates in the arrest of Doyle, and Angie, pained and distraught beyond words, leaves him. No one wins. In *Prayers for Rain* (1999), fate throws the pair together again, and they begin a fairly comfortable relationship.

MYSTIC RIVER

Mystic River is LeHane's most praised book and his first nonseries book. Again, an abused child is central, but the emphasis in *Mystic River* is on how the entire neighborhood reacts to the abuse. Twenty-five years before the time in which most of the novel takes place, three children are playing in the streets of East Buckingham, an amalgam of Dorchester and a number of other Boston suburbs. The three are approached by two men claiming to be police officers and ordered into the car for fighting. Two refuse, but one—Dave Boyle—gets in, and though he returns alive four days later, the neighborhood is scarred forever.

Twenty-five years later, the young daughter of Jimmy Marcus, one of the two who did not get into the car with Dave Boyle, is kidnapped and murdered; Sean Devine, the other boy with Jimmy and Dave on that fateful day, is the investigating officer; and Dave Boyle, though innocent, is the chief suspect. Though Katie Marcus's murder is a mystery, LeHane has said, "Who dunnit? Who cares?" The novel is about how the effects of the murder can be felt in every part of the narrow streets, every neighborhood bar, and on the porches of every triple-decker house in the city.

It has been said that place is a character of its own in *Mystic River* and that the river itself is central to the novel—flowing throughout the book, a mystical place where people can find hope and where bodies and dark secrets of the past disappear.

ELMORE LEONARD

Born: New Orleans, Louisiana; October 11, 1925

Also wrote as Dutch Leonard

Types of plot: Hard-boiled; thriller

PRINCIPAL SERIES

Chili Palmer, 1990-

PRINCIPAL SERIES CHARACTER

CHILI PALMER is a picaresque Miami loan shark who, on orders from his mob boss, goes to Las Vegas and then Los Angeles within the organized crime and film industry subcultures, as Palmer incongruously becomes a motion picture producer. Later, the parochial lack of creativity in the American film industry—perhaps best illustrated in its penchant to create sequels, is critiqued as Palmer transitions into the recording industry.

CONTRIBUTION

In 1953 Elmore Leonard began producing Western, then detective and mystery fiction, creating more than forty books. Leonard earned a significant but limited reputation as a writer of Western stories, novels, and screenplays, but his enduring contribution will be his witty, unorthodox crime thrillers that reveal the particulars of the made-men and wise guys of Detroit, Atlantic City, Miami, Las Vegas, Los Angeles, and wherever human motivation and endeavor might be on display. Leonard has also written extensively for television and film. In a review of Leonard's *Bandits* (1987), noted author Walker Percy said, "He is as good as the blurbs say: 'The greatest crime writer of our time, or perhaps ever.'" He shares with musician Bruce Springsteen

(who achieved the feat in 1978) the distinction of being the only nonpresident to be on the covers of both *Newsweek* and *Time* magazines (in 1988) in the same calendar year; *Time* magazine characterized Leonard as "the [Charles] Dickens from Detroit." Leonard continues to be a phenomenally successful popular writer who continues to merit scholarly attention for his literary corpus.

Leonard developed a cult following of crime novel readers in the 1970's and 1980's with such notable works as *Fifty-two Pickup* (1974) and *City Primeval: High Noon in Detroit* (1980). However, he did not have a best-selling novel until *Glitz* (1985), which, combined with the television movie that was made from this book in 1988, made his name a household word. In 1986, *City Primeval* won the Grand Prix de Littérature Policière. For the past two decades, Leonard's novels and the television movies and feature films made from them have enjoyed immediate and considerable audiences; he has transcended the world of crime fiction and made significant contributions as a screenwriter and in his interactions with such figures as director Quentin Tarantino (*Jackie Brown*, 1997; made from Leonard's 1992 novel, *Rum Punch*) and actor John Travolta (*Get Shorty*, 1995; *Be Cool*, 2005). Leonard received the Grand Master Award from the Mystery Writers of America in 1992 and the Cartier Diamond Dagger lifetime achievement award from the Crime Writers' Association in 2006. A devoted grandfather who has written the children's book *A Coyote's in the House* (2004), he continued to be productive beyond his eightieth birthday, with the publication of his forty-first novel, *Up in Honey's Room* (2007).

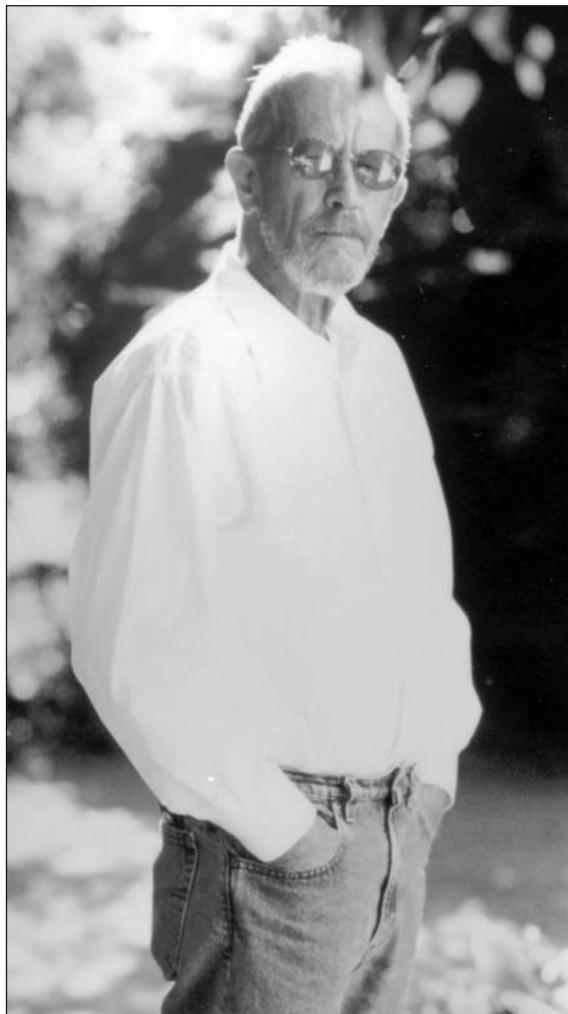

BIOGRAPHY

Born in New Orleans on October 11, 1925, Elmore John Leonard, Jr., is the son of a General Motors location scout. His father frequently moved the family, mostly in the southeastern United States, before settling permanently in Detroit, Michigan, where Elmore (nicknamed “Dutch” by his childhood friends) attended a Roman Catholic grammar school and graduated from the University of Detroit Jesuit High School in 1944. Leonard was profoundly affected by his reading of Erich Marie Remarque’s *Im Westen nichts Neues* (1929, 1968; *All Quiet on the Western Front*, 1929, 1969), and by his high school years, he was writing short stories that he purposefully modeled after those of his favorite writers, Ernest Hemingway, John Steinbeck, and John O’Hara.

After high school, Leonard joined the United States Navy and served in a Seabee unit in the South Pacific. After he earned a degree in English from the University of Detroit in 1948, he took a job as an advertising copywriter for the Campbell Ewald Agency in Detroit and wrote copy for the Chevrolet account, among others, between 1948 and 1961. Leonard wrote Western stories and novels throughout the 1950’s, publishing his first short story, “Trail of the Apache,” in *Argosy* magazine in 1951, and his first novel, *The Bounty Hunters*, in 1953. Leonard has published more than thirty short stories in such periodicals as *Zane Grey’s Western Magazine* and *The Saturday Evening Post*. Leonard’s Western novels adapted easily to the big screen, and in 1957 two of his stories, “The Captives” (the film was titled *The Tall T*) and “3:10 to Yuma,” were sold to Columbia Pictures.

Between 1961, when he quit Campbell Ewald and optioned *Hombre* (1961; which did not appear as a film until 1966) to Twentieth Century Fox, and 1969, when he published his first crime novel, *The Big Bounce*, Leonard supported himself and his growing family (which would eventually reach five children) with fee-for-piece writing, mostly in educational films, including a number of Encyclopaedia Britannica films as well as a recruiting film for the Franciscan order of Catholic priests.

The pictorial quality of his writing and his simple but eloquent diction and honest dialogue, often com-

Elmore Leonard. (© Linda Solomon)

pared to that of Hemingway, served him well as a writer of Westerns and especially well as he transitioned in the 1960’s and 1970’s to becoming not so much a mystery and detective writer but a crime writer—indeed, perhaps *the* crime writer of the final three decades of the twentieth century—detailing quirky characters in the crime capitals of Detroit, Miami, Las Vegas, and Los Angeles. Leonard attributes his research for a freelance article in the late 1960’s for the *Detroit News*, in which he rode for a shift in a police cruiser with a felony homicide squad, as an impetus in what he describes as a “four-decade spree” as a crime novelist and screenwriter.

ANALYSIS

Although Elmore Leonard became a published novelist with film credits within the Western genre, his lasting contribution to world culture will certainly be his crime fiction in the distinctive Leonard style—reticent, understated prose and evocative but understated descriptions—and the film adaptations of his works. The quality of Leonard's storytelling is enhanced by the insights and complexities with which he invests his characters. Although he is known for his exact descriptions of Detroit and the sordid characters who populate industries from organized crime to filmmaking to the recording industry, Leonard is able to create characters who are white and male (Chili Palmer) as well as those that are black and female (Jackie Brown) and characters who are vulnerable males (Vince Majestyk) as well as indomitable females (Karen Sisco).

HOMBRE

Hombre, acclaimed by the Western Writers of America as one of the best Westerns of all time, is important to the Leonard corpus for a number of reasons. Unlike later Leonard novels, which usually feature a third-person, omniscient narrator, this work is narrated by a minor character, Carl Allen. John Russell, a man of mixed white and American Indian heritage and raised by a band of Apache in Arizona, has liquidated a boardinghouse property and boarded a stagecoach, prepared to enter mainstream white society. However, he is literally shunned by the other passengers and forced to ride outside with Mendez, the Mexican driver.

When the stagecoach is attacked by outlaws, it is Russell's ability with guns and his laconic assurance in the face of danger that saves the other stagecoach passengers, even as Russell sacrifices himself for the others, who may not be worthy of the gesture. Like many of Leonard's later heroes and antiheroes, Russell is a man of action and few words. Although the film adaptation did not appear until the height of the Vietnam War in 1967, it has weathered the years well with Paul Newman as John Russell, Fredric March as a despicable Indian agent who has redeeming qualities that come out under duress, and Richard Boone as a lascivious stagecoach traveler.

GLITZ

Lieutenant Vincent Mora, a Miami police detective, is the central character in *Glitz*. When Mora goes to Puerto Rico to convalesce from a bullet wound, Teddy, a rapist and former convict seeking revenge for his incarceration, wreaks havoc on Mora's life and appears to be connected with the death of Mora's girlfriend, Iris, in Atlantic City. Lieutenant Mora suspects homicide rather than suicide, and his hypothesis draws him into conflict with the worlds of casino gambling and organized crime. As usual, Leonard creates memorable and distinctive characters, from blueblood Nancy Donovan (from Philadelphia's suburban Main Line) to exotic lounge act Nancy Moon to mob characters Ricky the Zit and Frank the Ching.

GET SHORTY

The premise of *Get Shorty* (1990), a quirky crime novel, is that a reasonably successful criminal can segue seamlessly into the Hollywood film industry. Chili Palmer, a Miami loan shark, travels to Las Vegas then to Hollywood on the trail of an unpaid loan. Palmer connects with horror-film producer Harry Zimm and begins to evaluate screenplays, articulate film ideas, and meet on equal terms with studio executives.

BE COOL

In the sequel, *Be Cool* (1999), Palmer takes on the Southern California music industry. Palmer's follow-up film to his hit film, *Get Leo*, has bombed, and he decides to pitch his proposed third film to a recording industry executive who is an acquaintance from Palmer's youth in Brooklyn. However, when his acquaintance becomes a mob hit before the end of the luncheon, Palmer is thrust into contact with Los Angeles Police Department detective Darryl Holmes, and they work together to find some Russian gangsters and to avoid being their next victims. Palmer fakes his way into the recording industry, even as he had earlier faked his way into the film industry in *Get Shorty*.

RUM PUNCH

In *Rum Punch*, Jackie Burke is a thrice-divorced forty-four-year-old white stewardess in Miami. Caught by the local police at the Miami airport as she attempts to bring cash back into the country from the Bahamas for arms dealer Ordell Robbie, she agrees to engage in a sting to implicate him. However, with the help of bail

bondsman Max Cherry, she creates a scheme in which she tries to keep the money for herself. In the film version of this novel, *Jackie Brown*, directed by Quentin Tarantino, the white Jackie Burke becomes African American Jackie Brown, and the scene is moved to Los Angeles. The story line remains mostly the same, though Tarantino adds the issues of gender and race, especially by casting 1970's blaxploitation actress Pam Grier in the leading role.

LEONID MAKSIMOVICH LEONOV

Born: Moscow, Russia; May 31, 1899

Died: Moscow, Russia; August 8, 1994

Also wrote as Lapot; Maksim Laptev

Types of plot: Inverted; psychological

CONTRIBUTION

In some of Leonid Maksimovich Leonov's most celebrated works, written early in his career, problems of good and evil are set against a background of political upheaval during crucial periods in Soviet history. Thus, his fiction serves to document and explore the dislocation of values and traditions and the blurring of moral distinctions that followed from the social reorganization begun by the Russian Revolution. Leonov's work deals largely with the political implications of criminal acts.

In spite of ideological objections that occasionally have been expressed by those in official positions, in his own country Leonov's work generally was accepted as politically sound by those who determined Soviet literary standards. While adhering basically to the criteria established by Soviet authorities, he produced works that also represent original, deeply personal approaches to literature. The success of Leonov's works disproves some critics' contention that political requirements precluded the acceptance of crime fiction among Soviet readers.

BIOGRAPHY

The political and literary direction of Leonid Maksimovich Leonov's career may reflect the circumstances of his early life. He was the son of Mariya Petrovna Leonova and Maksim Lvovich Leonov, and was born in Moscow on May 31, 1899. His father was originally from a peasant family and was largely self-educated; in addition to ventures as a small merchant, he wrote some poetry and became involved in radical journalism. He was arrested in 1908 on charges of subversion, and two years later he was exiled to Arkhangelsk, in northern Russia.

Leonov was educated in Moscow, where from time to time he published poetry and theater reviews in a

newspaper his father had started; for several summers, he worked as a proofreader. In 1918 after he had completed his secondary schooling, Leonov joined his father and settled for a time in Arkhangelsk. After Allied forces that had intervened against the Bolsheviks departed from that city, Leonov joined the Red Army; in addition to working for *Krasny voyn*, an army newspaper, he took part in operations to the south, at Perekop and in the Crimean peninsula. Although on his return to civilian life he was denied admission to Moscow University, he recommenced his literary efforts. In 1923 he was married to Tatiana Mikhailovna Sabashnikova, the daughter of a well-known publisher. With the appearance of major stories and his first novels, Leonov won recognition as an important new figure in Soviet letters.

Early in his career, Leonov met the poet Sergei Yesenin; he also became acquainted with Maxim Gorky, whom he visited in the course of a journey across Europe. Sometimes Leonov's works came under official reproach, though he was not subjected to the proscription or persecution that befell many other writers. During World War II, he served as a correspondent on major fronts; later, in 1945 and 1946, he was one of *Pravda's* reporters at the Nuremberg trials. During the onset of the Cold War, he became involved in a polemical exchange about responsibility for international tensions. In 1960, he was a member of a writers' delegation that visited the United States. In Leonov's later works he largely abandoned strictly political concerns, preferring to explore questions of literary criticism and issues of nature conservation. Leonov died in Moscow on August 8, 1994.

ANALYSIS

Leonid Maksimovich Leonov's earliest prose fiction dealt with problems of reality and morals in ways that sometimes bordered on the fantastic; such themes resurfaced in his later crime fiction, though in treatments that were markedly different. One early story, for example, concerns a man in the Arctic who comes on strange, seemingly mythical beings in an arche-

typal quest; in another work, a lonely man falls in love with the black queen on his chessboard. "Petushikhinsky prolom," however, depicts the revulsion a frail, good-hearted youth feels when peasants beat a horse thief to death. In "Konets melkogo cheloveka," a demon challenges a paleontologist's preoccupation with the study of the past; once he has been tempted by the spirit, the protagonist considers destroying his manuscripts and abandoning his research. Eventually, the scientist succumbs to hunger and privation.

When Leonov explicitly raised questions of criminal activity, it was often in relation to larger questions of the social order. Acts of theft, violence, and rebellion frequently were depicted as the work of groups that, in keeping with their defiant postures, would sanction and encourage such undertakings. In some of his major novels, Leonov succeeded in conveying the outlook and peculiar mores of robber bands without yielding in his conviction that opposing ideals of socialism and cooperation should prevail.

THE BADGERS

In the novel *Barsuki* (1924; *The Badgers*, 1947), turmoil and upheaval in Moscow, where the Soviet government has established its power, are contrasted with the disorders that seem to propel the distant countryside in a different direction. Around Arkhangelsk, far to the north, Soviet authorities must contend with peasant groups who have taken the law into their own hands. Apart from a few backward glances on the part of older men, the previous regime seems to have passed into history with few regrets on any side. Among many peasants, however, recollections of the more recent past remain alive: Some had undergone confinement in a czarist prison or were caught up in revolutionary outbreaks. Grim and bloody battles of World War I, fought in a cause few held dear, appear to have severed any loyalties to the older government. Memories of murderous conflict are reinforced once more by the sight of men who have been left lame or badly disfigured. Some villagers still profess religious beliefs, which are mingled with folk practices. There seems to be no consensus about the proper political course to follow. Among those who have sided with the Bolsheviks, a district committee is formed to put requisitioning measures into effect; the most immediate,

though onerous, concerns they must confront are raising taxes and preventing the hoarding of foodstuffs.

Open conflict erupts when a soldier is shot, and then a prominent village leader, Petka Grokhotov, is found dead, slashed through the body with a scythe. It is learned that elsewhere a village chairman has been found murdered from stab wounds. What began as a series of local mysteries begins to take on much wider connotations. Indeed, tracking down culprits must yield to more basic concerns of self-preservation when full-fledged rebellion engulfs the area. Local chieftains are chosen to lead peasant communities; in addition to dispensing justice according to ingrained notions of fairness, they lead their people into battle against a neighboring village that reputedly is more sympathetic to the Bolsheviks. There ensues a protracted campaign in which barns are burned and Soviet convoys are intercepted; wild and seemingly spontaneous outbreaks of violence are punctuated with proceedings in ad hoc courts, imposing the peasants' conceptions of martial law. The villagers become known as "badgers," from their practice of digging entrenchments and placing barricades about the territory they control. Eventually, the cycle of bloody confrontations runs its course; the insurgents lack any wider aims or program, and their leader loses heart when his own brother, a commander in the Bolshevik army, convinces him that further resistance would be futile.

THE THIEF

Although crime and violence are tied to peasant revolts in *The Badgers*, Leonov's second novel, *Vor* (1927; *The Thief*, 1931), deals more directly with lawless behavior carried out for personal gain. The urban setting, near Moscow, is marked by a bustling, impersonal air that in some ways befits the complex, interlocking series of subplots that reveal the organization and procedures of the criminal underworld around the capital. At the outset, readers are introduced to two major characters whose lives and destinies for the time being have become intertwined. Mitka Vekshin, a peasant youth who was once caught up in war and revolution, and who still is inwardly affected by his killing of a White officer during the civil war, has applied his skills to some rather dubious enterprises. Although initially he brushes aside the inquiries of Fyodor

Fyodorovich Firsov, a minor writer whose work on a novel appears in counterpoint to the main action, in due course the aspiring author is introduced to a number of Mitka's associates. Along the way, the varied circumstances that have brought them together are laid forth. Among the assorted malefactors are an expert in railway robberies, a receiver of stolen goods, and a man who serves as a scout or decoy. Some of them evidently are hardened criminals, while others have simply found no certain employment; even the latter eventually shrug aside any compunctions they may feel about the expropriation of others' property. The characteristic manners and speech of outlaws are recorded in connection with visits to typical haunts, such as a thieves' bar; odd bits of robbers' lore crop up from time to time. Mitka's own specialty is safecracking; though there are some vaults he cannot open, his success overall has earned for him the esteem of others in his immediate circle. Firsov is intrigued by this adventurous existence. Yet Mitka's reflections about his early life lead briefly to some rather nostalgic passages that suggest the extent to which he has become estranged from once-familiar people and places.

The progress of Firsov's work seems to illuminate some of the peculiar moral beliefs and forms of self-regard that are held by those he has met. Many of his acquaintances comment on his depiction of criminal ways to suggest similarities as well as divergences between their outlook and the views of the conventional law-abiding world. One individual maintains doubts that it is ever right to kill a man; another reproaches Firsov for offering up too many victims in his fictional narrative. Eventually, his novel, which features a protagonist presumably based on Mitka, is finished and published, but critics are generally disapproving.

In the meantime, Mitka, who has disappeared for a short time, has undergone yet another change of heart. However disillusioned he may have become with life after the Revolution, he has never quite fit the role of a romantic villain. For some time, tragedy and betrayal seem to follow at every turn; one of his associates is shot during a police raid, and in the underworld there are rumors that an informer has been operating in their midst. Many clamor for the calling of a thieves' court-martial to uphold their own sense of honor and respect

for their fellows. Mitka's sister Tanya, a graceful, charming circus performer, is killed when a rope becomes caught too tightly about her neck during a spectacular maneuver. Increasingly preoccupied with forebodings and guilt, Mitka consults a psychiatrist, but to no avail; after a stormy meeting with his colleagues in crime, he takes his leave of them. At the end, he recommences life as a woodcutter.

Some critics objected to *The Thief* on political grounds, considering Mitka's disillusionment with the Revolution disloyal. In 1959, Leonov brought out a new edition that was intended in part to answer such reproaches.

Other problems of social justice are examined in a story from this period that, like *The Badgers*, has a rural setting. In this later story, however, the villagers seem to have accepted only too well the need to maintain order. When the only blacksmith in a village is caught stealing horses, a deaf and mute carpenter is chosen to be punished in his place; since there are several carpenters about, it is considered that, innocent or not, his life is expendable, whereas those of others are not.

SOT AND SKUTAREVSKY

This uneasy accommodation between collectivist ideals and older values marks other works from this period; events such as the enactment of the first Five Year Plans inspired Leonov's literary imagination. In *Sot* (1930; English translation, 1931), efforts to build a paper mill in a backward region of northern Russia come to represent a struggle between rural superstition and modern industrial innovation; though some questions of sabotage arise here and there, dedication to a common task eventually takes primacy. The political orientation of the old intelligentsia is handled in the rather more complex work *Skutarevsky* (1932; English translation, 1936), which deals with conflict within the family of an aging and introverted scientist who, while accepting Soviet ideals, must confront opposition from those close to him. Although hitherto he has pursued his research with a single-minded devotion that seemingly excluded other concerns, Skutarevsky becomes involved in bitter debates at home with Arseny, his wayward son. Although the father cannot find an effective answer to his son's denunciation of the re-

gime's excesses, Arseny becomes troubled by guilt over his part in a conspiracy. Unable to confess, he finally kills himself. Others at the scientific institute are implicated as well, including Skutarevsky's brother-in-law and his assistant. When one of Skutarevsky's experiments fails, he offers to resign his position, but he is accepted back once his political loyalty has been confirmed. Despite this rather platitudinous ending, skillful characterization and the presentation of conflicting viewpoints distinguish this novel from many other politically inspired works of its period. Elements of the detective story remain vaguely in evidence in some of Leonov's works of this time, but such themes are largely overshadowed by other concerns. *Doroga na okean* (1935; *Road to the Ocean*, 1944) is an ambitious effort to recapture the ethos of socialist economic development; while political differences from the past put important characters at odds with one another, this saga of railroad building ultimately gives way to three imaginative journeys into the future.

THE RUSSIAN FOREST

Leonov also became known for his work with drama, and adapted some of his fictional pieces for the stage. Although controversy arose over some of his offerings, others were widely accepted. During World War II, Leonov produced plays and stories that recaptured in graphic human terms incidents of struggle and suffering. *Zolotaya kareta* (pb. 1946) was received with official approbation for its implication that not all had shared equally in the hardships of the wartime years. The lengthy novel *Russkii les* (1953; *The Russian Forest*, 1966), with its themes of political intrigue and family loyalties, also reflects Leonov's concerns for his country's woodlands; depredations against nature are depicted alongside the difficult events that followed Germany's invasion of the Soviet Union in 1941. Questions of guilt, innocence, and crime are again evident in Leonov's bold implication that, where political charges were concerned, guilt or innocence could often be construed at the whim of those who were able to bring those charges.

LATER WORKS

Later works also include *Begstvo Mistera Mak-Kinli* (1961), a screenplay that concerns the scheme of a seemingly insignificant man to kill a wealthy widow

to obtain money. Ultimately he hopes to be placed in a "salvatorium," which supposedly could preserve his body indefinitely against the ravages of time and disease. Eventually, however, he abandons this notion and indeed finds himself content with his actual situation. This work, which is presumably set in the United States, refers obliquely to fictional conceptions of Fyodor Dostoevski. Some critics have also discerned in it a parody of certain attitudes that were common during that period of the Cold War. A rather different work is *Evgenia Ivanovna* (1963), a sensitive evocation of an émigré's troubled feelings for her native Russia.

Because Leonov's works possess both breadth and subtlety, a number of comparisons to other writers have been suggested; it has also been possible to trace the most important influences on his creative efforts. Although he noted that the examples of Aleksandr Blok and Sergei Yesenin were important for his poetry, the writer most frequently cited in discussions of his narrative works has been Dostoevski. On several occasions early in his career, Leonov declared that Dostoevski's writings had been of great importance to him. Clear affinities may be found in Leonov's interest in elucidating the subjective origins of aberrant and criminal behavior. Concerns with questions of ultimate moral truth also arise in some parts of Leonov's work. Yet Leonov manifested little interest in metaphysical or religious issues. Where Dostoevski would consider problems of human relations to God, Leonov pondered the moral concerns of socialist society.

In his early use of fantastic elements, Leonov displayed some similarities to Nikolai Gogol. Leonov's studies of literature focused on Leo Tolstoy and Anton Chekhov, explicating their contributions to traditions that he has attempted to carry forward. He also acknowledged the influence of Maxim Gorky.

Leonov's handling of dialogue is particularly skillful; expressions and nuances common to various social classes are faithfully rendered. Indeed, some terms Leonov put in the mouths of fictional thieves may have become part of the written language only after he had recorded them in his early works. His grasp of regional dialects is so considerable that the distinguished Asian specialist Ilya Petrushevsky was impressed with his

knowledge of Tatar speech. Leonov is also notable for the loving tribute he pays to his country's natural beauty through his description of landscape.

When Leonov took up matters of crime or mystery, it was always in the context of a probing of the values underlying the socialist state. While managing to adhere more or less faithfully to the ideological standards imposed by the Soviet system, he found room to raise important questions and express his personal concerns.

WILLIAM LE QUEUX

Born: London, England; July 2, 1864

Died: Switzerland; October 13, 1927

Types of plot: Espionage; historical; private investigator

CONTRIBUTION

William Le Queux was one of the earliest authors of espionage fiction; he strongly influenced the direction of the genre for nearly twenty-five years. In writing more than one hundred novels dealing primarily with political intrigue and spying, he anticipated almost every development of the spy story until the writings of Eric Ambler. Yet because he was reputed to have been a member of the British secret service for a number of years, his works are somewhat difficult to assess: Le Queux's lively and vivid imagination makes it hard to distinguish between his factual and fictional writings; he was not at all reluctant to embellish a situation and present it as historical fact. During the early part of his career, Le Queux warned of a Continental invasion of England. As a result, his early novels were extremely popular for their topicality and sensationalism.

BIOGRAPHY

William Tufnell Le Queux was born on July 2, 1864, in London, the eldest son of William Le Queux of Châteauroux, France. Traveling extensively with his parents during his childhood, he was educated in London, France, and at Pegli, near Genoa. As a young man, Le Queux studied art in Paris, but his desire to travel led him to give up a career as a painter. During a trip to Russia, he gathered material for his first book, *Guilty Bonds* (1891), which dealt with the revolutionary movement in czarist Russia and was banned in that country. Later, he worked as a correspondent and from 1891 to 1893 served as foreign editor of London's *Globe* newspaper. In 1893, he resigned from his position to devote most of his time to writing novels.

In the early part of the twentieth century, Le Queux visited North Africa and the Middle East and also made a trip to the Arctic. He was London's *Daily Mail* cor-

respondent during the Balkan Wars (1912-1913). At one time, he also served as consul to the Republic of San Marino. During and after World War I, Le Queux was popularly believed to have been involved in espionage work for the British government. Indeed, he himself insisted that his novels were written to support himself as a freelance member of the British secret service.

After retiring to Switzerland, he continued to write and lecture on spies and their techniques. He became an expert in wireless transmission and was a member of the Institute of Radio Engineers and president of the Wireless Experimental Association. Le Queux died of natural causes in Switzerland on October 13, 1927.

ANALYSIS

William Le Queux's first novel, *Guilty Bonds*, dramatized the political conflicts in prerevolutionary Russia, but more important it marked the beginning of his professional writing career. He began his career as a novelist in earnest with the publication of *The Great War in England in 1897* (1894). The first of many novels detailing the threat of military invasion to Great Britain, the novel portrays the menace posed by a Franco-Russian alliance. Five years later, Le Queux wrote *England's Peril*, in which a member of Parliament is betrayed and ruthlessly murdered by his wife, who is having an affair with the head of the French secret service.

Although Le Queux was of French parentage, he had become the quintessential Englishman—more English than his fellow citizens. He summarily dismissed the importance of Anglo-French political cooperation and friendship, sharing the popular belief that France was Great Britain's enemy on the Continent. As a result, Le Queux's warnings that England was not prepared to withstand an invasion from the Continent influenced spy fiction more than did the writings of many other authors during the same period. Although his novels were not of the same literary quality as those of Erskine Childers because they were overwrought and highly melodramatic, they were nevertheless very popular. Le Queux had a journalist's sense of the topical,

which, when combined with his talent for sensationalism, made his novels compelling reading. With a vast readership and numerous supporters, he soon became a widely admired and often-imitated novelist.

After further travels throughout Europe, North Africa, and the Middle East, Le Queux became convinced that the threat to England's security was not France but Germany. The first of his anti-German books, *The Invasion of 1910: With a Full Account of the Siege of London* (1906), singled out Germany as Great Britain's probable future enemy. The novel *The Mystery of a Motor-Car* (1906) quickly followed, and Le Queux intentionally began using his espionage novels as propaganda instruments. In this story, a country doctor finds himself involved in a German plot against England when he treats the victim of an automobile accident.

SPIES OF THE KAISER

Le Queux soon found several senior officers in the British army who shared his views on Germany's growing military might. The most important of these men was Field Marshall Lord Roberts, a supporter of conscription. In *Spies of the Kaiser* (1909), Le Queux warned that England was in imminent danger of an invasion by Germany and that thousands of German spies were living in Great Britain and gathering information on important individuals, shipyards, factories, arsenals, and the country's overall military preparedness.

THE GERMAN SPY

One of the best examples of Le Queux's books during this time is *The German Spy: A Present-day Story* (1914), written just before the outbreak of World War I. His style in this book is characteristic of all of his other writings:

Zarñatu was . . . a bacteriologist, and, leaving the twelve half-penny stamps untouched, he had prepared the three small leaves, each of six penny stamps, with a gum that contained the most deadly germs. Thus a stamp placed upon the tongue would mean certain death.

Had not all the impregnated stamps been destroyed by Wedderburn, I should, I confess to the reader, have been sorely tempted to leave one of them for Whitmarsh himself, and thus avenge his dastardly and inhuman crimes.

Le Queux's prose is typical of pieces written during the early part of the twentieth century in England. The language is stiff, excessive, and melodramatic. Many of his story lines also involve easily recognizable stock characters, including the intelligent, witty, urbane Englishman; the country gentleman; the scientist; the military attaché; the beautiful female love interest; and the foreign spy. In spite of these limitations, Le Queux could maintain an intense level of suspense. In fact, the combination of melodrama and heightened suspense contributed most to Le Queux's success as an author.

BOLO, THE SUPER-SPY

When World War I actually started, Le Queux continued writing about German spies in books such as *The Mystery of the Green Ray* (1915), *Number 70, Berlin* (1916), *The Unbound Book* (1916), and many others. Yet although his prewar plots were well constructed and not at all contrived, during the war they became more and more preposterous, as is illustrated by his novel *Bolo, the Super-Spy* (1918):

The real adventures of this most mysterious individual, this *escroc* who began life as a lobster merchant in Marseilles, and who before his execution as a traitor was a financier dealing in millions of francs, were indeed a romance more astounding than any imagined by a writer of fiction. . . . At the trial . . . much remarkable and sensational evidence was given and many startling statements were made—allegations only equaled by those proved against the mock monk Gregory Rasputin.

Although the background of his stories remained authentic and quite believable, the plots themselves seemed to undermine his authority as a writer of spy fiction. Indeed, from the literary standpoint, Le Queux became a casualty of the war—he was so obsessed with it that his writings lost all objectivity or detachment. Perhaps his association with the British secret service led to this obsession: Le Queux once remarked that, after the war had started, he carried a loaded revolver at all times because his life was constantly threatened by foreign agents.

RASPUTIN, THE RASCAL MONK AND CIPHER SIX

In his nonfictional material, he invented overly dramatic situations to provide a degree of texture and rich-

ness to his work. Unfortunately, the lively imagination that assured his reputation as a novelist handicapped him as a writer of nonfiction, especially when fictional plots were presented as factual occurrences. This tendency makes it extremely difficult to evaluate what he wrote about his own actions. For example, Le Queux stated that during the Russian Revolution the provisional government had secretly provided him with a considerable number of official papers and documents supposedly discovered in a safe in the cellar of Gregory Rasputin's residence. According to Le Queux, he wrote *Rasputin, the Rascal Monk* (1917) using this material. The existence of such papers, however, has never been independently verified. Another example of Le Queux's extravagant embellishment of situations is his book *Cipher Six* (1919). This postwar work was supposedly based on actual occurrences that took place in the East End of London during the peace negotiations in 1918. According to the story, Le Queux assisted the police in unraveling one of the most baffling mysteries to take place in the recent past. Once again, fact and fiction are not easily distinguishable; no one has ever corroborated either Le Queux's contribution to the police investigation or his portrayal of the events in question.

When Le Queux retired to Switzerland in the 1920's, he returned to writing the kind of spy stories in which he had specialized at the turn of the century. No longer was there a single devious foreign country that served as the focus for his novels. Except for the change to a Swiss setting, his style remained the same—suspenseful plots interwoven with a large dose of melodrama.

GASTON LEROUX

Born: Paris, France; May 6, 1868

Died: Nice, France; April 16, 1927

Types of plot: Amateur sleuth; thriller; horror

PRINCIPAL SERIES

Joseph Rouletabille, 1907-1923

Chéri-Bibi, 1913-1925

PRINCIPAL SERIES CHARACTERS

JOSEPH ROULETABILLE, an investigative reporter and amateur sleuth, is employed by the Paris daily *L'Époque*. Rouletabille's editor assigns him to investigate "the mystery of the yellow room," and the brilliance that the reporter displays in solving this and later mysteries brings him world renown as a detective.

CHÉRI-BIBI is regarded by the public as the king of criminals. After being wrongly sentenced to prison for murder, he escapes and solves the original murder but is imprisoned again. Another escape leads to a third imprisonment.

CONTRIBUTION

Gaston Leroux, a journalist by profession, proved himself an outstanding author of two different kinds of popular fiction: what the French term the *roman policier* and the *roman d'aventure*. Both these terms are broad and ambiguous: the first embraces more specifically the detective mystery, the police procedural, and the crime story. The second term embraces such vague categories as thriller, novel of suspense, and horror story as well as the more specific espionage story, gothic romance, Western, fantasy, and science fiction.

Leroux created two main series characters, Joseph Rouletabille and Chéri-Bibi. Rouletabille is a prodigy who displayed his mathematical genius at the age of nine. As a child, he was accused of a theft of which he was innocent and ran away from his boarding school in Eu. He lived on the street until age eighteen, when he became a reporter on the Paris paper *L'Époque*. Although a rationalist, he is not a worshiper of reason. He holds that it is incorrect to apply logical processes to external signs without first having grasped them in-

Gaston Leroux.

tuitively. In his thinking, therefore, Rouletabille is as much a philosopher as a mathematician.

Chéri-Bibi, whose real name is Jean Mascart, grew up in Puits, near Dieppe. He was a butcher's apprentice when he was mistakenly convicted for the murder of M. Bourrelier, a wealthy shipowner and the father of Cécily, the beautiful girl whom the poor butcher's boy loved. Although Chéri-Bibi's life was spared, he was sentenced to a long term in prison. His life then became a series of escapes and repeated imprisonments as he committed various crimes in his efforts to survive and to remain free. As an innocent man to whom society has meted out injustice, he blames his difficulties on fate. At the same time, he is a man who knows how to laugh.

Leroux's first novel in his famous Joseph Rouletabille series, *Le Mystère de la chambre jaune* (1907; *The Mystery of the Yellow Room*, 1908; also known as *Murder in the Bedroom*), is a detective mystery. It fo-

cuses on the solution of a mysterious crime by an unofficial detective whose method is opposed and superior to that of the police. In composing this novel, Leroux followed his predecessor Edgar Allan Poe, who in inventing the detective mystery had reacted negatively to the police-procedural narrative emerging in François-Eugène Vidocq's work. Leroux also sought to go Poe one better, by using a locked room that, unlike Poe's in "The Murders in the Rue Morgue," is hermetically sealed.

In following Poe rather than his important French predecessor Émile Gaboriau—who was the first after Poe to focus on the process of criminal detection, in his *L'Affaire Leroux* (1866; *The Widow Lerouge*, 1873)—Leroux composed a contrapolic narrative (Gaboriau's detective, M. Lecoq, is an *agent de police*, and hence his novel is a police procedural and not a detective mystery). In trying to do something different from both Poe and Gaboriau, Leroux created with *The Mystery of the Yellow Room* a detective mystery that became a landmark in the history of this genre. Indeed, it remains a valued classic of the form.

Although his second Rouletabille novel, *Le Parfum de la dame en noir* (1908; *The Perfume of the Lady in Black*, 1909), proved less successful than his first, it is more important than the rest of the series. After 1909, the series becomes focused less on detective mysteries and more on adventures that hew closely to the political realities of the time.

Leroux's legend of Chéri-Bibi begins with *Chéri-Bibi* (1913), a play. It continues with five novels, the last published in 1925. The books in this series belong to the subgenre of the crime novel, but they are concerned with mythic crime, with crime against the order of things as well as crime against the body and soul of humankind. At the same time their style is baroque, with an intertextuality showing the traces of archaeological myths, social codes, and literary techniques. They declare themselves immediately as something artificial, a matter of artistry.

Their Rabelaisian excess suggests that the Chéri-Bibi novels are not to be taken seriously; it would, however, be wrong to conclude that they are ridiculous melodrama. They are extraordinary books, whose texts are stuffed with signs of political, ethical, and

aesthetic importance precursive of the age of modernity, of the primitive, repressed drives within human-kind's unconscious that underlie class prejudice and legal judgments, of the later developments of existentialist philosophy and negative theology, and of the post-structuralist view that literary texts are not products of innocence but laden with hidden meaning. The legend of Chéri-Bibi as told by Leroux amounts to tragicomedy of modernist proportions, although its *fons et origo* is archaeological and archetypal.

BIOGRAPHY

Gaston Leroux, a lawyer, journalist, and writer of fiction, was born in Paris on May 6, 1868, two years before the formation of the Third Republic. He was the son of a building contractor. Although Paris-born, Leroux always thought of himself as a *Normande*, as his mother was from Normandy. He lived for some years at Eu, inland from Le Tréport, while his father was engaged in the restoration of a castle. Leroux attended a school in Eu for a time; later, he was graduated from secondary school in Caen, Normandy.

Leroux removed himself to Paris, where he took up residence in the Latin Quarter and began the study of law, which he later practiced on completion of his studies. A description of his physique about this time by a contemporary indicates that he was a plump man with a curly, chestnut beard. From behind his spectacles, his dark eyes sparkled with malice, his countenance suggesting repressed irreverence. He overflowed with life and energy, and he seemed to have in him something of the street Arab and the Bacchic reveler. The whole judicial system frustrated and irritated him. Eventually, he quit. Leroux remained cynical about the judicial system the rest of his life, and this attitude pervades his fiction. His *Rouletabille* redresses the errors of human justice, and Chéri-Bibi, for a time at least, is both the victim of judicial error and the instrument of supreme justice.

After his stint as a lawyer, Leroux decided to enter the world of journalism. In 1892, he worked for the *Ècho de Paris*, first as a law reporter, then as a theater critic. Soon leaving the *Ècho de Paris*, he became a reporter on the *Matin*. It was not long before Leroux became one of the greatest journalists of his time. He in-

terviewed illustrious persons, covered the Dreyfus affair, and became a foreign correspondent. He followed the peripatetics of the Otto Nordenskjöld expedition to Antarctica (1901-1903). He covered the Russian Revolution of 1905 and later interviewed the admiral who had quelled the rebellion in Moscow. In 1907, Leroux spent some time in Morocco and covered the eruption of Vesuvius in Italy. Too old to be mobilized at the outbreak of World War I, he covered the Armenian massacre by the Turks in 1915. At that point, Leroux decided that he had had enough of traveling to foreign places and terminated his career as a journalist.

Having to find another way to earn a living, Leroux hit on the writing of novels of adventure, including the *roman policier*. After several months of writing, he produced the manuscript of his first novel, *The Mystery of the Yellow Room*. This story was first published in the September 7, 1907, issue of the magazine *L'Illustration*. It proved an immediate success and was succeeded the following year by *The Perfume of the Lady in Black*, which was almost as successful as his first novel. With these two books, Leroux became a world-famous author, and he was to continue to write many more successful novels until his death in Nice on April 16, 1927. As a skilled writer of fiction he has not been forgotten. Apart from the fine study of him by Antoinette Peské and Pierre Marty in their *Les Terribles* of 1951, the journal *Bizarre* devoted its first issue to him in 1953, and the journal *Europe* paid tribute to him in its June/July, 1981, issue.

ANALYSIS

The first two volumes of the *Rouletabille* series, *The Mystery of the Yellow Room* and *The Perfume of the Lady in Black*, are Gaston Leroux's masterpieces. These novels complement each other by rounding out the character and personality of their hero, the reporter-detective Joseph Rouletabille. They also involve Rouletabille's confidant Sainclair (who also serves as the narrator), Mathilde Stangerson (the Lady in Black), Robert Darzac, and the notorious criminal Ballmeyer (alias Jean Roussel and Frédéric Larsan). Both stories involve the attempted murder of Mathilde Stangerson by the same persistent criminal whose identity is hidden from the rest of the characters until uncovered by

Rouletabille, and both concern the mystery of how the criminal entered a hermetically sealed room to make such attempts and escaped thereafter.

**THE MYSTERY OF THE YELLOW ROOM AND
THE PERFUME OF THE LADY IN BLACK**

The two novels differ in the times and places in which their stories occur in France. *The Mystery of the Yellow Room* takes place in 1892, principally at the Château du Glandier, located on the edge of the forest of Sainte-Genevieve, just above Épinay-sur-Orge. It is the residence of the famous American-French chemist Professor Stangerson and his beautiful daughter Mathilde, who assists her father in his experiments regarding his theory of the “dissociation of matter” by electrical action that contradicted the law of the “conservation of matter.” Her bedroom, abutting her father’s laboratory, is the sealed “yellow room,” in which she is viciously attacked and seriously injured by the unknown criminal. The narrative of *The Perfume of the Lady in Black* takes place in 1895—although flashbacks take the reader to earlier times in the lives of Rouletabille, Stangerson, and Larsan. The main events take place at the Fort of Hercules, located at Roches Rouges, near Menton on the Côte d’Azur, the home of Arthur and Edith Rance. In *The Perfume of the Lady in Black*, Mathilde Stangerson and Robert Darzac are married. As husband and wife, they occupy adjoining bedrooms in the Square Tower of the fort, and these apartments are hermetically sealed when an attempt on the life of Darzac takes place inside, thus constituting another locked-room mystery. In addition, there are mysteries concerning the identification of Larsan and the one “body too many.”

What is not so plain about these two novels, among a number of subordinate matters, is their underlying mythical structures, which are hidden, particularly in *The Mystery of the Yellow Room*, by the technical device of displacement or the adaptation of myth to realistic criteria. In *The Mystery of the Yellow Room*, Rouletabille says of Mathilde Stangerson: “I saw her. . . . I breathed *her*—I inhaled the perfume of the lady in black. . . . How the memory of that perfume—felt by me alone—carries me back to the days of my childhood.” Although ignorant at this time that she is his mother, he—and he alone—senses the fragrance, one

might say the aura, of the mother he knew as a child. *The Perfume of the Lady in Black* reveals that Rouletabille was separated from his mother at the age of nine. When he applied for the job of reporter in *The Mystery of the Yellow Room*, its editor in chief asked him his name. He replied “Joseph Josephine.” The editor remarked, “That’s not a name,” but added that it made no difference. Like Odysseus, Rouletabille has no name because he does not know the identity of his parents. His fellow reporters gave him the nickname Rouletabille because of his marble-shaped head.

Endowed with an Oedipus complex, Rouletabille—as it turns out—seeks to protect his mother from her male attacker and to identify him. Hence, from a mythical point of view, the plot of *The Mystery of the Yellow Room* amounts to a “search for the father,” although Rouletabille does not learn the identity of his father until *The Perfume of the Lady in Black*. Nevertheless, Rouletabille is powerfully intuitive; he is a psychic before he is a mathematician or a logician. He may seem a Telemachus and in a way he is. Not only does he search for his father but also, having learned of his father’s identity, Rouletabille cannot help admiring him for his bravery, wisdom, and cunning, which are the chief qualities of Odysseus. At the end of *The Mystery of the Yellow Room*, he allows Larsan (who is revealed as his father) to escape the law, ostensibly to protect his mother’s secret, but one suspects that his psychic feeling would not allow for both his father’s capture and the protection of his mother.

The Perfume of the Lady in Black begins by asking the question: Who is Rouletabille? In answering this question, the novel is more frank than *The Mystery of the Yellow Room*. It soon discloses that its plot is, in essence, a “search for the mother,” the father being found by accident, or, more likely from Leroux’s point of view, the finding of the father being the result of fate or destiny. Toward the conclusion of *The Perfume of the Lady in Black*, Oedipus-Rouletabille is prepared to kill Laius-Larsan if need be to protect Jocasta-Mathilde, but he does not have to because Larsan kills himself. After the reunion of the real Robert Darzac and Mathilde, Rouletabille resolves his Oedipus complex (he is now twenty-one and has become an adult) by contentedly leaving his mother in the protection of her new hus-

band. He returns to Paris in favor of his journalistic responsibilities and a proposed trip to Russia.

If the two novels taken together have an overriding theme, it is an attack of pure empiricism: Presumptions based on what is seen alone may prove false if the reality lies in what has not been seen. Rouletabille is suspicious of appearances because they may be illusory. Hypotheses based on the intuitive and creative power of the imagination must form a circle within whose circumference reason and logic must be confined. Reasoning has both good and bad ends. Observations must be instinctive, and logic must not be twisted in favor of preconceived ideas. Rouletabille says to Larsan: "It's dangerous, very dangerous, Monsieur Fred, to go from a preconceived idea to find the proofs to fit it." Facts are empty sacks that will not stand upright until filled with correct interpretations.

The Mystery of the Yellow Room and *The Perfume of the Lady in Black* differ considerably in style and treatment. The style of the former is plain, factual, largely unemotional. Descriptions are sparse, and little or no use is made of simile. Nevertheless, the style is interesting—indeed, it is absorbing—from beginning to end. On the other hand, *The Perfume of the Lady in Black* is more complicated and lavish. It contains more elaborate descriptions and more imaginative speculations. Leroux's treatment of his subject in *The Perfume of the Lady in Black* is far more emotional than that in *The Mystery of the Yellow Room*. For example, he remarks of Larsan's attack on the Square Tower:

In a siege as mysterious as this, the attack may be in everything or in nothing. . . . The assailant is as still as the grave . . . and the enemy approaches the walls walking in his stocking feet. . . . It is, perhaps, in the very stillness itself, but again, it may, perhaps, be in the spoken word. It is in a tone, in a sigh, in a breath. It is a gesture. . . . It may be in all which is hidden . . . all that is revealed—in everything which one sees and which one does not see.

In *The Perfume of the Lady in Black* Rouletabille is continually losing control of his emotions, then regaining his concentration. As a result, the narrator, Sainclair, is sometimes required to sustain the story line. This frenetic seesawing between emotionalism

and calmness veils from the reader the novel's development and its unity.

Although Leroux's work is rooted in nineteenth century melodrama and the prototypical detective fiction of Poe and his followers, it also anticipates the post-World War II vogue for serious fiction that appropriates the conventions of the detective novel only to subvert them. The difference is that, while in the works of modern writers such as Alain Robbe-Grillet and Leonardo Sciascia the subversion is intentional, in Leroux's baroque fictions it may have been unconscious.

JOHN LESCROART

Born: Houston, Texas; January 14, 1948

Types of plot: Police procedural; thriller

PRINCIPAL SERIES

Auguste Lupa, 1986-

Dismas Hardy, 1989-

Abe Glitsky, 1995-

PRINCIPAL SERIES CHARACTERS

AUGUSTE LUPA is a British secret service agent who works for Mycroft Holmes, the brother of Sir Arthur Conan Doyle's Sherlock Holmes. He is also pat-

terned after Rex Stout's detective, Nero Wolfe, whose orchid-growing hobby Lupa emulates.

DISMAS HARDY, a Vietnam War veteran, is a former police officer turned defense attorney who specializes in homicide cases, often relying on police detective Abe Glitsky, even though their jobs also lead them into conflict.

ABE GLITSKY, a half African American and half Jewish homicide detective, is a rather dour yet sensitive man. He has a rigid code of behavior, forbidding colleagues to swear in his presence, and adheres to a set of methods and ethics that sometimes puts him in

conflict with district attorneys and defense attorneys who work the system but are not necessarily as single-minded as Glitsky is about finding and convicting the real criminals.

CONTRIBUTION

John Lescroart has said that he wanted to create a detective looking for a sense of direction. In other words, the detective's involvement in crime solving is inseparable from his maturation as a man. Dismas Hardy was the result: a man who has had several careers and is troubled about how to maintain a well-rounded family life. Hardy needs help and finds it in the form of Abe Glitsky, a homicide detective whose major failing is that he is all too sure about himself and his cases. In other words the two men need each other—Hardy supplying the doubt, Glitsky the confidence. Unlike in earlier two-man detective teams (Sherlock Holmes and Dr. Watson, Nero Wolfe and Archie Goodwin), there is no master/mentor relationship. Hardy solves crimes by asking endless questions while keeping his theories of what happened open to constant revision, whereas Glitsky tends to press his perception of what happened and who did it until all the facts fit or he has to start again with a different set of premises.

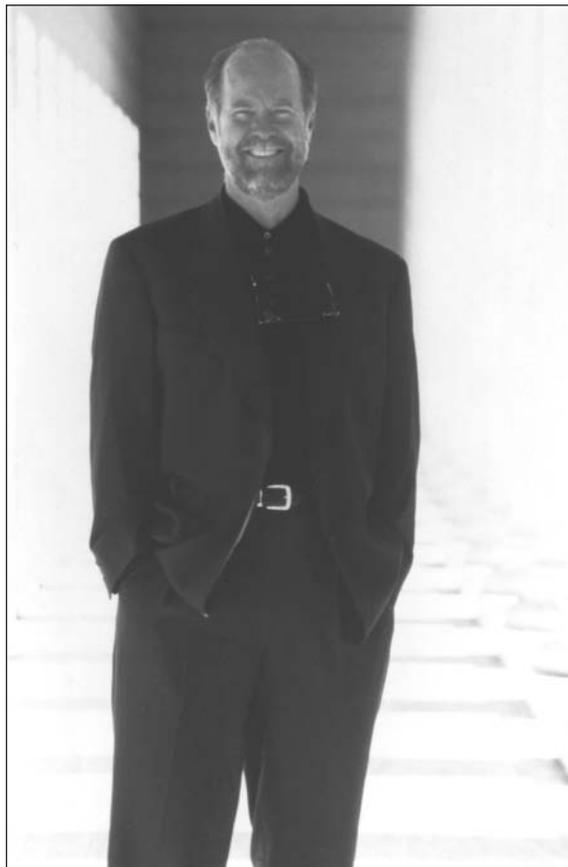

Thus this unusual duo upsets the conventional format of the crime story, allowing Lescroart to combine the police procedural (Glitsky) with the legal thriller (Hardy). The friendship of Hardy and Glitsky—in spite of the conflicting roles of defense attorney and homicide detective—injects a level of intensity and complexity that is unusual in crime fiction.

BIOGRAPHY

John Lescroart was born in Houston on January 14, 1948. He has said that writing has always been in his blood. His father, a businessman, was a frustrated writer who regretted never writing the novel he said he had in him. Lescroart published plays, poems, and essays in high school and college. Majoring in English at the University of California at Berkeley, he completed a first novel heavily influenced by Ernest Hemingway and F. Scott Fitzgerald. A year later he wrote a second novel, but he did not attempt to get his work published, regarding writing as a means of self-expression but not

as a career. Then came an interest in music that led him to composing songs and performing in the 1970's in Europe. He returned to Los Angeles intent on becoming a rock star.

By the late 1970's Lescroart began to realize that his dreams of rock stardom were unlikely to be realized, and he stopped performing. He wrote one novel about his experiences in Europe but did not seek a publisher. Then he wrote a few novels experimenting with the mystery and detective genre (pastiche of the Sherlock Holmes mysteries). When his early novel, *Sunburn* (1982), won a writing prize and was later published, he began to think about a full-time writing career. However, Lescroart had not yet found his voice. This was a troubling period for him. In 1979, he divorced his first wife, Leslee Ann Miller, after a three-year marriage. He married Lisa Marie Sawyer in 1984. They had one son and one daughter. Lescroart

John Lescroart. (© John Earle/Courtesy, Delacorte Press)

continued to write and supported himself as a editor and writing consultant. His wife encouraged him to submit his Lupa series for publication, and within six weeks he had a contract.

Lescroart has attributed his increasing productivity and success to a life-changing event in 1989. He went bodysurfing in Seal Beach, California, was exposed to contaminated seawater, and contracted spinal meningitis. The doctors gave him only two hours to live, but he emerged from an eleven-day coma and a near-death experience that, he suggests, led to a creative rebirth. He then built on the experience of working as an administrator in a law firm for seven years by developing the Hardy and Glitsky series. In 1991 Lescroart became a full-time writer.

In addition to his years working in a law firm, Lescroart has attributed the authenticity of his legal thrillers to a lifelong friendship with Al Gianini, a violent-crime prosecutor in the San Francisco Bay area. The two men have known each other since Lescroart was fourteen, which perhaps accounts for Lescroart's deft handling of the friendship between Hardy and Glitsky.

ANALYSIS

John Lescroart's Dismas Hardy is an unusual defense attorney. He often asks his clients if they are guilty (the best defense lawyers, as Hardy knows, disapprove of this kind of interrogation), and he confesses to considerable sympathy with the prosecution. This behavior may be due to Hardy's having been a police officer before entering law school and his having a homicide detective, Abe Glitsky, as his best friend. The need to see justice done is what motivates Hardy and Glitsky. Therefore, even when Hardy believes he has a guilty client—or when the client has confessed—problems with police procedure or with the prosecution's methods arouse Hardy's anger. Consequently, he has acquired a reputation for taking on cases that put him at odds with the legal system and with his friend Glitsky.

The desire of these two men to maintain their friendship and to solve crimes together results in complex psychological stories that get at the heart of the personalities who pursue crime and at the way justice is administered. Lescroart's own experience in a law firm has obviously contributed significantly to his dra-

matization of how the legal system functions—often to the detriment of suspects, unless indefatigable attorneys like Hardy represent them.

DEAD IRISH

Dead Irish (1989), the first novel in the Dismas Hardy series, begins with the main character at a low point. His careers as police officer and attorney are gone. He has also failed as a family man (his infant son dies in a tragic accident). He now works as a bartender for his old Vietnam War buddy, Moses, at the Little Shamrock Bar near Golden Gate Park in San Francisco. However, Hardy's spirits start to revive as he begins to investigate the death of his friend Eddie Cochran, a young man with a promising future who dies in circumstances that suggest suicide. Hardy cannot believe his friend killed himself. To investigate, he has to deal with a police department that clearly wants no vigilante detective barging in on its case. That Hardy persists not only restores a measure of his own dignity but also recovers the truth of Eddie's death for his family, allowing them to heal as well.

THE MERCY RULE

In *The Mercy Rule* (1998), Graham Russo is accused of killing his father Sal, a down-and-out loner suffering from Alzheimer's disease. It is known that Sal was thinking of suicide and that he had a stash of morphine that he vowed to use when life became unbearable. Did Graham merely assist his father's desire to end his suffering? Graham is charged with murder when fifty thousand dollars in cash and a valuable baseball card collection (both belonging to Sal) are found in Graham's safe deposit box. Even Graham's family suspects him of criminal intent. Although trained as a lawyer, Graham has given up the profession, first pursuing his dream of playing in major league baseball and then, when he failed to make the cut, indulging in a helter-skelter life that makes it seem probable that his father's cash and card collection were too much of a temptation for him.

Even Dismas Hardy thinks Graham may be guilty, although Graham steadfastly refuses any deal with the prosecutor. To understand the nature of the crime and who is really guilty, Hardy must take several tangents. He must look at what happened to Sal, who was once an upstanding member of his community, and what

happened to Graham, whose abrupt rejection of the law has made him persona non grata among the San Francisco legal community. Essentially Hardy is called on to research the lives of father and son and their friends, finding out, in the process, that Sal's dropping out of society is connected to an overwhelming sense of guilt over a restaurant fire that somehow shattered his faith in himself and in society. Hardy's work is complicated by his fraught relationship with Abe Glitsky, who has little patience for the attorney's roundabout way of gathering evidence and interpreting his client's gestalt. Psychological analysis dominates legal procedure in this absorbing mystery.

THE HEARING

In *The Hearing* (2000), Cole Burgess, a drug addict, is caught standing over the dead body of Elaine Wager, with the proverbial smoking gun in his hand. Normal procedure is to send drug-addict suspects to the hospital and to detox before they are interrogated. However, Elaine is Abe Glitsky's daughter, the result of a liaison with Loretta Wager, who later became a United States senator and then killed herself. Loretta did not tell Glitsky that Elaine was his child because he refused to marry her, and Elaine died before Glitsky was able to figure out whether he should contact his daughter. Grieving and angry about Elaine, Glitsky makes a major mistake, turning Burgess over to detectives, who grill him for hours until the exhausted suspect, who is in withdrawal, confesses to the crime.

Members of Burgess's family—one of whom is a reporter and Hardy's close friend—call on Dismas Hardy to defend Burgess. Dismas would prefer not to get involved not only because he believes Burgess is guilty but also because he has promised his wife, Frannie, not to take on any more high-profile murder cases because they disrupt their marriage and family life. However, Hardy cannot help himself when he learns that District Attorney Sharon Pratt is going to make the prosecution of Burgess a political issue in her campaign for reelection. She is way behind in the polls and decides she needs to look tough on crime, especially because her administration has never called for the death penalty during her term in office. Hardy's ire, then, stems from this perversion of the criminal justice system. Burgess has no criminal record, and Pratt's

grandstanding aggravates Hardy so much that he runs afoul of the judge at Burgess's hearing. In open court, Hardy accuses the district attorney of turning the trial into a political circus. In his chambers, Judge Hill admonishes Hardy that if he makes one more outburst he will be charged with contempt of court.

Unlike some of the other Hardy and Glitsky mysteries, *The Hearing* adheres closely to the format of a legal thriller in which legal procedure is paramount. The narrative explains in fascinating detail what "probable cause" means, how the defense has to prove, in effect, that the prosecution does not have enough evidence to bring a case to trial before a jury.

In this case, Hardy finds Glitsky more of an ally than adversary because Glitsky comes to his senses and realizes that Burgess's confession is not "righteous"—a term the police use to mean a confession is ethically and legally obtained. Hardy's fellow attorney, David Freeman, a master of legal procedure and courtroom histrionics, is another memorable character.

It is also in this novel that Glitsky meets Treya Ghent, Elaine's paralegal, who not only contributes significantly to Burgess's exoneration but also captures Glitsky's heart. Finally coming out of mourning for Flo (his first wife who died of cancer), Glitsky now seems ready to start a new family and a new life with the compassionate but confident Treya.

THE OATH

In *The Oath* (2002), when Tim Markham, the head of a health maintenance organization (HMO), is struck by a hit-and-run driver and dies in his own hospital, his death seems to be an accident. Then, however, Markham's wife and family are murdered. Suspicion turns toward Dr. Eric Kensing, a doctor on Markham's staff whose conflicts with Markham are well known—not to mention that Markham had also been having an affair with Kensing's wife.

As usual Hardy and Glitsky begin to unravel a complex set of motivations and cross-purposes that make Kensing only one of several suspects. Much closer to a police procedural than a legal thriller (there are no courtroom scenes), this novel provides an in-depth look at how the efforts of HMOs to cut costs can jeopardize sound medical practice.

BIBLIOGRAPHY

Anderson, Patrick. *The Triumph of the Thriller: How Cops, Crooks, and Cannibals Captured Popular Fiction*. New York: Random House, 2007. Includes a short but informative section on Lescroart, comparing him to other writers of legal thrillers such as Scott Turow and John Grisham. Anderson concludes that Lescroart's novels are just as entertaining as Grisham's but more realistic, and that his strengths are characterization and his ability to "set legal battles in a believable world." Several novels

are discussed, especially *The Motive*. Anderson also supplies some important biographical details.

Lescroart, John. John Lescroart: Website of the Author. <http://www.johnlescroart.com>. The author's official Web site includes a biography emphasizing how Lescroart became a novelist, news about forthcoming novels, interviews, summaries of his books, compilations of his music, and a list of forthcoming appearances at bookstores and other book signings.

Pickard, Nancy, and Lynn Lott. *Seven Steps on the Writer's Path: The Journey from Frustration to Fulfillment*. New York: Ballantine Books, 2003. Lescroart is interviewed about how he is able to continue writing novels. He describes his working methods, including writing several opening scenes, discarding them and beginning again, and searching for a way to write a better book than the last one.

White, Terry, ed. *Justice Denoted: The Legal Thriller in American, British, and Continental Courtroom Literature*. Westport, Conn.: Praeger, 2003. Detailed discussion of Lescroart's novels. He is quoted as saying his work is closer to police procedurals than legal thrillers, and he names the writers who have influenced him (Hemingway and Lawrence Sanders, for example) and writers he admires, such as Elmore Leonard and John D. MacDonald.

IRA LEVIN

Born: New York, New York; August 27, 1929

Died: New York, New York; November 12, 2007

Types of plot: Horror; inverted; psychological; thriller; metaphysical and metafictional parody

CONTRIBUTION

Ira Levin began his career as a writer in his early twenties by winning a screenplay-writing contest sponsored by the Columbia Broadcasting System (CBS) in 1949. His entry, "The Old Woman," about a wealthy elderly woman who thwarts a plot by her nephew to murder

her for her money, won the second-place prize of two hundred dollars. Levin soon sold this script to CBS's rival, the National Broadcasting Corporation (NBC), for four hundred dollars, and it was filmed as an episode of NBC's popular mystery anthology series, *Lights Out*. This early success allowed Levin to avoid having to work in his father's toy business and launched him on a versatile career as a popular writer of both Broadway plays and best-selling novels, a number of which were later made into critically acclaimed films.

Beginning with the publication in 1953 of his first

Ira Levin. (AP/Wide World Photos)

novel, *A Kiss Before Dying*, Levin became one of the most influential writers within the thriller genre, and his works left a mark on popular culture for the next four decades. In the warped, cold-blooded murderer at the center of the plot of *A Kiss Before Dying*, Levin provided a prototype for the repulsive but endlessly fascinating psychopathic and sociopathic killers who populated American crime fiction and film for much of the twentieth century, from Norman Bates in Robert Bloch's *Psycho* (1959) to the sadistic Leatherface in the cult horror-film *The Texas Chainsaw Massacre* (1974) and the many "slasher" films of the 1970's and 1980's, to, most notably, Hannibal Lecter in Thomas Harris's series of novels featuring a compellingly clever, cannibalistic madman. With the immense popularity of his 1967 novel of devil-worship and black magic in modern New York, *Rosemary's Baby*, Levin inaugurated another subgenre that would prove popular for years to come—horror tales involving demonic impregnation or

diabolic children. Subsequent works that reflect this aspect of Levin's influence include the novel and film formats of *The Exorcist* (1971 and 1973, respectively), the popular series of *Omen* films (beginning in 1976) dealing with the birth of an antichrist, and David Cronenberg's much-admired 1979 film, *The Brood*.

Admired by other writers of supernatural-themed thrillers such as Stephen King, Levin demonstrated in his novels and plays a talent for more than tightly constructed plots containing ample surprises. He also displayed a deft ability to incorporate into accessible, entertaining stories topical themes of the day without becoming preachy or heavy-handed. For example, *A Kiss Before Dying* depicts the growing paranoia and mistrust of the Cold War years, while *Rosemary's Baby* reflects unease about radical changes in religious thought in the 1960's in the United States as well as the nation's growing concern about reproductive issues. Likewise, *The Stepford Wives* (1972) addresses doubts about changing gender roles in the 1970's, and *Sliver* (1991) deals with worries in the 1990's about lack of privacy as the result of the increasing sophistication of monitoring devices.

BIOGRAPHY

Ira Levin was born in New York City on August 27, 1929, to a toy merchant and importer, Charles Levin, and his wife, Beatrice Schlansky Levin. As a boy, he became fascinated with magic and began frequenting shops that sold supplies for professional magicians. In his early teens, he developed a passionate interest in theater and in mystery stories. Soon, he had decided to be a playwright or novelist—or both. However, his father was insistent that his son enter the family's toy business. After graduating from the Horace Mann School in New York, Levin decided to attend Drake University in Iowa, but after two years moved back to New York and enrolled in New York University, from which he received a bachelor of arts with a major in English and philosophy. Levin was in his senior year when he won the second-place prize in CBS's screenplay contest.

After Levin graduated, the conflict with his father about a choice of career resumed. Eventually the two agreed on a plan: For two years, his father would sup-

port Levin financially while he tried to establish himself as a writer. If Levin was unsuccessful after two years, he would join his father's business. Levin quickly succeeded, however, selling screenplays to the television anthology series *Lights Out* and *The United States Steel Hour* and stories to such magazines as *The Ladies Home Journal* and *Manhunt*. In 1953, when he was only twenty-two years old, Levin published his first novel, *A Kiss Before Dying*, in which he employed techniques using multiple narrators and points of view similar to those used by James Joyce and William Faulkner. A best seller, it won the Mystery Writers of America's Edgar Award for best first novel in 1954.

Later in 1953, Levin was drafted into the United States Army. Soon after his discharge, he wrote first a teleplay and then a stage play based on Mac Hyman's comic novel about military life, *No Time for Sergeants*. The play became a huge success on Broadway, running for nearly a thousand performances. However, his next five plays were failures, with one running for only a few months and the other four running for only a handful of performances each. Finally, after fourteen years, Levin decided to try his hand at writing a novel again, and the result, *Rosemary's Baby*, a tale of a midwestern woman who comes to New York and is impregnated by the devil, was one of the best-selling novels of the 1960's. It was soon adapted for the screen by writer-director Roman Polansky as a film starring Mia Farrow and John Cassavetes. Other best-selling novels followed: *This Perfect Day* (1970), *The Stepford Wives*, *The Boys from Brazil* (1976), and *Sliver*. In 1978, Levin returned to the theater with his most important contribution to the mystery genre, the slyly satirical *Deathtrap*, which became the longest-running mystery in the history of Broadway, with almost eighteen hundred performances. In 1980 the Mystery Writers of America gave Levin an Edgar Award for *Deathtrap*, and in 2003 that organization presented him with a Grand Master Award.

Levin was married twice—to Gabrielle Aronsohn from 1960 to 1968 and to Phyllis Finkel from 1979 to 1981. He had three sons by Aronsohn: Adam, Jared, and Nicholas. He died November 12, in New York.

ANALYSIS

Ira Levin's career offers worthwhile insights into

how an author can successfully utilize tropes and conventions of the mystery genre without producing a single major work that can be labeled a straightforward mystery. Beginning his career in the early post-World War II era, Levin was a pioneer in a trend that continued well into the twenty-first century—one of blending genres and experimenting with conventions not only in highbrow literature but also in popular fiction. With few exceptions, Levin's most successful works, both with critics and readers, have been skillfully constructed hybrids of at least two genres, with one always being the mystery story, his favorite form of reading as a boy. This combining of genres is evident in his most popular works, *Rosemary's Baby* and *The Stepford Wives*.

Levin repeatedly explored the fate of the outsider in a corrupt, inimical environment. The outsiders in *Rosemary's Baby* and *The Stepford Wives* are the young wives who are new to the community. In *A Kiss Before Dying*, both the killer and Marion, the young woman who ultimately escapes him, are quirky and do not fit comfortably into society, and the hero of Levin's dystopian science-fiction novel, *This Perfect Day*, is called Chip in a futuristic society where everybody else has one of eight approved names followed by a number, and he has eyes of two contrasting colors in a world where defects and differences have been eliminated.

ROSEMARY'S BABY

Rosemary's Baby, Levin's phenomenal best seller of the 1960's, is essentially a story of supernatural horror and the occult: a coven of devil worshipers conjure up the Prince of Darkness to impregnate a young housewife, Rosemary Woodhouse, who has just moved into the gloomy apartment house in New York where the cult operates. However, the plot format that Levin employs is taken directly from classic mystery and detective fiction: The protagonist becomes convinced that something sinister is afoot after the death of a young neighbor. As her suspicions grow, she pursues a pathway of investigation typical to mystery tales, involving eavesdropping, unraveling secret identities, solving anagrams, conducting historical research, and perceiving and analyzing subtle clues such as recurring scents and sounds and slight changes in characters' behavior.

Absolutely nothing overtly supernatural is depicted until the very last chapter, which is almost a parody of the final scene of a mystery novel: Rosemary moves through a secret passageway in a closet into a parlor full of all the surviving characters where points of the plot are rehashed and the truth is revealed.

THE STEPFORD WIVES

The Stepford Wives employs a similar formula, but this time Levin combines science fiction with mystery conventions. In *The Stepford Wives*, a heroine very similar to Rosemary moves with her husband to the placid suburb of Stepford, where a misogynist scientist is replacing the women of the town with slavish android replicas. Here, though, Levin seems to play with the conventions of the cozy mystery format such as that used in Agatha Christie's Jane Marple series. The protagonist finds herself living in a conservative, quiet, seemingly ideal small town in New England but soon picks up numerous clues that something odd is going on, especially in the manor house of the wealthiest and most respected member of the community. Nothing obviously suggestive of science fiction and robotics occurs until the final revelation scene.

A KISS BEFORE DYING

Levin's first novel, *A Kiss Before Dying*, in many ways is seen as his most innovative and surprising work. A taut psychological thriller, it also fits neatly into the mystery subgenre of the inverted narrative that focuses primarily on the killer. The antihero, Bud, is a psychopathic college student who kills quickly and easily to solve whatever problems he encounters. He gets his girlfriend Dorothy pregnant and pushes her off a roof at the Marriage Bureau because he feels that early marriage will interfere with his career. When his girlfriend's sister Ellen investigates her death and gets too close to the truth, he kills Ellen as well. Then Bud sets his sights on marrying and killing the third sister, Marion, to inherit her share of her wealthy father's estate. However, this time he is thwarted, and confronted with his crimes, he commits suicide by jumping into a copper smelter with the same offhandedness with which he dispatched his victims.

Despite more sadistic and graphically rendered psychopathic killers in later mystery and crime fiction and film, Bud remains a chilling, creepy literary cre-

ation and can easily be taken as the prototype of Norman Bates in Bloch's *Psycho* and Patrick Bateman in Brett Easton Ellis's *American Psycho* (1991). This first novel also demonstrates Levin's love of intricate and surprising plots. In a more conventional crime novel or detective story, after Dorothy's murder, a heroic protagonist would arrive to play a cat-and-mouse game of confrontation and interrogation with Bud, but when such a figure does arrive in the form of Ellen, the second sister, she too is murdered. The more traditional amateur-sleuth figures, Gordon Gant and the third sister, Marion, do not even figure prominently in the plot until the last third of the novel.

DEATHTRAP

The longest-running mystery ever to appear on Broadway, *Deathtrap* is a metafictional parody of the mystery genre that nevertheless supplies its audience with the sorts of surprises and plot twists that mystery fans crave. At least a dozen tropes and conventions of the genre are exploited in the play: secret romance as motive for murder, professional jealousy as motive, fears regarding one's reputation as motive, murder by heart attack brought on by fear, a culprit's tricking other people into incriminating themselves by handling weapons and leaving fingerprints, apparent death that turns out to have been faked, conspirators betraying each other, weapons that fail, dark and stormy nights, power failures and blackouts, premonitions of murder, and surprise endings. Nevertheless, with extremely rapid pacing and sardonic dialogue often commenting on the writing of mysteries, Levin manages to surprise the audience with each new twist, even though any mystery fan watching or reading the play will have encountered these conventions hundreds of times previously. As with much parody and metafiction, *Deathtrap* is difficult to summarize, because—as is typical of Levin's work—the pleasure of his plot lies not in its construction but in the order and way in which it is revealed.

Deathtrap tells the story of a has-been playwright who seemingly murders a younger man to appropriate a promising mystery play he has written. When the man seemingly rises from the dead, the older playwright's wife, who has a weak heart, dies of fright. At this point, the audience realizes that the two men are

lovers and have conspired to scare the wife to death. However, the older man comes to distrust his younger lover when he discovers that he has written a play based on the murder that they committed. The play ends with both men dead at each other's hands and a casual visitor in possession of the play.

In addition to spoofing the conventions of the mystery genre, *Deathtrap* takes satirical jabs at Broadway and the writing profession. Until *Deathtrap* premiered, Levin had not had a hit play since *No Time for Sergeants* in the early 1950's. In the play's dialogue, jokes abound about the fickleness of the theater-going public, writer's block, and professional envy among writers. The ironies of Levin's profession are neatly detailed in the play's ending: two men have committed murder and betrayed each other in their quest for a hit play, yet the manuscript that eventually does become a Broadway success ends up in the possession of Helga, who merely happened to be visiting in the neighborhood when the crimes were committed.

ELIZABETH LININGTON**Barbara Elizabeth Linington****Born:** Aurora, Illinois; March 11, 1921**Died:** Arroyo Grande, California; April 5, 1988**Also wrote as** Anne Blaisdell; Lesley Egan; Egan O'Neill; Dell Shannon**Type of plot:** Police procedural**PRINCIPAL SERIES**

Lieutenant Luis Mendoza, 1960-1987

Detective Vic Varallo, 1961-1985

Jesse Falkenstein, 1961-1983

Sergeant Ivor Maddox, 1964-1986

PRINCIPAL SERIES CHARACTERS

LUIS MENDOZA is the head of homicide in the Los Angeles Police Department. In his late thirties and a dapper, cynical bachelor when the series begins, he later marries and has children. A fortune inherited from a miserly grandfather enables him to enjoy a luxurious lifestyle.

ALISON WEIR MENDOZA is the girlfriend and later the wife of Mendoza. In her early thirties and the operator of a charm school when the series begins, she later pursues a minor career as an artist. She offers Mendoza stability and acts as a sounding board for his ideas.

ARTHUR "ART" HACKETT, a homicide detective in the Los Angeles Police Department, is Mendoza's senior sergeant, the practical one who balances Mendoza's hunches, and his closest friend. Hackett is a large man and looks like a police officer. Initially unmarried, he later marries and has children over the course of the series.

GEORGE HIGGINS, a homicide detective in the Los Angeles Police Department, is the other senior sergeant in the squad. He does much of the practical investigation and is even larger than Hackett. Originally unmarried, he woos and weds the widow of a fellow police officer.

LUDOVIC "VIC" VARALLO, a detective in the Glendale, California, Police Department. In the first book, he is a police captain in the fictional town of Contera.

When he is thirty-three years old, he quits to become an average rookie in Glendale. He marries as he leaves his original job and later has a family. Because of his past experience, he is extremely knowledgeable.

CHARLES O'CONNOR is a lieutenant of detectives in the Glendale Police Department. In the early books, he is single and rather crusty; marriage to a schoolteacher whom he meets in the course of the series mellows him slightly.

JESSE FALKENSTEIN is a Jewish lawyer in Los Angeles. In his early thirties when the series begins, he loves music, especially Bach, and frequently quotes the Talmud.

NELL VARNEY FALKENSTEIN is first Falkenstein's client and later his wife. Wrongly convicted of murder, she is saved from execution by new evidence uncovered by Falkenstein and Vic Varallo.

IVOR G. MADDOX is a detective sergeant in Wilcox Avenue Precinct, Hollywood. In his early thirties when the series begins, he ages slowly. Although ordinary in appearance, he is very attractive to women, which puzzles him. He eventually marries police officer Sue Carstairs.

CÉSAR RODRIGUEZ, one of Maddox's colleagues, is dapper, bored, and cynical. He develops an interest in mystery fiction, which he finds more fascinating than the real crime he encounters daily.

DROGO D'ARCY, another of Maddox's colleagues, is tall, lanky, excitable, and constantly falling in love. His despised and unusual first name is a closely guarded secret for most of the series.

CONTRIBUTION

Elizabeth Linington's novels show uniformity in both style and substance. Although police procedurals usually focus on the issue of good versus evil, Linington emphasized this archetypal conflict to such a degree that it becomes the essence of her work. She called the detective story "the morality play of our time." The police officer is so much a representative of good in her books that the police officers take on a uniformity of at-

titude and behavior; they are distinguished from one another only by individual mannerisms and physical characteristics. The other distinguishing characteristic of her work is the large number of cases included in each book. In her early police procedurals, the detectives focus on several cases at once. Later, they focus on large numbers of cases at once.

BIOGRAPHY

Elizabeth Linington was born Barbara Elizabeth Linington on March 11, 1921, in Aurora, Illinois, the daughter of Byron G. Linington and Ruth Biggam Linington. When she was a child, her family moved to California, settling in Hollywood. She was graduated from Herbert Hoover High School and received a bachelor of arts degree from Glendale College in 1942. Although she began writing in high school, it was not until 1955 that her first novel, *The Proud Man*, a historical novel about a sixteenth century Irish prince, was published. She wrote several more historical novels.

In 1960, Linington wrote her first mystery, *Case Pending*, under the pseudonym Dell Shannon; this novel launched the Lieutenant Luis Mendoza series. In 1961, she wrote *Nightmare*, a suspense thriller, under the pseudonym Anne Blaisdell. In 1961, writing as Lesley Egan, she published the first novel in the Detective Vic Varallo series, *A Case for Appeal*. This novel also introduces Jewish lawyer Jesse Falkenstein, who is the protagonist of the fourth Linington series (the only one not a police procedural). The Sergeant Ivor Maddox series began in 1964 with *Greenmask!*

Linington received several prizes for her writing, including a gold medal for the best fiction by a California writer from the California Commonwealth Club in 1956 for *The Long Watch*. Her wide range of interests is apparent in her novels. These include the John Birch Society, of which she was a longtime member, parapsychology, archaeology, music, the occult, and languages. Once Linington realized that she was involved in writing many books about police officers, she researched the techniques of the Los Angeles Police Department carefully. It is apparent that the later books are more closely based on actual police procedures than are the early ones.

Linington also wrote historical novels, including

her last work published before her death in 1988, *The Dispossessed*. Oddly, perhaps, she published this and a number of her historical novels under her Dell Shannon pseudonym. Two police procedurals were published posthumously, again under the Dell Shannon name, by Linington's literary executors. The *Manson Curse* (1990) and *Sorrow to the Grave* (1992) were inferior works, but manuscripts unpublished in their author's lifetime are always objects of intrigue for the dedicated fan. Linington died in Arroyo Grande, California, on April 5, 1988.

ANALYSIS

Elizabeth Linington was a successful author when she turned to mystery fiction in the 1960's. Within a few years, critics were calling her the "Queen of the Procedurals." Linington never intended to write a series, let alone four. While writing a suspense novel, *Case Pending*, under the Dell Shannon pseudonym, she needed a police officer to develop the plot, and thus Lieutenant Luis Rodolfo Vicente Mendoza was born. According to Linington, "he rose up off the page, captured me alive, and dismayingly refused to let me stop writing about him." Mendoza was Linington's most important series character.

Linington's early police novels, written under her own name and as Dell Shannon and Lesley Egan, had not yet developed into the procedural formula. Instead, in the early books in the Mendoza series and to a degree in the Ivor Maddox series and the Vic Varallo series, the protagonists are great detectives who happen to be police officers. In the great detective tradition, an individual acting more or less alone solves the mystery through his analysis of people and visible clues. These detectives include such figures as Sherlock Holmes, Hercule Poirot, and Lord Peter Wimsey. It is not necessary to be a police officer to be a great detective; in these novels, the police are often shown to be unintelligent, stubbornly wrong, and an impediment to the solution of the case.

The early books in the Mendoza series are in this tradition; nevertheless, Mendoza, like Ngaio Marsh's Roderick Alleyn, happens to be a police officer. Many of the recurring characters who support Mendoza appear in *Case Pending*, but the emphasis is less on po-

lice procedure than on Mendoza's uncanny hunches and his reading of people. The pattern continues in *The Ace of Spades* (1961) and *Extra Kill* (1962). In *Extra Kill*, Mendoza remarks:

With all the laboratories and the chemical tests and the gadgets we've got to help us, . . . like everything else in life it always comes back to individual people. To people's feelings and what feelings make them do or not do. Quite often the gadgets can give you an idea where to look, but once in a while you've got to find out about the people first—then the gadgets can help you prove it.

The early books also lack Linington's later, characteristic multitude of cases—a major difference between a great detective and a real police officer. The great detective may confront a number of seemingly unrelated cases, but ultimately there will be a connection and usually a common perpetrator. Police officers, however, cope with a number of cases simultaneously, and the true police procedural will, as it develops, have fictional police officers take on more cases. In the early works, there is basically one case—usually two or more seemingly unrelated cases turn out to be related. In *Extra Kill*, for example, Mendoza discovers that a confidence man and a police officer have been murdered by the same person.

Finally, in her early works, Linington gives more space to character development than in later books. The early novels are traditional, with full character development of police officers, witnesses, suspects, and criminals. With the later increased caseloads, the length of the books remains the same, but the details about both people and cases decline.

In no other mystery subgenre are the supporting characters as important as in the police procedural, which by definition requires that mysteries be investigated and resolved much as are actual cases—with teamwork. Linington establishes her ensemble of supporting players in the early books. Each is given certain easily described physical characteristics and idiosyncrasies—these become an abbreviated description in subsequent works. In the Mendoza series, for example, these include Mendoza's fastidiousness, detective Art Hackett's dieting, detective George Higgins' cautious wooing of a fellow officer's widow, and detective

Tom Landers's perpetual youthfulness.

The greatest character development is in the Mendoza series. Mendoza is unique in two respects: He is Mexican American, and he is independently wealthy. When he first appeared in print, Mendoza was the only ethnic minority hero in a series of this kind in the United States. Nevertheless, Mendoza's ethnic background appears only in his use of Spanish words and phrases in conversation. There is no other indication of values, beliefs, or ideas significantly different from those of his Anglo-American associates. The author uses brief interjections and comments in foreign languages to indicate ethnic background: Mairí MacTaggart, Mendoza's housekeeper-nanny, speaks Gaelic; Vic Varallo, Italian; and César Rodríguez, Spanish.

Mendoza's wealth makes him even more unusual. Because of his early poverty and his police career, which predates his inheritance, he is saved from being merely a wealthy dilettante. Although he sometimes wonders why he stays with the "thankless job" and occasionally talks about retiring, he continues because he believes that the police are the good guys in the struggle between good and evil.

Under the superficial differences, there is a uniformity of attitude and behavior within each series and from series to series. The good characters in the books—whether police officers, witnesses, or bystanders—share the same conservative political, economic, and social views.

Linington's books stress family values. Over the course of the various series, many of the recurring characters marry; most become parents. The marriages are uniformly traditional and happy, without arguments or divorce (belying the divorce statistics for real police officers). Families make the police officers vulnerable; in the early books, they have nothing to lose but their lives. Later, they have wives and children, "hostages to fortune." Family life serves several purposes: It humanizes the police officers, allows them to express themselves freely, provides light relief, and serves as a counterpoint to the evil and violence of the outside world. Linington described the work life of police officers:

Police officers see very little of the good; . . . they are in too many cases dealing with the mud at the bottom of

things, the sordid, the stupid, the random violence. . . . There are no fuzzy edges around that job, no gray areas, no vagueness. . . . This is . . . why so many people enjoy reading about it. . . . They turn . . . to a fictional world where there is solid ground underfoot. A world where right and wrong, good and evil, are starkly defined: though it is so much oftener goodness and stupidity.

Often, the characters in Linington's novels view violence and lawlessness with detachment. At other times, the nature of the crime or the detectives' personal involvement makes detachment impossible. Some of the most effective books are those in which the action is close to home. In *Knave of Hearts* (1962), Alison Weir, Mendoza's estranged girlfriend, is kidnapped by a psychotic rapist-murderer and is rescued by Mendoza and Hackett. In *Mark of Murder* (1964), Hackett himself is attacked and near death. In *The Death-Bringers* (1965), Sergeant Albert Dwyer is killed by a bank robber. In *Deuces Wild* (1975), the Mendoza twins are kidnapped and Mendoza, a self-proclaimed agnostic, returns to the religion of his youth. In other cases, the crime is so heinous as to demand their emotional involvement—especially if it involves child victims or sexual abuse.

CHAOS OF CRIME

The title of the novel *Chaos of Crime* (1985) describes Linington's literary premise better than any other. The novel follows the usual formula: One major case encompasses the entire book; two or three smaller, featured cases occupy much of the book; numerous cases appear and are resolved quickly; and other cases are barely mentioned as requiring time and paperwork. This "chaos of crime" contrasts with the normality of the home lives of the detectives.

Linington consistently used simple, economical language that flows naturally from paragraph to paragraph. Descriptions are brief and straightforward. Her development of character and plot is deft and effective in spite of reduction in the space devoted to developing individual plots and characters. Although lacking the gritty realism of Joseph Wambaugh or Ed McBain, Linington's characters and events catch the reader's attention and arouse empathy.

Linington effectively takes the reader into the mind of a criminal; this foray into the criminal mind is the

leitmotif of *Chaos of Crime*. For example, the mental processes of a serial killer, nicknamed the werewolf, are described: "All last night the Voice had been talking to him, so he knew it was time for another. Today when he had come to work he had brought his tools, locked away in the little case in the trunk of the car."

Meanwhile the routine goes on; cases come and go. "Jack the Stripper," an armed gas-station bandit who takes his victims' clothing so as to escape unobserved; "Bonnie and Clyde," teenage liquor store bandits; and the murder of a rookie patrol officer during a routine traffic stop provide secondary plots. The last is resolved quickly because the officer was holding his killer's driver's license when he died. A man dies in an argument over a coin-operated dryer. There are witnesses but no evidence, and the investigating detectives are resigned. An elderly couple, long dead, are discovered in their home. Detective Landers wonders why they were not discovered sooner. The older, more experienced Sergeant Hackett replies, "People in a big city, Tom. They don't notice, or if they do they don't do anything about it." A supermarket bandit, surprised at being caught, is told by an amused detective, "Only yourself to blame. . . . You really haven't got much sense, Bennie." Stupidity is blamed when an engraved locket from a burglary-homicide leads to the criminal: "Just as well they're nearly all stupid so we can catch up to them."

New cases pile up on the unsolved, old ones. The werewolf kills again. A man kills an unfaithful wife. A teenage boy is dead of a drug overdose. A man is held prisoner in his apartment by his brother, an escaped convict. The detectives reluctantly investigate the werewolf's latest crime. More cases accumulate. Twelve juveniles under the age of fifteen, high on drugs and liquor, watch as one of them kills the mother of the girl having the party, and then continue carousing. A man is arrested for beating his wife after learning that she had a sex-change operation.

Contrasting vividly with this chaos is the normality of the police officers' home lives. Everyone seems to be having a baby or looking for a new home. The ordinary routines of daily life are the detectives' relief (and the reader's) from the chaos of their jobs.

Mendoza's home life reveals a different aspect of

his character. His young twins, Johnny and Terrie, are devastated following their ejection from a pool party because they cannot swim. He refuses their request for a swimming pool (which he can well afford): "No swimming pool. You can just forget about it, *niños*, and if either of you starts to cry I'll spank you." "I'll bet you wouldn't really," his son responds.

At work, stupidity seems more prevalent than evil. A mugger who killed an elderly man is caught wearing the victim's necktie, embroidered with the names of his grandchildren. The mugger never learned to read. Another elderly victim is killed by her teenage gardener, who wanted money to take his girlfriend to Disneyland.

A distinctive watch left at the scene of the werewolf's last crime is identified by a jeweler who repaired it. When Mendoza and Hackett go to arrest the werewolf, a bookkeeper for a major insurance company, he goes to pieces. The psychiatrist tells Mendoza, "All his fantasies have two clear threads running through, religion and sex." Mendoza is not impressed: "Just so he's not out hunting more women to cut up."

Like the robbery-homicide detectives, Mendoza is glad to get home, "This had been another grueling week with a good deal of legwork to do." There are still, however, the twins and the matter of the swimming pool.

Although this is the only one so titled, all Linington's mystery novels deal with the chaos of crime. The burden of cases often seems as overwhelming to the reader as it must to the detectives, but the relief of the home life mitigates it. Critics may dismiss her books as formula writing, but she makes her readers care about her characters. Readers become so involved in both the professional and home lives of her characters that they keep coming back for more.

LAURA LIPPMAN

Born: Atlanta, Georgia; January 31, 1959

Type of plot: Private investigator

PRINCIPAL SERIES

Tess Monaghan, 1997-

PRINCIPAL SERIES CHARACTER

TESS MONAGHAN, an unemployed newspaper reporter in her late twenties when the series begins, stumbles into detective work. As the novels continue in real time, she moves from part-time researcher to full-time, self-employed, licensed private investigator. In the process, she navigates complicated relationships with friends, family, and a boyfriend six years her junior. Unlike many of her private investigator counterparts, she does not grow jaded from her exposure to crime. Her sense of humor remains intact throughout the series, and she retains a guarded optimism while living and working in a city that averages a homicide every thirty-six hours.

CONTRIBUTION

Laura Lippman achieved immediate success with her first novel, *Baltimore Blues* (1997), which was nominated for a Shamus Award for best first novel; the later books in the series have won every major award for mystery writing. *Butcher's Hill* (1998) won an Anthony Award and an Agatha Award. *Charm City* (1997) won a Shamus Award and an Edgar and was nominated for an Anthony. *In Big Trouble* (1999) won a Shamus Award and an Anthony Award. *The Sugar House* (2000) won a Nero Award. Her nonseries suspense novel, *Every Secret Thing* (2003), won Barry and Anthony awards.

Lippman began publishing as a paperback original author, but since 2000 her novels have been released in hardback editions, and her reputation has grown accordingly. Her work is available overseas in Europe, the United Kingdom, and Japan. Lippman places herself in the middle range of American crime writers, no longer an obscure author with a strong regional following but not yet a household name with a string of best sellers. She is committed to advancing the genre

of crime fiction and to discovering and encouraging new writers.

Lippman's twenty years' experience as a journalist and her intimate knowledge of state and local politics in Maryland and Baltimore contribute to the believability of her work. Both her series and her nonseries novels are known for their social realism. Her writing is informed by considerations of class, race, and gender but avoids any sense of shrillness, tokenism, or political correctness.

BIOGRAPHY

Laura Lippman was born in Atlanta, Georgia, in 1959, the daughter of Theo Lippman, Jr., a journalist, and Madeline Mabry Lippman, a librarian. Two years later, her family moved to Washington, D.C., when her father became a correspondent for the *Atlanta Constitution*. In 1965 her father accepted a position with *The Sun*, then the morning newspaper of Baltimore, and the family relocated again. Lippman attended Baltimore city schools through ninth grade and graduated from Wilde Lake High School in Columbia, Maryland, where she was captain of the It's Academic team. After studying journalism at Northwestern University, she began a career as a reporter, working in Waco and San Antonio, Texas, before joining the Baltimore *Evening Sun* in 1989. When that paper was taken over by *The Sun* in 1991, she and her father became colleagues until his retirement a few years later.

While in her twenties, Lippman began writing fiction; she credits a workshop directed by the novelist Sandra Cisneros with encouraging her to pursue publishing her work. After abandoning several novels, Lippman completed *Baltimore Blues* in 1994; later that year, even though she had yet to secure an agent, she began writing her second novel in what would become the Tess Monaghan series. She completed seven novels in the series while continuing to work full time at the *Baltimore Sun*. Although her years as a journalist/novelist were highly productive ones, the demands of maintaining a dual career placed enormous strains on her personal relationships. In interviews, she has attributed the breakup of an early marriage in part to her "workaholicism."

After leaving the *Baltimore Sun*, Lippman became

involved in a relationship with David Simon, author of *Homicide: A Year on the Killing Streets* (1991) and producer of the Home Box Office series *The Wire* (beginning in 2002). Lippman avoids discussing personal matters, but she has contrasted her fictional version of Baltimore with Simon's, which portrays more accurately the nature of crime in the city, which regularly registers five homicides a week and where the victims are frequently young black men.

The city of Baltimore is central to all of Lippman's writing. Since becoming a novelist, she has lived in several different areas of the city, immersing herself in neighborhood culture and participating in community activities. She donates a portion of her appearance fees to Health Care for the Homeless and volunteers at a Baltimore soup kitchen. Although she shares a number of traits with Tess Monaghan, such as a fondness for greyhounds and a healthy appetite, Lippman rejects the idea that her character is an alter ego; any resemblance is superficial.

Lippman maintains a disciplined schedule, writing a thousand words every morning—most often at a local coffee shop, where the background noise reminds her of a newsroom—and exercising every afternoon. Once she has completed a first draft, she revises the entire manuscript several times. Her own writing practices are consistent with the advice that she gives to novice writers: establish a routine, finish the manuscript, and revise.

After completing seven books in the Tess Monaghan series, Lippman began alternating between non-series crime novels and books featuring Tess.

ANALYSIS

Laura Lippman follows in the footsteps of Sue Grafton, Sara Paretsky, and Marcia Muller, who broke new ground in the 1980's by introducing female private investigators into an exclusively male territory. Lippman describes her series character, Tess Monaghan, as a second-generation feminist detective who, unlike her predecessors, Kinsey Millhone, V. I. Warshawski, and Sharon McCone, need not perform better than her male counterparts to pursue a successful career. In fact, when Tess is first introduced, she is an unemployed journalist who undertakes a surveillance op-

eration as a favor for a friend; Lippman has referred to her character as “the accidental detective.” It is not until the third novel of the series that Tess obtains her license and sets up her own business. Neither her career choice nor her independence alienates her from the larger society. In contrast to the hard-boiled loner Kinsey Millhone, Tess enjoys family, friends, and house pets, and unlike V. I. Warshawski, she does not agonize over retaining her independence within romantic relationships. Having come of age in a culture more receptive to female autonomy, Tess is better equipped than her older sisters-in-crime to balance professional and personal interests. Lippman keeps her character on a human scale so that her problems are ordinary ones; her missteps may lead to heartache but not to melodrama.

Generally regarded as social realism, the Monaghan series encompasses a range of contemporaneous concerns, yet the novels do not foreground social issues at the expense of character, and the tone is never shrill. Lippman writes in third-person limited, restricting point of view to Tess and allowing her voice to dominate. The character’s sense of humor keeps the writing entertaining without trivializing serious subject matter.

Lippman’s experience as a reporter serves her well in this series. She gives Tess a remarkably similar background to her own, one that provides the character with the skills and resources to succeed as an investigator. One of the strengths of the series is how convincing Tess is as she tracks down information from public records and as she “interviews” contacts. She is comfortable with technology, but she does not rely on computer wizardry for answers.

Overall, Lippman has produced a body of fiction that, while staying within the boundaries of the genre, possesses a true-to-life quality. She frequently bases plots on actual cases; in addition her intimate knowledge of Baltimore, where all but one of her books is set, allows her to place her characters in well-defined social and cultural contexts. Realism is also reflected in her plot resolution, which resists oversimplification and pat, happy endings.

In keeping with the genre, many of Lippman’s secondary characters are two-dimensional; Aunt Kitty, the

femme fatale, and friend Whitney, the wealthy socialite, are predictable stereotypes, while boyfriend Crow, in spite of maturing as the series progresses, remains too good to be true. However, in later works, Lippman has shown an improved facility for character development as she has employed a more complex point of view. The increasing sophistication of her style is particularly apparent in *Every Secret Thing* and *To the Power of Three* (2005), which are less formulaic than the books in the Monaghan series.

CHARM CITY

In the second book in Lippman’s Tess Monaghan series, *Charm City*, Lippman draws on her knowledge of the newspaper industry to set her story in motion. Tess, still an unlicensed investigator working for lawyer Tyner Gray, accepts an assignment from her former employer, the *Beacon Light*, to look into the unauthorized publication of a story that led to the suicide of a prominent citizen involved in a deal to bring a professional basketball franchise to Baltimore. A subplot examines the dog racing industry and the fate of retired greyhounds. Lippman brings plot and subplot together neatly in this traditionally crafted mystery, but the strength of this early work lies in characterization as Tess learns to apply her skills in a new profession.

THE SUGAR HOUSE

A variation on the conventional whodunit, *The Sugar House* reveals the identity of the murderer in the prologue. Tess’s challenge is to identify the victim. When the murderer is killed in prison, his sister hires Tess to find out why. The key appears to lie with the victim, a Jane Doe whose body was never claimed. The case leads Tess to a treatment center for eating disorders; Lippman provides a shocking view into the world of anorexia while examining Tess’s past problems with bulimia. Midway through the novel, Tess solves her case, but establishing who Jane Doe is raises more questions than it answers. As Tess continues the investigation, Lippman takes the story into Maryland’s colorful political history, adding another layer of sophistication to the story. *The Sugar House*, the first work of the series to be published in hardback, attracted international attention and established Lippman as a significant literary figure within the genre.

IN A STRANGE CITY

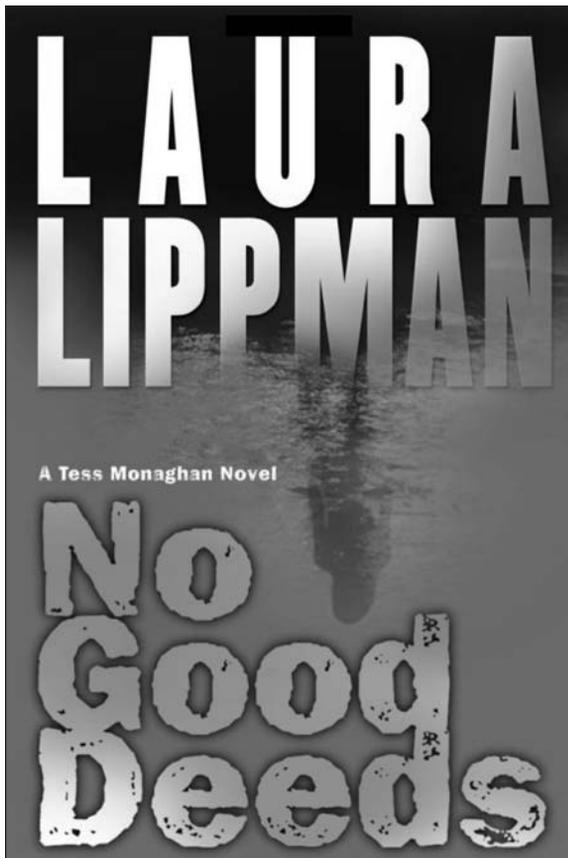

Since the mid-twentieth century, Baltimoreans have been enchanted by the mysterious appearance of the Poe Toaster, a cloaked figure who makes an annual visit to the grave of Edgar Allan Poe on the night of Poe's birthday, leaving an offering of three red roses and a half bottle of cognac. *In a Strange City* (2001) puts the identity—and life—of the Poe Toaster at risk. Tess, approached by a shady antiques dealer to track down the Toaster, turns away the potential client, then sets off to protect the Baltimore legend. While standing watch at the gravesite on the poet's birthday, Tess witnesses the murder of a Toaster impersonator and finds herself involved in a dangerous entanglement. This book is notable for its tribute to Poe, the father of the modern detective story. Lippman's considerable research is evident throughout, and she weaves into the plot a number of fitting tributes to Poe's stories.

NO GOOD DEEDS

No Good Deeds (2006) reflects Lippman's stylistic development as she grows more adventurous with point of view. In this work, perspective is focalized through several different characters: Tess; her boyfriend, Crow; and Lloyd Jupiter, a homeless black teenager whom Crow is trying to help. Lloyd is a particularly well-drawn character, whose distrust of white people undermines his opportunity to escape a cycle of poverty and violence. In this novel, Lippman defines for the first time "two Baltimores": one affluent and white, the other poor and black.

Lippman's unvarnished portrayal of racial tensions suggests how strongly her fictional worldview has been affected by the city's problems with urban crime, drug-infested neighborhoods, and failing schools. The social realism of this work is enhanced by a plot with strong parallels to the unsolved murder in 2003 of federal prosecutor Jonathon Luna. *No Good Deeds* suggests that the Monaghan series is moving in a more serious direction as the principal characters become more fully engaged in larger concerns.

FRANCES LOCKRIDGE

Born: Kansas City, Missouri; January 10, 1896

Died: Norwalk, Connecticut; February 17, 1963

Also wrote as Francis Richards

Types of plot: Amateur sleuth; police procedural; comedy caper; cozy

PRINCIPAL SERIES

Mr. and Mrs. North, 1940-1963

Merton Heimrich, 1947-1976

Nathan Shapiro, 1956-1980

Bernie Simmons, 1962-1974

PRINCIPAL SERIES CHARACTERS

PAM NORTH, a slim, attractive woman, charms and bewilders her listeners with her elliptical conversa-

tions. She is very fond of cats, often talking to them. Intelligent and curious, Pam often takes the lead in walking inadvertently into dangerous situations that lead to the murderer.

GERALD "JERRY" NORTH, a publisher, is devoted to his wife. Accustomed to her style, he understands her and acts the role of a straight man. Like his wife, he favors dry martinis and good companionship at elegant meals. Jerry and Pam are both compassionate, a quality that motivates them to become involved in detection.

BILL WEIGAND, an officer in the homicide squad, and his assistant, DETECTIVE SERGEANT ALOYSIUS CLARENCE MULLINS, work closely with the Norths on cases. Weigand is a likable character, a kind and effective professional.

MERTON HEIMRICH, of the New York State Police, rises steadily in rank in the series devoted to his adventures, from lieutenant to captain to inspector. He also meets and marries Susan Faye, a widow with a ten-year-old son, Michael. Heimrich's gradual success in

his professional and personal life has little effect on his kind nature and rather gloomy outlook.

NATHAN SHAPIRO, a lieutenant in the homicide squad, is a self-doubting but competent investigator. He normally works with Captain Weigand, but in one novel he is teamed with Merton Heimrich. Unlike the other North principals, he prefers sweet sherry to a dry martini. Some readers have compared him to the television detective Columbo.

BERNARD SIMMONS is a tall, red-haired assistant district attorney of New York City. When not working on cases, he is working on a relationship with his girlfriend, Nora Curran, hoping that she will marry him.

WALTER BRINKLEY, a white-haired, pudgy professor of English, retired from Dykeman University, is a recurring Lockridge character, though he does not have his own series.

CONTRIBUTION

With the creation of their husband-and-wife team, Pam and Jerry North, Richard Lockridge and Frances Lockridge added to the small number of mystery novels featuring couples as amateur detectives. The novels featuring the Norths were immensely popular and were developed into a radio and television series, a play, and a motion picture. The Mystery Writers Association awarded the Lockridges the first Edgar Allan Poe Award for the best radio mystery program in 1946.

Both journalists, the Lockridges produced novels at a steady rate, drawing on their own experiences. Even the series about law-enforcement detectives emphasizes the characters' personal lives and their relationships with their spouses or lovers, creating a comfortable air of stability and family strength. Although the novels feature a variety of detective figures, the Lockridge novels as a whole create a miniature world of their own, in that characters sometimes overlap series. Lockridge readers are thus provided with the pleasure of entry into a familiar world in most of the novels.

Although the Lockridges' plotting was seldom intricate, they created a series of personable characters and picked interesting subjects as backgrounds. Simply and clearly written, their novels have been admired for the civilized tone, the gentle humor, and the glimpses they afford of American life.

BIOGRAPHY

Richard Orson Lockridge was born on September 25, 1898, in St. Joseph, Missouri, the son of Ralph David L. Lockridge and Mary Olive (née Notson) Lockridge. He attended Kansas City Junior College and the University of Missouri at Columbia before his education was interrupted by navy service in 1918. After the war, he held a variety of jobs, including stints at the United States Census Bureau, a wholesale grocer, a carnival, and a printing shop. He studied journalism briefly before he started his journalistic career as a reporter for the *Kansas City Kansan* in 1921. In New York, he became the drama critic at the *New York Sun* and contributed frequently to *The New Yorker*. He served as a public relations officer for the Navy in World War II. Returning to journalism after the war, he acquired a reputation as a fast, reliable rewrite man in his newspaper work.

Frances Lockridge, born Frances Louise Davis on January 10, 1896, in Kansas City, Missouri, also became a journalist. She attended the University of Kansas and worked for four years at the *Kansas City Post* as a reporter and feature writer. In New York City, she wrote for the "Hundred Neediest" section of *The New York Times*, continuing her role as a "sob sister." Her long experience as a publicist for the State Charities Aid Association (1922-1942) led to an interest in the problems of child adoption and a book, *How to Adopt a Child* (1928).

Davis and Lockridge met and married in 1922. Their first move to New York City was not successful; they returned to Kansas, but decided to try again. Their second attempt succeeded, though they lived precariously, never having enough money. It was during these lean times that Richard wrote about some of their experiences in short humorous pieces that led to the Pam and Jerry North characters. Both avid readers of mysteries, together they created three long-running series, keeping up on other writing as well. They were elected co-presidents of the Mystery Writers Association in 1960.

Two years after Frances's death in 1963, Richard married Hildegard Dolson, also a writer, and continued to write prolifically. Richard Lockridge died in 1982, after a series of strokes, in Tryon, North Carolina.

ANALYSIS

The Lockridges' most popular characters, Pam and Jerry North, appeared in nonmystery genres before they became amateur sleuths. Richard Lockridge first wrote of the experiences of a couple similar to his wife and himself in a series of short pieces for the *New York Sun*. Later, the Norths resurfaced in the short domestic comedies that he wrote for *The New Yorker*. Their surname, their creator said, "was merely lifted from the somewhat amorphous, and frequently inept, people who played the North hands in bridge problems." In their initial existence, the couple did not have first names, and neither had an occupation.

MR. AND MRS. NORTH SERIES

The Norths' final passage to amateur-sleuth status came when Frances Lockridge decided to write a mystery during one summer vacation. Her husband became interested, and together they worked out a story. Because the Norths were well-established characters by then, the Lockridges kept them as the main characters and retained the humorous tone previously used in North stories. According to Frances, her own role was to contribute interesting characters and her husband's was to kill them off. After their story conferences and the joint preparation of outlines and summaries, Richard did all the writing.

When Richard continued writing other series after the death of Frances, reviewers suggested that his style had changed, a claim that seemed to baffle and amuse him. The style of the collaborative Lockridge books, praised as quiet, understated, graceful, and easy to read, certainly is consistent, though the novels featuring characters other than the Norths seem more serious in tone. The North novels were initially admired for their infectious humor. They are a delightful blend of urbane chic (somewhat reminiscent of the tone of motion-picture screwball comedies) and an attention to social issues, a legacy of the authors' journalistic training.

The Lockridges fall into the category of detective-fiction writers who consider it their job to play fair with the reader in producing interesting puzzles to solve. Among his rules, Richard Lockridge said, were that butlers and detectives are never the criminals, that there is only one murderer, and that the detective must disclose all the clues. It is this last requirement that oc-

casions the frequent meals and dry martinis in the North series. Pam and Jerry, often with their police-officer friend Bill Weigand and his wife, Dorian, discuss cases over meals at elegant restaurants or at home. A whimsical fascination with the activities of cats adds to the comic charm of the novels. Pam's thought processes are sometimes relayed in her conversations with the assorted cats that appear throughout the series. These monologues, like the scenes of socializing, serve a dual purpose, adding a warm, sometimes comic touch of characterization and deftly passing on information to the reader.

Another unwavering source of amusement for the reader is the ire the Norths arouse in Inspector O'Malley, Bill Weigand's superior. "Those Norths!" he sputters whenever he discovers that they are in the thick of the latest homicide. A running gag is the obligatory suspicion that falls on the Norths themselves: Why do

they so often find the bodies? the inspector wonders. Though on an intensive diet of the North books this comic touch becomes rather wearying, it is nevertheless true that, as with characters in a situation comedy or any other kind of series, these predictable touches are part of the appeal.

Though Richard Lockridge found the casting of Gracie Allen as Pam North in the film featuring the Norths a "triumph of miscasting," there is a distinct aura of the daffy charm of George Burns and Gracie Allen about Pam and Jerry North. Like Gracie Allen, Pam is much given to elliptical dialogue that bewilders everyone unaccustomed to her thought processes; Jerry, like George Burns, is the straight man who can practically foretell the confusion that Pam is about to spread. Jerry's publishing career, which presumably supports their elegant lifestyle, comes in handy as a source of cases. In *Murder Within Murder* (1946), for example, one of his freelance researchers is murdered; in *The Long Skeleton* (1958), one of Jerry's authors becomes centrally involved in the murder, and *Murder Has Its Points* (1961) similarly revolves around one of Jerry's authors. Pam is the one who solves the mystery, however, because of her intuitive intelligence, a quality described by Richard Lockridge as a "superior mental alacrity." She is so often caught up in a dangerous situation in the final scenes of a novel that the predictability moved Howard Haycraft, by 1946, to complain: "Someday I'd like to read a North story in which Mrs. North does not wander alone and unprotected into the murderer's parlor in the last chapter."

MURDER IS SUGGESTED AND TWICE RETIRED

Though Pam is also sometimes described as scatterbrained, and though the structure of the North novels themselves leaves an impression of flighty formula fiction, the Lockridges' novels as a whole tackle interesting political and social issues. Hildegard Dolson, Richard Lockridge's second wife, noted that a reviewer had once said that her husband did more good for liberal causes than polemics do, to which Richard responded that his social theories intentionally spilled out in the novels. *Murder Is Suggested* (1959) gives an interesting account of the view of hypnosis at that period; the sobering responsibilities of medical practice are taken up in *Murder by the Book* (1963). In

Twice Retired (1970), a Bernie Simmons mystery, there is a touching portrayal of the evil effects of fascism on families: The egocentric behavior of a general in the armed forces, recklessly deploying forces for his own glory, brings about tragedy for his nephew.

FICTION FROM EXPERIENCE

The Lockridges were skillful in incorporating their own experiences into their novels; thus, the early novels in particular have been praised for their mirroring of specific elements of American life. The atmosphere of prewar Greenwich Village, for example, is rendered faithfully in *The Norths Meet Murder* (1940). *Death on the Aisle* (1942) is set in a theater, a milieu with which Richard Lockridge was familiar from his years as a drama critic. The Merton Heimrich novels are often set in suburban Westchester, Putnam, and Dutchess counties, in all of which the Lockridges lived for a while. The Lockridges' experience with a friend who bred Angus cattle is reflected in *Death and the Gentle Bull* (1954), a novel featuring Captain Heimrich. Frances Lockridge's experiences as a publicist with a private committee for the placement and adoption of children underlies *A Pinch of Poison* (1941) and *Quest for the Bogeyman* (1964), both of which have an adoption theme.

The Lockridges' own life also accounts for another characteristic of their novels: In marked contrast to the American tradition of the lone detective, the Lockridge detectives, as Chris Filstrup and Jane Filstrup observe, have stable relationships. In addition to the compatible marriage of Pam and Jerry North, there are Bill Weigand and his wife, Dorian; Merton Heimrich and his wife, Susan; and Bernie Simmons and his girlfriend, Nora Curran.

These touches of personal and social realities, however, contribute only to the variety of milieus in the Lockridge novels. Although these novels do provide realistic glimpses of American life, in other respects they follow the murder-mystery convention of a closed circle of people. A distinguishing Lockridge extension of this convention is the overlapping in the series. Captain Bill Weigand, the family friend in the North series, appears in the Nathan Shapiro series as the main character's superior. Even fictional settings reappear: For example, the imaginary Dyckman Uni-

versity (based on Columbia University, where Richard Lockridge taught briefly) appears in *Murder Is Suggested*, a North mystery, and is the home institution of Professor Emeritus Walter Brinkley in *Twice Retired*, a Bernie Simmons novel. This familiarity of recurring characters and settings extends the family atmosphere of the North series to the other novels as well.

As a reporter, Richard Lockridge had covered crime stories and many important trials, while Frances had specialized in human-interest articles. Nevertheless, though New York City appears frequently as a locale, and law enforcement officials—Heimrich, Shapiro, Weigand, Simmons—outnumber the amateur sleuths as principal characters in the Lockridge novels, there is little of the grim, the sordid, or the violent. Far from depicting the harsh realities of big-city life or exploring the complexities of police politics, the Lockridges created their own version of the cozy English village murder mystery. Indeed, asked to which writers he was often compared, Richard Lockridge said, “They identify me as a writer of the old-fashioned mystery, which I am. Which I prefer to the bang-bang school, the private eye who is slugged, knocked unconscious, and is up without a bruise the next day.”

The Lockridge novels—charming, humorous, interesting for their treatment of a variety of social issues—are in the tradition of well-crafted novels of entertainment. The Norths’ long fictional lives—more than forty books, a radio series that lasted thirteen years, a television series that ran for two years, a Broadway play with 162 performances, and a film—are a testament to the ability of their creators to intrigue and amuse. The Lockridges are rightly admired for their ability to sketch comically endearing characters. For the Lockridge fan there is great comfort in the sheer quantity of the Lockridge output. With a combined total of more than eighty titles to their credit, the Lockridges have produced for readers the pleasure of many engrossing reads.

Types of plot: Historical; police procedural; psychological

PRINCIPAL SERIES

Sergeant Cribb, 1970-

Bertie, the Prince of Wales, 1988-

Peter Diamond, 1991-

PRINCIPAL SERIES CHARACTERS

SERGEANT CRIBB, in his forties at his first appearance, is a tall, lean man with full side-whiskers, who dresses well and relishes impersonations on the job. His keen sense of morality is tempered with irony, and his delight in the new and unusual is offset by the bitterness of having worked seventeen years without a promotion. He is married, but his wife, Millie, appears only infrequently.

EDWARD THACKERAY, a burly constable, is proud of his full gray beard. He is a more conventional man than his superior and is uneasy in strange situations. Unable to pass official examinations, he serves Cribb as a sounding board and performs most of the legwork on their cases, with little hope of promotion.

INSPECTOR JOWETT, once Cribb's fellow sergeant, is now his superior and an obstacle to his promotion. An astute politician and a class snob, Jowett has risen rapidly in the ranks because of his ability to present himself well in written reports of cases without giving credit to those who actually did the work.

BERTIE, THE PRINCE OF WALES is largely based on the public perception of the eldest son of Queen Victoria, who later became King Edward VII. He is a large, gourmandizing womanizer who enjoys the sports of the upper classes and thinks he can use his deductive skills to solve crimes.

PETER DIAMOND, a large, imposing man whose bald spot is hidden by his omnipresent Trilby hat, is in his late forties at the beginning of the series. A detective superintendent living in Bath, England, Diamond is a tra-

ditional police detective who distrusts technology and bureaucracy, relying on interviewing skill and deductive reasoning to solve his cases.

CONTRIBUTION

One of the attractions of Peter Lovesey's work is the interesting sidelights the author offers into esoteric aspects of history. His background in the history of sports has served him well, but not content with the Victorian setting with which he made his name, he has widened his scope to explore other time periods. Rather than trying to recapture the style of bygone eras, Lovesey writes from a modern perspective, thus achieving an interesting juxtaposition of different detective-fiction traditions. The consistently high quality of his historical research, his brilliant plots, and the skill with which he tells stories, ranging in tone from the serious to the comic, put Lovesey in the top ranks of historical mystery writers.

Lovesey's later novels, while set in more recent times, reveal the same skill in plotting, characterization, and subtle humor, whether the novels are set in a small corner of England or range around the globe. Although Lovesey's plots sometimes center on modern technology, his sleuths' commitment to using traditional methods, while maintaining their own independence, shows the connection between the past and the present, particularly in the mystery genre.

Lovesey's numerous awards include the Crime Writers' Association's Silver Dagger Awards in 1978 for *Waxwork*, 1995 for *The Summons*, and 1996 for *Bloodhounds*, and the Gold Dagger Award in 1983 for *The False Inspector Dew*; the Anthony Award in 1992 for *The Last Detective*, and Macavity Awards in 1997 for *Bloodhounds* and 2004 for *The House Sitter*. In 2000 he was awarded the Cartier Diamond Dagger Award by the Crime Writers' Association of Great Britain for his lifetime achievement in the field.

BIOGRAPHY

Peter Harmer Lovesey was born on September 10, 1936, in Whitton, Middlesex, England, the son of Rich-

ard Lear, a bank official, and Amy Strank Lovesey. He attended Hampton Grammar School and the University of Reading, receiving honors in English in 1958. He served as an education officer and flying officer in the Royal Air Force from 1958 to 1961, and he married Jacqueline Ruth Lewis in 1959. After teaching at Thurrock Technical College in Grays, Essex, for eight years, Lovesey became the head of the general education department at Hammersmith College for Further Education in London until 1975. Lovesey has two children: a daughter and a son, Philip, who as Phil Lovesey, has become a crime novelist in his own right.

In the article "Magician, Actor, Runner—Writer," Lovesey traces the influences of his childhood ambitions on his writing career. By his own account, he was one of the first joggers, accompanying himself with his own radio commentary as he trained on dark suburban streets. When he realized that he was not cut out to be a runner, he became a fan of those who were and, utilizing his academic skills, turned to research on the history of running. A photograph in a sports magazine of a nineteenth century North American Indian, Deerfoot, spurred Lovesey's interest in the Victorian period. Researching accounts of running events of the previous century in a newspaper museum, he found stories full of "character, color, and eccentricity," which he turned into articles for track and field magazines. After five years of writing, earning nothing but the title of "world's foremost authority on the history of athletics," Lovesey published a book on long-distance runners, *The Kings of Distance: A Study of Five Great Runners* (1968).

For his entry to the Panther-Macmillan First Crime Novel Competition, Lovesey decided to create a mystery involving a nineteenth century running event known as wobbles. The result was his first mystery novel, *Wobble to Death* (1970), which won the competition. Since then, he has delved into other aspects of Victorian life for the Sergeant Cribb series and branched out into other historical periods. In 1975, he became a full-time writer. With his wife, Jackie, who holds a degree in psychology and was more of a mystery fan than he, Lovesey adapted some of the Cribb novels and wrote six new ones for the television series based on the Cribb novels. Jackie, being more familiar

with the genre, helped Lovesey steer clear of hackneyed situations in his novels.

ANALYSIS

Unusual among mystery writers, Peter Lovesey started his career in the genre not because he loved reading mysteries but because he loved sports, long-distance running in particular. His prizewinning debut, *Wobble to Death*, is set in the Agricultural Hall in Islington in 1879, at one of the running events known as wobbles, in which contestants try to run the greatest possible distance in six days. The hardships of the runners, the filth and stench pervading the building rented for the event, the tricks that athletes and trainers used to gain an extra winning edge, and the varied and sometimes mysterious reasons that a sport becomes so obsessively important to its contestants are all evoked in vivid detail. The reader learns about this nineteenth century sporting event along with Sergeant Cribb and his assistant Thackeray, who are called to the scene when one of the runners favored to win is murdered.

This winning combination of the historical setting, the sociology and psychology of sports, and a modern police procedural story led to a series of Cribb adventures highlighting other aspects of Victorian life: bare-knuckle prizefighting in *The Detective Wore Silk Drawers* (1971), hammer throwing and the music-hall stage in *Abracadaver* (1972), seaside resorts in *Mad Hatter's Holiday: A Novel of Murder in Victorian Brighton* (1973), and Irish terrorism in *Invitation to a Dynamite Party* (1974). *A Case of Spirits* (1975) explores the dynamics of Victorian family life, the emancipated new woman, and the craze for spiritual phenomena.

Lovesey's other novels branch out from the Cribb series; they may be set in a different historical period, such as the Hollywood of Mack Sennett in *Keystone* (1983) or a transatlantic ocean liner in the 1920's in *The False Inspector Dew* (1982). *Rough Cider* (1987), set in the 1960's, describes the consequences of an incident during World War II. In *Bertie and the Tinman* (1988), however, Lovesey returns to the Victorian sporting scene.

Mystery novels set in the past, whether in Victorian times as in the works of Lovesey, Julian Symons, or Nicholas Meyer, or centuries ago as in the works of

Ellis Peters or Robert van Gulik, automatically have a charm of their own. As a genre, mystery fiction has traditionally been considered a form of escapist literature, and historical mysteries provide an escape even further removed from the realities of modern life. The Victorian setting of Lovesey's Cribb series, for example, evokes not only the stereotypes of a slower, more leisurely era but also the tradition of those mystery-fiction giants, Sherlock Holmes and Watson. The unequal intellectual contest between Sir Arthur Conan Doyle's famous duo is re-created in Lovesey's Sergeant Cribb and Edward Thackeray; the latter wishes, as he plods through the tedious tasks assigned him, to surprise his superior just once with some vital discovery, but like Watson, he cannot.

Lovesey has explained that Victorian society was a rich source of motivations for crime; the twentieth century with its "social welfare and easier divorce and psychiatric care has removed many of the bad old reasons for murder." By contrast, the Victorian need for respectability provides more motives for murder: "The need to achieve security by inheritance, or life insurance, or marriage; the risk of losing it when scandal threatened; the equating of sex with sin; the stigma of insanity; the things that went unsaid."

A historical setting, Lovesey notes, must conform to a framework of historical fact, which cannot be changed and which thus assures a measure of certainty and control. In *Invitation to a Dynamite Party*, for example, which the author describes as a Victorian James Bond book, the reader knows that the plot to assassinate the Prince of Wales cannot succeed. Although some elements of plot are thus deprived of suspense, there is still the whimsical pleasure of recognizing real historical characters or events juxtaposed to the fictional: Sergeant Cribb will occasionally mention Charlie Peace, an infamous Victorian murderer, or the equally infamous Jack the Ripper; the pioneers of Hollywood—Mack Sennett, Mabel Normand, and Fatty Arbuckle—appear in *Keystone*; and *The False Inspector Dew* features a brief description of the sinking of the *Lusitania*. In *Bertie and the Tinman*, the Prince of Wales is the detective figure, with cameo appearances from his mother, Queen Victoria.

As interesting as their backgrounds are, Lovesey's

novels do not appeal merely because of their historical detail; rather, they illustrate his own view of such historical novels: "All we ask of the historical mystery is that it tell a story consistent with known facts and that those facts arise naturally from the plot. If we want a history lecture, we can go to college." Because of their historical setting and their range of tone, it would be misleading to characterize the Sergeant Cribb novels as typical police procedurals. Some elements, however, as described by George Dove and Earl Bargainnier in their introduction to *Cops and Constables: American and British Fictional Policemen* (1986), are indeed typical. Dove and Bargainnier place the police story within the classic category of mystery fiction, which develops step by step, and within the hard-boiled school, with its physical and pragmatic approach. This category of fictional police detectives is in turn divided into two: the older school, with its emphasis on "cop sense," relying on intelligence, common sense, and a broad understanding of human nature; and the more recent school, drawing on technological advances in police work such as forensic science, the police laboratory, and computers.

Lovesey's historical detective figures are of necessity in the older school. Sergeant Cribb has been with the Criminal Investigation Department since its inception, and although a few scientific advances have been made in the field of crime detection, he must rely on his experience and understanding of human nature to solve cases. As is typical of police detectives, who cannot exercise a private code of ethics or choose their cases as the private investigators of hard-boiled detective fiction can, Cribb has to work on cases within the limitations imposed by police hierarchy and politics. In *Waxwork* (1978), for example, he glumly reflects that after seventeen years his chances for a promotion are practically nil because he tends to be so outspoken. Aware of this bitter situation, his superior, Inspector Jowett, who has advanced primarily through his skill with paperwork and rigorous adherence to the police code, forces him to take a politically dangerous assignment. Cribb fully realizes, however, that the assignment cannot advance his career in any way, because no matter what part he plays in the case, Jowett will appropriate all the credit.

The hard-boiled tradition, however, does not dominate all of Lovesey's novels. A more lighthearted twentieth century perspective prevails in other novels. *Swing, Swing Together* (1976) and *The False Inspector Dew*, for example, have a delightfully wry post-modernist self-referential quality. *The False Inspector Dew*, as indicated in the title, plays on the case of the real Inspector Dew, who captured the infamous Dr. Crippen and his lover. Such extended jokes blended into classic puzzle plots are surely hard to find in college history lectures. Luckily for anyone who does not mind accumulating bits of history as long as the promise of a good murder story is there, Lovesey offers fascinating glimpses of life in other eras with skill, imagination, thoughtfulness, and humor.

These same qualities imbue Lovesey's later detective fiction, including the psychological mysteries *Rough Cider, On the Edge* (1989), and *The Reaper* (2001), and particularly his series about Peter Diamond, head of the Murder Squad for the Avon and Somerset police force until he resigns in a dispute with his superior. Diamond later returns under his own terms, thus establishing his independence of traditional bureaucracy and authority. Diamond distrusts modern police technology and cannot operate a computer, but he will use the results of technology if someone else obtains them for him. He relies on his own common sense and ability to talk to people to achieve his results, which are successful enough that his gruff manner and uncontrolled tongue are often—if not always—excused by superiors and coworkers. However, his irascibility causes an assistant he admires, Julie Hargreaves, to ask for a transfer to headquarters, even though she otherwise likes and admires him. Diamond also suffers deep personal loss during the series. Lovesey's presentation of Diamond is complex enough so that admiration for him is usually tempered by regret over his lack of forethought. Though these novels are set in the present, Lovesey's love of the past has not disappeared: Bath, we are reminded in several novels, was the home, at various times, of Jane Austen and Mary Wollstonecraft Shelley. All in all, this series shows Lovesey's mastery in combining modern themes and subjects with the traditional genre virtues of skillful plotting and interesting characterization.

SWING, SWING TOGETHER

Drawing on the enormous popularity of Jerome K. Jerome's *Three Men in a Boat (To Say Nothing of a Dog)*, published in 1889, Lovesey anchors *Swing, Swing Together* in Jerome's story of a trip on the Thames River. Harriet Shaw, a romantic seventeen-year-old, inadvertently witnesses a murder involving three men and a dog in a boat. Unaware that there is a vogue for re-creating the events of the book among the populace, Cribb, Thackeray, and a young village police officer, all traveling incognito, take Harriet along to track the movements of the men Harriet saw. They are disconcerted to find that numerous parties of three in boats are following the same trail and that no one is inclined to take their search seriously.

WAXWORK

An excellent example of Lovesey's skill in integrating historical ambience and detail with a good story is *Waxwork*, in which Cribb is asked to conduct an independent investigation to clear up some inconsistencies in the confession of a condemned murderer, Miriam Cromer. The story is woven from three separate threads, one following Cribb as he retraces the trail of evidence, one tracing the process of Miriam's incarceration, and a third following James Barry, a real Victorian hangman, as he negotiates with Madame Tussaud's for the sale of Miriam's clothing after he executes her. Memorable scenes of a Victorian women's jail and the Chamber of Horrors at Madame Tussaud's, a testimony to the public's fascination with criminals, emerge naturally from the plot. The three story lines are intertwined when Barry, seeking only to present his wife with a picture of himself done by Miriam's husband, a famous photographer, innocently precipitates the hasty actions that reveal the true murderer to Cribb.

Waxwork is one of the most hard-boiled of the Cribb police procedurals in its dark tone, its depiction of inept police officers, its intimation of high-level political manipulation, its cynical view of humanity, and its portrayal of Cribb as a lone and lonely figure in search of the truth regardless of where it leads him. Significantly, it is one Cribb novel in which Thackeray does not appear. Indeed, Lovesey has described Cribb as a character who manifests the three qualities that

Ross Macdonald, the American writer of hard-boiled mysteries, listed as typical of a contemporary American detective hero: "an impatience with special privilege, a sense of interdependence among men and a certain modesty."

THE SUMMONS

The Summons (1995) establishes Bath as the geographical center of the Peter Diamond series, as Diamond uses an escaped convict's threat to leverage a return to the police force. Diamond's skill in eliciting information and interpreting it are highlighted, as is his reluctance to use deadly force in apprehending a suspect. Above all, Diamond's integrity is recognized, particularly by the convict, who asks for Diamond because he is "straight." Lovesey's skill at plotting is also exhibited in the explanation for the chief clue in the original crime, roses stuffed in the mouth of the victim. Diamond's success represents the triumph of the older, more traditional methods of policing.

DIAMOND DUST

Lovesey here forces his readers out of their comfort zone as Peter Diamond investigates (against orders, of course) the death of his wife, Stephanie, who in previous novels had proved to be a thoroughly likeable, yet human character. Diamond's pain is depicted realistically and unsentimentally, and his search is characteristically blunt and thorough. The explanation of the killer's motive is believable and psychologically sound, as Lovesey plays fair with the clues and evidence. If Lovesey has a weakness, it is in the coziness of some of his plots, particularly in the historical novels. *Diamond Dust* shows that charge no longer applies, and that the world of crime can enter the circle of the detective.

MARIE BELLOC LOWNDES

Marie Belloc

Born: Marylebone, London, England; 1868

Died: Eversly Cross, Hampshire, England;
November 14, 1947

Also wrote as Philip Curtin; Elizabeth Rayner

Types of plot: Psychological; historical

PRINCIPAL SERIES

Hercules Popeau, 1913-1940

PRINCIPAL SERIES CHARACTER

HERCULES POPEAU, an elderly French detective, follows the pattern of traditional detective fiction. Perhaps because of the author's French heritage, Popeau is never given to the histrionics and idiosyncrasies so typical of his many French and Belgian detective contemporaries.

CONTRIBUTION

Marie Belloc Lowndes was one of the first novelists to base her work on historical criminal cases, at times utilizing actual courtroom testimony. This innovation, however, presented her with a dilemma: If the reader knows the outcome of the problem, where is the suspense? Lowndes's solution was to focus attention not on the crime but on the underlying motives and, above all, on the reactions of those affected by its consequences. Most of her characters, whether murderers, accomplices, or bystanders, are ordinary people who, to their horror, become gradually enmeshed in circumstances beyond their control. Lowndes, unique in her day, was particularly adept at portraying the psychology of women who not only shielded criminals but also could be cold-blooded killers. It is to one extraordinary, even mythical, figure in criminal lore, how-

ever, that Lowndes owes her place of honor in the mystery hall of fame. In *The Lodger* (1913), she was the first to seize on the rich material latent in the Jack the Ripper murders. She also was the first to participate in the game of guessing the Ripper's identity. Her assumption that the hierarchy of the Metropolitan Police knew and covered up the identity of the murderer has formed the basis of many subsequent theories concerning the notorious serial killer.

BIOGRAPHY

Marie Adelaide Belloc Lowndes was born in the summer of 1868 into a family renowned for its literary, social, and scientific achievements. Her parents, both nearing forty at the time of her birth, had already distinguished themselves in their respective careers, her French father, Louis Belloc, in law, and her English mother, Bessie Raynor Parkes, as a leader in the fight for women's rights. Bessie Parkes was also the editor of one of the first women's magazines in Great Britain. Lowndes's French grandmother had translated Harriet Beecher Stowe's *Uncle Tom's Cabin* (1882), and her maternal great-great-grandfather was J. B. Priestley, the discoverer of oxygen. Her younger brother, Hilaire Belloc, was the well-known novelist and poet.

The bilingual Lowndes considered herself to be French, even though she was born and later died in England, wrote in English, and lost her French father during her early childhood. She had little formal schooling, except for two years in a convent school, but claimed to have begun writing at the age of sixteen. Her familial connections brought her in contact with the important figures of the day, and her literary career began with sketches of famous writers such as Jules Verne that were published in magazines such as *The Strand*. In 1896, she married the journalist and writer Frederic Sawrey Lowndes. They had two daughters and a son.

At the beginning of her literary career, Lowndes was primarily known as a writer of witty and satirical sketches of upper- and middle-class society. After the publication of her first novel of suspense, *When No Man Pursueth: An Everyday Story* (1910), however, her works increasingly began to focus on the psychological motivation of crime. Since 1926, numerous

versions of her suspense novels have been adapted to the screen. The most famous have clearly been the various reworkings of *The Lodger*, starting with the Alfred Hitchcock classic *The Lodger* (1926) with Ivor Novello as the mysterious upstairs tenant.

During the 1930's, Lowndes concentrated her energies on writing for the stage, adapting many of her own works. Her expertise in the manipulation of dialogue served her well in her account of another famous murder case, that of Lizzie Borden. In *Lizzie Borden: A Study in Conjecture* (1939), Lowndes offers her own solution to the crime. Lowndes wrote four biographical volumes: "*I, Too, Have Lived in Arcadia*": *A Record of Love and of Childhood* (1941), *Where Love and Friendship Dwelt* (1943), *The Merry Wives of Westminster* (1946), and *A Passing World* (1948). *Where Love and Friendship Dwelt* contains fascinating glimpses into the lives of important literary and political figures of the early twentieth century. During World War II, the Lowndes family house in London was destroyed in a bombing raid, and she retired to her country house in Hampshire, where she died on November 14, 1947.

ANALYSIS

Marie Belloc Lowndes subtitled her first attempt at suspense fiction, *When No Man Pursueth*, "An Everyday Story." Its setting is not the gothic castle, the lonely moor, or the Chinese opium den, so beloved of her generation, but a tiny, common English village filled with pleasant, ordinary English people living pleasant, ordinary lives—except for the fact that one man is slowly murdering his wife in quite a vile manner. The protagonist is a country doctor who, to his own amazement, begins to realize the truth. He has no direct proof, and another doctor does not agree with his suspicions, but slowly and reluctantly he is drawn into action. The focus of the novel is on neither the victim nor the murderer but on the workings of the young doctor's mind. This careful delineation of the psychology of an ordinary person confronted by extraordinary circumstances was to become the linchpin of all Lowndes's later work. What interested Lowndes was not the "who" but the "why." In fact, her trademark was the revelation of the criminal's identity at the beginning of the novel rather than at the end. Bereft of the value of

the dramatic denouement, Lowndes experimented with different narrators and narrative techniques. In *The Chink in the Armour* (1912), which somewhat resembles the much later *Before the Fact* (1932) by Francis Iles, the story is told from the point of view of the intended victim.

THE STORY OF IVY AND LETTY LYNTON

Victims were not, however, psychologically interesting to Lowndes. Her emphasis on motivation enabled her to break away from many of the stereotypes of her time. Although her writing does have its share of pathetic heroines, more common are the strong, amoral women whose straying from the path of accepted behavior is painstakingly depicted. Lowndes was particularly intrigued by the psychology of the female poisoner. Two of her most popular works, *The Story of Ivy* (1927) and *Letty Lynton* (1931), analyze two such women who ruthlessly try to rid themselves of all obstacles that block their path to monetary gain or sexual satisfaction. Interest in these novels is maintained in the revelation of the protagonist's true identity as layer after layer of psychological camouflage is painfully stripped away. Both works contain courtroom scenes, and Lowndes's skill at dialogue is evident in her adroit maneuvering of the verbal give-and-take of a trial. In 1939, Lowndes united this expertise to her concentration on psychological motivation in her acclaimed tour de force, *Lizzie Borden*.

LIZZIE BORDEN

Lowndes had long used actual criminal cases as background for her suspense novels, and she is principally remembered for these fictional reconstructions. The Borden case fascinated her—the case was one of the most controversial in United States criminal history, and the notorious Borden seemed to be the real-life counterpart of Lowndes's own fictional murderesses. In 1893, the New York jury, although apparently presented with incontrovertible evidence of guilt, voted to acquit Borden. In Lowndes's reconstruction of the case, Borden's guilt or innocence is never an issue. She wholeheartedly accepts Edmund Pearson's 1924 analysis of the trial that ridiculed the acquittal. For Lowndes, the interesting question is the motive underlying the guilt, which she defines as destructive love. Controlled by a tyrannical father and dominated

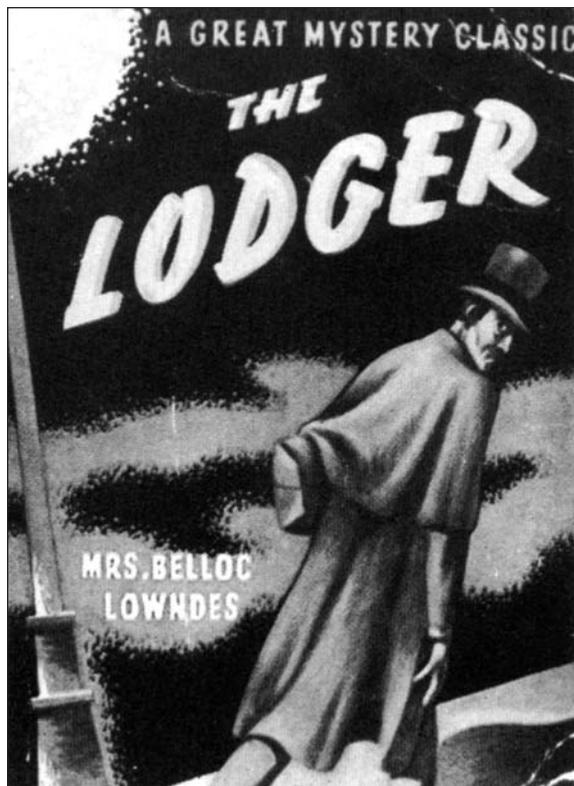

by passions that she could not control, the quiet, repressed Borden visualized murder as a logical step in her quest for sexual liberation. Although no shred of evidence has ever arisen to substantiate Lowndes's claim, her psychological insights and masterful setting of the scene lend a credibility that is further reinforced by its insertion between the factual prologue and epilogue. Unfortunately, the technical skill of the novel has at times been obscured by the prevailing theories about the Borden case. In 1971, both Pearson's and Lowndes's work were caustically attacked by the journalist Edmund Radin, who, decrying the bias of Pearson's assertions, named the Borden servant, Bridget, as the culprit. Since the publication of Radin's own book, *Lizzie Borden: The Untold Story* (1971), opinion generally has been divided between the Lowndes-Pearson and Radin camps. Another theory, rapidly gaining a following, deals with reputed epilepsy and concomitant temporary insanity in the Borden family.

THE LODGER

The Lowndes work that is considered a classic of its kind concerns another famous criminal, Jack the Ripper. *The Lodger* is a complex weaving of Lowndes's preoccupation with criminal history, feminine psychology, and obsessive motivation. It also represents a milestone as the first fictional treatment of a subject that has continued to fascinate connoisseurs of crime; many consider it to be not only the first but also the best fictional reworking of the Jack the Ripper story.

In 1913, Lowndes was still wary of using actual names. Her murderer is called "The Avenger," and all of her references to historical names and details are veiled. So well did she execute this deliberate vagueness that on publication of the work, many critics did not even mention its similarity to the Ripper case. Instead, labeling it a psychological study, they congratulated her for her clinical impartiality.

Rather than focusing on the murderer himself, Lowndes centers her attention on an impoverished former servant named Ellen Bunting. The tale is set in a shabby street near Marylebone Road, London, in an old house whose tenants, to survive, have had to rent their upstairs rooms to lodgers. (Lowndes herself was born in a lodging house in Marylebone, although in a far better section.) The beginning of the novel is a mi-

cosmos of Lowndes's art in suspense writing. The reader is presented with detailed descriptions of an ordinary, middle-aged couple and their house and its furnishings, typical of their class and period. Everything is in order and nothing attracts attention. The thick damask curtains are drawn against the dampness and intrusions from the street. Suddenly, however, the outside world enters with the echoing shout of newsboys crying the late edition of the day's paper. Only one word stands out—murder.

Reading about the series of brutal murders committed during the past fortnight has been Mr. Bunting's only diversion from his financial woes. Slipping out into the street, he guiltily buys the paper and reads it under the street lamp, afraid to return home with his purchase. Remorsefully, he realizes not only that it was wasteful to have spent the sorely needed money, but also that his wife, Ellen, is angered by any reference to immorality or physical violence. Decent people, in her opinion, should be above such morbid curiosity. It is cold and foggy outside, however, and

Bunting slowly enters the house with his paper and sits down to read about the most recent murder. Absorbed in the paper, he does not respond to the sudden knock, and so it is his wife who slowly opens the front door:

On the top of the three steps which led up to the door, there stood the long, lanky figure of a man, clad in an Inverness cape and an old-fashioned top hat. He waited for a few seconds blinking at her, perhaps dazzled by the light of the gas in the passage. . . .

"Is it not a fact that you let lodgings?" he asked, and there was something shrill, unbalanced, hesitating, in his voice. . . .

And then, for the first time, Mrs. Bunting noticed that he held a narrow bag in his left hand. It was quite a new bag, made of strong brown leather.

"I am looking for some quiet rooms," he said.

Ellen Bunting, knowing instinctively that this man is a gentleman, smilingly invites Mr. Sleuth into her home. The Buntings are overjoyed. Financial disaster has been temporarily postponed with the arrival of this most-generous stranger. His oddities do not concern them, for after a lifetime spent in servitude, the Buntings are tolerant of, and even amused by, the eccentricities of the upper classes.

A decrease in suspense and surprise generally accompanies any familiarity with the subject, but, paradoxically, it is the modern reader's detailed knowledge of the Whitechapel murders that increase the drama in *The Lodger*. In 1913, unaware of many of the facts or theories surrounding the case, few readers recognized Lowndes's skill in weaving historical detail or surmise into her fictional pattern. By 1944, the year of the remake of the film *The Lodger*, starring Laird Cregar, the audience was immersed in Ripper lore and thrilled at the first close-up of the small leather bag surrounded by swirling fog. Consequently, the modern reader is well ahead of Ellen Bunting in her discovery of the truth. Such prescience, however, in no way diminishes the novel's impact. The true center of interest has always been Ellen, and it is soon made clear that what the reader knows Ellen would give anything to hide.

Their lodger quite literally represents hope for the Buntings. Without the rent money, they would starve. Moreover, Mr. Sleuth is Ellen's lodger; he trusts her.

In a famous passage, Lowndes analyzes the psychological motivation underlying this protective instinct:

In the long history of crime it has very, very seldom happened that a woman has betrayed one who has taken refuge with her. The timorous and cautious woman has not infrequently hunted a human being fleeing from his pursuer from her door, but she has not revealed the fact that he was ever there. In fact, it may almost be said that such betrayal has never taken place unless the betrayer has been actuated by love of gain, or by a longing for revenge. So far, perhaps because she is subject rather than citizen, her duty as a component part of civilised society weights but lightly on woman's shoulders.

Ellen Bunting feels no obligation to the forces of law and order. As a respectable, nineteenth century woman of her class, she would consider it a mark of shame to be associated with the police. The fact that the beau of her stepdaughter Daisy is a police officer makes no difference. One can have a police officer as an acquaintance or even as a member of the family, but one must not be soiled by his sordid occupation. It is indeed fortunate that this particular police officer, besotted by Daisy, shows no curiosity in the lodger or his odd comings and goings. Ellen is also typical of the psychology of her class and time in her feelings toward the victims. One reason that she can shield the real murderer is that she is not sympathetic toward the dead women. Contemptuous of their class and morality, she believes that they deserve what they get.

It is clear why Lowndes's portrait of Ellen Bunting surprised many critics. The taciturn, prejudiced, unlovely landlady is a far cry from the usual lady in distress. Lowndes has justly been praised by writers such as Ernest Hemingway for psychological insights into the mind of this woman, who slowly becomes a prisoner of her own fear. It is not physical fear; Ellen is afraid not of her lodger but of social ostracism. Lying in bed at night listening for the sounds of Mr. Sleuth's footsteps, Ellen has visions of being identified as the woman who harbored the criminal, which would mean that she and her husband would never get another lodger. Although differing from most of Lowndes's female protagonists in age and class, Ellen, who considers herself to be an extremely decent, religious

woman, is nevertheless like the others in her amoral approach to her problem. Ellen sees no inherent ethical dilemma in sheltering a homicidal maniac. On the contrary, self-interest demands that she keep him safe.

There are times, however, when her resolution wanes. For example, spurred by a need to know if the police are any closer to the truth, she attends the inquest on one of the Avenger's victims. For the first time, a victim becomes human to her, and the enormity of the crimes hits home. Hearing the gruesome details, Ellen becomes physically ill but still cannot bring herself to betray Mr. Sleuth. In fact, she never does. It is not her fault that in a final ironic twist of fate, her loyalty becomes meaningless. At the end, Mr. Sleuth believes that she has betrayed him.

In the best of Lowndes's fiction, suspense lies in the unraveling of an ordinary mind and spirit confronted by unusual circumstances. Lowndes resented being called a crime writer and would have been amazed to discover her name indelibly linked with that of an extraordinary criminal.

ROBERT LUDLUM

Born: New York, New York; May 25, 1927

Died: Naples, Florida; March 12, 2001

Also wrote as Jonathan Ryder; Michael Shepherd

Types of plot: Thriller; espionage

CONTRIBUTION

Each of Robert Ludlum's novels typically features a middle-class American in his mid-thirties, well educated and often financially secure, who can be said to represent a type of twentieth century Everyman. This individual unwittingly and unwillingly faces a Dantesque midlife crisis, becoming involved in events that transcend his own experiences and demand that he respond and react to a life-threatening, often world-threatening challenge as the result of an all-encompassing conspiracy. The particular conspiracy faced by a Ludlum protagonist can be perpetrated by executives of international corporations, members of organized crime, fascists, communists, Middle Eastern terrorists, or religious fanatics, but it always threatens to destroy the ideals and institutions of a way of life.

Ludlum's heroes battle against power, particularly absolute power; monopolistic institutions, whether political, ideological, economic, or criminal, threaten the acceptable status quo that his heroes strive to maintain. In Ludlum's fast-paced writing, with its convoluted plots and its international settings, the confrontation between good and evil is complex but ultimately clear-cut, and the conclusion generally manifests itself in graphic violence. Power and evil, however, are not always permanently defeated; like the phoenix, they rise from the ashes only to be faced again by the hero.

Ludlum himself acquired a phoenix-like quality, publishing for years after his death. A planned mass-market series called Covert-One allowed Ludlum to collaborate with several top-flight suspense writers, such as Philip Shelby and Gayle Linds. Ludlum's name is featured prominently on the covers, but the credit for authorship is somewhat fudged. *The Lazarus Vendetta* (2004) gives Ludlum credit only for "creating" the series. Eric van Lustbader, a popular author of thrillers, was commissioned by the publisher to pro-

duce *The Bourne Legacy* (2005) and *The Bourne Betrayal* (2007). A number of novels appeared, beginning with *The Janson Directive* (2002), that may have been cobbled from Ludlum's notes but clearly were the work of ghostwriters.

BIOGRAPHY

Robert Ludlum was born on May 25, 1927, in New York City, the son of George Hartford Ludlum and Margaret Wadsworth. His family was from the upper middle class, and although his father died when Ludlum was still young, he attended a series of private schools. He became enamored of acting and the theater, and on his own initiative he obtained a part in a Broadway show. Before finishing school, he attempted to enlist in the Royal Canadian Air Force but was rejected because he was underage. He later served in the United States Marine Corps. After leaving the service, he enrolled in Wesleyan University in Middletown, Connecticut, as a theater major. At college he met his future wife, Mary Ryducha, with whom he later had three children. Ludlum was graduated with honors in 1951.

For the next several years Ludlum pursued an acting career. He was moderately successful, playing a number of parts in regional theater, on Broadway, and particularly in television. He became a featured player but never achieved stardom, often playing, he said, a murderer or a lawyer. In the late 1950's he turned to producing plays rather than acting in them, and he established a financially successful theater in a New Jersey suburban shopping center; he later complained that although he personally wished to produce more avant-garde plays, they inevitably were financial failures. By 1970, at the age of forty-three, he was ready for a new beginning.

Ludlum had considered becoming a writer for many years. He took the plot for his first novel from a short-story outline that he had begun years before. After numerous rejections, *The Scarlatti Inheritance* was published in 1971. He continued to supplement his income by doing voice-overs for television and radio advertisements, but by the mid-1970's his novels had be-

To view image, please refer to print edition of this title.

Robert Ludlum in 1986. (AP/Wide World Photos)

come so successful that he was able to write full-time. From their home in a two-hundred-year-old farmhouse in suburban Connecticut, Ludlum and his wife traveled widely. Many notes and photographs from their travels served as research for his novels. On March 12, 2001, Ludlum died in Naples, Florida.

ANALYSIS

Robert Ludlum established both his writing style and his literary themes in his first book, *The Scarlatti Inheritance*. Although his style and themes were to be subsequently refined, what he discovered then has proved to be successful in his later novels. Long an avid reader of history, Ludlum considered the question of how the Nazis came to power in Germany. His answer, in fiction, was that they were supported by a small number of ruthless and ambitious international

financiers, including Americans, who hoped to create an economic superpower. The conspiracy was discovered by a lone American intelligence officer who successfully dealt with the threat in an equally ruthless and violent manner. As with his later books, no reviewers praised Ludlum's style, but most were captivated by the energy and entertainment of the fast-moving story. The plot was convoluted and improbable and the writing melodramatic, but the formula worked. Various themes in his first novel would reappear in later ones: the relatively powerless individual who accidentally stumbles across a larger-than-life conspiracy to do evil, historical issues regarding the Nazi movement, and various international settings.

THE OSTERMAN WEEKEND

His next two novels saw Ludlum restrict his locale to the United States. He possibly perceived that in

spite of the success of his first book, he was not yet ready to deal fully with such broad historical and international topics, even through his imaginative fiction. *The Osterman Weekend* (1972) continued the precedent established by his first novel of a three-word title (which was followed in all the novels published under his own name), but instead of ranging over years and countries, the story is played out in only a few days in a New Jersey suburb. Four couples are invited to the home of John Tanner, but just before the party Tanner is approached by a supposed Central Intelligence Agency (CIA) agent who warns Tanner about an international conspiracy of financial fanatics known as "Omega" and tells Tanner that it is likely that at least some of the invited guests are members of that secret order. Over the course of a few hours, tension and paranoia become paramount, violence occurs, the CIA fails to protect the innocent, and Tanner is forced to save the day himself. Ludlum, who has identified himself as a political liberal of the 1950's, has stated that "What I don't like in the world is largeness—large corporations, large governments." His moral anger at such conglomerations of power is a recurring theme in his novels.

THE MATLOCK PAPER

In his third novel, *The Matlock Paper* (1973), Ludlum keeps his scenes in the northeastern United States. James Barbour Matlock, a young English professor at Carlyle University (possibly modeled on Ludlum's own Wesleyan), becomes involved in a conspiracy, known as Nimrod, which aims to control the narcotics trade in New England. Both college officials and students have been sucked into the corrupt maelstrom of Nimrod. Matlock is approached, as was John Tanner, by officials of the United States government, but the government agency is unable to protect Matlock, and he is forced to become increasingly involved, resorting to violence to expose and defeat Nimrod.

The basic plots of Ludlum's earliest books were improbable but compelling. If professional historians remained doubtful about the existence, much less the efficacy, of the various conspiracies that Ludlum proposed, nevertheless he had succeeded in touching deep chords in many modern readers. Since the end of World War II, questions concerning the rise of communism in China,

the acquisition of atomic secrets by the Russians, the assassination of John F. Kennedy, the motives for American involvement in Vietnam, and the Watergate conspiracy have puzzled Americans. Most persons refused to believe that these situations were the result of mere chance, accident, bad luck, long-term historical trends, or abstract forces. Instead, they were seen as the result of conscious human actions inspired by alien ideologies, immoral ambitions, superhuman greed, or fanatic commitments. In the bureaucratic world of the mid- and late twentieth century, the antagonist was not merely a single individual but a group of dedicated fanatics, acting together, secretly, with unlimited goals and demands aiming toward total power. Ludlum understood these fears: "We're living in a time when you can't take things at face value anymore. This is no longer the age of Aquarius—it's the age of conspiracy." To that insight he added fast-paced writing, complex plots, exotic locations, and considerable violence. His books became international best sellers.

TREVAYNE, THE CRY OF THE HALIDON, AND THE ROAD TO GANDOLFO

After the success of his first three novels, Ludlum, for some unexplained reason, published two novels, *Trevayne* (1973) and *The Cry of the Halidon* (1974), under the pseudonym Jonathan Ryder, a variation on one of his wife's acting names. Both novels concerned conspiracies engendered by international finance, and both were set on the exotic Caribbean island of Jamaica. In an interesting if not entirely successful change of pace, during that same period he also published *The Road to Gandolfo* (1975), under the pseudonym Michael Shepherd, in which he seems to be spoofing his own work, or at least his chosen genre. The plot revolves around the kidnapping of a pope by a military figure aiming at financial and political power, but the typical Ludlum theme is handled humorously and satirically. Under his own name, Ludlum always presents his conspiracies with great seriousness: "I take my work very seriously, and I generally write about something that outrages me as a man."

THE GEMINI CONTENDERS

The Gemini Contenders (1976) was one of Ludlum's most ambitious and successful novels. The story begins in the early days of World War II but only sec-

ondarily concerns one of his perennial bêtes noires, German fascism. The plot progresses to the waning days of the Vietnam War, but one of the most significant events in the novel occurred almost two thousand years before. No other Ludlum novel has covered so many centuries. Less unusually but still impressively, the story travels around the globe, from its beginnings in Greece and Italy, to England, to the United States—Washington, New England, and New York City—to Vietnam, and back to Europe. As is usual in Ludlum's books, the background detail adds considerably to the veracity of the plot, but the geographical and historical information never detracts from the story line and the dynamic energy of the writing. Ludlum has observed, "As Shaw once said, if you want to convince somebody, entertain him. That's what I try to do. In the theater you can't bore people. They'll walk out." Ludlum rarely bores the reader.

Ludlum generally begins his novels with the hypothetical question "What if?" In *The Chancellor Manuscript* (1977), the author asks what if J. Edgar Hoover had been assassinated instead of dying of natural causes? In *The Gemini Contenders*, Ludlum poses to the reader the possibility that a long-secret, first century C.E. document concerning the origins of Christianity exists. For many centuries the document has been kept in total secrecy by a fanatical order of Greek monks, but in the early days of World War II it was deemed too dangerous for it to remain in its traditional place of hiding. In the event of a Nazi invasion of Greece, the document might be discovered and then used by the German government to create religious differences within the Christian community and thus weaken the allied cause, facilitating Adolf Hitler's dream of establishing his Third Reich for a thousand years.

As usual in Ludlum's plots, the story's resolution involves a secret and corrupt conspiracy that entangles the hero; in *The Gemini Contenders*, however, the heroes are twin brothers, grandsons of the only man who knew the hiding place of the secret document. One twin, Andrew, is a professional soldier and a war hero in Vietnam; the other, Adrian, more reflective, has become a lawyer. Like Cain and Abel, the brothers become antagonists. Both, however, are committed to

rooting out corruption—Andrew in the military, Adrian in government and business. Ludlum has claimed, "I have one true loathing—for fanatics of all persuasions, right or left," and in his desire to cleanse the military, Andrew has become a fanatic. He and several of his comrades have formed a secret organization known as Eye Corps. It is a typical example of one of Ludlum's conspiracies: Secret and elitist, it follows its own rules, and regardless of its initial beneficial goals, it has become seduced by the vision of power and aims at taking over the United States Defense Department and, in effect, the country itself. In *The Chancellor Manuscript*, the secret elite group dedicated to preservation and betterment of the country is a small cadre of elder statesmen known as Inver Brass. In time, individual members of the secret organization also turn from the light to the darkness. Ludlum is consistent throughout his novels in portraying the corrupting effects of power, and secret power is the most dangerous.

In most Ludlum stories, issues and confrontations are resolved only through violence, and *The Gemini Contenders* is no different. When accused of glamorizing mayhem, Ludlum responds to his critics: "Have they read Sophocles? What about Aeschylus? C'mon, this century has not exactly been all roses. I use violence because it is realistic to my plots, but I do not romanticize it." Ludlum's use and description of violence has not only furthered his plots but has also undoubtedly contributed to his great popularity. By the time of the final battle between Andrew and Adrian, literally scores of characters—men, women, and children, the young and the old—have been most graphically maimed and murdered. Ludlum describes Andrew's death in the following manner:

The soldier's hand was in the grave. He whipped it out. In his grip was a rope; he lurched off the ground, swinging the rope violently. Tied to the end was a grappling hook, its three prongs slashing through the air.

Adrian sprang to his left, firing the enormous weapon at the crazed killer from Eye Corps.

The soldier's chest exploded. The rope, held in a grip of steel, swung in a circle—the grappling hook spinning like an insanely off-course gyroscope—around the soldier's head. The body shot forward, over

the sheet of rock, and plummeted down, its scream echoing, filling the mountains with its pitch of horror.

With a sudden, sickening vibration the rope sprang taut, quivering in the thin layer of disturbed snow. . . .

. . . He [Adrian] limped to the edge of the plateau and looked over the sheet of rock.

Suspended below was the soldier's body, the grappling hook imbedded in his neck. A prong had been plunged up through Andrew's throat, its point protruding from the gaping mouth.

Thus Ludlum's originally unwilling and unwitting individual triumphs over fanatics and conspiracies; Abel/Adrian kills Cain/Andrew. However, in Ludlum's novels, the triumph is not necessarily permanent or clear-cut. At the end of *The Gemini Contenders*, Adrian has finally discovered the message of the secret document, the message that could threaten the world's stability: It was not Christ who died on the cross but an impostor, and Christ himself committed suicide three days after the Crucifixion. The novel ends with Adrian neither releasing the document to the public nor permanently ensuring its secrecy by destroying it; he decides instead to keep it secret for the present, bearing the burdens of it himself, an existential act that perhaps represents Ludlum's ideal human quality.

THE BOURNE TRILOGY

In the second decade of his prolific writing career, Ludlum began to carry characters from one book to the next. Jason Bourne, the American suffering from amnesia in *The Bourne Identity* (1980), was brought back for further conspiratorial adventures in both *The Bourne Supremacy* (1986) and *The Bourne Ultimatum* (1990). The secret group Inver Brass, introduced in *The Chancellor Manuscript*, reappeared in *The Icarus Agenda* (1988), Sam and the Hawk, from Ludlum's satirical *The Road to Gandolfo* (written under the Shepherd pseudonym and republished in 1982 under Ludlum's name) were revisited in the similarly humorous *The Road to Omaha* (1992), while rowdy Brandon Scofield from *The Matarese Circle* (1979) returned in *The Matarese Countdown* (1997) to once again battle maniacal Matarese members intent on dominating the world.

THE COVERT-ONE SERIES

After five more bestsellers in the 1990's, Ludlum decided to try something different—a paperback origi-

nal, *The Hades Factor* (2000), as the first in a series called Covert-One, similar to Tom Clancy's hugely popular OpCenter and Net Force books. Cowritten with Gayle Lynds, the thriller followed Ludlum's usual tenets of terrorism and conspiracy, this time involving biological warfare.

THE SIGMA PROTOCOL

Ludlum's last novel, *The Sigma Protocol* (2001), was widely considered one of his finest. As its release was nearly coincident with his death, the work probably was authored by Ludlum himself. His publisher, St. Martin's, let it be known at the time that there were a number of unpublished manuscripts, but it is doubtful that these were anywhere near ready for publication. Ghostwriters were certainly employed to finish the incomplete works, and it is speculated that much that has been published under Ludlum's name has been written entirely by other hands.

Ludlum's characters and plots also gained wider exposure through film adaptations: *The Scarlatti Inheritance*, *The Osterman Weekend*, and *The Holcroft Covenant* (1978) were made into major motion pictures and later released on video; *The Rhinemann Exchange* (1974), *The Bourne Identity*, and *The Apocalypse Watch* (1995) were transformed into television miniseries. Though critics greeted the films in much the same way reviewers did the books—lamenting the overwrought plots filled to capacity with ultraviolence—audiences were willing to overlook contrivance for a chance to see a Ludlum adventure on celluloid. In 2002 Ludlum's film reputation improved with the release of *The Bourne Identity* starring Matt Damon as Jason Bourne.

PRINCIPAL SERIES

87th Precinct, 1956-2005

Matthew Hope, 1978-1998

PRINCIPAL SERIES CHARACTERS

STEVEN LOUIS CARELLA, the 87th Precinct's senior police detective, is between thirty-five and forty years old. Tall, athletic, and of Italian descent, he is devoted to his wife, a beautiful deaf-mute, and to their twin children. Honest, intelligent, tenacious, and experienced, Carella is humanized by his humor, temporary defeats, and concern for denizens of his hard world.

TEDDY CARELLA is Steven's wife and a source of tenderness, intrepidity, and insightful intelligence. She provides her husband with his emotional compass.

THE DEAF MAN, who periodically appears in the series, is a cunning, big-city superhood who delights in challenging the police. Often Carella's nemesis, he is a ruthless, streetwise variation of Sir Arthur Conan Doyle's Professor Moriarty.

COTTON HAWES is an 87th Precinct detective who often works with Carella. Named for Cotton Mather, Hawes loves the police officer's existence, looking up at society's underbelly. He has a sense of outrage and is one of the few characters allowed brief bursts of social commentary, particularly on the degradations of life in the streets of slums.

MEYER MEYER, a veteran, middle-aged 87th Precinct detective, is a source of humor and commonsensical morality.

ARTHUR "BIG BAD LEROY" BROWN is a huge, experienced, thoughtful black detective. When teamed with Teddy Carella, understated musing on race relations attends their conversation and interactions.

BERT KLING is a white, midwestern hayseed. Self-conscious about his relative inexperience as a police officer in earlier volumes, he matures somewhat as the series does.

EILEEN BURKE is a female detective and past par amour of Kling, whose presence and secondary story line recurs in later volumes.

CONTRIBUTION

Ed McBain's fifty-plus 87th Precinct novels rank him among the most prolific authors of police procedurals. Acclaimed the best in this genre by, among others, the Mystery Writers of America, McBain won a Grand Masters Award in 1986. His knowledge of police methods was thorough and convincing; the 87th Precinct novels focus on them with a ruthless economy that adds to their excitement, information, and entertainment. In spite of this singular concentration, McBain nevertheless managed to present his readers with several plausible, three-dimensional—though never complex, profound, or overpowering—characters who operate in an otherwise largely implied, lightly sketched and labeled urban landscape. McBain's special skill lay in his keen depiction of these characters as trackers and the unwavering quality of his narrative gaze. A major contribution of the 87th Precinct series to the genre has been to establish the ensemble detectives scenario in the popular consciousness. Long before the television series *Hill Street Blues* (1981-1987)—which many readers believe was based on McBain's series—the detectives of the 87th Precinct set the standard for intelligent police procedural featuring a group cast. In addition,

McBain's Matthew Hope series, begun in 1978 and concluded in 1998, as well as suspense and mystery novels written outside the two series, furnish the genre with many compelling, complex, and involving works.

BIOGRAPHY

Ed McBain, who legally changed his name to Evan Hunter in the 1950's, was born Salvatore A. Lombino, the son of Charles Lombino and Marie Lombino, in New York City on October 15, 1926, and reared during the first dozen years of his life in an Italian slum. He attended Evander Childs High School in the Bronx, where his family had moved in 1938. Following graduation, he went to New York City's Art Students' League on scholarship and from there to Cooper Union Art School. Hunter's own self-estimate, however, was that his artistic talents ranged well below those of his fellow students. He had enjoyed writing for his high school literary magazine, and when he joined the Navy in 1944, he started writing once again. After more than a year of service on a destroyer in the Pacific, he left the Navy and entered Hunter College. In 1950, he was graduated Phi Beta Kappa with a bachelor's degree in English. In

1949, he married Anita Melnick, a classmate at Hunter College; they had three sons. The marriage eventually ended in divorce, and Hunter married Mary Vann Finley in 1973.

Until 1954, Hunter held various jobs: He was a substitute teacher in New York vocational schools, worked for a literary agency, answered the night phone at the American Automobile Club, and sold lobsters for a wholesale firm. Although by 1954 he had published nearly one hundred short stories and had written several novels as Evan Hunter and under various pen names, *The Blackboard Jungle* (1954) was the first to bring him success.

The first novel Hunter published under the name Ed McBain was the initial 87th Precinct novel *Cop Hater* (1956). The author maintained a stylistic distinction between his more literary Hunter persona and his grittier McBain alter ego. The McBain name became so well established, however, that works originally published under Hunter's other pseudonyms were eventually reissued under the McBain byline.

Hunter wrote the screenplay for Hitchcock's late masterpiece, *The Birds*, and a number of television movies of the 87th Precinct novels have been made. His frank *Let's Talk* (2005) describes the author's fight with throat cancer and the difficult adjustment to living without a voice. Hunter died on July 6, 2005, from cancer of the larynx. *Fiddler*, the final installment in the 87th Precinct series, was published posthumously in 2005.

ANALYSIS

Ed McBain was a serious, versatile, prolific, and successful writer. His 87th Precinct police procedurals were usually written in about a month, yet they were and are appreciated by large audiences, who are more familiar with Ed McBain than with Evan Hunter. Indeed, McBain's works effectively replaced those of Erle Stanley Gardner and Georges Simenon, among others, as a standard on the bookstores' mystery and detective fiction shelves.

McBain's appeal is explicable in several ways. Clearly, he intended to entertain with swiftly moving, dramatic stories. In addition, he clearly entertained himself in the sense that he was free to explore any

To view image, please refer to print edition of this title.

Ed McBain in 1976. (AP/Wide World Photos)

subject matter so long as it related to his characters' criminal investigations. This freedom allowed him considerable range. Indeed, his work offers glimpses of a Dickensian array of characters: junkies, medical examiners, prostitutes, actors, patrolmen, psychologists, lawyers, businessmen, burglars, arsonists, psychopaths, gang members, homemakers, social workers, clergy, district attorneys, female police officers, and politicians. The list, if not inexhaustible, is extensive.

Considerable appeal also stems from McBain's clinical concentration on the crime. A corpse is discovered—hanged, beaten, shot, dismembered, poisoned, drowned, or overdosed—and everything subsequently concentrates on how it came to be where and what it was. Kept distinct are whatever effects the corpse and the crime may have on shaping those who are involved with it or are enmeshed in the crime. The detailing of violence is employed not to titillate or to provoke but to underscore the fact that violence, senseless and otherwise, is part of a police officer's daily reality. Nauseating situations are normal.

THE 87TH PRECINCT SERIES

The 87th Precinct's professional survival—and sanity—thus depends on the extent to which its individuals understand, have mastered, and have a feel for certain unvarying procedures “as disciplined as the pattern of a bull fight.” McBain holds his readers because his knowledge of those procedures (learned from the New York and Florida police) has a professional imprimatur. It is the application of procedures, authoritatively unfolded by McBain, that is central to every novel.

Descriptive background in the 87th Precinct stories is minimal. New York City is called simply Isola; it is divided into five sections, as dissimilar as foreign countries. There are the River Harb and the River Dix (Styx), which surround the city; Calm's Point (ironically, a dangerous section); West Riverhead; Lower Isola; the Gold Coast; and Cloak City (a garment center, in later books Coke City).

Principal characters in the 87th Precinct stories are also sketchily described. Detective Steve Carella is merely a tall, athletic man in his late thirties or early forties with somewhat slanted, Asian eyes. However, Carella, as much as anyone, is the central figure. So it

is with the other precinct detectives. McBain's rough characterization reflects his view of the police and the nature of their work. Like an army, Isola's police force is a vast, hierarchical organization, and detectives are only organization men. He has compared them to account executives, a notoriously cutthroat profession, yet detectives have a singular difference: They view the myriad forms of death daily. In McBain's corpus, police officers witness the slow, individual decay of the slums' inhabitants. Each day, they witness the death in the addicts' search for heroin; the death by confinement for burglars, thieves, pimps, hustlers, muggers, and killers; the death of the whore's honor and integrity under repeated sexual stabbings; the death of street gangs, which live in fear and use violence to banish it; and the death of love in ordinary and deadly domestic violence. McBain's detectives focus on the case, probe for information with their tested methods, in the hope that “another one” can be filed. Nevertheless, McBain registers their recognition that their procedures are often intrinsically inadequate, that with nothing to go on, the police often have little chance of solving many murders, and that chance and coincidence, as much as the skillful adherence to procedure, frequently illuminate and resolve the crime.

Given this setting, in which organization and procedure are paramount, the detectives, not without passion, are pushed toward functioning as emotionally uninvolved trackers and observers. Consequently, while McBain certainly does not treat the precinct's detectives as interchangeable parts, he realistically depicts them as a unit. When Carella is not on center stage, Cotton Hawes, Meyer Meyer, Arthur Brown, and Bert Kling, among others, carry on. In such a context, McBain uses situations—rather than lengthy descriptions, extended conversations, stream-of-consciousness ruminations, or one character's analysis of another—to define them as individuals.

In this sense, his 87th Precinct detectives are relatively dull and unimaginative fellows—relative, that is, to the people whom they encounter and pursue. McBain merely illustrates something that every newspaper reporter and his readers accept: Crimes and criminals, as a rule, are perceived as intrinsically more interesting than the badge-numbered organization

To view image, please refer to print edition of this title.

When Manhunt Detective Story Monthly printed one of Ed McBain's stories in a 1955 issue, it called attention to his recent bestseller Blackboard Jungle, a dramatic story about a teacher in a rough inner-city high school.

men and women who try to stop them. McBain, who ably recounts what the police do and how they do it, copes with this perception in two ways. He gives a third dimension to the detectives: Carella's devotion to his family and his belated recognition in high school that he was not only an Italian but an Italian Jew as well; Cotton Hawes's continual embarrassment, on and off the job, because of his name (and as far as readers are concerned, because of the fact that he is puritanical); Meyer Meyer's unblinking defense of his ridiculously apparent toupee, his avuncular insistence on lecturing a junkie, and his delight in discovering a murder victim whom he knew—so that for once there is a name for the detectives to use; and Bert Kling's horror, when, turning over a murder victim, he discovers that it is his fiancé and his delight in marrying a gorgeous model, only to be cuckolded within months—

all of these touches humanize most of the precinct's seventeen detectives.

Further plays of imagination and injections of color come from those whom detectives interview, interrogate, and pursue, although none of these characters rises to the stature of the Deaf Man. A quintessential villain, the Deaf Man is also the quintessential embodiment of criminality. He taunts and challenges Carella and the precinct with clues to past or impending crimes; he flaunts his disguises, changes his appearance and name; he apparently dies a number of deaths but phoenixlike rises again; he recruits and when necessary abandons his dupes; he is a virtuoso murderer, thief, arsonist, con man, and layer of false trails; and he is to the precinct a perpetual reminder that crime always pays for some, that criminality is perpetual and elusive.

THE MATTHEW HOPE SERIES

In 1978, McBain brought out the first of his Matthew Hope novels. *Goldilocks* inaugurated a series in which the lead investigator begins as a newly transplanted (from New York to Florida) civil attorney who soon turns to criminal law—hardly a surprising career move given the bodies that pile up around his practice. Each fairytale-themed title refers to a particularly gruesome crime; its motive is always bestial and its principals are frequently irresistible beauties. Hope is not as skeptical as he ought to be and is inclined to believe a woman's story, whether she is a grouchy old garden maven with three children buried in the yard or an asylum inmate with a billion dollars coming her way. Hope's optimism leads him into dangerous situations, and he often cannot penetrate the veils of deceit in which his clients are naturally swathed. Readers tended to enjoy the occasional, more freeform Hope diversion between the tightly woven procedurals of McBain's better-known series.

LATER WORKS

Near the end of his life, McBain apparently intended to create a new series. His last completed work, *Alice in Jeopardy* (2005), was to be followed by *Becca in Jeopardy*, though that manuscript remained unfinished. Alice, in a departure for McBain, is let down in her hour of need by infighting authorities and must strike out on her own in search of her abducted chil-

dren. Set in southwest Florida, where McBain had not ventured since ending his Matthew Hope series, the author once again provided his readers a balmy break from the precinct after *Fiddlers*, the last book featuring Carella and his colleagues.

The 87th Precinct books matured and deepened over the years. Entries such as *Lullaby* (1989); *Mischief* (1993), which features the return of the Deaf man; *Nocturne* (1997); *The Last Best Hope* (1998), which brings together the principals of the Matthew Hope series with the 87th Precinct detectives; and *The Last Dance* (2000) have the strength and freshness of true virtuosity. Violence, emotion, sex, insights and musings on the fraught and continual decay of urban life, bad jokes, and black humor blend together with McBain's trademark procedural and forensic veracity, understated characterizations, well-realized, tautly paced plots into cogent stories with essentially American, urban hearts. His detectives—brave as they can be—mostly are neither heroes nor antiheroes. They persistently, humorously, at times foolishly and sometimes successfully proceed against the worst human products of those values and environs inimical to the American self-image.

Obituary summarizes Hunter's career, focusing on his popular 87th Precinct series and noting his Matthew Hope series and early success. Describes some of his private life as well.

Vicarel, Jo Ann. *A Reader's Guide to the Police Procedural*. New York: G. K. Hall, 1995. A helpful source for short entries. Covers 271 writers and more than one thousand titles, including Ed McBain and many of his novels.

ALEXANDER McCALL SMITH

Born: Southern Rhodesia (now Zimbabwe); August 24, 1948

Types of plot: Private investigator; amateur sleuth; cozy

PRINCIPAL SERIES

The Number One Ladies' Detective Agency, 1998-

The Sunday Philosophy Club, 2004-Scotland Street, 2005-

PRINCIPAL SERIES CHARACTERS

PRECIOUS RAMOTSWE is the founder and chief investigator of the Number One Ladies' Detective Agency in Gaborone, Botswana. The congenial and wise Ramotswe is as capable of revealing the mysteries of the human heart as she is clever in solving the cases her clients present. Her signature pleasure in life is indulging in a cup of red bush tea.

MR. J. L. B. MATEKONI is Ramotswe's suitor and eventual husband. The owner of Tlokweng Road Speedy Motors, Matekoni is a skilled and honest mechanic. Although Ramotswe appreciates his repairs on her tiny white van's erratic engine, it is his high moral standards and kindness that attract her respect and romantic interest. In one story, Matekoni undertakes an investigation himself but afterward decides to stick to what he knows best—being a mechanic.

GRACE MAKUTSI advances from secretary to assistant detective at the Number One Ladies' Detective Agency. Makutsi is renowned for earning a 97 percent in her final exam at the Botswana Secretarial College. Her intelligence is matched by her heart; she provides for her ailing brother financially and emotionally until his death from an ailment that appears to be AIDS. She supplements her meager agency income with monies from her typing school for men.

ISABEL DALHOUSIE is an amateur sleuth and degree-bearing philosopher whose knowledge of ethics helps her unravel mysteries in Edinburgh, Scotland. Born of an American mother and a Scottish father, a family inheritance has left her financially independent. When

not sleuthing, she edits the *Review of Applied Ethics* and hosts the Sunday Philosophy Club.

CAT is Isabel's niece, a young independent woman in her twenties who owns and manages a local delicatessen. Though Cat's predilection for fast cars and faster men concerns her aunt, the two women maintain a close relationship.

JAMIE is a musician who supports himself playing bassoon in a chamber orchestra and offering private lessons locally. Smitten with, but rejected by, Cat, the soulful Jamie develops a growing friendship with, and interest in, her Aunt Isabel.

CONTRIBUTION

Alexander McCall Smith's mystery series, particularly the Number One Ladies' Detective Agency series, have gained a wide and loyal following of readers worldwide, but critics are divided on the worth of his contributions to the genre as a whole. Although some critics term his emphasis on human decency a retreat from the harsh realities of the modern world, others laud his focus on values as either an antidote to or an expansion of those realities. In an age when many espionage and true-crime stories are ripped from the headlines, McCall Smith seemingly draws his inspiration from otherwise underreported, and perhaps undervalued, stories of human interest.

Whether McCall Smith's mystery series are set in the remote but developing country of Botswana, or the established metropolis of Edinburgh, Scotland, his principal characters are women and men of conscience who strive to live decent lives. To take action in response to an outright crime or to investigate a mysterious circumstance is a moral choice on their parts. Characters such as Precious Ramotswe and Isabel Dalhousie choose involvement in the lives of others and in their communities in cases where others, in fiction and in life, would most likely remain apathetic.

BIOGRAPHY

Alexander Alasdair McCall Smith (also known as McCall-Smith) was born in the British colony of

Southern Rhodesia (now Zimbabwe) in 1948. As a child he was educated in Bulawayo, and as a young man he earned his law degree from the University of Edinburgh in Scotland. Following his graduation, he returned to Africa, accepting a position at the University of Botswana. There he helped develop a program of study in law and assisted in the writing of Botswana's inaugural criminal code. That McCall Smith returns to these familiar and beloved locales in his mystery series is a testament to their impact on his development as a man of both law and letters.

In the late 1970's, McCall Smith began coauthoring nonfictional books on medical law and ethics. His first solo ventures in fiction were stories for children published in the 1980's. Although he continues to publish works of nonfiction and children's literature, the 1998 debut of *The Number One Ladies' Detective Agency* and subsequent entries in the series led to his success as a writer of mysteries. Two additional mys-

Alexander McCall Smith in 2004. (Chris Watt/
Library of Congress)

tery series have followed in its wake: the Sunday Philosophy Club and the Scotland Street series. A fourth, the von Igelfeld series, features the antics of a German professor of linguistics. The von Igelfeld books are not mysteries in the vein of his other series but rather broad comic novels.

As an academic, McCall Smith held the post of professor of medical law at the University of Edinburgh and was, on two occasions, a visiting professor at Southern Methodist University School of Law in Dallas. He is retired from classroom teaching and is now professor emeritus of the School of Law at the University of Edinburgh. He served with distinction as vice chair of the Human Genetics Commission of the United Kingdom, as chair of the Committee for British Medical Ethics, and as a member of the United Nations Educational, Scientific, and Cultural Organization International Bioethics Commission. Increasing obligations as an author, including international book tours, forced his withdrawal from these committees, but he remains supportive of their work.

ANALYSIS

What distinguishes mysteries written by Alexander McCall Smith is his almost singular focus on morality. Although a number of other writers include ethics in the mysteries they concoct, McCall Smith typically reverses the focus in his works. His protagonists' chief interests lie in examining the morality (or lack thereof) of human behavior contributing to the predicament; only then are the mysteries themselves explored and ultimately resolved. In interviews, he admits his penchant for writing mysteries featuring women with a heightened moral compass and an intuitive sense for detection, such as Precious Ramotswe and Isabel Dalhousie. He has acknowledged his personal interest in moral issues. Certainly his background in jurisprudence and medical ethics has prepared him to write knowledgeably on the subject.

Often McCall Smith's protagonists are less focused on solving mysteries than they are on resolving human dilemmas. That success in the latter often leads to a break in the former is indicative of how his characters operate. The maintenance of personal relationships is crucial to the establishment of community trust and

openness. As Ramotswe observes of her line of work in *In the Company of Cheerful Ladies* (2004), “Sometimes we are able to do something that helps somebody else. That is the important thing. That makes our job a good one.”

In the case of the Number One Ladies’ Detective Agency series, McCall Smith’s depiction of the lands and villages skirting the Kalahari Desert creates a literary terrain that is at once curiously exotic and comfortably familiar. Although the foliage (Namaqualand daisies and Tsama melons) described by the author may be unfamiliar to many readers, the human dilemmas, foibles, and hardships are not. Cheating husbands, embezzling employees, and blemished beauty queens are universal in their apparent normalcy.

Although subsequent series centered in Edinburgh may seem less exotic than Gaborone, Botswana, McCall Smith’s depictions of human life still combine the ordinary with the extraordinary in ways that charm. In the Sunday Philosophy Club series, Isabel Dalhousie witnesses unusual circumstances in common environments, such as a body falling from an upper balcony at an opera house and a coffee shop admission by a stranger that he has acquired, in addition to a new heart, the emotional memories of the donor. The Scotland Street series features an ensemble of characters representing cross sections of Edinburgh society. The rooming house at 44 Scotland Street is the ultimate urban landscape in which to explore social values and behaviors as exemplified by its inhabitants, among them a domineering mother, a narcissistic young man, and a struggling writer.

Certain authors of mystery novels, such as Patricia Highsmith and Robert Bloch, turn to the social science of psychology to account for criminal acts. McCall Smith, like the chief protagonists he creates, relies on moral philosophy to examine the choices men and women purposefully make. Rather than explain away their behaviors, he holds his characters accountable for their actions.

THE NUMBER ONE LADIES’ DETECTIVE AGENCY

In *The Number One Ladies’ Detective Agency* (1998), which launched McCall Smith’s career as a best-selling author, Precious Ramotswe is Botswana’s

best and only female detective, hence the name of the agency. After receiving her deceased father’s estate (he bequeathed to her his cattle), Ramotswe sold most of the livestock and invested in a detective agency. The mysteries that require her attention are primarily domestic in nature: missing husbands, recalcitrant daughters, cheating spouses. An unconventional private eye, on occasion she abandons the advice of Clovis Andersen’s *The Principles of Private Detection*, which she used to start her agency. Rather than spy on suspects, she prefers to contact them and ask straight out what they have done. Frequently, and perhaps in response to her own forthrightness, clients and suspects respond with the truth or reveal more than they intend. Ramotswe then offers them advice on what might be done to remedy situations. Not a typical female detective, she is the only one of her kind in Botswana and perhaps in the genre.

IN THE COMPANY OF CHEERFUL LADIES

Critics have lauded *In the Company of Cheerful Ladies* (2004) as McCall Smith’s best addition to the series. The sixth in the series, this novel focuses on the efforts of Precious Ramotswe and her assistant Grace Makutsi to locate a missing financier. Their goal is complicated by other curious events that claim their attention: a stranger hiding under the bed who loses his trousers in flight, a pumpkin that appears overnight in the garden, a mysterious woman in a Cadillac who lures Charlie from his apprenticeship at Tlokweng Road Speedy Motors, and the disappearance of Ramotswe’s beloved white van. Moral dilemmas abound and are less readily resolved. At what point does society allow a former convict to reenter its ranks? Can Ramotswe, content in her marriage to J. L. B. Matekoni, handle the reappearance of her former lover, jazz musician Note Mokoti, particularly when he tries to extort money from her? That the perseverant Gaborone detective succeeds in resolving these dilemmas is not surprising; following her own advice, she keeps the channels of communication—and her eyes—open.

THE SUNDAY PHILOSOPHY CLUB

The Sunday Philosophy Club (2004), the first in the series, introduces readers to Isabel Dalhousie, the philosopher sleuth who tackles moral quandaries and unsolved crimes with equal intelligence and composure.

A resident of Merchiston, an area of Edinburgh that is also home to Alexander McCall Smith, the independently wealthy Dalhousie finds herself exploring other sections of the city in search of an explanation for the mysterious death of a young man following a symphony performance. Though his tumble from a balcony is deemed an accident by the police, Dalhousie intuits otherwise. The chief question posed by this novel is to what extent people should involve themselves in the lives of others, strangers and family members alike. It is the first of many ethical dilemmas that McCall Smith tackles in the series.

44 SCOTLAND STREET

The creation and design of *44 Scotland Street* (2005) differ from those of McCall Smith's previous mysteries. The novel was originally serialized in 110 installments in *The Scotsman* newspaper. Rather than rely on a sole protagonist, *44 Scotland Street* is populated by a cast of interesting characters, no one more important than the others. Frequently characters are driven by their need for self-advancement: the mother who pushes her talented son to extremes in the hope of creating a prodigy; the surveyor who aims to join the country club elite; the son of a gallery owner who hopes to make his way in the world independently. The whodunit involves the disappearance of a work of art and the detective talents of author Ian Rankin, but as is the case with McCall Smith's other series and characters, the more compelling mysteries are those surrounding the human heart.

CHARLES McCARRY

Born: Pittsfield, Massachusetts; June 14, 1930

Types of plot: Espionage; psychological; thriller

PRINCIPAL SERIES

Paul Christopher, 1973-

PRINCIPAL SERIES CHARACTER

PAUL CHRISTOPHER, a government agent, has spent his entire adult life working for the Central Intelligence Agency (CIA), which he knows as the Outfit. Indeed, his work represents a family commitment, because his father was one of the first agents to serve in the Office of Strategic Services (OSS), the CIA's precursor. Although he is entirely loyal to the Outfit, Christopher remains a loner, developing plans of action that sometimes conflict with the agendas of other

agencies and government officials. Although he tries to maintain a satisfying private life, his need for secrecy constantly puts him at odds with the women with whom he becomes involved.

CONTRIBUTION

Charles McCarry's novels have often been compared to the espionage thrillers of John le Carré. McCarry's characters are also caught in the morally ambiguous Cold War world of agents and double agents. Like le Carré's George Smiley, McCarry's Paul Christopher carries out his duties as a government agent (in the novels the CIA is called the Outfit) while he realizes that his own side engages in dubious, unethical, and even evil actions to protect national interests.

Christopher's personal life, like that of Smiley, suf-

fers because of his need to be secretive and contain his emotions. A decent man who refuses to carry a gun, Christopher is often at odds with the Outfit's programs, although he usually finds a way to operate within the system even as he risks termination.

Christopher differs from Smiley, however, in that his moral purpose is never compromised. However opposed he may be to the Outfit's policies, his ability to gather intelligence and to determine the identities of the real enemies makes Christopher not only a survivor but also the holder of a point of view about the covert world of espionage that is quite different from that of Smiley. That Christopher has moral convictions that he never relinquishes actually makes him a better agent than anyone else in the Outfit. In other words, his morality is not a luxury but a necessity.

Whereas le Carré exposes the corruption on both sides of the Cold War, McCarry, through the indomitable Christopher, suggests a "third way," a personal code of conduct that makes his series hero an exemplar of values that neither side can warp.

BIOGRAPHY

Charles McCarry was born in Pittsfield, Massachusetts, on June 14, 1930. His father, Albert, was a farmer and his mother, Madeleine Rees McCarry, was an avid reader who inspired her son's love of literature. On September 12, 1953, McCarry married Nancy Neill. They have four sons. McCarry's home is in the Berkshires, where generations of his family have lived.

McCarry's novels draw extensively on his experience as a journalist, government official, and CIA agent. From 1952 to 1955, he was a reporter and editor on the *Lisbon Evening Journal* in Ohio. He spent another year (1955-1956) on the *Youngstown Vindicator* in Ohio as a reporter and columnist. His government service began as an assistant to the secretary of labor in Washington, D.C. (1956-1957). From 1958 to 1967, McCarry worked for the CIA. He worked as a freelance writer from 1967 to 1983. His last job in journalism was at the *National Geographic*, where he served as editor at large from 1983 to 1990.

Although McCarry is best known for his espionage thrillers, he has simultaneously fashioned an impressive career in nonfiction. His well-received biography,

Citizen Nader, appeared in 1972. The subject of this biography, a maverick public activist beholden to no institution, is not so different, in some respects, from McCarry's series hero, Paul Christopher, who is constantly confronting and sometimes flouting the Outfit's strict protocols. Indeed, in *The Tears of Autumn* (1975), when Christopher's desire to investigate the John F. Kennedy assassination goes way beyond what he is permitted to do as a government agent, he resigns from the Outfit.

McCarry's novels reflect his collaborations with government officials such as Alexander M. Haig, Jr., former secretary of state, and Don T. Regan, chief of staff under President Reagan. McCarry cowrote with Haig *Caveat: Realism, Reagan, and Foreign Policy* (1983), *Inner Circles: How America Changed the World* (1992), and with the Regan *For the Record: From Wall Street to Washington* (1988).

McCarry has published more than a hundred articles and stories in magazines, including *Saturday Evening Post*, *Life*, *National Geographic*, *Esquire*, *Saturday Review*, and *True*. He has also worked extensively as a "script doctor," contributing to several screenplays without receiving authorial credit.

Although Paul Christopher uses work as a journalist as a cover for his covert espionage activities, McCarry has said that he kept his journalism and his spy work in two separate worlds. In the novels, however, Christopher uses journalism as a cover to travel extensively and to mingle with government officials, foreign nationals, and just about anyone a journalist might wish to interview or befriend.

The Paul Christopher novels: *The Miernik Dossier* (1973), *The Tears of Autumn* (1975), *The Secret Lovers* (1977), *The Last Supper* (1983), *Second Sight* (1991), and *Old Boys* (2004), have received many accolades from critics who praise their authenticity and elegance. The novels are "compulsively readable," as one critic put it.

Part of McCarry's authority derives from his travels. McCarry spent time in Berlin in 1948, observing firsthand the U.S.-Soviet Cold War confrontation. During his CIA period, he had deep cover assignments in Europe, Africa, and Asia—locations that are Paul Christopher's turf. Rome, for example, is Christo-

pher's home base, a place that comes alive as he walks the streets, dines, and mingles with the everyday sights and smells that have no doubt been experienced by his creator as well.

McCarry apparently wanted to end his twenty-five-year career as a novelist with *Lucky Bastard* (1998), which featured a politician (a mixture of John F. Kennedy and Bill Clinton) whose seriocomic adventures marked a departure from McCarry's series of espionage novels. Then Peter Mayer, publisher of Overlook Press, sought out the retired novelist at his home in Massachusetts, promising to reprint his work, and encouraging McCarry to write more novels. The result was *Old Boys* (2004), which centers on the disappearance of a retired Paul Christopher. Critics deemed this novel a great success, confirming McCarry's place not merely in the espionage thriller category but in the history of the literary novel.

ANALYSIS

Otto Penzler in *The Armchair Detective*, like many other reviewers, highly praised Charles McCarry, saying he stood out among the American creators of believable spy novels, a very difficult category, because of the brilliance of his plots and characterization and his poetic style of composition.

McCarry's spy hero, Paul Christopher, is handsome, a Yale graduate, and a poet. His father was also a spy, killed in Berlin in a Soviet setup. Christopher's mother, a courageous anti-Nazi German who helped many Jews escape the Third Reich, was sent to a concentration camp during the war and then vanished. As a loner, it is difficult for Christopher to maintain relationships with the women who fall in love with him, and it is not surprising that an early marriage ends in divorce.

This composite biography of Christopher can be gleaned from several of McCarry's novels. Each work of fiction, in fact, is a revelation, delving not only into Christopher's background but also into the widening network of contacts that implicate him in the major events of the Cold War. To read the sequence of the Paul Christopher novels is not only to journey through the complexity of contemporary history but also to constantly revise perceptions of Christopher himself.

Thus biography, history, and psychology are melded into the plots of the spy novels, making McCarry's handling of the genre so sophisticated and elegant that he has few equals.

THE MIERNIK DOSSIER

McCarry's stunning debut novel, *The Miernik Dossier*, is also an innovative work that is reminiscent of such great novels as William Faulkner's *Absalom, Absalom!* (1936). Miernik is a Polish diplomat who wishes to defect to the West, but is he a double agent? The novel takes the form of a dossier, which includes reports from Paul Christopher and his superiors, excerpts from Miernik's own writings, and other materials that typically are included in intelligence reports. Christopher is doubtful all along that Miernik is duplicitous; that is, Christopher tends to think that Miernik is what he says he is. However, mired in the Cold War world of deceit (Federal Bureau of Investigations director J. Edgar Hoover titled one of his anti-communist books *Masters of Deceit*, 1958), Christopher's superiors overrule his assessments, and the result is tragic for Miernik.

The novel never explicitly ratifies Christopher's judgment. There is no smoking gun, no way to absolutely confirm what is surely true: that Miernik's suspicious behavior would not have seemed all that problematic if the Cold War had not fomented the conditions in which the truth itself becomes a victim of the competition between superpowers.

Mystery novels in general are supposed to solve a mystery. What is striking about *The Miernik Dossier* is that like *Absalom, Absalom!* the mystery is solved only insofar as readers are able to decipher the novel's escalating ironies and negotiate its intricate ambiguities.

THE TEARS OF AUTUMN

Considered by many critics to be McCarry's masterpiece, *The Tears of Autumn* tracks Paul Christopher's quest to discover who set up Lee Harvey Oswald to assassinate John F. Kennedy. Christopher does not doubt that Oswald was the assassin, but his years as a covert agent for the Outfit lead him to suspect that Oswald did not act alone.

Early on, Christopher intuitively senses who is behind the plot. He does this not because of any particular clue

but rather because of his travels in Southeast Asia. He realizes that the United States' involvement in the assassination of South Vietnamese leader Ngo Dinh Diem, a figure intricately situated within the clan structure of his society, has set off forces that will bring down an American president.

The problem for Christopher, however, is that his superiors do not really want to know who is behind the Kennedy assassination. Christopher finds himself opposing highly placed officials inside the White House, and ultimately he resigns from the Outfit to pursue his personal quest for the truth.

What is it that Christopher hopes to accomplish? The answer to this question is what distinguishes McCarray from virtually all other writers of political thrillers and espionage novels. Christopher has no political agenda—not even a basic desire to see justice done or to exact revenge. On the contrary, what motivates him is a pure quest after the truth no matter where it might lead. This dedication to truth and knowledge endows Christopher with an extraordinary ethical authority that is highly unusual in the annals of the mystery genre.

THE SECRET LOVERS

In *The Secret Lovers*, when one of Paul Christopher's agents is run over in a Berlin street, the Outfit assumes he has been killed by the Soviets. However, Christopher watched the event happen, and though it has all the earmarks of a Soviet-style murder, he is suspicious. Why would the courier (who had just handed off a manuscript that exposes Stalin's crimes, including the gulags) be eliminated after he accomplished his mission?

Christopher finds himself opposing not only the higher command of the Outfit but also one of his most trusted foreign agents, who wants the manuscript published even though Christopher is sure it will result in the author's death. He wonders why the agent would not just wait until the author, an old and ailing man, dies.

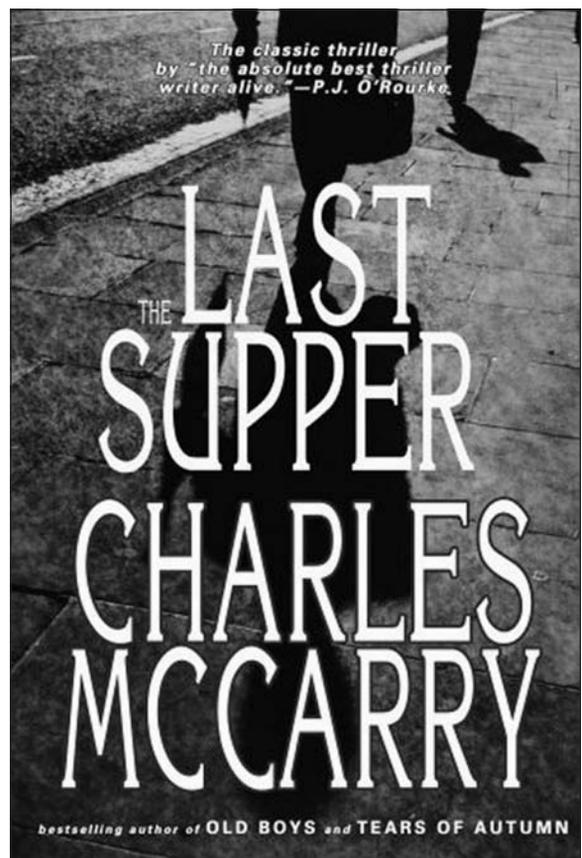

Ultimately Christopher unravels a complex set of affairs (including secret lovers) that explains the concatenation of events in Berlin. At the same time, his own personal life is disintegrating as his wife finds Christopher's need for secrecy unbearable because he

cannot share much of what he does for the Outfit with her. A clinging, demanding, beautiful woman, she attempts to construct a secret life of her own, challenging Christopher to come out of his shell.

Both Christopher's marriage and the publication of the manuscript result in disaster—as Christopher, more than ever a tragic protagonist—has anticipated. This is one of the bleakest and certainly the most honest of McCarray's spy thrillers. The human cost of spying, as in John le Carré's novels, is brought home with devastating effect.

THE LAST SUPPER

The Last Supper constitutes a virtual biography of Paul Christopher. So much of what motivates Christopher is inherent in his family's history—his father's quest to find out what happened to his wife after the Nazis captured her and how others related to the Christophers became mired in Cold War politics and the missions of the Outfit.

Not as taut as the other novels but with the heft of a historical novel, *The Last Supper* merges a family saga with the history of American intelligence. Descriptions of how the Outfit (CIA) developed out of World War II and how Christopher sees himself in the geopolitical jockeying of the Cold War make this novel the most comprehensive of all McCarry's works.

Callendar, Newgate. Review of *The Miernik Dossier*, by Charles McCarry. *The New York Times Book Review*, July 8, 1973, p. 26. One of the first reviewers to hail McCarry as one of the most important practitioners of the spy novel.

Fletcher, Katy. "Evolution of the Modern American Spy Novel." *Journal of Contemporary History* 22, no. 2 (April, 1987): 319-331. Situates McCarry in the context of other spy novelists, including E. Howard Hunt and William F. Buckley, Jr. McCarry's work is praised for its authenticity and compared with several nonfictional works criticizing the CIA.

Heilbrun, Jacob. "Old Fangled Espionage." *The New York Times Book Review*, April 2, 2006, 11. A review of the reissued *The Last Supper* that also assesses McCarry's place in the pantheon of Cold War novelists. Heilbrun ranks McCarry as the best American novelist in this genre while reserving judgment as to whether McCarry equals the best of the work of John le Carré and other British contemporaries.

Kegley, Charles W., Jr. "How Did the Cold War Die? Principles of an Autopsy." *Mershon International Studies Review* 38, no. 1 (April, 1994): 11-41. McCarry's novels can be profitably read in the light of this searching study of the Cold War. The author examines the books McCarry wrote with Alexander M. Haig, Jr.

Penzler, Otto. *Armchair Detective* (Summer, 1989): 272-73. Review of *The Better Angels*, *The Bride of the Wilderness*, *The Last Supper*, *The Miernik Dossier*, *The Secret Lovers*, and *The Tears of Autumn*. Penzler, one of the most important critics of mystery fiction, ranks McCarry as one of the great writers in this genre

JAMES McCLURE

Born: Johannesburg, South Africa; October 9, 1939

Died: Oxford, England; June 17, 2006

Type of plot: Police procedural

PRINCIPAL SERIES

Tromp Kramer and Mickey Zondi, 1971-1991

PRINCIPAL SERIES CHARACTERS

TROMP KRAMER, a lieutenant on the Trekkersburg Murder and Robbery Squad, South African Central Intelligence Division, is an unmarried Afrikaner. As the series progresses, he matures from a youthful, lusty, irreverent, and independent man into a more introspective, sympathetic detective. He retains his compassionate but antisocial stance, observing quietly the vagaries of South African apartheid. Kramer's observations in detection are astute, but he depends on others for information on which he can speculate, using wit, luck, and an uncanny intuition to develop leads and solve cases.

DETECTIVE SERGEANT MICKEY ZONDI, Kramer's assistant, partner, and friend. A Zulu from a rural village who worked as a houseboy for a year before joining the Central Intelligence Division and who was educated by missionaries, Zondi lives in the Trekkersburg township of Zwela Village. He thus has insights that Kramer can only discern intuitively or have reported to him. Gifted with a photographic memory, Zondi frequently contributes as much to a crime's solution as Kramer does, often using recall and logic while Kramer relies on experience and intuition.

THE WIDOW FOURIE, Kramer's slightly younger lover, who despite her sense of propriety agrees to live with Kramer on a small farm, Blue Haze, just outside the city. Supportive and attentive to Kramer's domestic needs, Fourie is not only his sexual companion but also his confidante, providing refuge from his hectic job; her questions often provoke Kramer to further insights into the case at hand.

DR. CHRISTIAAN STRYDOM, the district surgeon, is a pathologist for the Trekkersburg Central Intelligence Division. A man of relatively liberal views, Strydom

craves data, often being so thorough in researching background information that he misses the obvious conclusions at which Kramer arrives. Whether by uncovering the constrictive powers of a python or by discovering a little-known treatise on the hangman's art, Strydom provides an exotic technology of death in the series.

CONTRIBUTION

With the procedurals that develop the Tromp Kramer-Mickey Zondi partnership, James McClure fashioned a neutral portrayal of South African apartheid society as seen from within. Amassing much historical and cultural information in the course of his exposition, characterization, and plot, McClure nevertheless maintained a carefully guarded distance from any direct, judgmental commentary. Indeed, McClure claimed that "the *neutrality* of the crime story" is the primary appeal of the genre. Of the South African novel, he said, "Every novel . . . that I'd come across . . . had been self-limiting . . . in that its antiapartheid slant made it appeal only to the 'converted.'" By guarding the neutrality of his novels, he believed that he can "leave people to make their own moral judgments." Seeking to appeal universally to his readers, McClure considered his first obligation to be entertainment, "leaving graver matters—which [can] be included, but obliquely—to those with the time, money, and intellectual capacity to indulge them."

Although conscious of his craftsmanship and the psychological complexity of his characters, McClure made his procedurals hew closely to the facts of daily existence under apartheid, so that the culture and place, evoked even descriptively, are integral to his success as a crime novelist. That McClure's readership included not only mystery devotees but also international antiapartheid activists and academic literati as well as the South African police attested his achievement of neutrality without compromising the serious, socially significant framework of his novels. McClure's Kramer and Zondi novels are taught in creative writing courses at the college level in the United States.

BIOGRAPHY

Born on October 9, 1939, in Johannesburg, South Africa, the son of a military intelligence officer, James Howe McClure was, from his earliest years, witness to the violence and compassion of the paradoxical South African lifestyle. During World War II, while the family was living at military headquarters near Pretoria, anti-aircraft guns were installed in the family garden. When the family moved to Pietermaritzburg, the capital of Natal and the hometown model for Trekkersburg, the violence shifted from international war to domestic but bloody strife among the servants and workers. McClure's mother was able to temper that violence, however, through her close, compassionate relationship with Miriam Makhatini, the family's Zulu nanny, whom McClure considered a second mother. Along with his natural mother's relative openness within apartheid, the boy received, from his father—an avid reader, occasional writer, and master of seven languages—a respect for books, languages, and people that kept him reading actively, despite his marginal interest in formal education.

Growing up and remaining in Pietermaritzburg, McClure developed interests in art and photography, working for a commercial studio in 1958-1959 after his graduation from high school. He then taught art and English at a boys' preparatory school until 1963. Although he had written stories, plays, and a young adult novel, McClure did not yet think of himself as a writer, preferring instead to hone his editing skills, to practice photography, and to develop a new career in journalism. From 1963 to 1965, he worked for Natal newspapers, often in regular contact with the police and the courts as a reporter. The paradoxes of such an inside look at law enforcement under apartheid, however, led to his working long hours; during that time, he "saw too much."

In 1965, McClure, his American wife, Lorly, whom he had wed in 1962, and the first of his three children left South Africa for Edinburgh, Scotland, where he worked for a year as a subeditor. During the following three years, the McClure family lived in a small apartment in Oxford while he worked for the *Oxford Mail*. After a momentary triumph when he sold a script, "The Hole," about an American in Viet-

nam, to Granada Television and could then afford a modest house, a television directors' strike left that play and another, "Coach to Vahalla," without hope of production. Feeling that success depended on more than his writing, McClure stopped working for television drama, and in 1969 he switched employers, intent on developing a features department for the *Oxford Times*. Then, encouraged by the success of a fellow subeditor, facing a vacation during which he could not afford to travel, and bored with television for entertainment, McClure began his first Kramer and Zondi novel, *The Steam Pig* (1971). Ten days after he submitted the typescript, he had a contract—and *The Steam Pig* went on to be named the Best Crime Novel of 1971 and to win the Crime Writers' Association's Gold Dagger Award.

With the success of this first novel and the continued favorable reviews and critical acclaim of those that followed, McClure turned to writing professionally in 1974, winning the Silver Dagger Award for his spy thriller *Rogue Eagle* (1976). He continued to garner praise not only for his series but also for his non-fictional studies of police departments in Liverpool and San Diego. His last novel in the Kramer and Zondi series, *The Song Dog*, was published in 1991, three years before the formal end of apartheid. He died in Oxford, England, in 2006.

ANALYSIS

Rather than emphasize the obvious political contexts of his South African crime novels, James McClure focused on providing his readers with the straightforward entertainment of detection. Clues are not withheld, but the rationale for the solutions to which they lead is so deeply enmeshed in apartheid that one leaves the resolution of a case knowing who committed the crime but pondering circumstance and motive in an effort to understand why it was committed—even when a superficial answer is readily apparent. Weaving observations of daily survival, the historical background, and the social tensions of life in South Africa into exposition, dialogue, and description, McClure, like anti-apartheid novelist Naomi Stride, who was later murdered, did in *The Artful Egg* (1984), kept the political undertones oblique. Conse-

quently, the polemical themes of much South African fiction are muted, and the novels are not so much subversive as they are compassionate toward all races suffering from the bleakness of a rigidly racist society.

McClure maintained his neutral stance by means of a shifting point of view controlled by the perspective of his characters. Although he avoided explicit judgment of the society he described, he nevertheless showed so much of South African life that, once having been offered the material, his readers were virtually compelled to arrive at their own moral judgments. Scene shifts are rapid and diverse; Kramer and Zondi often pursue parallel and sometimes related cases that take them into the country as well as through various sections of the city, bringing them into contact with blacks and whites, rich and poor. Besides describing the center of these diverse scenes, Central Intelligence Division headquarters, McClure, throughout the series, developed portraits of a rural Zulu village, a library, an illicit township drinking house (*shebeen*), the city council chambers, a liberal's mansion, a white nationalist's farm, a township shack, a zoological institute, a prostitute's bungalow, a forensic laboratory, a prison gallows, an apartheid hospital, and a decaying resort, among many other locales. His precise details and evocative images are interspersed so carefully among plot development, characterization, and exposition that readers are never distracted from Kramer and Zondi's detective work, yet each scene, on reflection, reveals the subtle effects of apartheid.

McClure's knack for shifting the point of view in his scenes permitted his characters, even minor ones, to express their values through dialogue and in the contextual narration that reflected attitudes varying from crude, overt racism to blind revolutionary zeal. Many of Kramer's fellow white police officers are proponents of Afrikaner nationalism, yet McClure refrained from stereotyping his characters. He also allowed his African characters the same extended range of responses to conditions under apartheid. Zondi, in *The Gooseberry Fool* (1974), is nearly killed by a rioting crowd of people evicted from their homes by the Security Forces—the crowd believes that all police officers, whatever the branch, are racist murderers. Lenny Francis, in *The Steam Pig*, arranges his own sis-

ter's murder, in part because of his envy of her ability to pass as white. Mario Da Gama and Ruru, in *Snake* (1975), use apartheid's blindness to shape a white-black alliance in crime, certain that such a partnership is beyond suspicion. Because the viewpoints and values expressed by McClure's characters embody such a range of sensibilities, he deterred readers from easy, snap judgments about South Africa and its peoples.

In the rapid exchanges between Kramer and Zondi and in more extended dialogues, McClure suggested that the messy search for clarity not only in solving the case but also in understanding apartheid would not come easily. Ethnic pride and linguistic heritage permeate the dialogue, both directly and subtly. Spiked with humor, yet provoking consistently a sense of doubt, hostility, or fear, his dialogue includes occasional Afrikaans and Zulu words and phrases even as his characters find bemusement in the irregularities of English. Although McClure's dialogue models the process of detection, it also illustrates the fragility and tension both within a racial group and across racial lines. Characters, as a result, seem tentative and fearful of speaking their minds. Just as Kramer and Zondi probe and push to crack the alibis of their suspects, so McClure's dialogue probes and pushes his readers to crack their narrow views of South Africa.

THE STEAM PIG AND THE SUNDAY HANGMAN

The exotic plotting of McClure's novels is so integral to their South African setting that even this basic element of the procedural provokes thought long after the entertainment has faded. In *The Steam Pig*, the Zulu murderer uses a sharpened bicycle spoke as a weapon, seeking to make the death appear to have resulted from heart failure. The murder itself, however, is one of the disastrous consequences of an arbitrary reclassification of a family's race. In *The Sunday Hangman* (1977), a group of Boer farmers become obsessed with the technical lore of hanging in their self-righteous sentencing of criminals who have escaped the courts through legal loopholes; these vigilantes undermine the authority of the very laws on which their privileges depend.

SNAKE

McClure's plots suggest through their surface construction the deeper, psychological turmoil of apartheid. In *Snake*, a wealthy white liberal, son of a

Supreme Court justice, strangles an exotic dancer, making it appear that her own pet python was the culprit. His motive is an obsessive desire for illicit sex with a black woman, but his victim is instead a darkly tanned, racist white. In no other setting but South Africa would such complex ironies and the thematic possibilities they raise be possible.

The essence of McClure's novels, however, is found in the complicated relationship between Kramer and Zondi. Despite their growing affection and understanding, they must present the mask of master and slave to others around them: Everyone expects the conventions of apartheid, especially the police. Consequently, Kramer must feign racism and Zondi must act subservient. Only when they are alone can they tease each other with racial humor or comment on the blindness of others. They may save each other's lives while on the job, but neither can inhabit the social world of the other, however well they may know and understand it. McClure illustrated the stark contrast in their personal lives in each novel. In *The Sunday Hangman*, the Widow Fourie suggests to Kramer that, should Zondi lose his job as the result of a lingering leg injury, he might work for them as their gardener. Zondi's family dwells in a two-room, dirt-floor shack while Kramer and Fourie live in Blue Haze, a sprawling old farmhouse. The couple's admiration for Zondi, even Fourie's charity in *The Gooseberry Fool*, cannot change the circumstances of his life. In the same novel, Kramer waits while Zondi lies in a coma and grapples with his anguish because he cannot show his compassion for fear of being perceived as a black sympathizer, thereby losing his authority as a detective among his white assistants.

Kramer and Zondi, however, work so well as partners that they serve as a symbol of not only the failures but also the hopes of South African culture. Although they demonstrate the limiting effects of historical and cultural racism on their individual lives and friendship, they also testify to the potential of individuals to overcome those dehumanizing constraints.

THE SONG DOG

The Song Dog is a "prequel" to the Kramer and Zondi series, in that it reveals how they first met in the early 1960's. Kramer is still new to Natal and appears more uncouth, more Afrikaner and hard-line than he is

in the later works. The book was inspired by the arrest of the African National Congress leader Nelson Mandela in Howick, which McClure heard about when he was visiting the police station that very afternoon. McClure told an interviewer that he intended the book to be the last in the series as well as the first, and to dramatize the relationship between Kramer and Zondi as they get to know each other and to "get it right."

McClure's allusions to previous books in the series suggest that, on the whole, the series itself sought to fulfill that potential of an identity based on personal qualities and capabilities rather than on race and class. These books offered no definitive, absolute answers to the questions they raised; just as Kramer noted his reluctance to confront the truth in *Snake*, McClure's fictions provided a limited truth, "having solved a problem without supplying any real answers." Readers, however, found that beneath the surface of entertaining detection they had to confront the turmoil of apartheid in South Africa. McClure's vivid material, well-crafted writing, and neutral stance provided just that opportunity for his readers' own cultural detective work—if they so chose.

SHARYN McCRUMB

Born: Wilmington, North Carolina; February 26, 1948

Types of plot: Amateur sleuth; cozy

PRINCIPAL SERIES

Elizabeth MacPherson, 1984-
Ballad, 1990-

PRINCIPAL SERIES CHARACTERS

ELIZABETH MACPHERSON is clever and articulate and engages in highly allusive verbal sparring with her brother Bill and cousin Geoffrey. The series traces Elizabeth's personal and professional life as she solves a variety of cases and also falls in love, marries, and is widowed.

SPENCER ARROWOOD has been elected sheriff, but he still feels inferior to his predecessor, Nelse Miller, and his brother Cal, the football hero who died in Vietnam. His self-confidence grows as the series pro-

gresses. Spencer sometimes expresses an ironic view of events, but the Arrowood series lacks the humor found in the MacPherson novels.

NORA BONESTEEL has "the Sight," and although Spencer admits that she sometimes possesses information that cannot be explained rationally, he has little faith in her powers. In the early Arrowood novels, Nora primarily serves to advise other characters, but in the later novels, she becomes increasingly central to the plot.

CONTRIBUTION

Sharyn McCrumb, who considers herself primarily a storyteller, has increasingly used her mystery novels as vehicles to portray a southern/Appalachian culture where contact with modern issues and problems results in various kinds of violence. Thus, she has stretched the boundaries of the mystery novel, emphasizing the interaction of culture and characters and exploring complex

relationships within families or groups of close friends.

McCrumb's novels have won numerous awards. *Lovely in Her Bones* (1985) and *The Hangman's Beautiful Daughter* (1992) were named Best Appalachian Novel by the Appalachian Writers Association in 1986 and 1992, respectively. Several of her novels have been selected as Notable Books of the Year by *The New York Times* and the *Los Angeles Times*, and her fiction has won three Agatha Awards (*She Walks These Hills*, 1994; *If I'd Killed Him When I Met Him*, 1995; and "A Wee Doch and Doris"), two Anthony Awards (*She Walks These Hills* and "The Monster of Glamis"), the Nero Wolfe Award (*She Walks These Hills*), and the Edgar Award from the Mystery Writers of America (*Bimbos of the Death Sun*, 1987). She also received the 2006 People's Choice Award for Fiction, given by the Library of Virginia and the James River Writers, for *St. Dale* (2005). Her novels have been translated into Dutch, German, Italian, and Japanese. She has also received the Wilma Dykeman Award for Regional Historical Literature from the East Tennessee Historical Society in 2003 and the award for Outstanding Contribution to Appalachian Literature from the Appalachian Writers Association in 1997.

BIOGRAPHY

Sharyn McCrumb was born Sharyn Elaine Arwood in Wilmington, North Carolina. Her father, Frank Arwood, was chairman of the Elementary Education Department at East Carolina University. McCrumb acknowledged the formative influence of his storytelling when she dedicated *Lovely in Her Bones* to him. His bedtime stories were installments from the *Iliad* (c. 750 B.C.E.; English translation, 1611), but he also told her about the circuit-riding preachers who were their ancestors (the Arrowoods and the McCourys). Helen Arwood, McCrumb's mother, grew up in the eastern part of North Carolina, and McCrumb's grandmother told her stories about North Carolina during the Civil War. Many of the family legends have made their way into McCrumb's novels, especially the *Ballad* series.

McCrumb completed a bachelor's degree in Spanish and communications at the University of North Carolina-Chapel Hill in 1970, and by 1976 she had become a professional writer. She also took graduate classes in

speech and theater at Wake Forest University in 1977 and earned a master's degree in English at Virginia Tech in 1985.

On January 9, 1982, McCrumb married David Kenneth McCrumb, an environmental engineer. The McCrumb family has two children, Spencer and Laura. In 1983 Sharyn McCrumb became a member of the Appalachian Studies faculty at Virginia Tech.

ANALYSIS

The early Elizabeth MacPherson novels by Sharyn McCrumb emphasize astute observation and deductive reasoning as Elizabeth unmasks murderers, using her academic training in anthropology, her skill in dealing with people, and her familiarity with the mores of both mountain and flatland cultures. Increasingly, though, as the series progresses, Elizabeth's cases deal with issues of blood ties, family tradition, links to the land, and timeless domestic problems.

The interrelationship of past and present also figures prominently in the *Ballad* series. Nora Bonesteel, who possesses "the Sight," intuitively knows that his-

Sharyn McCrumb. (© Jerry Bauer)

torical events often reflect the same emotions and personality traits seen in modern actions. The more pragmatic Sheriff Spencer Arrowood reluctantly learns to accept Nora's authority in these matters, though he continues to prefer demonstrable evidence.

LOVELY IN HER BONES

Lovely in Her Bones explores themes of personal relationships and ethnic identity. Elizabeth MacPherson, who has finished a sociology degree, still has not chosen a career when she meets Milo Gordon, her brother Bill's roommate and the research assistant for Alex Lerche, a forensic anthropologist specializing in Native American studies. Elizabeth and Milo are attracted to each other, but she is also intrigued by folk medicine and eventually by Lerche's process of determining the ethnic identity of Native American groups.

Comfrey Stecoah, a Cullowhee leader, enlists Lerche's help in proving that the Cullowhees are a Native American tribe and thus entitled to federal protection for their land. Lerche agrees to examine the ancient graves, primarily because this project provides a temporary escape from his wife, Tessa, and a chance for trysts with Mary Clare, one of his graduate students. Elizabeth decides to join the group, primarily for the chance to meet the medicine woman, Amelanchier Stecoah, who is Comfrey's mother.

The project is opposed by Bevel Harkness, whose family owns land where a strip mine may be located, but it is also plagued by dissent among Lerche's group. Lerche is so involved in his scientific research that he cannot relate well to other people, as both women in his life discover. Milo is similarly distant toward Elizabeth, and Victor Bassington, one of the undergraduates, annoys everyone with his grandiose lies.

When destruction of the project computer does not deter Lerche, he is murdered. Because the sheriff is unavailable, the investigation is conducted by Deputy Sheriff Barnes, who quickly calls in the local Federal Bureau of Investigation (FBI) agent. Although Milo believes Harkness is the murderer, Barnes's primary suspects are Tessa and Mary Clare, because both have recently been rejected by Lerche. The subsequent murder of Victor changes the way the investigators view the crime and provides Elizabeth the clue she needs to unmask the murderer.

In this novel, the primary focus is the two murders; the themes of personal conflict and racial identity are present merely to suggest motivation for the crime, though there is some indication that both Elizabeth and Milo learn from this experience.

IF I'D KILLED HIM WHEN I MET HIM

Though part of the MacPherson series, *If I'd Killed Him When I Met Him* appears to begin McCrumb's transition to the Ballard series, developing themes that recur in those novels. The overall subject is marital conflict and the violence that sometimes results when marriages end. McCrumb drew the novel's title from a battered woman's comment: "If I'd killed him when I met him, I'd be out of prison now."

Elizabeth—still reeling from her husband's death—is an investigator for the law firm of her brother Bill and his partner, Amy Powell "A. P." Hill. A. P. is hired to defend socialite Eleanor Royden for murdering her former husband and his new wife. Eleanor has openly entered the home of her former husband, Jeb, and shot him and his new wife. She has proudly proclaimed what she has done, and A. P. must save her from the death penalty. Compounding the problem is the fact that Jeb was a prominent lawyer and that the entire legal establishment has closed ranks against Eleanor. Even women who supposedly were Eleanor's friends refuse to testify for her, and most of the men suggest that she simply did not understand appropriate behavior for supplanted wives.

Meanwhile, Bill, initially hired to sue Donna Jean Morgan's husband, ends up trying to clear Donna Jean of poisoning her husband. Donna Jean hired Bill because her husband, Chevy, a part-time preacher, declared that God told him to take a second wife. Chevy and sixteen-year-old Tanya Faith knelt in the back of his carpet truck and promised to be man and wife, then Tanya moved into the Morgans' home. Donna Jean refuses to file for divorce because that violates her beliefs, so Bill sues Tanya Faith for criminal conversion (adultery with Donna Jean's husband). When Chevy dies of arsenic poisoning, suspicion falls on Donna Jean, in part because her great-grandmother, Lucy Todhunter, was suspected of poisoning her husband, Philip, after the Civil War.

The prologue, which serves to indicate the timeless

nature of marital conflict, describes the death of Philip Todhunter, depicted by his widow's attorney as a wealthy Yankee who married genteel and land-poor Lucy Avery soon after the Civil War. When Philip died of arsenic poisoning, Lucy was tried for murder but acquitted because no one could determine how she could poison him without making anyone else ill. Months later, Lucy gave birth to Todhunter's son (Donna Jean's grandfather), but she died soon after. The family declined in wealth and prestige, but Lucy became a local legend.

Although Elizabeth realizes her job in the law firm is intended primarily as a distraction, she solves the mystery of both poisonings. During the investigation, she and Bill must cope not only with the dissolution of their parents' marriage but also with their mother's semifacetious claim that she has become a "political" lesbian.

The novel closes with Elizabeth's last letter to her deceased husband, Cameron. She asserts that they were lucky their marriage did not end in boredom or hatred. She declares herself free to move on with her life and her career as a forensic anthropologist.

IF EVER I RETURN, PRETTY PEGGY-O

Traditional ballads play major roles in McCrumb's *Ballad* series, and folk ballads are the source of important clues in *If Ever I Return, Pretty Peggy-O* (1990). Peggy Muryan, a semifamous folk singer, has moved to town. Sheriff Spencer Arrowood initially is attracted to her, perhaps because he seems to associate her with everything he missed during the era when folk music was popular and he was a high school senior.

Spencer's deputy Martha Ayers, who is organizing a class reunion at the local high school, arranges for Spencer to present a plaque in memory of his brother Cal and two other local men killed in Vietnam. Martha has unresolved issues with her high school classmates, and Spencer still feels ambivalent about the memory of his supposedly heroic brother and is convinced that both his mother and his former wife consider him inferior to Cal.

Spencer's association with Peggy becomes professional when she becomes the object of harassment, possibly by a Vietnam veteran. A series of animal mutilations culminates in the murder of a high school girl

who looks like the young Peggy. Initially Spencer handles the case as he thinks his predecessor, Nelse Miller, would have, but he gains self-confidence as his investigation progresses.

This novel establishes Spencer as a major character in the *Ballad* series. As he investigates the threats Peggy is receiving, Spencer begins to understand how the Vietnam experience directly and indirectly changed not only the men who fought there but also American society as a whole.

THE ROSEWOOD CASKET

The Rosewood Casket (1996) explores characteristic McCrumb themes: family ties, love of the land, and individuals' links to family and community history. Sheriff Spencer Arrowood's responsibilities tie him to all three elements. He must carry out Randall Stargill's dying wish that all his sons come home to build his coffin, and later Spencer must try to mediate between the Stallards, who own a prime piece of mountain farmland, and Frank Whitescarver, who holds their mortgage and wants to develop the land. Finally, he must help Nora Bonesteel reconcile the Stargill family's historical guilt.

There are two rosewood caskets. First is the one Randall wants his sons to build for his burial; the other is the small casket Randall made and gave to Nora Bonesteel when they were young lovers. By bringing the small casket, which contains a child's skeleton, to be buried with Randall, Nora sets in motion the resolution of an old mystery. When both Randall and Nora were small children, Randall's stepsister Fayre disappeared, and because Nora possesses "the Sight," for many years she has known what actually happened to the girl. Threatened by her knowledge, Randall ended their relationship and married someone else. Now Nora releases Randall by helping to arrange a proper burial for Fayre.

Randall has left written instructions for his four sons, whose lives have followed totally different paths. Robert Lee, the eldest, is a salesperson who believes his father has always been disappointed in him; his wife, Lilah prays for a miracle to convince him of his success. The second, Garrett, is an Army officer, but he too believes he has failed, primarily because he was unable to prevent a fellow soldier's rape of his wife,

Debba. The third, Charles Martin, is a country singer. Financially he has been more successful than his brothers, but he has not been able to sustain an emotional attachment. When he returns to bury Randall, he is accompanied by his girlfriend Kelley and her daughter Kayla, but the relationship does not seem likely to endure. The youngest son, Clayton, has chosen not to pursue fame or financial success. He lives simply, and his only job is giving schoolchildren nature tours and talks about frontier life. To build the casket as Randall instructed, these men must learn to cooperate as brothers, burying their antagonism toward each other and coming to terms with their long-suppressed resentment of their dead brother, Dwayne.

While building their father's casket, the Stargills also discuss the future of their father's farm. Two brothers consider the land their family heritage and want to keep it, but two are eager to sell to a developer like Whitescarver. Their neighbor Dovey Stallard is determined to hang on to her family's land, however, even if she has to shoot Whitescarver. McCrumb suggests a parallel between Dovey and Nanyehi "Nancy" Ward, the female Cherokee chief who also fought unsuccessfully to keep the mountain land for her people.

Son of Fletch, 1993-

Skylar Whitfield, 1995-

PRINCIPAL SERIES CHARACTERS

IRWIN MAURICE “FLETCH” FLETCHER, a reporter in his early twenties, is constantly in trouble. He has been married and divorced twice, and each adventure provides him with a new relationship. He is at times care-free and irresponsible, but there is always a method to his eccentric behavior. In the end he usually manages to do the right thing. Not at all like the traditional hard-boiled private eye, Fletch is a nonconformist in every way.

FRANCIS XAVIER FLYNN is an inspector for the Boston Police Department. He is cultured and articulate, a devoted family man, a brilliant investigator, and a shrewd judge of character. His police colleagues find him inscrutable and his methods incomprehensible. It is hinted that besides his police work he has taken on special, top-secret government assignments.

SKYLAR WHITFIELD is a small-town Tennessee high school graduate of considerable talent—academic, musical and romantic—but little ambition. Because of his innate charm, he has the capacity to adapt to any situation, and he blends in well because of his ability to speak proper or countrified English.

CONTRIBUTION

Gregory McDonald is often called the “clown prince” of the detective genre. The world of his major character, Fletch, is a world where anything can happen and usually does. Many of these events are serious, but McDonald always gives them a humorous edge. Irwin Maurice Fletcher, better known as Fletch, breaks new ground for the amateur detective. McDon-

ald uses the anarchic worldview and sarcastic humor of this character to make a wry commentary on life.

McDonald’s fiction evolved out of the political and social rebellion of the 1960’s. Fletch is apolitical, but he never hesitates to thumb his nose at the Establishment. He is an outsider who has little use for rules and regulations or maintaining regular hours, jobs, or traditional relationships. The events of his life occur haphazardly, as a series of bizarre situations into which he falls with regularity. Fletch never complains. He continues making his jokes or quips and deals with each situation as it happens. He is never at a loss for words or solutions. There is little emotional involvement or commitment in the Fletch series. Fletch is whimsical and fickle, though in the long run, this character cares.

McDonald is different from his predecessors in the genre. It is difficult to compare him to a Raymond Chandler or a Ross Macdonald, but like them, he uses the realities of his time to fashion a character that is a reflection of that time. Fletch’s world is an ironic one, and he must laugh at himself as well as at everything else. McDonald’s Fletch mysteries are unique in the sense that they consist largely of dialogue, with few long narrative or descriptive passages. Wildly successful—the original nine Fletch novels published between 1974 and 1987 have sold some one hundred million copies worldwide—the mysteries also served as the basis for two films starring Chevy Chase in the title role (*Fletch*, 1985, and *Fletch Lives*, 1989).

For his fiction, McDonald has received two Edgar Allan Poe Awards (1975 and 1977). He has also been recognized for his nonfiction with a number of awards for his efforts at the *Boston Globe*, where he was one of the first American journalists to write against the Vietnam War and in support of civil rights, gay rights, and women’s rights. Such honors included the Tennessee Association of Federal Executives Humanitarian of the Year Award (1989), the National Association of Social Workers’ Citizen of the Year Award (1990), the National Conference of Christians and Jews’ Roger Williams Strauss Award (1990), and the first annual Alex Haley Award (1992).

BIOGRAPHY

Gregory Christopher McDonald was born in Shrewsbury, Massachusetts, on February 15, 1937, the son of author Irving Thomas McDonald and painter Mae Haggarty McDonald. He attended private school in Massachusetts and, accepted to Harvard University at the age of sixteen, obtained a bachelor of arts degree in 1958. During college, McDonald created an international yacht troubleshooting enterprise and worked as a sailboat captain to help pay tuition. He also began writing his first novel. Following graduation, he was employed as a marine insurance underwriter (1959-1961) before serving as a volunteer in the Peace Corps for a year. In 1963, the year he began teaching, McDonald married Susan Aiken (they divorced in 1990), and she bore two sons, Christopher Gregory and Douglas Gregory.

In 1964, McDonald was hired as critic-at-large columnist and arts and humanities editor for the *Boston Globe*—in which position he remained for nearly a decade—where he began to develop a fictional character: a reporter who would become the author's best-known protagonist, the irreverent Fletch. The same year, McDonald published his first novel, *Running Scared* (1964), a dark story of a college student who makes no effort to prevent a friend from committing suicide. Though the book received critical acclaim for believability, the subject matter was controversial and disturbing, and caused the author considerable difficulty in placing further manuscripts with publishers.

McDonald, who served from 1970 to 1973 as a member of the voting committee for the Boston Museum of Fine Arts, left the *Boston Globe* in 1973 to become a full-time freelance writer. He concentrated on the character he had first dreamed up while working as a reporter, and he produced his first mystery, *Fletch* (1974), in which the titular journalist is working undercover on a story involving drug transactions when he is approached by a man who offers the investigator three million dollars to kill him. The novel was critically acclaimed, became a commercial success, and won an Edgar Award for best first mystery. McDonald, who had not originally planned a sequel to the novel, was forced by popular demand to devise a followup. The result, *Confess, Fletch* (1976), also won an Edgar

Award (the only time in the history of the award that a debut novel and its sequel have received top honors), and spawned a series of sequels, prequels, and offshoots. These included a trilogy involving a minor character from *Confess, Fletch*, Boston Police Department inspector Francis Xavier Flynn, now promoted to major protagonist, for darker, more serious-toned novels (*Flynn*, 1977; *The Buck Passes Flynn*, 1981; and *Flynn's In*, 1984), and a related novel, *Son of Fletch* (1993), which along with *Fletch Reflected* (1994), formed a new series.

Beyond the Fletch and Flynn canons, McDonald has also produced a number of standalone novels, the nonmystery Time Squared trilogy (*A World Too Wide*, 1987; *Exits and Entrances*, 1988; and *Merely Players*, 1988) exploring the relationships of a group of friends, and a quirky new mystery series set in Tennessee (*Skylar*, 1995, and *Skylar in Yankeeeland*, 1997).

ANALYSIS

Gregory McDonald has created two detective series that have attracted serious attention from critics. The first series, Fletch, with its wildly comic tone, has gained widespread readership. The second series, the Francis Xavier Flynn novels, takes a more traditional detective approach. It is built around Flynn, a wily Irish Boston detective who had his genesis as a character in the second Fletch novel, *Confess, Fletch*.

Irwin Maurice Fletcher, or Fletch, is not a detective, private or otherwise, but rather a journalist who ultimately becomes a freelance reporter and troubleshooter. As a journalist, Fletch has ample freedom of movement to follow whatever crisis or crime he happens to stumble across. Fletch is financially independent, thanks to money he has fortuitously acquired in his first caper; this money affords him further freedom to pursue any situation that arises. For Fletch, life has no plan or design. Life is haphazard. Things happen and Fletch, following his instincts, reacts. In Fletch, McDonald has created an anarchic character, one that determines the moral boundaries of his own life. Though Fletch is physically attractive, he never bothers much about what he wears or what he drives. He is not a materialist, but if he has money, he is going to enjoy it. He is not introspective like detectives such as

Robert Parker's Spenser. He is not self-analytical, nor does he try to analyze others; he accepts things and people for what they are. Fletch is not emotional and sentimental; making it difficult to identify with Fletch on that level, and the reader is not moved by McDonald's detective stories. What the reader can count on is that Fletch will always be entertaining.

As a character, Fletch is not guided by a clear set of inviolable principles. Indeed, he views rules as made to be broken. He makes up methods as he goes along; he employs no clear investigative strategy. Whatever he thinks will work, he tries. He lies outrageously and shamelessly to whatever degree the situation seems to require. Fletch's off-the-cuff, unsystematic approach results in judgments of which the reader may not always approve. Neither a truly admirable figure nor a thoroughgoing rogue, he is designed to keep the reader off balance. In *Fletch and the Widow Bradley* (1981), for example, he goes to ridiculous lengths to return twenty-five thousand dollars he could easily have kept, while in *Fletch* he expresses no qualms about keeping a much larger sum of money belonging to someone else.

Clearly, Fletch inhabits a world that is morally ambiguous. McDonald does not preach about right and wrong. Readers are intuitively aware of this fact, and while they may not approve of everything Fletch does, they accept his style as a reflection of the reality of modern life, as Fletch himself does. In any case, like most antiheroes, he usually does the right thing in the end.

In most of the Fletch novels, McDonald creates multiple plotlines. For example, in *Fletch and the Widow Bradley*, Fletch finds a wallet containing twenty-five thousand dollars before being fired from his reporting job for writing a story quoting a man who has been dead for two years. The story develops along both lines, with Fletch trying to redeem himself with the newspaper but never forgetting his quest for the owner of the wallet. Such dual plots are sometimes but not always connected in McDonald's novels.

However, McDonald's work is primarily built around the creation of character through the liberal use of dialogue; characters are largely defined by what they say. It is characterization that is at the center of his writing, and there are times when plot becomes

secondary. The plots in the Fletch series are greatly exaggerated and cannot be taken seriously. Characters who are eccentric and offbeat are ubiquitous throughout the series: actor Frederick Mooney, who pretends drunkenness and orates his way through life; Louise Habeck, a genuinely comic character who thinks she is still married to the husband who divorced her years ago; the Widow Bradley's husband, Tom, supposedly dead two years, who is actually alive and well and living in New York after a sex-change operation. These are McDonald's people and he captures them as broadly comic exaggerations. Such characters would have no place in a novel by Raymond Chandler or Ross Macdonald.

McDonald's Flynn series is considerably different than the Fletch series, though both have a common origin. Francis Xavier Flynn is introduced in the second Fletch novel, *Confess, Fletch*. Fletch enters an apartment he has borrowed in Boston and finds a beautiful naked woman, who, unfortunately, has been murdered. Police Inspector Flynn, with whom Fletch develops a curious relationship, investigates the murder. Both Fletch and Flynn admire and respect one another, but each recognizes the limitations of the friendship.

Flynn is a brilliant investigator. He is much closer to the traditional concept of a detective as one who investigates and detects. Flynn is iconoclastic and his methods are unorthodox, but he is much more the procedural detective than Fletch. McDonald gives Flynn a strange and intriguing background. He is an Irishman who was brought up in Germany during World War II. The SS shot his parents at the end of the war, and Flynn made his way to the United States.

Flynn is occasionally mysteriously called away on special assignments. The suggestion is that Flynn works not only for the Boston Police Department but also for one of the federal government's secret service agencies. Unlike Fletch, Flynn is a devoted family man. He has a passion for music and has trained his family to perform as a small chamber orchestra. In one of the more effective scenes in *Confess, Fletch*, Flynn takes Fletch to his home, where his children perform a Beethoven sonata.

Flynn's sense of humor is low-key, but he continually makes quips and sardonic remarks, often directed

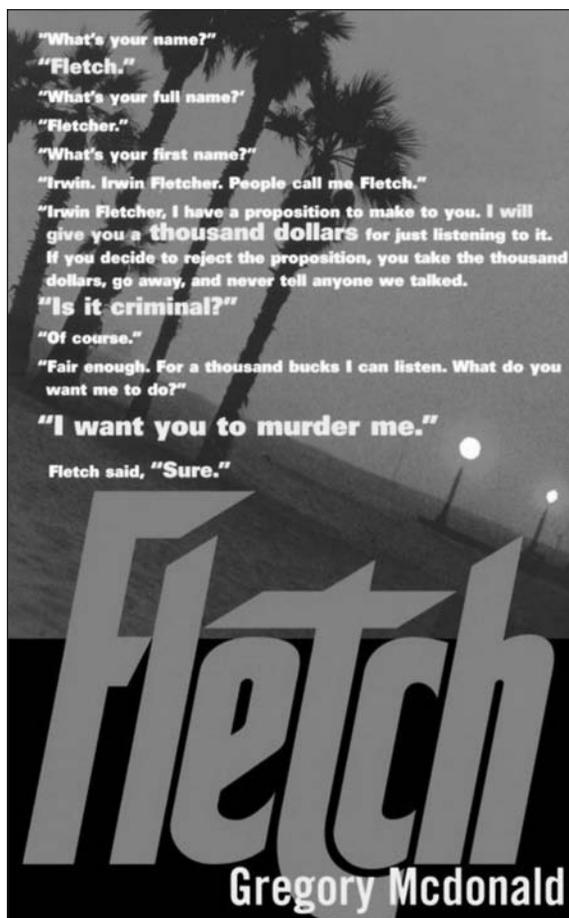

at his partner, Richard Whelan, whom Flynn insists on calling Grover. Whelan has little understanding of anything Flynn says, and generally serves as a comic foil.

Intellectually, Flynn is far superior to his colleagues in the police department. In *Flynn's In*, for example, the Boston police commissioner calls on the Irish detective to investigate a murder at a private hunting club. In many ways, the plot resembles a British locked-room murder mystery. Flynn has to use all his acumen and intelligence to solve the case. There is little action or violence in the book, other than the discovery of the victims. Once again, it is the main character, not the plot, that is central to the story.

Both the Fletch and Flynn series have achieved considerable popularity, but it is with Fletch that McDonald established his reputation as one of the major humorists in the genre. Fletch is most certainly not in the mainstream of the private investigator. He has carved his own niche—an anarchic man, an antihero, an ironic commentator; as an investigator he breaks all the rules, willingly and consciously. Fletch is an original, rollicking character in a series of novels that give an amusing skew to many of the traditions of mystery and detective fiction.

FLETCH

In *Fletch*, McDonald's debut mystery, Alan Stanwyk hires Fletch, who is working undercover on a drug story, to murder another man. Fletch is to be the ultimate victim, so Stanwyk can start a new life in Rio de Janeiro with a new wife and child. Stanwyk's scheme, however, goes awry; he is killed, and Fletch ends up with the three million dollars of loot. McDonald purposely creates an ending that is in direct contrast to the traditional detective-story ending, in which the hero is supposed to refuse any reward, especially that which is ill-gotten. Instead, Fletch takes the money and flies off to Rio himself, leaving behind two former wives clamoring for alimony that he has been too irresponsible to pay. Moreover, he leaves a perfectly decent woman and her child waiting at the airport for Stanwyk and the money, which will never come. McDonald makes no apologies for his hero's behavior. Fletch need not give the money to the widows and orphans fund; he invests it and lives on the beach in Rio for six months. These actions define Fletch as

an anarchic antihero. He has cleaned up the mess, nailed a police chief who had been in charge of distributing drugs on the beach, and settled the Stanwyk situation. His work done, he will use the three million dollars as he likes.

CARIOCA FLETCH

In *Carioca Fletch* (1982), Fletch has used Stanwyk's money to become a beach bum in Rio de Janeiro. As he walks the streets of Rio with his Brazilian girlfriend, an old crone emerges from the shadows to point her finger at him and croak the name "Janio Barreto." It seems Fletch resembles her dead husband, murdered forty years ago. This strange event forms the basis for one of the plots, as Fletch unravels the forty-year-old mystery and almost gets beaten to death in the process.

The plot of *Carioca Fletch* is typical of the Fletch series. The hero is led from one exaggerated event to

the next. After being mistaken for Janio Barreto, Fletch finds that Stanwyk's wife (from *Fletch*) has arrived in Rio. She enlists Fletch's help after being robbed, then disappears. While the rest of the frantic plot unwinds, Fletch is also trying to locate Joan Stanwyk. McDonald spends an inordinate amount of time describing Carnival, which he calls "the biggest, most amazing human spectacle in the world. Except war."

During carnival week, four upper-class Brazilian cariocas (playboys) befriend the hero. They take Fletch outside Rio to a brothel, where one of the cariocas suffers a fatal heart attack in the arms of a prostitute. McDonald spends four chapters describing the group's attempt to make their friend's death look respectable. These farcical scenes include the four being stopped by the police while the corpse is propped up in the back seat next to Fletch. The scene, at the center of the book, is absurdly long; it does not have much relation to the principal story. Such digressions are an important part of McDonald's distinctiveness as a writer of mysteries: Even to the neglect of the plot, he will indulge in prolonged play with his characters. Sometimes these digressions are successful; sometimes they are not.

FLETCH WON

Fletch Won (1985) could be titled "Fletch's First Case," for it is set before the events that occur in *Fletch*. In this book, Fletch is a fledgling reporter on the *News-Tribune*, about to be married to his first wife. He attempts to solve the murder of a lawyer killed in the newspaper's parking lot while doing a story on the Ben Franklyn Service, an escort service that is the front for an illicit sex ring. Most of the strands of plot are tied together at the end, but it is difficult to take the plot too seriously as it careens crazily from one situation to the next.

FLETCH, TOO

Fletch Won was followed by *Fletch, Too* (1986), in which the star reporter travels to Kenya. Fletch has tied up all the loose ends of *Fletch Won* and is about to go on a skiing honeymoon when he receives a note from his long-lost father inviting him to Kenya for a reunion (the elder Fletcher disappeared soon after his son was born). Fletch and his new wife, Barbara, race to the airport with their skis and ski clothes (a recurring comic motif in the book is Fletch and Barbara

having nothing but ski clothes in the sweltering heat of Kenya). On their arrival in Kenya, Fletch witnesses a murder in the men's room at the Nairobi airport. Typical in a Fletch plot, comical situations pile up, the repartee is fast and amusing, and the pace is frenetic.

SON OF FLETCH

Son of Fletch takes the popular series in a new direction. In this entry, the hero, now in middle age, is living in Tennessee with girlfriend Carrie, when a group of convicts escapes from a prison in neighboring Kentucky and makes a beeline straight for Fletch's home. Among them is an alleged attempted murderer, John "Jack" Fletcher Faoni, who claims to be Fletch's illegitimate son, the product of a moment of passion with an obese woman from the protagonist's past. Though Jack physically resembles his supposed father and moves like him, Fletch has his doubts and feels there may be more to the situation than meets the eye. Doing the unexpected, as usual, Fletch assists the convicts in eluding a dragnet and transports them to a compound in Alabama, a haven for lowlife white supremacists, where one of the escapees, Kris Kriegel, unveils a sinister plan to rain down murder and mayhem among humans deemed inferior. Sprinkled throughout with McDonald's trademark humorous dialogue, *Son of Fletch* has more violence and a harder edge than other entries in the series, and the ending sets up a sequel featuring father and son, *Fletch Reflected*.

BIBLIOGRAPHY

- Carr, John C. "Gregory McDonald." In *The Craft of Crime: Conversations with Crime Writers*. Boston: Houghton Mifflin, 1983. Contains a general introduction to McDonald's life and work; the interview is filled with insights into why the author writes shorter, humorous mystery novels "post-cinematically" and focuses on many other facets of his writing and fiction in general, including McDonald's assertion that the mystery is an ideal forum for social criticism and for bringing order to chaos.
- Dahlin, Robert. "PW Interviews: Gregory McDonald." *Publishers Weekly* 229, no. 25 (December 18, 1981): 14-16. Contains biographical tidbits from the author's life and insights into his methods of work.
- DeAndrea, William L. *Encyclopedia Mysteriosa: A Comprehensive Guide to the Art of Detection in Print, Film, Radio, and Television*. New York: Prentice Hall, 1994. Provides brief entries on Gregory McDonald and on his major creation, Fletch.
- Henry, William A., III. "Blood, Blonds and Badi-nage." *Time*, November 4, 1984, 83-86. Brief reviews of *Fletch Won* and *Safekeeping*; the latter

novel is particularly cited for its plot—a small boy, heir to a dukedom, is orphaned during the London blitz and sent to New York to be looked after by a tabloid writer. The novels are called a blend of "sociology and satire."

- King, Nina, with Robin Winks. *Crimes of the Scene: A Mystery Novel Guide for the International Traveler*. New York: St. Martin's Press, 1997. Provides a brief description of the Brazilian locations depicted in McDonald's *Carioca Fletch*.
- Lukowsky, Wes. *Booklist* 91, no. 2 (September 15, 1994): 117. A review of *Fletch Reflected*, the followup to *Son of Fletch*, in which undercover reporter Jack, having just completed an exposé of a redneck racist cult, embarks on a new investigation: an old flame, soon to be married to a billionaire inventor's son, asks Jack to investigate a series of incidents that occurred at the estate of her father-in-law-to-be. Favorably cited for witty dialogue and for its unique blend of suspense and cartoon-like characters.
- McDonald, Gregory. Gregory McDonald. <http://www.gregorymcdonald.com>. The author's official Web site contains a biography and information on the author's books and films made from his works.
- Pronzini, Bill, and Marcia Muller, eds. *1001 Midnights: The Aficionado's Guide to Mystery and Detective Fiction*. New York: Arbor House, 1986. Contains reviews of *Fletch* and *Flynn's In*—the former is called a "page-turner with dazzling dialogue," while the latter is labeled a "rollicking story with deadpan wit."
- Winks, Robin. "Mysteries." *The New Republic* 188, no. 23 (June 13, 1983): 35-36. A brief, positive review of *Fletch's Moxie*, described as "one of the most biting of McDonald's satires."

JOHN D. MacDONALD

Born: Sharon, Pennsylvania; July 24, 1916

Died: Milwaukee, Wisconsin; December 28, 1986

Type of plot: Hard-boiled

PRINCIPAL SERIES

Travis McGee, 1964-1985

PRINCIPAL SERIES CHARACTER

TRAVIS MCGEE is a self-described “salvage expert,” specializing in recovering stolen goods for clients who are helpless, hapless, and innocent victims of confidence men. He is a tough, independent man with a romantic streak and a moral code.

CONTRIBUTION

John D. MacDonald takes the hard-boiled detective and fashions him into the modern version of a knight-errant. MacDonald’s Travis McGee usually gets involved in helping young women who have been bilked of their money by charming male swindlers. In McGee’s code of honor, the worst crime is taking advantage of the innocent and the naïve. He couples his fiercely moral views with strong convictions about the nature of modern society, which he deplors for its rapacious violation of the environment and its greedy exploitation of human beings. Knowing he cannot change the structure of society fundamentally, McGee opts for living on its fringes and for doing battle with the hucksters and cheats who thrive on fooling women—and sometimes gullible men—by deceit and trickery. Although he is a fierce individualist, McGee is remarkable for having such a well-developed social consciousness. He is a man who realizes that his way of life is in itself a statement, a challenge to the status quo.

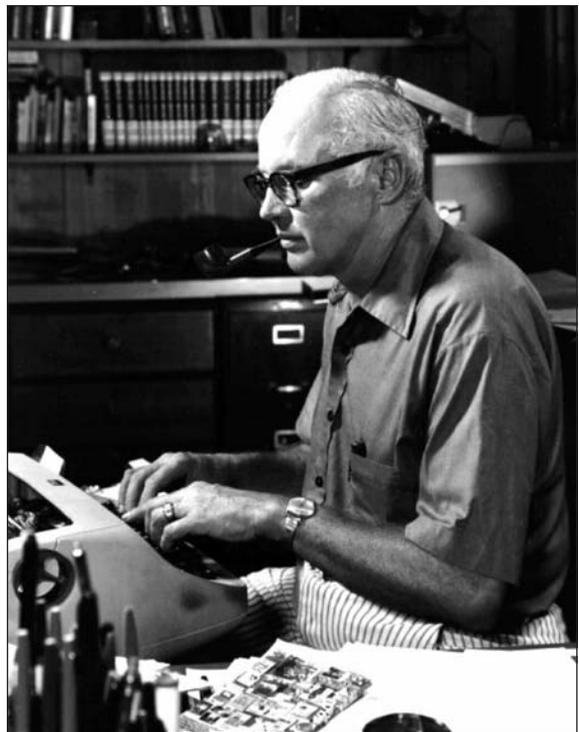

BIOGRAPHY

John Dann MacDonald was born on July 24, 1916, the only son of Andrew MacDonald and Marguerite MacDonald, in Sharon, Pennsylvania. When he was ten years old, his family moved to Utica, New York, where he attended the Utica Free Academy. Two years later he contracted mastoiditis and scarlet fever and al-

most died. His sickness changed his life, making him an avid reader and a deeply reflective person.

MacDonald’s father wanted his son to be a businessman, and MacDonald obliged his father by attending business schools in Philadelphia and Syracuse, where he was graduated with a bachelor’s degree in business administration in 1936. After his marriage in 1938, graduation from the Harvard Graduate Business Administration School in 1939, and a series of unsatisfactory jobs, he enlisted in the navy in 1940. It was a relief to him to have a sure means of supporting his family (his son was born in 1939) and not to worry about his place in the competitive business world. Soon he began to write—although his first short story was not published until 1946. His work for the navy and for the Office of Strategic Services (the precursor of the Central Intelligence Agency) gave him valuable background and experience for his fiction.

After World War II, MacDonald began to make a

John D. MacDonald.

modest living from selling stories to magazines. He published his first full-length novel in 1950 and went on to produce books about a wide range of subjects, including science fiction. In 1952, he began living in Florida, the setting for all the Travis McGee novels. Although he is best known for the Travis McGee series, it makes up less than half of his total output as a writer. *Condominium* (1977), for example, was a best seller and earned significant praise for the fineness of its moral and aesthetic vision. In 1972, he received the Grand Master Award from the Mystery Writers of America. He died in Milwaukee, Wisconsin, in 1986.

ANALYSIS

As John D. MacDonald freely admitted on many occasions, Travis McGee was his mouthpiece for the expression of opinions on a wide range of issues. MacDonald was a mature writer when he created McGee in 1964, so he knew how to create the detective as a full-fledged character interacting in complex ways with other characters. Although MacDonald showed that he could cleverly manipulate detective story plots, he always emphasized the significance of themes and characterization. He was not overly concerned with the whodunit form or with the mysteries the detective solves, but instead stressed the detective's moral nature and intelligence. How McGee goes about his job is at least as important as his discovery and apprehension of the murderers he pursues.

Because McGee is always the first-person narrator of the novels, his consciousness is of paramount interest. He works for himself and the people who hire him. He owns and lives on a boat, *The Busted Flush*, named in memory of a winning hand in a poker game. McGee had been losing hand after hand and then finally won one by bluffing a flush. His luck turned, and he won enough to take possession of the boat. The name of the boat points to the basic situation in which McGee usually finds himself. Fate usually deals him what looks like a losing hand, but somehow he manages to pull out or "salvage" something of value.

McGee is no unmarked hero. Indeed, the McGee series is remarkable for the many wounds and broken bones the detective suffers. He has been shot in the head and has endured all manner of injuries to his

face, his ribs, and his legs. He is a rugged six feet, four inches tall and weighs more than two hundred pounds (although his opponents often mistake him for being a good twenty pounds lighter). McGee always manages to escape with his life because of his mental and physical agility. He can duck and dance away from blows, and he can fall out of a hot-air balloon from a height of about four stories, landing so that only his knee needs surgery. Yet he recognizes that no matter how good he is, sooner or later he will be nailed. One of the finer pleasures of the McGee series is reading his analyses of fights, his calculations as to when to take blows on his forearms and elbows and when to penetrate his opponent's defense.

BRIGHT ORANGE FOR THE SHROUD

McGee never comes away from any of his cases with a clean victory. Sometimes one of his clients dies. Many times innocent people who get in the way of McGee's investigations die. For example, McGee understands that to catch up with Boone Waxwell in *Bright Orange for the Shroud* (1965), he has to use a woman whom Waxwell is stalking as bait. McGee's timing is off, however, and Waxwell snatches the woman and rapes her before McGee's plan of entrapment gets under way. Characteristically, the vicious Waxwell eventually manages to impale himself in a way that is just retribution for the many women he has violated. A rough, crude sort of justice—a kind of symmetry—does operate in the McGee novels, but it is at the expense of the guilty and the innocent alike.

Waxwell is also a particularly good example of MacDonald's deftness at creating complex characters. Waxwell talks like an easygoing country boy. He does not seem particularly bright. Yet McGee finds that this is a facade, that Waxwell hides his cunning, murderous nature with a mild-mannered, good-natured style. Knowing this, and even after being warned, McGee still underestimates Waxwell.

FREE FALL IN CRIMSON

One of the most fascinating aspects of the Travis McGee series is his patient piecing together of plots and human characters. In *Free Fall in Crimson* (1981), a terminally ill millionaire is beaten to death. He had, at most, another six months to live. Why was he murdered? Is there any connection between his daughter's

fatal bicycle accident, his death, and the fact that she was due to inherit his fortune? To trace the chain of events and to understand who had the most to profit from the millionaire's death, McGee calls on his friend Meyer, an economist among other things, who has a gift for seeing the "big picture" in ways that are beyond Travis, who is better as a painstaking collector of details. Because virtually every McGee case revolves around money, he needs a knowledgeable consultant who can explain or speculate on the many ways money can be extorted and conned from people or how it can find its way into various enterprises that conceal the source of revenue.

MCGEE AND MEYER

McGee and Meyer often work as a team. MacDonald found it necessary to invent Meyer because of the limitations of the first-person point of view. With McGee as narrator, everything is seen or reported from his perspective. Dialogue sometimes allows other points of view to intrude, but only a true collaborator could widen and extend McGee's consciousness. Like Sherlock Holmes and Dr. Watson or Nero Wolfe and Archie Goodwin, McGee and Meyer complement each other and compensate for what the other lacks. Meyer is certainly no man of action—as is proved in *Free Fall in Crimson*, where he buckles under pressure and almost causes McGee's death.

MacDonald also introduced Meyer to give his detective series a tension and variety that is often lacking in formula fiction. As MacDonald notes, Meyer helped solve a technical problem:

I have to keep the plot the same without allowing it to look as if it is the same. Little Orphan Annie gets into a horrible situation and Travis—Daddy Warbucks—comes and saves her. Every time. So . . . you become a little bit wary of a plot structure which is going to leave too many doors closed as you're writing it. I brought in Meyer about the fourth book because there were getting to be too many interior monologues.

If McGee is a Daddy Warbucks helping vulnerable young girls who have been swindled and molested, he is also a romantic who falls in love with some of the women he saves. McGee's cases take an emotional toll on him. Like Dashiell Hammett's Sam Spade, McGee

has a tough-guy exterior that hides a streak of sentimentality. He knows better than to indulge himself, yet he never completes a case unscarred by mental trauma. Compared to most fictional detectives, McGee is a feminist—in the sense that he is deeply aware of women's feelings. He often rejects women who invite him to engage in recreational sex. He is not above using manipulative women sexually to solve a case, but such women are his equals. He does not condescend to them. He also likes to describe love play. Sex scenes in the MacDonald series are as evocative as the fight sequences.

In Travis McGee, MacDonald created a character with a temper—if not a background—like his own. MacDonald hated working for business firms. He did not find himself as a man or as a writer until he decided to abandon the competition of the business world. Similarly, Travis McGee turns his back on the corporate enterprise. He has contempt—as did MacDonald—for the industries that are ruining Florida's environment. The McGee novels are full of laments for the spoilage of the state's lovely land and sea refuges. Neither MacDonald nor McGee sees a way to change the world, but both the author and his character elaborate on a consciousness of exquisite, discriminating taste.

Travis McGee is a rough-hewn version—perhaps it would be better to say an inversion—of Rex Stout's Nero Wolfe. Wolfe never left home; McGee is rarely at home. He travels the state of Florida—and sometime beyond it to Iowa, Illinois, and other states—to solve his cases. His home is a boat, and he is always in motion. Whereas Wolfe is sedentary and fat, McGee watches his diet. For all of their differences, however, each detective is admired for the way he savors and measures experience. McGee, the poor man's Nero Wolfe, the proletarian amateur, is the upholder of public and private standards.

In medieval literature, the knight went forth to save a damsel in distress or to vindicate a lady's honor. In *The Deep Blue Good-by* (1964), the first McGee novel, in *A Purple Place for Dying* (1964), and in *The Green Ripper* (1979), McGee explicitly refers to himself as a kind of worn-out, yet indefatigable knight, ready to tilt his lance at dragons. He realizes that the

odds are against him, but he cannot live with himself if he does not set forth. The imperative is moral. A seasoned veteran who knows how to spell himself, who waits for his second wind, McGee is the resilient hero and the modern antihero, making no great claims for his prowess yet surviving precisely because he knows his limitations. In a Florida fast being overtaken by developers, confidence men, and greedy corporations, McGee remains a voice of conscience, acting on his own principles and pointing out the damage caused by a world that ignores ethical and ecological concerns.

ROSS MACDONALD

Kenneth Millar

Born: Los Gatos, California; December 13, 1915

Died: Santa Barbara, California; July 11, 1983

Also wrote as John Ross Macdonald

Type of plot: Private investigator

PRINCIPAL SERIES

Lew Archer, 1949-1976

PRINCIPAL SERIES CHARACTER

LEW ARCHER is a private investigator, formerly on the Long Beach police force. About thirty-five years old and divorced when he first appears, he ages in the course of the series to fifty or so, remaining unmarried. A tough but caring man, he is sustained by his conviction that "everything matters"—that every human life has a meaning that awaits discovery and understanding.

CONTRIBUTION

Ross Macdonald's eighteen novels featuring Lew Archer, the compassionate private eye who serves as their narrator and central intelligence, have been described as "the finest series of detective novels ever written by an American." Working in the tradition of Dashiell Hammett and Raymond Chandler, masters of the hard-boiled detective novel, Macdonald surpassed them in craftsmanship and psychological depth. He saw in popular fiction the promise of "democratic prose," fashioned from the American vernacular. His language is economical, deceptively simple, capable of poetry. For the most part, his characters are ordinary people, neither heroes nor villains, rendered with full justice to the moral complexity of their experience. His books are also a composite portrait of a particular place and its society; few novelists, whether inside or outside the mystery genre, have achieved the accuracy, the social range, and the insight of Macdonald's anatomy of California.

BIOGRAPHY

Ross Macdonald was born Kenneth Millar on December 13, 1915, in Los Gatos, California, the son of John Macdonald Millar and Annie Moyer Millar. ("Ross Macdonald" was a pen name that he adopted after having published several books; in private life he remained Kenneth Millar.) Millar was an only child; his parents, both forty years old at his birth, were Canadian. When Millar was still an infant, the family moved to Vancouver, British Columbia, where Millar's father, an amateur writer, worked as a harbor pilot. When Millar was three years old, his father abandoned the family.

Millar spent most of his childhood and youth in the homes of relatives all across Canada. In Kitchener, Ontario, he attended the Kitchener-Waterloo Collegiate and Vocational School, from which he was graduated in 1932. There, he met his future wife, Margaret Ellis Sturm; his first publication, a Sherlock Holmes parody, appeared in an issue of the school magazine that also included her first published story.

Ross Macdonald. (Hal Boucher)

In 1932, Millar's father died, leaving an insurance policy of twenty-five hundred dollars. On the strength of that modest legacy, Millar was able to enter the University of Western Ontario. Following his graduation in 1938, he married Margaret Sturm; their only child, Linda Jane Millar, was born a year later.

In 1941, Millar began graduate study in English literature at the University of Michigan in Ann Arbor. (He received his doctorate in 1952 on completion of his dissertation, "The Inward Eye: A Revaluation of Coleridge's Psychological Criticism.") In the same year, Margaret Millar published her first novel, *The Invisible Worm*; she was to enjoy a productive and successful career as a mystery writer. Kenneth Millar's own first novel, *The Dark Tunnel*, was published in 1944, by which time he was an ensign in the United States Naval Reserve, serving as a communications officer on an escort carrier. After the war, Millar joined his wife and daughter in Santa Barbara. With the exception of a year spent in Menlo Park, 1956-1957, during which time he underwent psychotherapy, Millar lived in Santa Barbara for the remainder of his life.

Between 1946 and 1976, Millar published twenty-three novels. In 1974, he was awarded the Grand Master Award of the Mystery Writers of America. In 1981, he was diagnosed as having Alzheimer's disease. He died on July 11, 1983.

ANALYSIS

Ross Macdonald began his career with two spy novels: *The Dark Tunnel*, written in only one month while he was taking courses for his doctorate, and *Trouble Follows Me* (1946), which he completed on board ship while serving in the navy. His third and fourth books, *Blue City* (1947) and *The Three Roads* (1948), in which he turned to the hard-boiled style, were written in Santa Barbara in a nine-month span after his discharge. Together, these four novels constitute Macdonald's apprenticeship. They are marred by overwriting and other flaws, but they served their purpose, allowing him to establish himself as a professional writer.

THE DETECTIVE HERO

Macdonald found his voice with his fifth novel, *The Moving Target* (1949). It is no accident that this key

book was the first to feature private investigator Lew Archer: With Archer as narrator, Macdonald was able to deepen and humanize the form he had inherited from Hammett and Chandler. In his analytical awareness of what he was doing as a writer and how he was doing it, Macdonald was quite exceptional, and his essays and occasional pieces, collected in *Self-Portrait: Ceaselessly into the Past* (1981), remain the best guide to his work. In his essay "The Writer as Detective Hero," he sketches the history of the detective story and discusses his contribution to the genre via the character of Archer.

The focus of the essay, as its title suggests, is on the complex relationship between fictional detectives and their creators, from Edgar Allan Poe's C. Auguste Dupin and Arthur Conan Doyle's Sherlock Holmes to Hammett's Sam Spade and Chandler's Philip Marlowe. In Macdonald's view, the central purpose of the detective story is to provide an "imaginative arena" in which troubling realities can be confronted "safely, under artistic controls." The fictional detective, Macdonald suggests, is a projection of the author, a mediating figure by means of which the writer is able to "handle dangerous emotional material." Early detectives such as Dupin and Holmes enact the triumph of reason over the "nightmare forces of the mind" (although in Poe's stories, Macdonald notes, there remains a "residue of horror"). Sam Spade, the archetypal hard-boiled detective, is a much more realistic character, yet his creator deprives him of the ability to make sense of his experience—and thereby denies him full humanity. Marlowe is gifted with a richer sensibility, at once ironic and lyrical, yet there is a strong vein of romanticism in his portrayal.

Macdonald's Lew Archer has something in common with all these predecessors, yet he differs from them as well:

Archer is a hero who sometimes verges on being an antihero. Although he is a man of action, his actions are largely directed to putting together the stories of other people's lives and discovering their significance. He is less a doer than a questioner, a consciousness in which the meanings of other lives emerge. This gradually developed conception of the detective hero as the mind of the novel is not wholly new, but it is probably my main contribution to this special branch of fiction.

With this passage, Macdonald's title, "The Writer as Detective Hero," gains added resonance. Macdonald, the writer, is a kind of private investigator; Archer, the detective, is a poet, perceiving hidden connections. Both writer and detective are in the business of "putting together the stories of other people's lives and discovering their significance." Indeed, in many of the novels, Archer explicitly identifies the impulse that keeps him going, nowhere more forcefully than in *The Far Side of the Dollar* (1965), when, in response to a skeptical question ("Why does it matter?"), he states his credo: "Life hangs together in one piece. Everything is connected with everything else. The problem is to find the connections."

As Macdonald acknowledges, this altered conception of the detective hero (and, thereby, the detective novel) developed gradually. The early Archer books, while unmistakably individual, nevertheless retain many features of the traditional hard-boiled novel; like Chandler's Marlowe, Archer trades insults with gangsters, is repeatedly embroiled in violent, melodramatic confrontations, and encounters the requisite complement of dangerous and seductive women: "The full red lips were parted and the black eyes dreamed downward heavily. . . . I had to remind myself that a man was dead" (*The Way Some People Die*, 1951). The texture of the later books is subtler; Archer is less cynical, more introspective. It is easy to exaggerate the contrast, as many critics have done; after all, every one of the Archer books follows the conventions of the detective novel—a form as artificial, Macdonald remarked, as the sonnet. Still, it is undeniable that Macdonald's novels following *The Galton Case* (1959), the book he regarded as marking his breakthrough, reveal his increasing mastery of those familiar conventions and his ability to employ them in a highly original fashion.

THE UNDERGROUND MAN

That mastery is particularly apparent in *The Underground Man* (1971), the sixteenth Archer novel and one of the best. The title echoes Fyodor Dostoevski; Macdonald thus claims for his own a tradition that includes *Prestupleniye i nakazaniye* (1866; *Crime and Punishment*, 1886) and *Bratya Karamazovy* (1879-1880; *The Brothers Karamazov*, 1912). The point is that the heritage of the crime novel is much richer than

is generally acknowledged. Macdonald was not seeking to add a literary cachet to his work; rather, he was passionately committed to the value of popular literature. His experience of poverty and the humiliation that went with it made him a lifelong partisan of the underclass and an enemy of privilege. Those attitudes are reflected in the social commentary that threads through his books; more important, they helped to shape the language of his fiction.

The opening sentences of *The Underground Man* are typical: "A rattle of leaves woke me some time before dawn. A hot wind was breathing in at the bedroom window. I got up and closed the window and lay in bed and listened to the wind." The language is economical and direct; the sentences follow one another with compelling speed. Macdonald's apparently simple language is in fact highly stylized; to achieve the effect of simplicity—without falling into self-parody—requires great art. Macdonald based his style on the spoken language, "the carrier of our social and cultural meanings." A genuinely democratic society, he believed, needs a vital popular literature written in a language accessible to all its members: "A book which can be read by everyone, a convention which is widely used and understood in all its variations, holds a civilization together as nothing else can."

It is just such a convention that permits readers to accept a private eye who (to borrow Macdonald's tribute to Chandler's style) writes "like a slumming angel." Here is Lew Archer on the first page of *The Underground Man*: "It was a bright September morning. The edges of the sky had a yellowish tinge like cheap paper darkening in the sunlight." The marvelous similes that are Macdonald's trademark do not serve a merely decorative purpose; they create patterns of imagery that are integral to the structure of his novels. Here, there is a hint of the forest fire that will dominate the narrative.

On that bright morning, Archer is feeding peanuts to jays on the lawn of his apartment building in West Los Angeles. An anxious little boy emerges from an apartment usually occupied by an older couple; soon the boy, whose name is Ronny Broadhurst, is having a good time with Archer, catching peanuts in his mouth. The fun is interrupted by the arrival of the boy's father,

Stanley Broadhurst, who has come to take Ronny to Santa Teresa (a fictitious town modeled on Santa Barbara) to visit his grandmother. The boy's mother, Jean Broadhurst, comes out of the apartment and an ugly scene ensues, initiated by Stanley. Eventually he leaves with his son and a young blond woman, evidently eighteen or nineteen, who has been waiting out of sight in his car.

The reader may be grumbling that Archer's entry into the Broadhursts' troubles is a little too conveniently arranged. Does not Archer himself say (in this book and in others as well), "I don't believe in coincidences"? Indeed, there is no coincidence here, for Macdonald has a reversal in store. Several hours after Stanley leaves, Jean Broadhurst comes to Archer's apartment. A forest fire has started in Santa Teresa, near Stanley's mother's ranch. Jean asks Archer to take her there; she is worried about Ronny. On the way, she admits that the Wallers, the couple whose apartment she is borrowing, have told her about Archer and his profession, and that, under the pressure of her trouble with her husband, this knowledge may have prompted her to stay in the Wallers' place.

The deftness of this opening is sustained throughout the novel. Everything fits, yet nothing is contrived. Stanley's father has not been seen for fifteen years, having apparently left his wife and son for another woman. Stanley has become obsessed with tracing his father, increasingly neglecting his own family. At the Broadhurst ranch in Santa Teresa, Archer meets a Forest Service investigator who has discovered Stanley's hastily buried body. The fire, now raging out of control, was started by his cigarillo, dropped in the tinderlike grass when he was murdered. Ronny and the teenage girl have disappeared.

With no forcing, Macdonald draws a parallel between the fire and the ramifying Broadhurst case, which proves to involve many people in a tangle of guilt, deception, and murder. The consequences of the fire are enormous—completely out of scale, it would seem, with the tiny flame that started it. So it is, Macdonald suggests, with human affairs.

Such a conclusion, baldly stated, is little more than a cliché. Macdonald's novels, however, are not statements: They are stories that unfold in time with the in-

evitability of tragedy, and their revelations, even on a second or third reading, move the reader to pity and wonder.

Types of plot: Amateur sleuth; inverted; espionage; psychological

PRINCIPAL SERIES

Selena Mead, 1963-1982

PRINCIPAL SERIES CHARACTERS

SELENA MEAD is an agent for a secret federal counterespionage group, Section Q. She ages from her early twenties to her mid-thirties in the course of the series. Daughter of an aristocratic ambassador and his socialite wife, Selena rejects marriage to a young banker of her own social status in favor of elopement with a mysterious young man whose life she saves in East Berlin.

SIMON MEAD, the mysterious young man to whom Selena is married, is ostensibly a journalist for *Background* (a rather staid, nonpartisan political journal) but actually an agent for Section Q. When Simon is knifed to death in the course of an assignment, Selena takes over his journalistic cover and his post at Section Q.

CONTRIBUTION

Patricia McGerr's stories featuring the intrepid Selena Mead are stylish, entertaining, cerebral puzzles. Although there is much action and the character development of these stories is quite good, their chief appeal lies in their intellectual challenge to the reader. In each of the episodes, Selena is faced with a problem

that must be solved through brains, not brawn. Is the handsome young congressman who courts her a Russian agent or an innocent dupe? Is the vacationing scientist planning to defect behind the Iron Curtain? Which of several trusted aides and family members is plotting to assassinate the visiting monarch? Selena must analyze the words and actions of all these suspects and set hastily devised intellectual traps for them. The reader is challenged to outthink Selena and the criminal. Written in the 1960's, the Selena Mead series presented the reader with a strong, resourceful, intelligent female spy who solved cases by using her brains at a time when James Bond was the model espionage hero and female characters in typical espionage novels were disposable ornaments who distracted the macho agent from his bloody feats of derring-do.

The Selena Mead stories, however, are not McGerr's most original and creative efforts. McGerr will be best remembered as the author who reworked the whodunit into the "whodunin," a plot in which the identity of the killer is known from the start but the identity of the victim remains a mystery until the very end. The reader is invited to decide which character out of a large cast is the most likely to be murdered. In yet another twist on conventional plotting, McGerr presents a murderous wife whose suspicious husband sent for a detective just before his untimely and most unnatural demise. The murderess must then determine which of several new acquaintances is the detective who has come to prove her guilt. Like the Selena

Mead stories, these unconventionally crafted novels have a strongly feminist undertone.

BIOGRAPHY

Patricia McGerr, daughter of Patrick Thomas McGerr and Catherine (née Dore) McGerr, was born December 26, 1917, in Falls City, Nebraska. A practicing Catholic all of her life, McGerr attended Trinity College in Washington, D.C., before receiving a bachelor's degree from the University of Nebraska in 1936. She then went on to receive a master's degree in journalism from Columbia University in 1937. She returned to Washington for her first job as publicity director for the American Road Builders' Association, where she worked from 1937 to 1943. In 1943, she took a job in New York City as assistant editor of *Construction Methods* magazine, where she remained until 1948.

While working for *Construction Methods*, McGerr published two of her most original and experimental crime novels, *Pick Your Victim* (1946) and *The Seven Deadly Sisters* (1947). In 1948, the success of these books enabled McGerr to leave her editorial job in New York and return to Washington as a full-time writer. From 1960 onward, McGerr also served as a lecturer and consultant to the Georgetown University Writers' Conference.

Never married, McGerr devoted herself to her writing career and to various liberal political and social causes. Her Catholicism found its literary outlet in two biblical novels, *Martha, Martha* (1960), the story of Lazarus's domestic sister, and *My Brothers, Remember Monica* (1964), a novel about the mother of Saint Augustine. McGerr was an active member of the Mystery Writers of America and served several terms on its board of directors. She was treasurer and later president of the Catholic Interracial Council of Washington and treasurer of the Northwest Washington Fair Housing Association. She was also an unsuccessful candidate for the Democratic National Committee of Washington, D.C. McGerr's literary honors include first prize in the Catholic Press Association short-story contest in 1950, the French Grand Prix de Littérature Policière in 1952, and two awards for short stories from *Ellery Queen's Mystery Magazine* (second prize

in 1962 for "Justice Has a High Price" and first prize in 1967 for "Match Point in Berlin"). Patricia McGerr died of cancer on May 11, 1985, at the Carriage Hill Nursing Home in Bethesda, Maryland.

ANALYSIS

To read a Patricia McGerr novel is to enter into an implausible world peopled with peculiar characters. Yet the reader who is willing to suspend disbelief, to leave real-life logic behind for the duration of the book, will find a realm of suspense, bafflement, and intellectual enchantment. Her characters and situations may not be true to life, but within the McGerr universe they function perfectly. McGerr was a consummate mistress of style, and she took risks with the mystery form that few other writers have dared to imitate.

PICK YOUR VICTIM

Pick Your Victim was a bravura start to McGerr's career. Jacques Barzun and Wendell Hertig Taylor, who edited a series of the fifty greatest crime-fiction works written from 1900 to 1950, included McGerr's first novel to stand among such classics as Arthur Conan Doyle's *The Hound of the Baskervilles* (1901-1902) and Agatha Christie's *The Murder of Roger Ackroyd* (1926). According to Barzun's preface to the book, McGerr devised a whole new mystery genre:

Unlike any other detective tale on record, *Pick Your Victim* challenges attention by a double reversal, that of the standard problem and of its form. Here is a crime fully understood, in no way mysterious at the time and place of its occurrence, yet it tantalizes a group of people 3,000 miles away; and if this were not enough, the element unknown to the distant inquirers is not the criminal but the victim.

Dubbed a whodunin by several critics, the story develops through a frame narration. The year is 1944, and a group of soldiers stationed in the Aleutians are eager for any scraps of news from home. One of them, Davey Miller, receives a food package wrapped in newspaper shreds. The men devour the clippings as eagerly as they do the treats, even reading the fashion advertisements. Pete Robbins, the narrator of the tale, comes across one torn fragment dealing with a murder that

has occurred at the Washington, D.C., office where he worked before being drafted. According to the truncated news story, Paul Stetson, managing director of the Society to Uplift Domestic Service (SUDS), admitted to strangling one of the other executive officers of the organization with a brown wool scarf. The newspaper is torn at a crucial point in the story, so the identity, even the gender, of the victim is a mystery. There were ten officers in the organization, seven men and three women, when Robbins left. Management by turmoil was the organization's hallmark, and on any given day any two people might be sworn foes or best friends. Depending on how matters went on the day of the murder, any of the ten executives could have been the victim.

The soldiers decide to organize a betting pool on the victim's identity, and Pete agrees to write to his girlfriend, Sheila, who will send him the information. It will take approximately two weeks for her answer to arrive, and for the next ten days, Pete, like Scheherazade, tells the tale of a different organization member, holding his audience spellbound with the byzantine inner workings of an outfit ostensibly dedicated to aiding American housewives and paid domestic help.

Founded by Bertha Harding as a newsletter of domestic tips for maids, the tiny organization was taken over by Paul Stetson, a venture capitalist who turned it into a nationwide chain of women's clubs and a political organization that lobbies for various women's interests. From an inexpensive mailing service for domestic workers, SUDS grew into a representative group for the five million or so upper-middle-class housewives who can afford to hire maids. The leadership of the organization was taken over by a group of men who agree that "it's still a man's world, and even women have more confidence in a setup that is conducted by men." Bertha Harding, the founder, was relegated to a secretarial position, and Anne Coleman, Stetson's mistress, became the only woman in the group with real power. Coleman's queen-bee supremacy among the men became threatened, however, by Loretta Knox, an unpaid officer who had organized the West Coast contingent of SUDS and added temperance work to the SUDS agenda. The seven male officers vied with one another to be Stetson's right hand,

and each one secretly longed to dethrone Stetson, even though it was his money and organizational ability that had transformed the nickel-and-dime newsletter into a multimillion-dollar outfit.

The betting among the men changes with each new story Robbins tells, and when Sheila's answer finally arrives, all the soldiers have picked their victim. A lucky few have chosen the right one, and oddly enough, the clue to the victim's identity lies not in the Machiavellian infighting Robbins has described, but in Stetson's choice of murder weapon. *Pick Your Victim* is delightfully plotted, and the reader's interest is captivated not only by the murder but also by the bizarre people Robbins describes. McGerr's characters may not be realistic, but they are certainly riveting.

THE SEVEN DEADLY SISTERS

McGerr repeated her ingenious plotting in her second novel and second whodunit, *The Seven Deadly Sisters*. Once again, physical distance and incomplete communication separate an interested party from knowledge of a murder victim's identity. This time both killer and victim are unknown, but they are so closely linked that to know one is to know the other. Sally Bowen, the narrator of this story, is in England with her husband when she receives a letter from her friend Helen in New York. The letter offers sympathy in the light of tragic events that have befallen Sally's family—her aunt poisoned her uncle and then committed suicide. In writing the note, Helen is apparently unaware that Sally's family consists of seven unhappily married aunts, and Sally has received no news from any of them. Helen's note mentions that she is leaving for a vacation, so Sally cannot get in touch with her to find out which aunt is the suicide-murderess. She is reluctant to call any of the aunts for fear of reaching the bereaved household. Sally's husband proposes that they wait until morning, when the London library will be open and they can look at back issues of *The New York Times* until they find the story. Unable to sleep, Sally tells her husband the story of each of her aunts, and in the course of the night they try to deduce which aunt is the most likely culprit.

Orphaned at an early age, Sally was reared by Clara, the oldest and bossiest of her aunts. Married to a rich, tolerant, spineless husband, Clara has dedicated

her whole life to making respectable matches for her six younger sisters, with predictably disastrous results. Bert, young and handsome, abandons plain, aging Tessie shortly after their marriage. Agnes divorces quarrelsome Walter and goes on to a second, equally contentious marriage with Steve. Spendthrift Judy tries to bankrupt her well-meaning but frugal George. Edith cannot cope with Phil's interfering mother and becomes an alcoholic. Molly is pathologically terrified of sex and refuses to have relations with Tom, who follows Clara's misguided advice to force the issue and rapes her. Molly aborts the child she has conceived as a result of this violation and breaks down completely. Doris weds Mike out of spite because she cannot have Tessie's Bert and then proceeds to sleep with most of her brothers-in-law. Throughout this domestic turmoil, Clara tries to pretend that the family is happy. She quarrels with Frank when he finds the courage to stand up to her and tries to stop her from forcing the incompatible couples to stay together.

Recently married and newly pregnant, Sally is afraid that the familial neuroses, unhappy marriages, alcoholic tendencies, and homicidal urges may be hereditary. When the killer's identity and motives are finally revealed, Sally's anxieties are relieved, and the reader's theories and expectations are completely yet logically reversed.

MCGERR'S WOMEN

Although McGerr's stories are excellent studies in suspense and stylistics, they do seem to have a deeper purpose than mere entertainment. A theme of thwarted feminism underlies most of McGerr's novels. Over and over again, women struggle to gain independence, only to be beaten back by society, by circumstance, and by the men in their lives. In *Pick Your Victim*, an entire network of working women falls prey to Stetson the venture capitalist and his group of female-scorning henchmen. The only woman who attains any power in the novel does so by sleeping with Stetson. In *The Seven Deadly Sisters*, Clara, the dominant sister, rules over her siblings because she has no other outlet for her executive abilities. She was born to rule, and the only dominion available to her is on the home front. Each of the other sisters struggles to avoid a domestic fate and goes down in defeat before Clara and social pressure.

Margot Weatherby of *Catch Me If You Can* (1948) is a thoroughly wicked and reprehensible woman. Nevertheless, she is driven to murder because one of the few ways for a woman to attain wealth is through inheritance. In *Death in a Million Living Rooms* (1951), Podge O'Neill, the murdered comedian, is the creation of his wife, Sarah Scott, who gets none of the credit for Podge's success and all of the blame for controlling him. Sarah-Anne and Emily, the two career women of *Fatal in My Fashion* (1954), both fail miserably. Emily becomes a monster, feeding herself emotionally off her sister's success. She is ultimately murdered. Sarah-Anne, the spunky young girl who dreamed of independence, becomes rich and famous but is at the mercy of her creators: Emily, who wants to control her sister's life, and St. Pierre, who wants possession of Sarah-Anne's body. Susan Wills of *Stranger with My Face* (1968) leaves a treacherous husband to fall prey to a treacherous stranger. When she is finally rescued from Pierce Manning's machinations, it is only to fall into the arms of her rescuer, whom she will marry. In every McGerr novel women struggle to achieve sovereignty over their own lives. In each case they are either thwarted or they do gain control over their own fates but lose their souls and become murderous monsters in the process.

SELENA MEAD STORIES

Selena Mead, McGerr's series character, is the only one of her female creations who achieves full autonomy over her own life. Heroine of *Is There a Traitor in the House?* (1964), *Legacy of Danger* (1970), and more than twenty-five short stories (uncollected), she refuses the socially correct marriage her parents have planned for her and travels to Europe to revisit some of the scenes of her childhood as an ambassador's daughter. While visiting East Berlin, she manages to save the life of a handsome journalist, Simon Mead, who is actually an agent for Section Q, a top-secret counterespionage group answerable only to the president of the United States. She and Simon elope, and they spend eight happy years together until he is murdered in the course of an assignment.

Beautiful, intelligent, multilingual, and socially well connected in the United States and Europe, Selena proves to be an even more valuable agent than Simon

was. Assuming his cover as a roving reporter for *Background*, a respected, politically neutral newsmagazine, she goes to work for Hugh Pierce, Simon's immediate superior at Section Q and their Georgetown neighbor. Pierce's cover is that of an eccentric, bohemian, dilettante painter who lives off his trust funds. It is a shock to her friends and family when Selena falls in love with Hugh and is married to him. Yet their marriage does not end her espionage career. Although Hugh is reluctant to place her in danger, Selena insists on maintaining her position in Section Q and usually gets her way. The Selena Mead stories are not realistic—nor are they particularly well crafted. Indeed, they are rather mechanical puzzles with clues studded throughout the story like raisins in a bowl of oatmeal. *Legacy of Danger* is actually a rehash of several of the short stories strung together with a thin narrative thread. Revealing its short-story origins, the book jumps clumsily from one episode to another.

Despite their technical flaws, the Selena Mead stories are a pleasure to read. Selena is the one sunny, wholesome, autonomous female character in the entire McGerr canon. Courageous and resolute, she is able to maintain a career, a marriage, a healthy mind, and a loving heart. The women in McGerr's other, better written works are not so blessed.

Zohara Boyd

PATRICK MCGINLEY

Born: Glencolumcille, Donegal, Ireland; February 8, 1937

Type of plot: Psychological

CONTRIBUTION

Each of Patrick McGinley's novels explores the fortunes of modern Irish characters as they struggle with the burden of Ireland's historical past and its always uncertain future. In most of the novels, rural Donegal provides the setting for an investigation not only of crime but also, and more important, of local language, customs, and folklore. McGinley's intimate knowledge and appreciation of the Irish landscape and how it has profoundly influenced the lives of its inhabitants stand as his greatest strengths. His darkly comic vision and ironic manipulations of the conventions of the classic detective story lend a distinctive quality to his fictions. McGinley's characters are much more than stock figures, and they speak in a ribald, original language that is captivating and unmistakably Irish.

BIOGRAPHY

Patrick Anthony McGinley was born on February 8, 1937, in Glencolumcille, County Donegal, Ireland, to Peter McGinley and Mary Anne Heekin McGinley. One of five children, McGinley was educated at Cashel National School in Glencolumcille and at St. Edna's College in Galway. From 1954 to 1957, he studied literature at University College, Galway, and developed a particular interest in Middle English poetry.

After receiving the bachelor of arts in 1957, McGinley spent four years teaching in secondary school before emigrating to London in 1962. There he worked as an assistant publisher, except for a year in the mid-1960's, during which he lived in Sydney, Australia. In 1981, McGinley began serving as managing editor of Europa Publications Limited, publishers of academic and reference books.

ANALYSIS

With the publication of his first novel, *Bogmail*, in 1978, Patrick McGinley was immediately hailed as a

major new mystery novelist. What critics were quick to emphasize, however, was the distinctive quality of his works, a quality that raises them above the ordinarily formulaic mystery fare. Although there are mysteries and secrets in his work, these have less to do with "whodunit" than with a study of the minds of the killers and the victims. *Bogmail* is described as "a novel with murder," and such a description seems especially fitting for many of his other novels as well. Murders occur, and indeed they propel the plot; they are, however, almost secondary to the novels' primary investigations of landscape, manners, and customs.

BOGMAIL

In many of McGinley's novels the focus is squarely on rural Irish life. In *Bogmail*, the setting is the village of Glenkeel, County Donegal, where the local pub, the center of nearly all the novel's action, hums with talk of a persistent drought. Inevitably all conversations turn to the weather and its effect on crops, animals, and humans. The other important setting is the surrounding bog, where the pub owner, Tim Roarty, buries the body of an employee who is corrupting Roarty's estranged daughter. For the Irish, the bogs are extraordinary landscapes providing not only the turf for their fires but also secrets preserved from lost civilizations. Things are easily lost in a bog, but once recovered, as this body is, they can return to haunt the living.

McGinley is especially expert at capturing the randy, colloquial speech of the rural Irish. Characters speak not only a heavily inflected English but also Irish itself. The topics are, appropriately, those that would most concern country people. Thus, in one case there is a discussion of keeping land in the family, as an old codger refuses to sell his property, fearing that it will be exploited or unappreciated. In another instance, the sexual rapacity of widows, a time-honored theme in all Irish literature, commands attention.

A repeated McGinley theme is also a distinctly Irish one: the role of fantasy in Irish experience. In each novel, truth emerges as an elusive commodity as characters lie, dissemble, or coyly tell stories. In

Bogmail, the narrator interrupts a conversation to describe one character “trying to make out if she were being serious, always a problem in Ireland.” At another point in the novel the local police officer remarks that all crime is imaginary in the country.

McGinley uses dreams to show characters leading a double existence. Each of his protagonists, as well as various minor characters, struggle with divided senses of self. In *Bogmail*, Roarty finds he is becoming a stranger to himself the longer he hides his crime from others.

GOOSEFOOT

In *Goosefoot* (1982), a young university graduate, Patricia Teeling, leaves a family farm in Tallage, County Donegal, for a year in Dublin. Before her departure, she is offered her uncle’s prosperous farm but sets out for the city in search of herself. Throughout the novel she contemplates the differences between city and country living and returns periodically to her hometown. There, she feels free and uninhibited as she wanders the fields and visits the pubs, where discussion of crops and cattle dominate conversation. When Patricia loses the land to a scheming cousin, McGinley could well be revealing the fate of all Ireland—as it loses its connections with its rural origins, it loses itself.

The image of a cracked mirror appears periodically to reveal Patricia’s divided experiences. She is a country girl trying to live in the city; she disdains urban life but eventually grows bored of rural ways when she returns home. She is further divided because she cannot decide what course she wants her life to take.

McGinley liberally laces all of his novels with dreams, as characters wander in and out of consciousness searching for the significance of their existence. In a nation of dreamers, where hard definitions between reality and fantasy continually blur, dream becomes the perfect vehicle for expressing character and action. In McGinley’s hands, dreams presage events, although in oblique or exaggerated ways.

In *Goosefoot*, the heroine has horrifying erotic dreams. In one, she imagines herself lying astride her naked boyfriend and stabbing him in the heart for no apparent reason. By the end of the novel this dream makes perfect sense as she grows further from him,

emotionally and geographically. In another dream she imagines herself a naked captive, tied to a bed over which hangs a long sword. Into the room walks a nude Inspector McMyler, who cuts the cords that encircle her and then stabs her as he approaches for an embrace. In the closing chapter, Patricia Teeling is briefly held captive in McMyler’s room, under the shadow of an immense sword that later impales her as she tries to escape Dublin.

Truth is unstable, as characters dance around one another, never clearly revealing their fundamental natures. Each person creates a persona for the public, leading one character to comment, “In our separate ways we are all would-be novelists.”

One detective, McMyler, is an impostor and ultimately is shown to be the killer himself. Under the guise of being a watchful protector, he invades the victim’s life and eventually murders her. Like the murderers in the other novels, McMyler is a poor man’s Moriarty (in *Bogmail*, in fact, the detective continually sees his case in terms of a contest between a latter-day Sherlock Holmes and Professor Moriarty), a master criminal who matches wits with the police and often outdoes them.

THE TRICK OF THE GA BOLGA

In *The Trick of the Ga Bolga* (1985), McGinley offers his densest, most intricate view of rural Ireland and its folklore. The novel’s title remains enigmatic throughout the first half of the narrative until one of the locals explains to the English immigrant, George Coote, the legend of the Ga Bolga, which he describes as a rare sexual maneuver. At the novel’s close, however, as Coote is dying at the hands of an enraged war veteran, it is revealed that the Ga Bolga was the extraordinary weapon of the mythical Irish hero, Cuchulainn, which when wielded ensured the death of any foe. Also in this novel, there is a local legend surrounding the name of a cove where Irish residents hid to escape pacification by occupying British soldiers. The eventual discovery and slaughter of the Irish escapees operates as a grim foreshadowing of Coote’s destiny.

The power of the priesthood, which is mentioned in McGinley’s other novels, is dramatically presented in this work. Here Father McNullis cajoles and co-

erces the villagers into doing his will, which involves erecting a concrete bridge over a river. As an outsider, Coote watches scornfully as McNullis connives to emulate his inspiration, Pope Julius II, by erecting his own version of a timeless monument.

Many of McGinley's novels feature the fantastic; *The Trick of the Ga Bolga*, however, offers the most thoroughgoing use of fantastic elements. For example, all characters have at least two names; as one character remarks to the British outsider, "Here the names we use aren't real. Anybody who's anybody has at least two nicknames." The longer he stays in this headland the more disoriented Coote becomes, finding himself in a fog, both literally and figuratively. All of this is part of the Irish national character. One character explains, "The Irish imagination is not to be inconvenienced by fact." Earlier, the narrator comments on Ireland within the description of a treacherous country road: "Like so many things in Ireland, it was makeshift and incomplete, lacking the dependable solidity that comes from a confident history and undisturbed centuries of careful husbandry."

In *The Trick of the Ga Bolga*, the split revealed by dreams appears in the figure of Coote, who escapes war-ravaged London for the unfamiliarity of rural Ireland "to find unity of experience, to escape from the criticism and counter-criticism of the split self that continues to refuse wholeness and reconciliation." Everywhere he turns, he confronts doubles—two lovers, two neighbors who fight with each other, a nightshirt made for two, and his own two-facedness.

Coote cannot escape the eerie sensation of being two people living two very different lives, whose "actions were not his own." In the novel's final scene, as his murderer demands to know Coote's final wish, the injured man exclaims, "I wish to live till the true shape of my life is made plain to me—and no longer." Like so many of McGinley's searching characters, Coote fails to see the shape of his life as it unfolds; he imagines that there must be something else, and yet he fails to recognize what exists right under his nose.

The failure to interpret palpable clues recalls one of McGinley's ironic manipulations of mystery conventions. The detectives in McGinley's work, usually police inspectors, are comic figures. On one hand, they

remind readers of similar figures in Agatha Christie's novels who are well-meaning and hard-working, but ultimately incapable of solving anything. Thus in both *Bogmail* and *The Trick of the Ga Bolga*, the police arrest the wrong men after lengthy, secretive investigations. The comedy is especially sharp in *The Trick of the Ga Bolga*, where the principal killer, Coote confesses to Inspector Blowick, only to have the police officer discount the confession because he is convinced that Coote is operating from some misguided sense of compassion for the wrongly accused man. In both these novels the murderers remain unknown and unapprehended by the authorities.

THE RED MEN

The Red Men (1987) presents the Heron clan, a father and four sons, who own and run a hotel, store, and vast acreage in an unnamed Donegal community. In following the call of commerce, literary scholarship, and the priesthood, members of the family have divorced themselves from the land and the folk history of the region. As family members abruptly begin to die, they superstitiously wonder if they are not cursed. *The Red Men* is the first of McGinley's works in which that staple of Irish life—the Gypsy rover—appears, in the person of Andy Early. Early initially seems to be little more than a charming bit of local color, but by the novel's close he is as integral to the family and its twisted fortunes as any of the major characters.

Each of the main characters in *The Red Men* must undergo his or her own dark night of the soul. Their self-examination results in the knowledge that what they have taken for granted eludes their grasp. All realize that they are not exactly the people they thought they were, and their worlds are not nearly as secure as they imagined. Cut loose from their delusions and convenient explanations, they suddenly wander, some into death and others into possibilities for new and more meaningful lives.

FOXPRINTS

McGinley's third novel, *Foxprints* (1983), continues with the theme of fantasy, but the setting changes to suburban England. Here an Irishman, concealing his identity with the name Charles Keating, puts on a series of disguises to ingratiate himself with the villagers of Wistwood. He finds himself living in Foxgloves,

a mansion where fantasy has so fully replaced reality that Keating loses sense of himself as well as others. Once again fiction becomes the staff of life, and facts become rare.

The elusiveness of the master criminal is dizzyingly complex in *Foxprints*. Soon after enigmatic Charles Keating arrives in Wistwood, a series of murders occurs, each of which has as its most prominent clue some article relating to foxes. Keating becomes obsessed with the murders, to the point that he even wonders if he could be the culprit. Yet, when Keating becomes a victim, the reader remains uninformed of the killer's identity.

Other mysteries in the novel abound—what happened to a disappearing body in the garage, why one victim was finally spared death, who one girl on a train was, even why one woman's knees have different textures—and ultimately these mysteries are left unexplained. McGinley has crafted too ingenious a plot to leave so many unanswered questions unless they are integral to his purpose. Clearly, he is not interested in writing the traditional whodunit; instead, he uses mystery conventions to probe the psyches of various characters.

A DIFFERENT VIEW

In McGinley's novels, victims, not detectives or criminals, command the most attention. In most mysteries, victims are figures who remain in the narrative shadows; the reader must be concerned that they die but must never become too emotionally engaged by them either. In McGinley's novels, the protagonists are usually the victims, victims of their own insecurities and misgivings about themselves and victims of others who would prey on them.

As many scholars of mystery and detective fiction have noted, the genre is a fundamentally conservative one. It often posits, especially in the hands of writers such as Agatha Christie, Arthur Conan Doyle, and Dorothy L. Sayers, an ordered world that has been violated by crime. The role of the detective is to solve the case and thus restore order where it belongs. The suggestion is that the world is a fundamentally rational place and that senseless crime is merely an occasional aberration.

McGinley frequently plays with this view, and his

protagonists are forced to reject convenient notions of order and accept the world's unpredictability. In *Bogmail*, the "spoilt priest," Roarty, views the world as one absent of God and takes on himself the divine role of "benefactor of humanity" in his slaying of Eales.

In *The Trick of the Ga Bolga*, Coote, a man who escapes chaos in search of sanity and order, must eventually reconcile himself to the bitter fact that life is uncontrollable. As the village idiot tells him, "There's a thing called Life that goes its own way in spite of all that Tom, Dick and Harry do to stop it. We're only in control a fraction of the time. Someone else is doing the driving." Reluctantly, Coote must acknowledge that reason and logic are powerless against chance and necessity.

McGinley's works, apart from their distinct individual merits, represent the ever-expanding possibilities for mystery fiction. Some theorists have argued that mystery fiction has generally reached a creative dead end. McGinley, however, demonstrates that through wit and ironic manipulations mystery fiction can remain healthy and vigorous. His use of Irish speech, life, and manners gives his fiction an originality often absent from other mystery fictions. Furthermore, his works illustrate that the best mysteries are never bound by a fictional formula but may exploit that formula to offer keen and fresh perceptions of the human condition.

Taking a cue from Hugo McSharry, the novelist-character in the work, Shea examines McGinley's novel as a palimpsest, a parchment partially erased yet retaining traces of the original inscriptions, with the echoes of other writers, particularly Flann O'Brien.

WILLIAM P. McGIVERN

Born: Chicago, Illinois; December 6, 1922

Died: Palm Desert, California; November 18, 1982

Also wrote as Bill Peters

Types of plot: Police procedural; thriller

CONTRIBUTION

William P. McGivern's work differs considerably from the general run of crime fiction of the 1940's and 1950's, the years when the author did his best work. Although much of the writing of his contemporaries during this period presented protagonists with fixed, relatively stable personalities, McGivern's work generally took another direction. His novels on crime are particularly notable for their depth and sensitivity in the portrayal of the central character and for their trenchant analysis of the moral and psychological effects of the corruption that surrounds him in the netherworld of big-city politics and public service.

The McGivern protagonist is generally at the crux

of a moral dilemma, wrestling with problems of ethical, moral, even spiritual responsibility. Although formidable and independent in his interaction with others, the McGivern protagonist struggles with an inner world of psychological complexity and moral peril. He is consistently engaged in reluctant self-analysis and introspection, following a path that inevitably leads to self-discovery.

McGivern also brings to his writing a thorough knowledge of police work. In a subtle blend of casuistry and objective analysis, he examines the implications of its pressures and scant rewards, its frequent inability to meet the high and often-unrealistic expectations of the public, with an insight achieved by few of his contemporaries in the genre of crime fiction.

BIOGRAPHY

William Peter McGivern was born in Chicago on December 6, 1922, the second son of Peter Francis

McGivern and Julia Costello McGivern. His father was a banker and businessman, his mother a dress designer who catered to a fashionable clientele in her shop on Michigan Boulevard. For a time, his father's business interests brought the family to Mobile, Alabama, where McGivern was reared.

In 1937, McGivern quit high school and returned to Chicago, where he worked as a laborer for the Pullman Company in the Pennsylvania Railroad yards. During this time, he read widely and eclectically, particularly the works of American authors such as Nathaniel Hawthorne, Thomas Wolfe, Ernest Hemingway, and F. Scott Fitzgerald. He also discovered the prose of G. K. Chesterton and the poetry of Robert Burns. In addition to his wide reading, he had begun to write. By 1940, he was publishing in the pulp-fiction market, particularly in science-fiction and fantasy magazines.

During World War II, McGivern served three and one-half years in the United States Army and was decorated for service in the European campaign. He would later draw on these experiences in an autobiographical novel, *Soldiers of '44* (1979), based on his experiences as a sergeant in charge of a fifteen-man gun section during the Battle of the Bulge. At war's end, he was stationed in England, where, for a period of four months, he attended the University of Birmingham. McGivern was discharged from the army in January, 1946.

In December, 1948, McGivern married Maureen Daly, also a writer. They had two children, a son and a daughter. From 1949 to 1951, McGivern worked as a reporter and book reviewer for the *Philadelphia Evening Bulletin*. As a police reporter, he became interested in police officers and detectives and how they function in an environment of big-city corruption. The experience provided the details and factual basis for several of his crime novels.

In a long and distinguished career, McGivern published some twenty-five crime novels and an array of short stories, screenplays, and television scripts. In 1980, he was elected president of the Mystery Writers of America, which in 1954 had given him its Edgar Allan Poe Award for Best Motion Picture for his writing of the novel *The Big Heat* (1952). McGivern died on November 18, 1982.

ANALYSIS

William P. McGivern began his career as a conventional crime-fiction writer, submitting to pulp magazines the formula fiction that was their mainstay through the 1920's and 1930's. He continued this formula approach into the late 1940's, when he turned from the short story to the crime novel with the publication of his first book, *But Death Runs Faster* (1948). His brief tenure as a crime reporter in Philadelphia gave him both factual material and psychological insight into the daily, behind-the-scenes operations of big-city police, a combination that brought considerable authenticity to his writing. In the early 1950's, McGivern experimented with other forms of writing, including fantasy and science fiction. More notably, in his writing about crime he experimented with a Mickey Spillane-style plot and protagonist, exemplified in his fifth novel, *Blondes Die Young* (1952). Apparently, he had some misgivings about the Spillane approach to plot and characterization, for he published the novel under the name Bill Peters. It was the first and last time McGivern used a pseudonym for crime fiction.

Eventually, McGivern's interest focused on the complex characterization of the police detective as fallible hero, the culpable human being on the front lines of civilization's perennial battle with a criminal element that threatens to undermine and destroy it. Specifically, McGivern centered his attention on the intrinsic nature of urban corruption, the two-sided, inherent duplicity of society. He concentrated on the darker, ambiguous side of human nature that is subsumed and obscured by the surface appearance of a functioning, law-abiding society.

ROGUE COP

In novels such as *The Big Heat*, *Rogue Cop* (1954), and *The Darkest Hour* (1955), McGivern places his protagonists in solitary—and lonely—confrontation with the seemingly overwhelming power of an underworld that thrives on duplicity. Although the detective/protagonist is clearly superior to his fellow officers in his ability to observe, investigate, and make deductions concerning a crime, that superiority is always taken for granted. Mike Carmody, the protagonist of *Rogue Cop*, stops by a hotel room where a murder has

been committed. His fellow detectives are in the middle of their investigation. It is not Carmody's case, but in a matter of minutes and in an offhand, matter-of-fact way, he solves the crime for his befuddled colleagues.

In his crime fiction, McGivern is never overly concerned with details of investigative deduction and solution; his emphasis is on character study. The reader's attention in *Rogue Cop* is focused on Carmody's inner struggle, the psychological/ethical/moral conflict that McGivern's protagonists invariably face. The depiction of their struggle frequently reflects the influence of McGivern's Catholic background and his abiding interest in humanity's need for a spiritual center. Essentially, McGivern illustrates a very basic conflict between good and evil. In these novels, evil in the modern world comes in a highly attractive and deceptive package, with money and power its primary attributes. It is simultaneously seductive and destructive, and its appeal is easily and readily rationalized.

MIKE CARMODY

In developing the character of Mike Carmody, McGivern has drawn, at least indirectly, on the New Testament story of the prodigal son. Seduced and corrupted, Carmody is a crooked cop, the scion of a loving Catholic family that he rejects. As the novel begins, he is a prodigal without a home to which he can return. His mother died when he was a child; his father, whose values and spiritual optimism Carmody cynically dismissed, lived long enough to know the pain of his son's corruption. In his attempt to justify his choices and the life he lives, Carmody has all but totally convinced himself that he is simply playing the percentages, living the good life that only a fool would reject. Yet the richly furnished apartment, the expensively tailored suits, and the other accouterments of a life lived according to material wants all bear testimony to a moral, ethical, and spiritual poverty.

Carmody's redemption, along with the opportunity for retribution and subsequent atonement, comes after his younger brother, an incorruptible rookie cop, is murdered by racketeers because he has refused to follow his older brother's example. Bereft of family and career, Mike Carmody nevertheless regains in some semblance his lost integrity by turning state's evi-

dence. The lost son returns, if not to the father, at least to the father's values. When Carmody becomes the star witness for the prosecution, however, his motivation is not only retribution and atonement; there is also an old-fashioned desire for revenge, another element of the darker side of human nature that plays a significant role in McGivern's fiction.

THE BIG HEAT

The motif of the good man in righteous pursuit of vengeance is the energizing force in several of McGivern's novels—including *The Big Heat*, *The Darkest Hour*, *Savage Streets* (1959), and *Reprisal* (1973). In *The Big Heat*, Dave Bannion, the protagonist, is a police detective who has rigorously maintained the straight and narrow path and is uncompromising in his opposition to racketeers and corrupt officials. Unlike Mike Carmody of *Rogue Cop*, Bannion has a spiritual center. (He reads, for example, the sixteenth century *Ascent of Mount Carmel* by Saint John of the Cross for guidance and perspective.) His meditations are put aside, however, when first a fellow police officer and later Kate, Bannion's wife, are killed by racketeers who enjoy respectable status in the community and the protection of corrupt police officials and politicians. Like a patriarch of the Old Testament, Bannion pursues his adversaries with the fury of an avenging angel. His winning struggle against seemingly overwhelming odds is a veritable Armageddon. When he and the forces of good have triumphed, he returns, at the conclusion of the novel, to his meditations on Saint John of the Cross.

SAVAGE STREETS

In his exercise of the revenge motif, McGivern explores the gray areas of the issue as well. The law-abiding citizen, for example, vengeful because he is frustrated by the apparent inability of the police to exact justice in a legal system that seems to offer more protection to the criminal than to the victim, is effectively portrayed in *Reprisal* and *Savage Streets*. In both novels men whose lives, family, and property had always been insulated from crime suddenly become victims. That which had previously occurred only in the remote strata of society to which they were passive witnesses and bystanders has struck home, filling them with a sense of personal outrage and injustice.

Savage Streets, ostensibly a novel about juvenile delinquency and the lynch-mob mentality of vigilantism, reads like a sociological treatise. In this novel McGivern indicts middle-class, suburban America and the shallow values of a materialistic society. John Farrell and his neighbors live the comfortable commuter life of cocktail parties, backyard barbecues, and dinners at their restricted country club. When their children are threatened and intimidated by two teenage thugs, Farrell and the others become involved, attempting to intimidate the teenagers with their adult authority. The young hoodlums, however, are not intimidated, and a small war develops. When Farrell is driven to beat one of the young thugs senseless, mistakenly believing that this youth was responsible for the hit-and-run accident that sent Farrell's daughter to the hospital, he realizes what he has become. He attempts to reason with his vigilante neighbors to prevent further violence—but to no avail. Before Farrell can successfully enlist the police to halt the madness, one of his neighbors is dead, another boy is badly beaten, and a teenage girl is raped. In the course of the experience, Farrell comes to realize that there are actually two "gangs": one led by teens from the proverbial "wrong side of the tracks," the other by the exclusionary suburban set, whose property and career positions will be preserved at any cost, stopping, only by chance, just short of murder. The plot is a bit simplistic, but to his credit McGivern offers no easy answers to what he presents as a veiled class warfare. The focus in *Savage Streets* is on John Farrell, the typical American family man who comes to discover, after almost destroying his own life, that there is no satisfactory substitute for rule by law, regardless of how provocative the circumstances may be.

ODDS AGAINST TOMORROW

McGivern examined social issues in other crime novels, one of the best of which combines a social question with a well-plotted caper, a major robbery planned in extensive detail. In *Odds Against Tomorrow* (1957), Dave Burke, a former police officer who was fired from the force for taking bribes, and Novak, his accomplice, have planned a seemingly foolproof bank robbery. They require two additional men with special talents to make it work: John Ingram, a black man who needs money desperately to pay overdue gambling debts, and

Earl Slater, a Southern redneck, a misfit who is painfully becoming aware that after distinguishing himself in wartime combat, he seems unable to do anything else. From the moment these two meet, it is clear that Slater's prejudice threatens the success of the robbery. Ironically, it is the failure of this desperate enterprise that brings Slater and Ingram together. Deserted by Novak after Burke is killed, they gradually become closer, even dependent on each other.

McGivern's political liberalism is clearly in evidence here, offering the failed robbery as a metaphor for a stalled society, impeded in its progress by bigotry. As is typical in McGivern's novels, the details of the well-planned robbery and its failure are of secondary interest. Although his character study of Ingram is pedestrian and not particularly insightful, his study of Slater proves far more penetrating and interesting. McGivern offers a vivid analysis of a frightened sociopath, a man desperate for love and security, whose only talent is for making enemies.

McGivern's novels of the 1970's and 1980's show a marked commercial bent and seem to have been written for the screen. This is hardly surprising because McGivern was a successful writer of screenplays and television scripts, and nine of his novels have been made into motion pictures. Novels such as *Night of the Juggler* (1975), about a Central Park serial killer, seem written more for film producers than for readers of crime fiction. *Caprifoil* (1972), however, is a first-rate espionage/secret agent thriller, worthy of comparison with the work of John le Carré.

LIE DOWN, I WANT TO TALK TO YOU

McGivern's fiction is not without a lighter side, evidenced by the dual spoof of psychiatry and the caper plot in *Lie Down, I Want to Talk to You* (1967). Otis Pemberton, an overweight psychiatrist with a tendency to gamble (and lose), is a most unlikely and atypical McGivern protagonist. Pemberton is blackmailed into participating in a bank robbery by a patient. Because the patient has failed at previous robbery attempts, he needs Pemberton to "reprogram" him and his associates for success. Complicating the entire operation is a rival psychiatrist who has been treating the same patient and who ultimately becomes part of the scheme.

McGivern's books constitute crime fiction of a high order. In each, the actual crime and its concomitant details serve primarily as a point of departure for his highest interest: the texture of humanity that emerges with the creation and development of character. McGivern writes in the third person, combining spare prose and taut dialogue with an economical, highly selective use of descriptive detail. The situation in which the McGivern protagonist finds himself may be remote from the average reader's experience, but the reader readily empathizes; the angst McGivern depicts is universally felt and understood.

Died: Kettering, Northamptonshire, England; April 6, 2007

Also wrote as Elizabeth Chaplin

Types of plot: Police procedural; psychological

PRINCIPAL SERIES

Inspectors Lloyd and Hill, 1983-2004

PRINCIPAL SERIES CHARACTERS

CHIEF INSPECTOR LLOYD is a middle-aged, balding man, rather slight in stature. He is a Celt, born in Wales to Welsh parents, but he has spent most of his life in England. Lloyd chose not to go to college. When a friend who was a police sergeant bet him that he could not make the grade as a police officer, Lloyd joined the force and proved him wrong. Lloyd's dedication to his job caused his first marriage to end in divorce, but he has remained on good terms with his daughter. Later in the series, Lloyd marries Judy Hill, and they have a child, Charlotte.

SERGEANT JUDY HILL is an attractive young woman with brown hair and brown eyes. Although her father was a university lecturer, she has no interest in academics. She is career oriented; she cannot cook and does not like organizing a household. Hill and Lloyd met sixteen years before, but at that time Lloyd was still married. When the series begins, Hill is married, but she soon ends what has become a perfunctory relationship.

CONTRIBUTION

Jill McGown adapted her chosen genre, the traditional whodunit, to make it more appealing to contemporary readers. Like her predecessors, she satisfied the intellectual needs of her readers by presenting them with brilliantly devised plots. Where McGown diverged from the tradition, however, is in making penetrating psychological analyses of her characters and their relationships. Both of her detectives are careful observers of human nature; though they begin their in-

vestigations by looking for evidence at the scene of the crime, they proceed by gathering information about the suspects, then by watching not only their responses to the most casual questions but also their behavior in informal situations. Thereafter these sleuths do much of their most productive investigating by withdrawing to discuss their findings and to present various hypothetical solutions for analysis. These sessions, which are often stormy, hold additional interest for McGown's readers because as they spar, Hill and Lloyd reveal a good deal about themselves, and because their romance is one of the threads that unifies the series, readers find themselves watching the two detectives as closely as the sleuths observe their suspects. By so brilliantly uniting mind and heart as well as thought and feeling, McGown transmuted the classic whodunit into a far more satisfying literary form.

BIOGRAPHY

Jill McGown was born on August 9, 1947, in Campbeltown, Argyll, Scotland, on the Mull of Kintyre. Her father and his brother owned a fishing boat and earned their living as fishermen. Her mother, who was originally from Glasgow, was a secretary. During those years, the family spent summer holidays at Rothesay on the Isle of Bute, which seemed much more lively than Campbeltown, with its end-of-pier shows and its one neon sign. The McGowns would also take steamers to such places as Lochranza on Arran and Ardrossan in the Firth of Clyde. However, though she did enjoy beach picnics, McGown soon realized that she was not overly enthusiastic about nature. She was delighted when her mother took her to Glasgow to visit her aunt and uncle, and she could choose between her two favorite modes of transportation, the subway and the tram.

While the family was still living in Campbeltown, McGown attended an infants' school, then a primary school, and finally a second one. In 1957, when she was ten, she had to change schools for a fourth time. Jill's father, realizing that he could no longer make a living fishing for herring, decided to move to Corby in Northamptonshire, England, where he found a job at

Lloyds Ironworks, later Stewarts and Lloyds. Because the company was bringing in a great many new workers from Scotland, though McGown now lived in England, she grew up in an atmosphere more Scottish than English. Scottish accents dominated, and there was an annual Highland gathering. Even though McGown was not a great nature lover, she spent hours in the woods with her friends playing games. She summed up her childhood as a happy one.

After junior school, McGown proceeded to Corby Grammar School, where her Latin teacher was Colin Dexter, author of the mystery series that features Inspector Morse. She soon left to attend Kettering Technical College. In 1964, she left the college, having obtained the training in shorthand and typing that would enable her to obtain a clerical job. She remained in Corby, working as a secretary from 1964 to 1966 for Corby Development Corporation. She was then hired as a secretary by a firm of solicitors, Toller Halls and Collcutt, where she remained for five years. In 1971, she went to work for the British Steel Corporation, handling voluntary redundancies. After ten years there, McGown found her own job made redundant. Partly because of the high unemployment rate, she decided to live on her redundancy pay while she wrote a novel. Thereafter, she supported herself by writing, remaining in Corby in the same house where she had lived since she was ten.

When *A Perfect Match* (1983) was accepted for publication, McGown was advised not to try to develop it into a series. Bowing to what she believed was good advice, she proceeded to write three nonseries novels, which were published between 1985 and 1987. However, when her readers insisted they liked her first work far better, McGown decided to proceed with the Lloyd and Hill series, and it proved extremely successful. The thirteenth Lloyd and Hill book appeared in 2004. Because *A Perfect Match* was not written as the first book in a series, the ages of Lloyd and Hill were somewhat advanced. McGown solved this problem by aging them slowly, so that they aged only about ten years over the life of the series. She departed briefly from the series in 1990 to publish a spoof entitled *Murder Movie*, and in 1992, under the pseudonym of Elizabeth Chaplin, she published her only suspense

novel, *Hostage to Fortune*. However, at the urging of her publishers, thereafter she wrote only books in the Lloyd and Hill series.

ANALYSIS

In calling her Lloyd and Hill books classic whodunits, Jill McGown emphasized the fact that they were written in the tradition established by the American writer Edgar Allan Poe, who is credited with inventing the detective story in 1841, when he published "The Murders in the Rue Morgue." By the time the term "whodunit" was coined in 1930, the conventions of the genre had long been established. Typically, a murder is committed; a detective becomes involved in the search for the murderer; all the clues essential to the solution of the crime are presented to the reader; the author deliberately misdirects the reader without concealing any important clues; and finally, the detective identifies the criminal and explains how the clues that were presented led inexorably to the conclusion. Clearly, the whodunit emphasizes reason, rather than emotion, and therefore characterization is far less important than the plot itself.

McGown followed these rules scrupulously, but as a modern writer, she felt free to make some adaptations. For example, many of her predecessors paired a brilliant, eccentric detective with a well-meaning but somewhat obtuse friend; one example of this pattern would be the mysteries by the Golden Age writer Agatha Christie in which Hercule Poirot masterminds the investigation and Captain Arthur Hastings serves as his aide and his confidant. In McGown's mysteries, though Chief Inspector Lloyd is of higher rank, Judy Hill is not a mere second-in-command. In fact, in some of the books, *A Shred of Evidence* (1995), for example, Lloyd takes a backseat, and it is Hill who is primarily responsible for solving the crime. The fact that the two operate as equal partners underscores the idea that women are now supposed to have the same opportunities as men. Therefore it is appropriate that Hill, who is at the beginning of her career, should be anticipating future promotions, while Lloyd, who has already established his reputation, looks forward to retirement. It is true, of course, that theory and practice are not always the same. To her credit, McGown

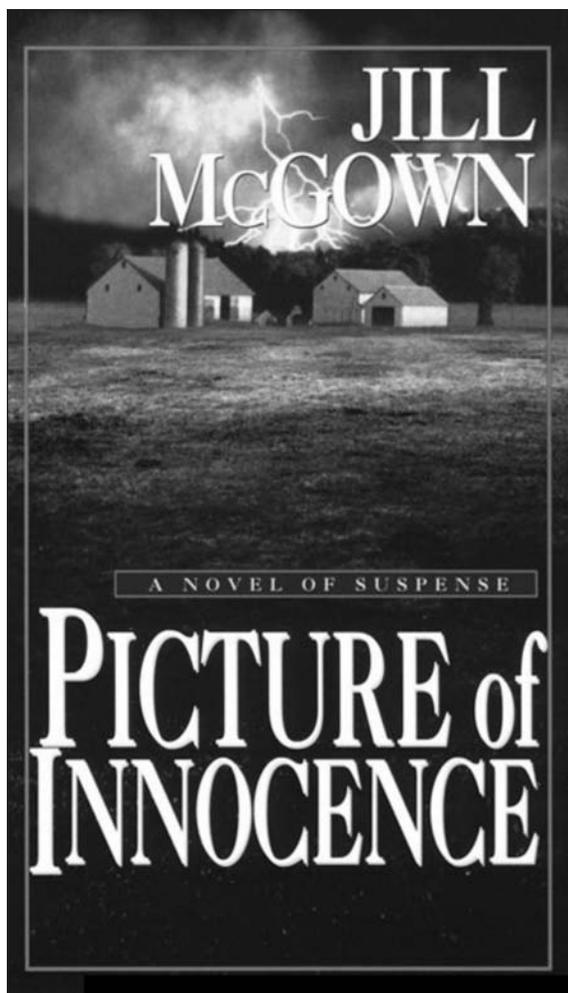

showed the two partners often disagreeing about the direction a case should take and even more often arguing bitterly about their own future goals, whether as individuals or as a married couple.

By venturing to explore the inner lives of her sleuths and of her primary suspects, McGown departed from the conventions of the traditional whodunit. She was interested at least as much in human nature and in human relationships as she was in presenting an intricate plot. Most critics applaud this alteration of the pattern, for they believe that novels such as hers hold the interest of modern readers better than the admittedly entertaining but essentially superficial mysteries on which they are modeled.

McGown also altered the conventional pattern by stressing the importance of place. Although she did not like to admit that her Lloyd and Hill books are in any way akin to the cozy subgenre, her series novels do resemble the early cozies in that they are set in rural England and involve village life. On her Web site, McGown explained that the fictional Stansfield is in fact Corby in Northamptonshire, where she spent most of her life, and she even included photographs of some of the real places in or near Corby that she used as settings for her fictional crimes. However, in her books, Stansfield is not just a convenient location; it is an integral part of her characters' lives. Thus when she described what she called the "three Corbies," the Elizabethan village, the mill town, and the New Town filled with newcomers, she underlined the theme of social change in a way that the originators of the cozy subgenre did not.

PICTURE OF INNOCENCE

In most of McGown's mysteries, the victim of the crime is a character for whom one can feel some sympathy. However, in *Picture of Innocence* (1998), when Bernard Bailey turns up dead in his home despite his state-of-the-art security system, most of the people in the Stansfield area feel like celebrating. Bailey has made his wife, Rachel, a virtual prisoner, alternately beating her and subjecting her to his sexual needs. She has remained with him because their marriage was based on a bargain between them: As soon as she bore him a son, thus enabling him to hold on to his extensive property, she was to receive a handsome reward and be free to leave. Though both Rachel and her se-

cret lover are obvious suspects in the murder, Bailey has been receiving death threats for the previous six months, and he has so many enemies in the Stansfield area that Hill and Lloyd hardly know where to begin their investigations.

Picture of Innocence is unique among McGown's novels in that it is essentially a one-character book. Reviewers who liked Rachel were enthusiastic about the book; those who did not were more critical. The fact that readers reacted so strongly to the central character in *Picture of Innocence* is an indication of McGown's gift for characterization.

PLOTS AND ERRORS

McGown's tenth Lloyd and Hill novel, *Plots and Errors* (1999), begins with what appears to be a double

suicide. Everyone knows that Andrew and Kathy Cope, who run a detective agency, are burdened by debt and likely to lose their home. When they are found in their car, asphyxiated, most people assume that they committed suicide. However, the details that Lloyd observes at the crime scene convince him that they were murdered. When their sole client, Mrs. Angela Esterbrook, is killed that same night, Lloyd and Hill look for a connection between the murders. However, they are hampered by their discovery that all the members of the immensely wealthy Esterbrook family are quite capable of committing a murder either for profit or on a whim.

Plots and Errors is a distinctive novel in that it was admittedly inspired by Shakespearean tragedy. By focusing on the very rich instead of the villagers and middle-class characters in most of her books, McGown took her readers into an alien culture. However, in exposing the Esterbrooks as essentially corrupt, she made it clear that, as Lloyd and Hill have long since discovered, evil is evil, no matter how cleverly it is disguised.

One of McGown's virtues as a writer was that, as she put it, she never wrote the same book twice. In the thirteen volumes in the Lloyd and Hill series, she never repeated a plot or a situation nor did she use a stock character. Moreover, she did not permit either her two detectives or their relationship to become stagnant; throughout the series, they were constantly changing. As a result, she built up a considerable following, both among critics and within the general public. She was admired for her versatility, her command of details, her logical brilliance, and her psychological insights.

Also wrote as Harry Austin; Matthew FitzRalph;

Ernan Mackey; Monica Quill

Type of plot: Private investigator

PRINCIPAL SERIES

Father Dowling, 1977-

Sister Mary Teresa, 1981-

Andrew Broom, 1987-

University of Notre Dame, 1997-

Egidio Manfredi, 2000-

PRINCIPAL SERIES CHARACTERS

FATHER ROGER DOWLING is a tough, unsentimental suburban Chicago priest-detective, low-key but also witty, irascible, and old-fashioned. His experiences as a priest have taught him about sin, guilt, and expiation. He firmly believes that “anyone is capable of anything” and that danger can lurk in unexpected places: a park, a country club, or even a dentist’s chair.

PHIL KEEGAN is a chief of detectives who has known Dowling since they were boys, attended the preparatory seminary of the Chicago Archdiocese with him, and believes in the efficacy of routine. A good Catholic who at times regrets the inability to master the intricacies of Latin that kept him from the priesthood, Keegan is as eager to dispense justice as Dowling is to mediate mercy.

SISTER MARY TERESA “EMTEE DEMPSEY” is a nonsense, brusque woman, a medieval scholar specializing in the twelfth century, one of the three remaining nuns in the Order of Martha and Mary (“the M and M’s”), and the bane of the Chicago police force. In her late seventies but still acutely perceptive, this heavy-set old nun magisterially presides over a Frank Lloyd Wright house and the two other sisters. Of necessity she engages in the detection of crimes that impinge on her territory (often ones involving former students or old friends). Rarely leaving home, she sends the other nuns out to gather information. Then deriding police methods as slow and uninspired, she engages in imaginative guesswork that leads to unexpected solutions.

ANDREW BROOM is a wealthy lawyer from Wyler, Indiana, whose interest in criminal cases inevitably involves personal twists and tangled conspiracies of clients and relatives that produce chains of ironic effects.

ROGER KNIGHT, a three-hundred-pound man, is a professor of Catholic studies at the University of Notre Dame, and a licensed—though only part-time—private eye, who invariably becomes involved in mysterious doings at the institution. His brother Philip, a retired private detective and a fellow lifelong bachelor, assists Roger in untangling the cases.

EGIDIO MANFREDI, the world-weary captain of the police force of Fort Elbow, Ohio, who is nearing mandatory retirement age, has appeared in novels of a non-violent but nonetheless puzzling nature.

CONTRIBUTION

Ralph McInerney brings to the mystery genre a theological and philosophical base, and his books look at events from an orthodox point of view. He scrutinizes the social and moral problems of the contemporary church; studies the relationships between a priest and his parishioners, a nun and her sisterhood, and a lawyer and his client; and examines crimes that grow out of a loss or failure of faith or a lapse into one or more of the seven deadly sins. His priest, Father Dowling, must wrestle with issues surrounding the sanctity of the confessional, the loyalties of the church hierarchy, and the confusions wrought by changes in the church itself; his nun, Sister Mary Teresa, must face the realities of a failing order, the confusions of lonely women trapped in a changing world, and the extremes of fanatics; his lawyer, Andrew Broom, in turn must confront the puzzles of life and death and seek meaning through action. McInerney is particularly interested in causal chains in which violence begets violence and a single act unleashes a series of interlocked events.

For his fiction, McInerney received the Mystery Writers of America’s Lifetime Achievement Award in 1993 and the *Crisis* magazine P. G. Wodehouse Award in 1995.

BIOGRAPHY

Ralph Matthew McInerny was born on February 24, 1929, in Minneapolis, the son of Austin Clifford McInerny, a mechanical engineer, and Vivian Rush McInerny. He was heir to a midwestern directness and an Irish Catholic sense of wit and humor. He served in the United States Marine Corps from 1946 to 1947 and then returned to school to continue his education. He received a bachelor of arts degree from St. Paul Seminary in 1951, a master of arts degree from the University of Minnesota in 1952, and licentiate (1953) and doctoral (*summa cum laude*, 1954) degrees in philosophy from Laval University in Quebec, Canada.

As McInerny's schooling suggests, his original goal was the priesthood, but he instead became a philosopher and, thereafter, a teacher. He was married to Constance Terrill Kunert on January 3, 1953, and they had six children: Cathleen, Mary Hosford, Anne Polincinski, David, Elizabeth, and Daniel. He taught philosophy at Creighton University in Omaha, Nebraska, during the school year 1954-1955. In 1955, he joined the faculty of the University of Notre Dame, beginning as an instructor in philosophy. He moved up to assistant professor (1957-1963), to associate professor (1963-1969), and to full professor in 1969. In 1978, McInerny was named the Michael P. Grace Professor of Medieval Studies and served as director of the Medieval Institute from 1978 to 1985. In 1979, he became director of the Jacques Maritain Center.

A respected academician, a renowned Thomas Aquinas scholar, a noted philosopher and leader in Catholic thought, McInerny has received numerous honors. He conducted research on Fulbright grants in Belgium (1959-1960) and Argentina (1985-1986 and 1986-1987) and was a National Endowment for the Humanities fellow (1977-1978), a National Endowment for the Arts fellow (1983), and a Pontifical Roman Academy of St. Thomas Aquinas fellow (1987). McInerny has also frequently served as a visiting professor at such institutions as the Catholic University of America (1971), St. Mary's College (1976), Senior Scholarship University of Scranton (1977-1978), Katholieke Universitet in Belgium (1982), Cornell University (1988), John Paul II Institute on Marriage and Family (1988), Truman State University (1999),

and Fu Jen University in Taiwan (2002). McInerny has also received such accolades as the Thomas Aquinas Medal (1990 and 1993), the Maritain Medal (1994), and the Gerhart Niemeyer Award (2002), and has collected more than six honorary doctorates.

McInerny is also an extremely prolific—with more than one hundred books to his credit—and versatile author and editor of fiction, a translator and writer of nonfiction, poetry, and plays. His initial full-length published work was *The Logic of Analogy: An Interpretation of St. Thomas* (1961), the first of more than twenty-five nonfictional books that include such titles as *Thomism in an Age of Renewal* (1966), *The Frozen Maid of Calpurnia* (1982), *Miracles: A Catholic View* (1986), and *What Went Wrong with Vatican II: The Catholic Crisis Explained* (1998).

McInerny debuted as a fiction writer with *Jolly Rogerson* (1967), the first of more than a dozen non-series novels. He began his long-running Father Dowling mystery series in 1977 with *Her Death of Cold*, and since then has introduced four other mystery series: Sister Mary Teresa (as Monica Quill, *Not a Blessed Thing!* 1981), Andrew Broom (*Cause and Effect*, 1987), University of Notre Dame (*On This Rockne*, 1997), and Egidio Manfredi (*Still Life*, 2000).

McInerny, in addition to his academic work and writing, acts as editor of the *Fellowship of Catholic Scholars Quarterly* and president of the American Maritain Association.

ANALYSIS

Ralph McInerny's titles all involve puns and allusions that grow out of the action. The title *The Basket Case* (1987), for example, carries the implication not only of psychological derangement but also of an infant abandoned in a basket, like Moses in the bulrushes. *A Loss of Patience* (1982) brings a loss of patience to all concerned, and those who rest in peace in *Rest in Pieces* (1985) have literally been blown to pieces. *The Grass Widow* (1983) focuses on two rejected women, one of whom smokes marijuana. The titles *Nun of the Above* (1985) and *And Then There Was Nun* (1984) clearly rely on linguistic play, while *The Noonday Devil* (1985) alludes to the medieval malaise *accidie*. Names of McInerny's characters also

reflect a certain gamesmanship, as with Geoffrey Chaser, the name of a pornographic novelist, clearly intended to conjure the ghost of Geoffrey Chaucer; Marie Murkin, suggestive of “merkin”; and Sister Mary Teresa’s nickname, Emtee, all too evocative of “empty.”

By virtue of the setting of the Father Dowling mysteries, the small Fox River community on the outskirts of Chicago, the novels partake of the ambience of both the small town and the booming metropolis. A portion of the wit and originality of the books, in fact, comes from this clash of big-city crime and sophistication with the values and culture of a midwestern small town. *A Loss of Patients* and *The Basket Case*, for example, center on local events, while *Lying Three* (1979) and *Rest in Pieces* bring the world of international politics and terrorism to Fox River. In *Lying Three*, a former anarchist confesses her past to Father Dowling, an assassin’s bullet narrowly misses the Israeli consul at Wrigley Field, an ardent Zionist is shot on the Fox River golf course, and the son of a local arms manufacturer with Arab connections is found drowned under suspicious circumstances. In *Rest in Pieces*, a Maryknoll priest, a liberation theologian who believes that the United States exploits Central America, brings with him international cocaine traffic and political assassination. In either locale, the crime itself most frequently involves the wealthy or the upper middle class.

Andrew Broom’s Wyler, Indiana, setting and Sister Mary Teresa’s Chicago setting involve some of the same mix in their portraits of established neighborhoods and the seamy inner city.

Furthermore, these worlds are a peculiar mix of Rome and the Midwest—the medieval and the modern. Dowling reads Dante and Saint Thomas Aquinas and interprets human behavior through their eyes. A swinging-singles bar, the scene of heavy drinking, sexual misbehavior, and social mayhem of various sorts, is known as the Gutter Ball; with its smoke-filled darkness, smoldering vocalist, and despairing laughter, it seems “some penitential place whose habitués were paying for their sins.” There the murderer meets his intended victims, and there, “no matter the smiles on their faces,” the patrons suffer the torments of Hell. Another

bar, the Mangy Manger, is likened to a vision of Hell, with “the bestial beat” of its “dreadful music” and its clientele with “utterly joyless” expressions, such as “those of the doomed and damned.” In *The Basket Case*, one of the characters has created his own Dantesque hell, for he experiences on Earth the punishment merited by adultery (the child of his unholy union is born with spina bifida; the anguished father consents to euthanasia and bars himself from confession and Holy Communion; he dies without holy rites in his mistress’s arms). In *Getting a Way with Murder* (1984), Father Dowling imagines the villain, a man who has murdered at least five people to prevent the discovery of an insurance fraud involving millions, “up to his neck in ice in the lowest region of the inferno.” Sister Mary Teresa, in turn, finds twelfth century parallels and advocates old-fashioned hanging and flogging for modern sins. This medieval judgment of the modern is an inseparable element of McInerney’s worldview.

In a typical McInerney plot, the murderer is someone who cannot relate to others in a normal fashion, someone so obsessed with possessions or with family honor that for him or her people lack value and are expendable obstructions. Readers sometimes learn who the murderer is early in the game, so the pleasure comes from seeing how the mystery will be unraveled, the guilt fixed, and the charges made. At other times, the identity of the murderer is a total surprise, though his unveiling grows out of the amateur detective’s psychological analysis of events and people.

Murder begets murder, as the murderer tries to hide his guilt and as investigators seek the weak link in a chain of deaths. In most instances the solution depends on the unveiling of a lie or a series of lies, particularly about relationships. Police routine proves inadequate, and solutions depend instead on imaginative flair and intuitive leaps. Furthermore, witnesses fail to tell the police details vital to unraveling motives and acts, but sometimes let them slip to Father Dowling or Emtee or else go to them for confession or reassurance. In *Getting a Way with Murder*, for example, a young innocent brings Father Dowling a computerized list of insurance-policy beneficiaries that reveals an insurance scam of a scale sufficient to explain multiple

murders. In like manner, confidences made to Andrew Broom in his capacity as lawyer give him an inside track on motives and possibilities.

Both Father Dowling and Emtee clearly respond to a higher law than humankind's and consequently do not feel too uncomfortable about keeping information from the police or handling cases in their own way. Emtee sidesteps the police at every opportunity, obstructing the law in the name of justice, lying and encouraging her associates to lie when occasion requires, withholding evidence, and making accusations on the basis of incredibly flimsy evidence. Father Dowling is not above slipping a credit card between frame and door to make an illegal entry in a just cause, plying a fellow clergyman with drink to loosen his tongue about a parishioner, or visiting a woman involved in a murder in order to slip a key photograph into his pocket when he asks for a second cup of coffee. Nor does he worry about confronting a suspect head-on, spelling out his suspicions as fact, tête-à-tête, and awaiting the response. Sometimes, however, his openness brings him into uncomfortable proximity to violence.

The forensic details of the crimes in McInerney's novels are not always convincing; for example, the police are not disturbed by a supposed suicide's making no trial cuts on her wrists, only deep, professional incisions. The Sister Mary Teresa series in particular is weak on hard criminal evidence. McInerney is simply not interested in the realities of a police investigation. Instead, motive, manner, behavior, and human interaction are for him most significant. His characters are a mixture of good and bad, with one or more of the seven deadly sins luring them into trouble and their own self-justifications plunging them deeper into chaos and even murder. As a consequence of his peculiar perspective, McInerney's endings sometimes leave situations somewhat unresolved when Dowling is satisfied with the spiritual state of all involved. *Second Vespers* (1980), for example, ends with police and priest entertaining dramatically different interpretations of the events of the plot, though it is understood that Dowling will intercede if an innocent is put at risk. A McInerney plot may turn into a circuitous labyrinth in which disparate motives and acts interlock in

causal patterns whose key is the heart of humanity. In fact, it is in his exploration of ironic causal sequences that McInerney excels, with the interlocking five deaths in *Cause and Effect* causing effects with a vengeance. The Sister Mary Teresa plots, however, are more conventionally suspenseful, with Emtee bringing all the suspects together at the end in a traditional unraveling.

McInerney uses his mysteries to explore issues and values that are of concern to him. For example, Father Dowling's discussions with his detective friend Phil Keegan and with his parishioners postulate and defend a conservative (what some have called reactionary) Roman Catholic worldview. Dowling misses the beauty and power of the Latin Mass, advocates daily Mass, confession, and penance, praises marriage and family, and has painful memories of his experiences on the church's marriage court. He and Emtee both clearly disapprove of the changes wrought by the Second Vatican Council and would prefer a return to the old ways of the church. Throughout the McInerney canon there are references to Catholics who feel rejected by the new church and who have left their faith, disillusioned by the growing laxness in Catholic moral theology. In *The Noonday Devil* the slackened values of Vatican II are blamed for an uprising among American bishops, who plan to replace an assassinated archbishop and maybe even the pope himself.

McInerney suggests that sex should be confined to marriage and should be for the sake of procreation rather than pleasure. In a number of the mysteries, sexual misalliances produce long-term conflicts that lead to murder and mayhem. The Sister Mary Teresa novels in particular often focus on "deviant" sexuality (pornography, dating clubs, singles bars) that precipitates murder.

A firm believer in the authority of the church, Dowling expresses disapproval of most Protestant ideas; he thinks, for example, that laypeople who become amateur biblical scholars are engaging in activities that are properly left to priests. Eccentric Protestant sects, television evangelists, and ignorant working-class Protestant converts are the subject of light ridicule throughout McInerney's canon.

Humbled by his alcoholism and embarrassed by his earlier ambitions to achieve a position of impor-

tance within the church hierarchy, McInerney's Father Dowling has found serenity in tending his flock. He derives aesthetic and spiritual satisfaction from the familiar words of the breviary and from psalms, hymns, and biblical passages. As McInerney puts it in *Lying Three*: "His parishioners were all the flock he needed; his life as a priest had moved onto a different and more solid stage. Something like peace returned when the anguish of insoluble marital tangles no longer tempted him to the oblivion of drink." Father Dowling devotes himself to the riddles of sin and grace and the mystery of the human heart, wonders about "the apparent inconsequence of so many lives," and believes that without faith there would be no adequate defense against the theory that life is futile. He befriends the lonely, feeds the hungry (Dowling's housekeeper is noted for her wholesome, hearty meals), and seeks out murderers—to protect Christ's flock and to offer them God's grace. In fact, most of the Dowling novels end, after the victim has been ferreted out and his earthly punishment assured, with the priest's attempts to make the murderer understand the degree of his guilt and the all-encompassing nature of God's forgiveness.

McInerney tries to humanize Dowling by having him smoke a pipe, enjoy a game of golf, and chat about sports with friends. He occasionally lapses into diction that echoes the cadences of the King James Bible, just as Emtee tosses out medieval allusions and Latin phraseology. Overall, however, Father Dowling is put forth as a model of a good man and a good priest: someone who has given up worldly ambitions, is satisfied with his lot in life, devotes himself to his parishioners, and personifies the best of church values. Emtee, too, despite her old-fashioned habit, her dismissal of Sigmund Freud, and her contrary ways, is a measure by which the more modern figures are judged.

Throughout his works McInerney studies spiritual and psychological motivations. His argument is that departures from Christian values (for him, conservative Catholic practices) lead to selfishness, misery, and perhaps even murder. Father Roger Dowling, Sister Mary Teresa, and, to a lesser extent, Phil Keegan have achieved spiritual well-being despite setbacks in their professional and personal lives; their well-being is di-

rectly attributable to their obedience and restraint. However, this very concern with spirituality leads to some disturbing contradictions. For all of their kindly manners, Dowling and Emtee are willing to believe the worst of virtually anyone, and their concern for the next life results in a seeming tolerance for failures in this one. Both affirm the need for earthly punishment despite the possibility of heavenly mercy. They seem at times uncharitable and even arrogant as they pontificate on orthodoxy and use the law and its representatives to achieve their own ends. There is a censorious air of self-righteousness, an unctuous piety to their words and deeds.

Furthermore, McInerney's Chicago, Fox River, and Wyler, for all of their midwestern charm and McInerney's witty descriptions of them, are cold, cheerless places inhabited by superficially pleasant but unhappy people. Wives and husbands betray each other casually; a son kills a woman to get revenge on his mother; a daughter lies obsessively and acts with contempt for the lives of even those most dear; a religious fanatic kidnaps a small boy, and another strangles a series of women. Dante's horrific visions are credible precisely because they are not set in the real world; McInerney's seem, in a curious way, to reflect a private view of Hell, one that is a bit jarring when located in the American Midwest.

HEIRS AND PARENTS

In *Heirs and Parents* (2000), Helga Bjornsen, a beautiful blond college student who once interned at lawyer Andrew Broom's practice, is found murdered, her throat slashed, in a car at a cemetery where she worked part-time in Wyler, Indiana. The crime features a wealth of hidden motives in conflict with one another and a plethora of potential suspects who move up or down the scale of probability as the police investigation intensifies and is just the opening salvo in a variety of criminal activities that plague the small town. The murder investigation intersects with a case Broom is working on: the probation of the will of local millionaire Stanley Waggoner, who shortly before his death apparently married a young nurse named Catherine, an action that raises the ire of other heirs. *Heirs and Parents* demonstrates many of author McInerney's trademarks: a fondness for puns, a dry and sometimes caustic wit in

observing society's foibles through close examination of a closed community, strong moral sensibilities, well-drawn characters who interact in believable fashion, and plenty of unexpected twists and turns to keep the reader guessing until the last page.

GREEN THUMB

Green Thumb (2004), the eighth entry in the University of Notre Dame traditional mystery series (who knew that crime was so rampant at the storied Catholic institution?), opens with a man found dying on the putting green at a university golf course. Apparently the victim of a heart attack, the dead man—Mortimer Sadler, class of 1977—was actually done in with poison derived from the deadly nightshade plant. As usual, private detective Phil Knight, retired but on retainer to the university, is called on to investigate, in league with friend Jimmy Stewart of the South Bend Police Department. As usual, Phil enlists the aid of his brilliant, obese

brother, professor of Catholic studies (and himself a licensed private detective) Roger Knight to help solve the crime. As usual, suspects abound. Is the murderer beautiful Maureen O'Kelly, valedictorian of the class of 1977, a noted gardener and a feminist who spurned the dead man when they were students? Is it one of Sadler's former roommates, all in attendance for an alumni get-together? Is it the dead man's brother, Samuel, or Samuel's son Paul, currently a student at Notre Dame, who is growing marijuana and deadly nightshade in his dorm room? Or is it someone else? As always, McInerny provides an intricate, complex story complete with philosophical digressions, touches of humor, and intimate glimpses into the workings of the university where he has taught for more than fifty years.

PRINCIPAL MYSTERY AND DETECTIVE FICTION

FATHER DOWLING SERIES: 1977-1985 • *Her Death of Cold*, 1977; *The Seventh Station*, 1977; *Bishop as Pawn*, 1978; *Lying Three*, 1979; *Second Vespers*, 1980; *Thicker than Water*, 1981; *A Loss of Patients*, 1982; *The Grass Widow*, 1983; *Getting a Way with Murder*, 1984; *Rest in Pieces*, 1985

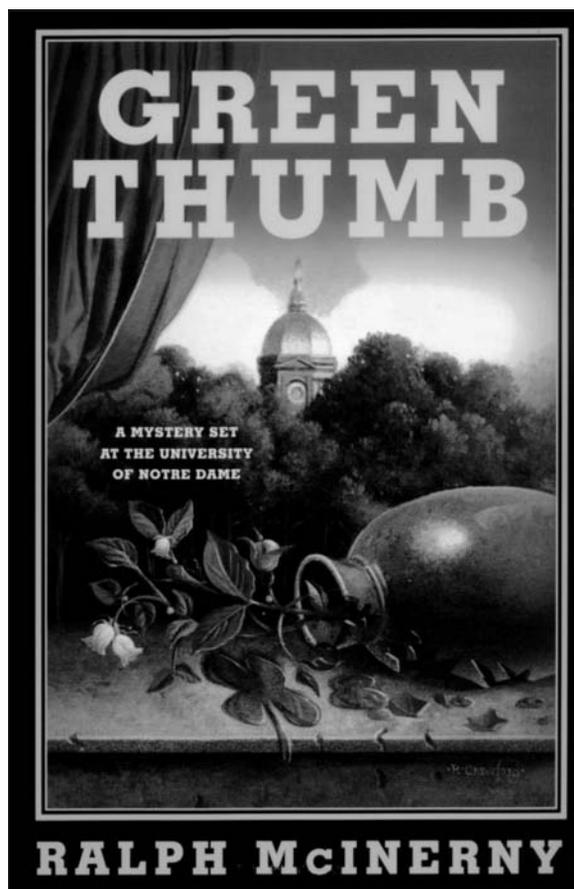

1986-1996 • *Leave of Absence*, 1986; *The Basket Case*, 1987; *Abracadaver*, 1989 (also known as *Sleight of Body*, 1989); *Four on the Floor*, 1989; *Judas Priest*, 1991; *Desert Sinner*, 1992; *Seed of Doubt*, 1993; *A Cardinal Offense*, 1994; *The Tears of Things*, 1996

1997-2007 • *Grave Undertakings*, 2000; *Triple Pursuit*, 2001; *Prodigal Father*, 2002; *Last Things*, 2003; *Requiem for a Realtor*, 2004; *Blood Ties*, 2005; *The Prudence of Flesh*, 2006; *The Widow's Mate*, 2007

SISTER MARY TERESA SERIES (AS QUILL): *Not a Blessed Thing!* 1981; *Let Us Prey*, 1982; *And Then There Was Nun*, 1984; *Nun of the Above*, 1985; *Sine Qua Nun*, 1986; *Veil of Ignorance*, 1988; *Sister Hood*, 1991; *Nun Plussed*, 1993; *Half Past Nun*, 1997; *Death Takes the Veil, and Other Stories*, 2001

ANDREW BROOM SERIES: *Cause and Effect*, 1987; *Body and Soul*, 1989; *Frigor Mortis*, 1989; *Savings and Loam*, 1990; *Mom and Dead*, 1994; *Law and Ardor*, 1995; *Heirs and Parents*, 2000

NOTRE DAME SERIES: *On This Rockne*, 1997;

Lack of the Irish, 1998; *Irish Tenure*, 1999; *The Book of Kills*, 2000; *Emerald Aisle*, 2001; *Celt and Pepper*, 2002; *Irish Coffee*, 2003; *Green Thumb*, 2004; *Irish Gilt*, 2005; *The Letter Killeth*, 2006

EGIDIO MANFREDI SERIES: *Still Life*, 2000; *Sub Rosa*, 2001

NONSERIES NOVELS: *Romanesque*, 1978; *The Noonday Devil*, 1985; *Easeful Death*, 1991; *Infra Dig*, 1992; *As Good as Dead*, 2002; *The Ablative Case*, 2003; *Slattery: A Soft-Boiled Detective*, 2004

SHORT FICTION: *Thou Shalt Not Kill: Father Brown, Father Dowling and Other Ecclesiastical Sleuths*, 1992 (with G. K. Chesterton and John Mortimer)

OTHER MAJOR WORKS

NOVELS: *Jolly Rogerson*, 1967; *A Narrow Time*, 1969; *The Priest*, 1973; *Gate of Heaven*, 1975; *Rogerson at Bay*, 1976; *Spinnaker*, 1977; *Quick as a Dodo*, 1978; *Abecedary*, 1979; *Connolly's Life*, 1983; *The Red Hat*, 1998

PLAYS (AS AUSTIN): *The Chinese Pendant and Other Plays*, pb. 1983; *The Little Lights of Kimberly and Other Plays*, pb. 1985

POETRY: *Shakespearean Variations*, 2001; *The Soul of Wit*, 2004

NONFICTION: 1961-1970 • *The Logic of Analogy: An Interpretation of St. Thomas*, 1961; *History of Western Philosophy, Vol. 1: From the Beginnings of Philosophy to Plotinus*, 1963; *Thomism in an Age of Renewal*, 1966; *Studies in Analogy*, 1968; *History of Western Philosophy, Vol. 2: Philosophy from Augustine to Ockham*, 1970

1971-1990 • *Saint Thomas Aquinas*, 1977; *Rhyme and Reason: Saint Thomas and Modes of Discourse*, 1981; *The Frozen Maiden of Calpurnia*, 1982; *Ethica Thomistica: The Moral Philosophy of Thomas Aquinas*, 1982 (revised 1997); *Being and Predication: Thomistic Interpretations*, 1986; *Miracles: A Catholic View*, 1986; *Art and Prudence: Studies in the Thought of Jacques Maritain*, 1988; *The Catholic Moment: Paradox of the Church in the Postmodern World*, 1988; *A First Glance at Saint Thomas Aquinas: A Handbook for Peeping Thomists*, 1990; *Boethius and Aquinas*, 1990

1991-2006 • *The Search Committee*, 1991; *Aquinas on Human Action: A Theory of Practice*, 1992; *Aquinas Against the Averroists: On There Being Only One Intellect*, 1993; *The Question of Christian Ethics*, 1993; *The God of Philosophers*, 1993; *Aquinas and Analogy*, 1996; *An Uncertain Legacy: Essays on the Pursuit of Liberty*, 1997 (with others); *What Went Wrong with Vatican II: The Catholic Crisis Explained*, 1998; *A Student's Guide to Philosophy*, 1999; *Characters in Search of Their Author*, 2001; *The Defamation of Pius XII*, 2001; *Aquinas*, 2003; *The Very Rich Hours of Jacques Maritain: A Spiritual Life*, 2003; *I Alone Have Escaped to Tell You: My Life and Pastimes*, 2006; *Some Catholic Writers*, 2006

EDITED TEXTS: *New Themes in Christian Philosophy*, 1968; *Modernity and Religion*, 1994; *The Degrees of Knowledge (The Collected Works of Jacques Maritain)*, 1995; *Thomas Aquinas, Selected Writings*, 1998; *Great Mystery Series: Eleven of the Best Short Stories from Alfred Hitchcock's and Ellery Queen's Mystery Magazines*, 2000 (with Lawrence Block and Mary Higgins Clark); *Murder Most Divine: Ecclesiastical Tales of Unholy Crimes*, 2000 (with Martin H. Greenburg); *Murder Most Catholic: Divine Tales of Profane Crimes*, 2002 (with Greenburg)

TRANSLATIONS: *Kierkegård: The Difficulty of Being Christian*, 1968 (with Leo Turcotte); *A History of the Ambrosiana*, 1983 (by Angelo Paredi; with Constance McInerney); *Introduction to the Summa Theologiae of Thomas Aquinas by John of Saint Thomas*, 2004

BIBLIOGRAPHY

DeAndrea, William L. *Encyclopedia Mysteriosa: A Comprehensive Guide to the Art of Detection in Print, Film, Radio, and Television*. New York: Prentice Hall, 1994. Contains brief entries on Ralph McInerney and two of his major fictional creations: Father Dowling and Sister Mary Teresa Dempsey.

Kirkus Reviews. Review of *Still Life*, by Ralph McInerney. 68, no. 18 (September 15, 2000): 1319. A review of a novel featuring Egidio Manfredi of the Fort Elbow, Ohio, police force, who investigates the disappearance of a poet and encounters a case of mistaken identity. The novel is praised for

its interesting theological concept—how long should one be responsible for acts of the past—and for its world-weary protagonist, but the reviewer takes McInerny to task for his verbosity.

Levin, Martin. "Reader's Report." Review of *Jolly Rogerson*, by Ralph McInerny. *The New York Times Book Review*, November 26, 1967, p. 68. A review of *Jolly Rogerson*, in which the protagonist is an ordinary professor at an ordinary university who, dissatisfied with his lot in life, begins conceiving absurd research projects, writing poison-pen letters, and turning his lectures into surrealistic exercises.

Lukowsky, Wes. Review of *Sub Rosa*, by Ralph McInerny. *Booklist* 98, no. 4 (October 15, 2001): 386. A review of *Sub Rosa*, the second Egidio Manfredi novel, in which an unattractive romance novelist kidnaps men to have sex. Favorably recommended for its cozy nonviolence, its gently satirical tone, and its satisfying puzzle.

McInerny, Ralph. *I Alone Have Escaped to Tell You: My Life and Pastimes*. Notre Dame, Ind.: University of Notre Dame Press, 2006. McInerny's autobiography describes the influences on his life and his career and his thoughts about writing and the works of other Catholic writers.

_____. "Saints Preserve Us: The Catholic Mystery." In *The Fine Art of Murder: The Mystery Reader's Indispensable Companion*, edited by Ed Gorman, Martin H. Greenberg, and Larry Segriff with Jon L. Breen. New York: Carroll & Graf, 1993. McIner-

ny's definition of what constitutes a Catholic novel: fiction that contains both the law enforcement concept of crime and punishment and the religious concept of sin and forgiveness. McInerny uses his own Father Dowling series to illustrate how the two concepts "overlap, interlock and play off against each other."

Mort, John. "Christian Fiction." *Booklist* 94, no. 17 (May 1, 1998): 1503. Brief reviews of eight novels dealing with religion, among them McInerny's *The Red Hat*, which is called a "convoluted tale of intrigue within the Catholic Church." McInerny's novel earns a mixed review: positive marks for a bizarre plot involving a defrocked priest and the author's witty erudition, but demerits for pacing—the story is considerably slowed by long, pedantic sections about church doctrine.

Needham, George. Review of *Grave Undertaking*, by Ralph McInerny. *Booklist* 96, no. 8 (December 15, 1999): 761. A review of the nineteenth Father Dowling mystery, *Grave Undertaking*, which is panned because of repetition, underdeveloped characters, and a time line that makes no sense.

Publishers Weekly. Review of *Triple Pursuit*, by Ralph McInerny. 248, no. 9 (February 26, 2001): 61. A mixed review of *Triple Pursuit*, the twentieth Father Dowling mystery: though comfortable, familiar, leisurely, and repetitive, and laced with the author's dry wit, the novel is called a "predictable entry in a generally lackluster series."

HELEN MacINNES

Born: Glasgow, Scotland; October 7, 1907

Died: New York, New York; September 30, 1985

Types of plot: Amateur sleuth; espionage

CONTRIBUTION

At the height of her popularity, Helen MacInnes was known as the "queen of international espionage fiction." Although her novels contain much less sex

and violence than others of the genre, they are highly suspenseful. In addition, they are based on an appreciation of justice, freedom, and individual dignity. Perhaps the most characteristic element of MacInnes's novels is their settings, which are invariably beautiful and of historic interest. The capital cities of Europe and its many forests, lakes, castles, and opera houses are described in such detail that the novels may be

Helen MacInnes in 1974. (Hulton Archive/Getty Images)

enjoyed as travel books. Brittany, Salzburg, Málaga, Venice, and Rome come alive for the reader. MacInnes's love for these and other spots of the world, as well as her appreciation of democratic values, illuminates and enhances her novels.

BIOGRAPHY

Helen Clark MacInnes was born on October 7, 1907, in Glasgow, Scotland, where she was also educated. She married Gilbert Highet, a Greek and Latin scholar, in 1932. To finance trips abroad they collaborated in translating books into English from German. The couple moved to the United States in 1937. After her son was born, MacInnes began writing her first novel. *Above Suspicion* (1941) not only was an immediate best seller but also was made into a popular film, as were *Assignment in Brittany* (1942), *The Venetian Affair* (1963), and *The Salzburg Connection* (1968).

The film *Assignment in Brittany* was used to help train intelligence operatives during World War II.

During the course of her life, MacInnes wrote more than twenty novels and a play. Her novels were highly successful, and more than 23 million copies of her books have been sold in the United States alone. They have been translated into twenty-two languages including Portuguese, Greek, Arabic, Tamil, Hindi, and Urdu. Her work is admired by both the general audience and professional intelligence agents. Allen Dulles, former head of the Central Intelligence Agency, called MacInnes a "natural master of the thriller" and included an excerpt from *Assignment in Brittany* in an anthology of espionage literature that he compiled. Not all of her novels, however, concerned espionage in foreign lands. *Friends and Lovers* (1947) was a semiautobiographical love story set at Oxford University in England, and *Rest and Be Thankful* (1949) satirized the New York literary

and critical establishment, showing some of its members trying to survive at a dude ranch in Wyoming.

In 1985, MacInnes died in Manhattan following a stroke. Her death occurred shortly after her last novel, *Ride a Pale Horse* (1984), appeared on *The New York Times* paperback best-seller list.

ANALYSIS

Helen MacInnes began her first novel, *Above Suspicion*, after an apprenticeship that included translating German works with her husband and taking careful notes on the political situation in Germany. Like her succeeding novels, it is based on the necessity of resisting the advance of Nazism. During World War II, the enemy was the Gestapo, the German secret police. MacInnes writes that after the war, villainous Nazis were replaced by communists and terrorists who were convinced of the superiority of their own ideologies and disdained Western democratic values, which they considered decadent. Because of their discipline, efficiency, and toughness the enemies of freedom could achieve limited success in the short run but were ultimately doomed to be overwhelmed by the forces of good.

MacInnes disapproved heartily of dictatorships of both the Left and the Right. Indeed, she considered herself a Jeffersonian democrat, and her books promote the ideals of freedom and democracy. The earlier novels not only demonstrate the evils of fascism but also insist on the danger of pacifism in the face of the Nazi threat. The later novels pitch the evils of communism and the danger of appeasing the Soviet Union. MacInnes's work is not harmed by such overt political commentary. On the contrary, her novels lack the sense of languor and depression, even boredom, that certain modern espionage novels exhibit. MacInnes's professional intelligence agents, a few of whom appear in more than one novel, are skillful operatives who love their country. There is no doubt in their minds that the Western democracies are morally superior to the governments of their enemies. This conviction is in strong contrast to the posture of the operatives in the novels of John le Carré or Len Deighton, who seem to see little difference between the methodology and goals of the Soviet Union and those of the West.

To convince the reader that Western intelligence operatives and U.S. State Department personnel are truly patriotic, MacInnes affords her audience glimpses into the mental processes of her characters. They are not professional agents, but they learn the craft of intelligence quickly after they are recruited by a professional agent for a mission. MacInnes's early heroes are often academics, while later heroes include a music critic, an art consultant, and a playwright. Their occupations allow MacInnes to comment on the current state of painting, music, and theater, which, for the most part, she finds inferior to the comparable arts of the past. These heroes are typically good-looking, gentle, and kind, as well as brave, intelligent, and resourceful, but they are also lonely. Not at all promiscuous, these young men are waiting for the right woman to come along, and by the conclusion of nearly all the novels, they are usually committed to a monogamous relationship. The contrast with Ian Fleming's James Bond is clear. Also unlike James Bond, MacInnes's heroes are not superathletes and they do not possess technical devices with seemingly magical powers.

ABOVE SUSPICION

In *Above Suspicion*, Mrs. Frances Myles is the principal character, although her husband, Richard, proves to be braver, calmer, and more capable than she. In subsequent novels, MacInnes uses male heroes. Although she pays lip service to the idea of female equality, she seems to be afraid to compromise her heroines' "femininity" by making them too intelligent or too brave. Young, beautiful women exist either to be rescued by the hero or, if they are enemy agents, to tempt him. The plucky hero is frequently pitted against a sexually predatory villainess; the latter may attract the hero initially but eventually disgusts him. This situation changes slightly in *The Snare of the Hunter* (1974), where the hero is aided by Jo Corelli, MacInnes's version of the liberated career woman who is able to take charge.

THE DOUBLE IMAGE

In this and other ways, MacInnes always tried to be current. For details concerning espionage techniques, she drew on evidence collected by the Federal Bureau of Investigation. Many of her plots were suggested by current events. The plot of *The Double Image* (1966), for example, was suggested by news reports that the

grave of a Nazi war criminal was found to be bogus. This event reminded her of the possibility that several communist spies had masqueraded as Nazis during World War II, as Richard Sorge, a real historical figure, had done. MacInnes has also been lauded for the accurate manner in which she described the communist influence on the Algerian revolt against France, which took place in the early 1960's. Indeed, she considered herself obligated not to falsify the past. It is interesting, however, that in her earlier novels she was more accurate about the details of the craft of espionage than in her later books. In the later novels, she chose to ignore certain technological advances, particularly in communications, because she believed that dedicated personnel were more important than gadgets.

MacInnes is most accurate in her use of locale. In *Above Suspicion*, the reader is given a picture of pre-war Oxford, Paris, and Austria. In *Assignment in Brittany*, the reader is shown Brittany as it must have been when the Nazis first came to power; *North from Rome* (1958) affords the reader a tour of Italy; in *Decision at Delphi* (1961), the reader is taken on an excursion through Greece, and *Message from Málaga* (1971) is set in Spain. *The Double Image* and *The Salzburg Connection* focus on postwar Austria, a mecca for tourists visiting concert halls, opera houses, and quaint mountain villages. In fact, MacInnes's most graphic writing is devoted to the historic delights of Europe and parts of Asia. In *Prelude to Terror* (1978), she describes the Neustrasse, a street in the Austrian town of Grinzing:

It was lined with more vintners' cottages, their window boxes laden with bright petunias. Each had its walled courtyard, whose wide entrance doors stood partly open to show barrels and tables and more flowers. All of them had their own individual vineyards, long and narrow, stretching like a spread of stiff fingers up the sloping fields.

MacInnes's language is simple but evocative. The accurate descriptions of her settings, as well as her obvious love for them, lend a depth and a resonance to her novels, affording them an additional dimension few other espionage novels achieve. Because her plots are structured around a chase, they are exciting. Reader

interest is further heightened by the love story, which is an intrinsic element of these novels. Unless the hero and heroine are already married to each other, two attractive young people will certainly meet and fall in love. To this mixture of travelogue and romance, MacInnes adds elements of action and suspense, as the hero and heroine must avoid capture, torture, and even death.

MacInnes's storytelling is tightly controlled. She keeps the reader's attention by providing only small bits of information at a time and by provoking concern at appropriate intervals. Will the garage mechanic unknowingly betray the heroine to her enemy? Will the villain reach the hidden door and escape? In all the novels, the protagonists are in danger, but only minor characters, or evil ones, die or get seriously hurt. Murder and mayhem either occur offstage or are not described vividly, which is clearly not standard practice in the modern espionage novel. Another unusual element in these novels is the emphasis on romance coupled with an absence of sexual description. The limited amount of sexual activity that does occur is glossed over as discreetly as it would have been in a Victorian novel.

Without relying on graphic descriptions of violence or sexual behavior, MacInnes has managed to entertain a generation of readers by keeping them in great suspense as she exposes her extraordinarily likable characters to familiar dangers. She has made it apparent that just as her characters barely manage to avoid disaster, so too are democracy and freedom constantly threatened by the forces of terror and chaos. In addition to the stratagems MacInnes employs to involve the reader, the chases, which often serve as the foundation of her plots, take place in some of the most picturesque settings in the world.

ADRIAN McKINTY

Born: Carrickfergus, Northern Ireland; 1967

Types of plot: Espionage; hard-boiled, thriller

PRINCIPAL SERIES

Michael Forsythe, 2003-

PRINCIPAL SERIES CHARACTER

MICHAEL FORSYTHE is a young, highly articulate illegal immigrant from Ireland living in New York City. After he joins the Irish mob in America and takes on investigations throughout the world, he finds that the troubles he left behind in Belfast have followed him.

CONTRIBUTION

Adrian McKinty has joined the long line of talented writers to come out of Ireland. In all of his novels, he exposes readers who might know little about Irish history to the long war waged in Ireland between Roman Catholics and Protestants. In particular, McKinty's fast-paced, intensely violent mystery novels provide insights into a dark period in Irish history known as the Troubles, during which Republican and Loyalist paramilitary organizations in British-ruled Northern Ireland engaged in various forms of violence from the late 1960's until the Good Friday Agreement of 1998. McKinty's characters—especially his dark, popular protagonist Michael Forsythe, who illegally

immigrates to New York City to escape the Troubles in Northern Ireland—are all products of this violent era in Irish history. McKinty, who has been described by crime-fiction specialist Otto Penzler as “the super-talented Irishman,” joins a number of Irish writers who have recently gravitated to crime writing such as John Banville, the winner of the 2005 Man Booker Prize for *The Sea*. Irish writer Frank Court, author of *Angela’s Ashes: A Memoir* (1996), describes McKinty as “a cross between American mystery writer Mickey Spillane and Damon Runyon.”

McKinty’s novels contribute to an emerging genre known as Irish noir, which, scholars suggest, has been created by the collision of the older political and social violence with the newer crime-based violence produced as a result of the prosperous economic era that made Ireland into the Celtic Tiger.

McKinty’s *Dead I Well May Be* (2003), which was adapted to screen, was short-listed for the Crime Writers’ Association’s Ian Fleming Steel Dagger Award. His *The Dead Yard* (2006) was named one of the fifteen best novels of 2006 by *Publishers Weekly*.

BIOGRAPHY

In 1967, Adrian McKinty was born in Carrickfergus, County Down, a town five miles outside Belfast in British Northern Ireland. Soon after his birth, Northern Ireland entered a violent period known as the Troubles, centered on the clash between the Unionist government in Ulster and the Irish Republican Army (IRA), which sought, through militant means, to reunite the six counties in Northern Ireland with the Republic of Ireland in the southern part of the island. The Troubles, which could at any moment have escalated into a full-scale civil war, seriously affected the daily lives of everyone living in Northern Ireland at that time and no doubt shaped the people’s political and social perspectives. In 1972, when McKinty was only five years old, twenty-six protesters in Derry, Northern Ireland, were shot by members of the British Parachute Regiment. This incident, known as Bloody Sunday, dramatically intensified the violence and caused an increase in enlistment in the Irish Republican Army (IRA), which was campaigning for Northern Ireland’s independence from Britain. McKinty’s

youth was thus shrouded in scenes of horrific violence. The author once described his hometown Carrickfergus, as “old school—no cars, much drunkenness, wives in their place and many, many fights.” Hardly surprising then, that his background in Northern Ireland provides much of the material for his highly suspenseful, brutally violent novels.

McKinty attended Oxford University, where he studied politics and trained as an attorney before immigrating illegally in the 1990’s to New York City, where for five years he worked at various odd jobs, including security guard, teacher, construction worker, mail carrier, bartender, salesman, and rugby coach. At one time, he sold books at the Barnes and Noble on Eighty-second Street and Broadway in New York City. McKinty lived in Harlem in New York City and traveled for a time to India before eventually returning to the United States, where he took a job as a schoolteacher and settled in Denver. As is true with many successful writers, his various jobs and his sojourns in various geographic locales provided McKinty with myriad experiences from which to create interesting settings and unusual, dynamic, bigger-than-life characters.

ANALYSIS

A new generation of Irish mystery writers continues to proliferate partly, as one critic argues, in response to Ireland’s changing social landscape. Although Ireland had been one of the poorer nations in Western Europe, thanks in part to its membership in the European Union, Ireland prospered from the 1990’s to the early 2000’s, becoming known as the Celtic Tiger. However, a rise in crime and violence typically accompany a rise in prosperity, and Ireland was no exception. This meeting point between wealth, misdeeds, and fear has given rise to a new literary genre called Irish noir, a blending of American hard-boiled crime fiction with twenty-first century Irish settings, social mores, and dialogue that illustrates the collision of primitive deep-seated violence with the modern world.

One way that the Irish have come to terms with the violence in their country is through the art of storytelling. Psychiatrists explain that storytelling can be viewed as a survival mechanism used by cultures to

sublimate or diminish their fears. The act of writing or telling shadowy tales of horror and violence makes evil seem less frightening. Described by one critic as “a stunning new noir voice, dark and stylish, mythic and violent—complete with an Irish lilt,” McKinty, whose own early life was steeped in violence and suspicion, writes novels that fit easily into this new Irish noir genre.

Although noir, the genre made famous by American writers such as Raymond Chandler and Dashiell Hammett, features tough-talking male protagonists and is set in cities in early twentieth century America, Irish noir, for the most part, is set in dark, shadowy and moody Dublin. Indeed, the Gaelic *dubh linn* translates as “dark pool.” However, Irish noir is often transplanted to other sinister, shadowy geographic locations such as, in the case of McKinty, inner-city Boston and New York City, locales that fit the noir genre. Both cities contain large Irish communities complete with pubs and have drawn violent IRA men on the run. In this regard, McKinty also uses Mexico effectively in his noir novels, but he has recently come under criticism for using Denver, Colorado, as the setting of *Hidden River* (2005). As one critic points out, Denver does not work quite as well as a backdrop for the dark horror and violence that, in addition to his lurid descriptions of pain, fear, and brutality, have come to define McKinty’s novels. According to one critic, his novels tend to mirror the real-life violence that has plagued Northern Ireland.

There are no good guys in McKinty’s novels. His heroes are really antiheroes who are, without exception, dark, complex, and brooding: bad boys, drug addicts, and murderers, who just might descend into madness before the readers’ eyes if they are pushed too far. It is not difficult to understand these horrifically violent heroes, because they are products of dark, shadowy, noir worlds and have rarely, if ever, encountered trustworthy people. In McKinty’s novels, everyone, even the seemingly sweet, innocent young women favored by his heroes, is corruptible: No one can be trusted.

In addition, McKinty is an intellectual. His novels are replete with entertaining literary and historical allusions that range from Christopher Marlowe’s *Faustus* to Sigmund Freud.

ORANGE RHYMES WITH EVERYTHING

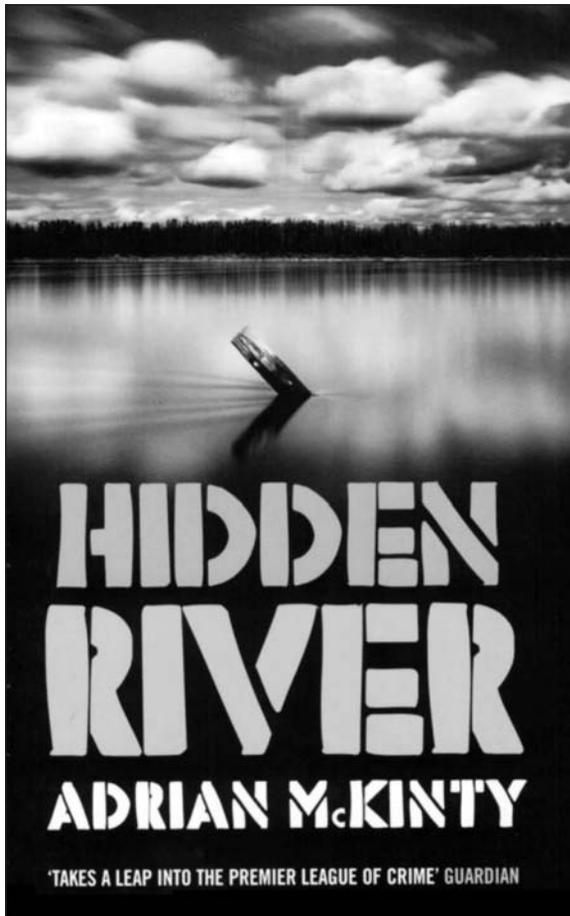

In his first novel, the 1997 thriller *Orange Rhymes with Everything*, McKinty uses two unnamed narrators, a Protestant terrorist and his disabled teenage daughter, to illustrate Northern Ireland’s ongoing historical, cultural, and religious conflicts between Catholics and Protestants. In New York, a patient with Irish Loyalist leanings and intent on returning home to Northern Ireland at any cost breaks out of a mental institution. Soon, bodies begin to pile up as he makes his way home to see his estranged teenage daughter, who lives an ordinary rough working-class life in dark and violent Ulster.

DEAD I WELL MAY BE

McKinty’s second novel, *Dead I Well May Be*, takes its title from the lyrics of the famous Irish ballad “Danny Boy.” First-person narrator Michael Forsythe, a nineteen-year-old illegal immigrant living in New York City to escape the Troubles in Belfast, finds life just as violent and unpredictable in his adopted country as it was in Ireland. Fearless, clever, and in need of money, Forsythe gets a job working for Darkey White, the ironically named Irish mobster. In between fighting various ethnic gangs for control of the dark streets of the Bronx and Harlem and dealing with various crack addicts, murderers, and prostitutes as Darkey’s enforcer, Forsythe manages to fall in love with his boss’s luscious girlfriend Bridget. After Darkey discovers Forsythe and Bridget have betrayed him, Forsythe winds up in a horrific Mexican prison for his involvement in a drug deal gone wrong. After escaping, he predictably returns to New York to exact revenge on the Irish mobster.

HIDDEN RIVER

Hidden River (2005), which has been compared to Raymond Chandler’s noir *Farewell, My Lovely* (1940), presents another flight from Ireland to America, this time by a twenty-four-year-old disgraced former Royal Ulster Constabulary officer turned heroin addict. Alex Lawson, another of McKinty’s brooding antiheroes, leaves Carrickfergus, Northern Ireland, to investigate the death of his former girlfriend, the Irish-born Indian Victoria Patawasti, who was murdered in Denver. He also needs to leave Ireland quickly, as he is being pursued by a heroin dealer to whom he owes

money, police investigators, and crooked Ulster police officers. Lawson, who remains addicted to heroin, soon is wanted by the Colorado police after a suspect falls from a balcony. Lawson's investigation reveals that Victoria was in fact killed by her boss, the enormously rich Charles Mulholland, who is married to the beautiful quirky Amber, the iconic mysterious noir femme fatale, whom predictably Alex finds attractive.

THE DEAD YARD

The Dead Yard, the popular sequel to McKinty's acclaimed *Dead I Well May Be*, opens in Tenerife, Canary Islands, Spain, where McKinty's primary antihero Michael Forsythe is taking a long-deserved holiday. However, Forsythe is arrested after a riot breaks out at a soccer match between Ireland and England and finds himself threatened with long-term incarceration back in the horrific Mexican prison from which he earlier escaped. However, a typical McKinty noir femme fatale,

this time the voluptuous British intelligence agent Samantha, offers him a chance for release if he takes an Federal Bureau of Investigation assignment to infiltrate an Irish terrorist sleeper cell in Massachusetts. After saving the life of Kit, the teenage daughter of McCaghan, the cell's leader, Forsythe is immediately integrated into the renegade Sons of Cuchulainn. He stays at McCaghan's palatial beachside estate in the company of Touched, McCaghan's star sadistic killer; McCaghan's new wife; and Kit and her boyfriend, Jackie. Predictably, Forsythe develops a fondness for Kit but this does not save her, and the rest of her family, from a violent end in the Maine wilderness at the hands of Forsythe.

THE BLOOMSDAY DEAD

In *The Bloomsday Dead* (2007), a sequel to *The Dead Yard*, Michael Forsythe arrives in Dublin on June 16, otherwise known as Bloomsday, the annual remembrance of the life of Irish writer James Joyce in which celebrants relive the events in his famous novel *Ulysses* (1922), the action of which takes place on June 16, 1904, in Dublin. Forsythe is working as a security guard in Lima, Peru, keeping tourists, prostitutes, and others in line, when two Colombian hit men force him into a hotel room to take a call from his old girlfriend, Bridget Callaghan, in Ireland. He is told to find her daughter or be killed, so he returns to Ireland. Like Joyce's hero Leopold Bloom, in a one-day odyssey Forsythe manages to penetrate the IRA network, is kidnapped, escapes, infiltrates the Irish mob, and finds Bridget's daughter on a cliff in the company of her kidnappers and, unexpectedly, her own mother.

Sennett, Frank. Review of *The Bloomsday Dead*, by Adrian McKinty. *Booklist* 103, 7 (December 1, 2006): 28. Favorable review praises the book for its action and characterization, although the reviewer feels *Dead I Well May Be* is a superior book.

ALISTAIR MacLEAN

Born: Glasgow, Lanarkshire, Scotland; April 28, 1922

Died: Munich, West Germany (now in Germany); February 2, 1987

Also wrote as Ian Stuart

Types of plot: Espionage; thriller

CONTRIBUTION

Alistair MacLean was a writer of thrillers in the tradition of John Buchan, though without Buchan's depth. Although a few of his books, such as *H.M.S. Ulysses* (1955), may be described as straight adventure stories, most of MacLean's novels involve international intrigue or espionage. In contrast to a writer such as Robert Ludlum, however, whose lengthy novels of intrigue and espionage feature tortuously complicated plots, MacLean crafted taut narratives that move at breakneck

speed from the first chapter to the last. The hero of a MacLean novel faces one apparently insoluble problem after another, leading to a final confrontation fraught with peril. Formulaic but vividly realized, many of MacLean's novels have been adapted for the screen.

BIOGRAPHY

Alistair Stuart MacLean was born in Glasgow, Lanarkshire, Scotland. MacLean approached authorship as a business and apparently considered himself a businessman rather than a celebrity. Many facts about his early life are not generally known. He was educated at Glasgow University. During World War II, he served in the Royal Navy, an experience that he later put to good literary use. Many of the adventures in his novels occur at sea, and several of his best-known works are set during World War II.

After the war, MacLean taught English and history at Rutherglen, a secondary school in Glasgow. In 1954, he entered a literary competition in the Glasgow *Herald*, and his sea story "The Dileas" won the hundred-pound prize over nine hundred other entries. His first novel, *H.M.S. Ulysses*, appeared in England in 1955 and in the United States the next year. Thereafter, despite his initial doubts that he could succeed as a writer, he produced a book virtually every year until his death. In 1961, he adopted the pseudonym Ian Stuart while continuing to write steadily under his own name. He became an accomplished scenarist—in fact, he first wrote several of his novels in the form of screenplays.

Of MacLean's first marriage, like much of his private life, little is known except that it produced three sons. His second marriage, to Mary Marcelle Georges, a film production company executive, took place in 1972. He lived in England for a time, operating a small chain of hotels until he lost his taste for that business. He eventually took up residence near Geneva, Switzerland. His interest in science and astronomy, especially science as applied to technology, is apparent in his fiction. While visiting a friend in Munich, West Germany, he suffered a stroke. Three weeks later, on February 2, 1987, he died of heart failure in a Munich hospital.

ANALYSIS

Alistair MacLean was a writer who found his niche at the very beginning of his writing career. Having made a successful debut with *H.M.S. Ulysses*, he proceeded to turn out thirty-three novels in the next thirty years. He worked very quickly, completing a screenplay in about two months and a novel in even less time. That he set a demanding schedule for himself can be inferred from his output. He was a formula writer, whose formula was exceedingly successful, and he would not have claimed to be anything else. To MacLean, writing was a business, and his responsibility as a businessman was to please the customer (that is, the reader).

As noted above, MacLean's fast-moving narratives and their often rugged settings are eminently filmable, and several of his early books were adapted for the

screen. By 1967, MacLean was ready to try his own hand at screenwriting. His first effort was the script for *Where Eagles Dare*, which had been published as a novel that year. He enjoyed solving the technical problems associated with screenwriting and went on to adapt several more of his novels: *The Guns of Navarone* (1957), *Caravan to Vaccarès* (1970), *When Eight Bells Toll* (1966), *Puppet on a Chain* (1969), *Force 10 from Navarone* (1968), and *The Golden Rendezvous* (1962). MacLean novels adapted for the screen by others include *Fear Is the Key* (1961), *Ice Station Zebra* (1963), *The Last Frontier* (1959), *South by Java Head* (1958), *The Satan Bug* (1962), *Bear Island* (1971), *H.M.S. Ulysses*, and *Breakheart Pass* (1974). These films have been vehicles for action stars such as Clint Eastwood (*Where Eagles Dare*) and Charles Bronson (*Breakheart Pass*), as well as other major stars, such as Richard Burton (*Where Eagles Dare*), Rock Hudson (*Ice Station Zebra*), and Anthony Hopkins (*When Eight Bells Toll*).

The novels follow a pattern that millions of MacLean fans have endorsed for more than three decades. The protagonist is a strong man, usually an extreme individualist, who is often in conflict with regularly constituted authority. He is pitted against an implacable, often a totalitarian, enemy. The confrontation usually takes place in some bleak and menacing locale—the turbulent North Atlantic, the sheer face of a cliff, a windswept mountain peak, or frozen arctic tundra. The action consists of a series of encounters (a capture, an escape, a recapture, a reescape), violent and intense but essentially inconclusive, leading up to the final climactic scene. Here, MacLean follows the basic episodic structure of the adventure story, descending from Homer and the medieval romance through James Fenimore Cooper and Alexandre Dumas, *père*. He adds to the mix an emphasis on twentieth century technology, so that the hero is often simultaneously facing hostile men, a hostile environment, and hostile machines.

THE GUNS OF NAVARONE

An example of a novel that blends twentieth century technology with the traditional adventure story is *The Guns of Navarone*, one of MacLean's best-known tales, thanks in part to the highly successful motion-

picture version starring Gregory Peck, David Niven, and Anthony Quinn. In this work, the Allied heroes must destroy mammoth German guns housed in supposedly impenetrable caves high up the face of a sheer and seemingly unscalable cliff. This novel, like many of the ones that followed, has an additional complication. There is a Judas in the protagonists' camp, who constantly betrays them to their enemies.

MacLean's heroes are marked by their steadfastness and by their competence in some crucial field of endeavor. They survive and triumph as much through their expertise as through their character. Andreas in *The Guns of Navarone* and Force 10 from *Navarone* has almost superhuman strength, Bruno in *Circus* (1975) is a high-wire walker, and Mitchell in *Seawitch* (1977) has uncanny night vision. These characters share an indomitable will and an inexhaustible resilience.

THE CRITICS WEIGH IN

The worldwide sales of MacLean's books, as well as the box-office success of the films he wrote, attest his popularity. The critical response to his work, however, is quite mixed. Some critics complain that MacLean tells the same story over and over, and with considerably less zest and energy in the later novels. Such is likely to be the case with any commercially successful formula writer: He knows that his public thoroughly enjoys the literary meal he is serving up, and he is reluctant to begin adding new dishes to the menu. MacLean's subject matter gives the superficial appearance of being varied. Some novels deal with war, others with espionage, and still others with crime—one, *Circus*, even borders on science fiction. The conflict, however, is always physical and unambiguous. The protagonist always possesses the manly virtues, and the antagonists are always recognizably evil: Nazis, Bolsheviks, international drug dealers, terrorists. The protagonist's mission is a seemingly impossible one: to blow up the indestructible gun turrets at Navarone, to kidnap a German general from an impregnable mountain fortress that can be reached only by a single cable car, to rescue VIPs held hostage in the middle of the Golden Gate Bridge, to retrieve sunken atomic and hydrogen weaponry from the ocean's floor. Moreover, the hero must succeed even while someone close to him (MacLean's typical Judas figure) is secretly

attempting to sabotage his efforts.

MacLean's handling of violence has been faulted on several counts, some of them seemingly contradictory. Some critics believe that MacLean glorifies violence, that he appeals to the reader's atavistic warlike tendencies. Some even purport to find in MacLean's dialogue simpleminded moralizations about the absolute need for violence in a world filled with vermin. Others argue that so numerous are the violent deaths in most of the novels that they become repetitious, *pro forma*. The scenes of violence are like children's games of pretend; they lack the power to stir the emotions. It may be true that MacLean glamorizes and romanticizes violence, or that he renders it merely banal and boring; he could hardly do both at the same time.

The political perspective of the novels has been characterized as a kind of radical conservatism. Certain critics rather disparagingly suggest that the values at the heart of MacLean's fiction are those of the old-fashioned middle-class morality. In the later novels, however, the author seems to have lost his faith in the institutions of society and in their ability to enforce the traditional standards. A stalwart individual, or perhaps a small band of committed men, must save society in spite of itself. Bureaucracy, both British and American, receives harsh treatment in the novels. The armed forces, the intelligence services, the police forces are all riddled with officious fools, spies, and traitors. A MacLean hero must struggle against the ineptitude of the bureaucracy with one hand while he fights villains with the other.

BREAKHEART PASS

Perhaps criticism of MacLean's writing is most justified as it relates to characterization. MacLean tends to differentiate his characters by giving each a dominant personality trait or an eccentricity or a tic; too often, the result is caricature rather than characterization. Good examples of these deficiencies can be found in *Breakheart Pass*, the story of a disguised federal agent aboard a snowbound train in the American West of 1870. Up to its midpoint, *Breakheart Pass* is a mystery novel. A series of murders occur on the train, and the murderer's identity is withheld until the reader is well into the book. The emphasis in the last half of the novel is on the hero's efforts to get the train

through the pass. MacLean makes little effort to capture the atmosphere of the American West or, for that matter, of the nineteenth century. The characters employ an occasional Americanism; otherwise, they might as easily be modern-day Englishmen stranded in some European mountain pass. This critical assessment of MacLean's characterization is particularly applicable to his treatment of his female characters, who serve primarily as props to the he-man types who star in the novels. Yet it can also be argued that such a criticism is obviated by MacLean's material, which is primarily concerned with masculine exploits.

What MacLean unquestionably does best is to grab readers on the first page and rush them pell-mell through a novel that has great energy and an unflagging pace. Nick Totton says in his review of *Seawitch*, "Those who read Alistair MacLean will read it, and those who do not need no encouragement." The MacLean fan may put the book down with no inclination ever to reread a word of it but will soon be longing for another just like it.

Webster, Jack. *Alistair MacLean: A Life*. London: Chapman's, 1991. The first major biography of MacLean to be published after the author's death; as the title implies, the focus is more on biography than on criticism of the author's work.

CHARLOTTE MacLEOD

Born: Bath, New Brunswick, Canada; November 12, 1922

Died: Lewiston, Maine; January 14, 2005

Also wrote as Alisa Craig; Matilda Hughes

Type of plot: Cozy

PRINCIPAL SERIES

Peter Shandy, 1978-1996

Sarah Kelling and Max Bittersohn, 1979-1998

Janet Wadman and Madoc Rhys, 1980-1992

Grub-and-Stakers, 1981-1993

PRINCIPAL SERIES CHARACTERS

PETER SHANDY, an agriculturalist and college professor, is in his late middle ages when he first appears as the developer of the Balaclava Buster, a prize rutabaga. He ages a little in the course of the series and marries Helen Marsh, a librarian who is Shandy's twin in temperament. A calm and quiet man, Shandy has strong moral convictions and enjoys a display of wit and repartee. His keen observations and his love of counting anything and everything are often the means by which he detects important clues.

SARAH KELLING, a Boston Brahmin in her mid-twenties, is made a widow in the first book in which she appears. In the early books in the series, she lacks self-confidence and is easily cowed by those around her and by tradition, but her character develops greater strength and assurance in the course of the series. She develops a relationship with and eventually marries private investigator Max Bittersohn.

MAX BITTERSohn, Sarah's husband, is a private investigator who specializes in art theft and art fraud.

His middle-class upbringing allows him to move more comfortably in the greater world than Sarah; thus, he serves to balance Sarah, whose view of the world is more limited.

JANET WADMAN is a perceptive amateur who relies on her knowledge of the past and of local people to gain insights into cases. She holds to her strong moral convictions, though these at times make her appear overly straitlaced. Her character grows in the series as she becomes more self-reliant and less judgmental. Her confidence develops in part through her marriage.

MADOC RHYS, Janet's husband, a Welshman who has become a Mountie, is assisted by Janet in his cases.

DITTANY HENBIT MONK is the principal member of the Grub-and-Stake Gardening and Roving Club, a women's social organization in Lobelia Falls, Ontario, which fosters a love of gardening and of archery. Dittany is the energetic amateur sleuth who mobilizes other club members for worthy causes while engaging in her own investigations. She frequently calls on Sergeant MacVicar of the local police to assist her.

CONTRIBUTION

In her mysteries, Charlotte MacLeod created local communities that, along with her principal series characters, served as continuing elements within her fiction. Her development of these communities, with all their customs and eccentricities, the new residents who bring change, and the movement of minor characters into major roles in particular novels, made her work distinctive. To define these communities further, MacLeod used domestic detail, conveying realism and evaluating her characters' states of mind by the states

of their domestic circumstances. A love interest in each series culminates in marriage, indicating the importance of stability in the domestic sphere of her sleuths, amateur and professional. MacLeod's portrayals of domestic detail and marital relationships to support the development of her characters places her in a company that includes Ngaio Marsh, Dorothy Simpson, and Patricia Moyes, among others. The light touch MacLeod brought to her mysteries, in which humor and satire are as important to the overall effect of her work as the plot, further distinguished her fiction from that of her contemporaries and allowed her to present mysteries that were also comedies of manners.

MacLeod was a member of the Mystery Writers of America and Crime Writers of Canada. In 1992 she received a Lifetime Achievement Award from the Bouchercon convention and in 1998 she received the Malice Domestic Award for Lifetime Achievement. She also received the Nero Wolfe Award for *The Corpse in Oozak's Pond* (1987), and she was twice nominated for Edgar Allan Poe Awards and three times nominated for an Agatha Award.

BIOGRAPHY

Charlotte Matilda Hughes MacLeod was born in Bath, New Brunswick, Canada, on November 12, 1922, the daughter of Edward Philips MacLeod and Mabel Maude Hayward MacLeod. During her childhood, her family moved to the United States, and she attended public schools in Weymouth, Massachusetts. She then attended the School of Practical Art in Boston (now the Art Institute of Boston).

MacLeod began her professional career in advertising in 1952, working for N. H. Miller in Boston, where she remained until 1982. She worked as copy chief and eventually became a vice president in the firm. While working in Boston, MacLeod resided on Beacon Hill and later in Sudbury, a small town west of Boston. There, she was a member and officer of the Sudbury Garden Club. After leaving N. H. Miller, MacLeod moved to Maine.

By the age of ten, MacLeod had decided that she would write mysteries for young readers because she could not find enough of them to read. MacLeod first began publishing fiction and articles in popular maga-

zines in the 1960's. Her early fiction was written primarily for teenagers, and many of these works are mysteries. One of her juvenile mysteries, *We Dare Not Go A-Hunting*, published in 1980, was nominated for an Edgar Allan Poe Award by the Mystery Writers of America.

MacLeod began writing her better-known mystery fiction for adult readers in the late 1970's and quickly attracted a reading audience that enjoyed her "witty and literate" style. In addition to writing, she did illustrations and paintings. MacLeod died on January 14, 2005, at the age of eighty-two in Lewiston, Maine.

ANALYSIS

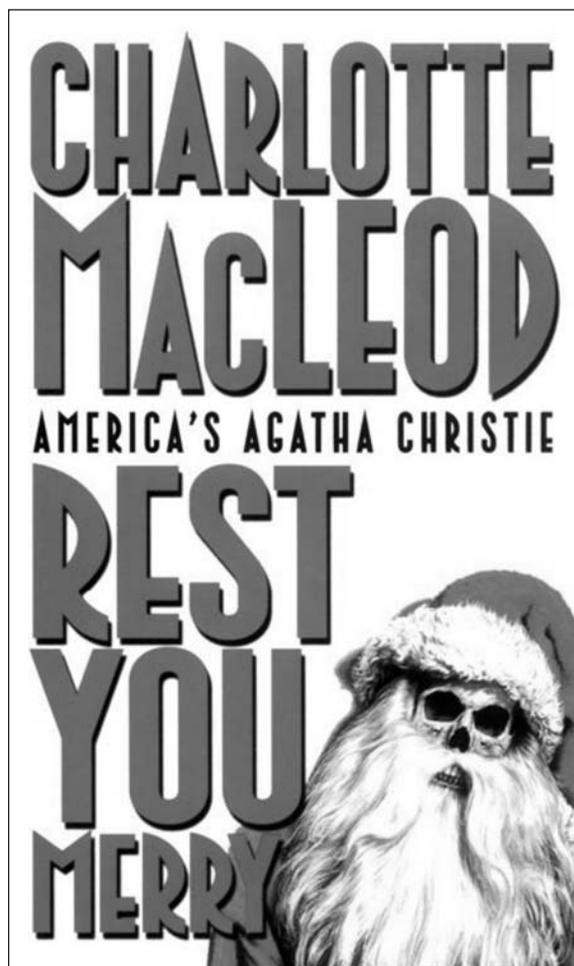

About her own mystery fiction, Charlotte MacLeod commented, "My murders are simple, old-fashioned affairs using weapons that might be found in any well-appointed home: plant poisons, quicklime, contaminated food, bed pillows." Most of the crime and detection in MacLeod's novels occurs in the domestic scene. Her approach to the domestic life is marked by humor and satire; while a few of her novels reflect the dark side of life in a community, most focus on amusing incidents and social relationships that are temporarily disrupted by murder. In her novels, the perpetrators are often obvious and the solutions at times implausible, but these are not the central elements in her work. MacLeod presented comedies of manners in which verbal wit and social foibles and faux pas often take center stage. Her writing supports the structure of the comedy of manners by relying on marriage as a means of reestablishing stability in the community. MacLeod used each series to allow character development: The personalities of continuing characters evolved as new novels appeared. Thus, the characters were not fixed at the time of their first appearances, and in the course of each series, many characters changed from being types to becoming rounded and interesting figures. While developing the personalities of her continuing characters, MacLeod also allowed the identities of the particular community in each series to emerge, revealing local folklore, customs, and values that influence the crimes and the solutions.

Mystery fiction is often regarded as a literature of reassurance and conformity, and this is the case for

MacLeod's writings. In her various series, MacLeod established secure relationships for her sleuths and returned communities to a sense of well-being at the end of each mystery. She provided few gory details, and though suspense was created through the use of the unknown, it did not culminate in moments of violence. MacLeod's use of the domestic and her humorous touches in each series contributed to the positive outlook on the world that her mysteries convey. For the fictional worlds that MacLeod created, murder is merely a momentary diversion in the development of social relationships and the satirizing of those who cannot laugh at their own foibles.

REST YOU MERRY

MacLeod's first series, featuring Peter Shandy as an amateur sleuth, began with *Rest You Merry* (1978).

Reflecting traits that suggest Laurence Sterne's Tristram Shandy, Peter Shandy enjoys puns and plays on words, collects literary obscurities, and displays a few "Shandyisms" of his own, including his proclivity for counting everything he sees and beginning statements with "M'yes." Peter serves as a moral center for his community at Balaclava Agricultural College, a fictional institution in western Massachusetts, though he sometimes overestimates the self-serving motives behind other people's actions. In his first appearance, he is a staunch bachelor, but when the librarian Helen Marsh arrives on the campus to catalog the library's Buggins collection, she brings an end to his bachelor days and works with him to solve two murders that have marred Balaclava's Christmas extravaganza of holiday lighting and winter sport. Under Helen's influence, Peter becomes less priggish and allows more of his sense of humor to show. By the novel's end, the couple are involved in a budding romance.

THE CORPSE IN OOZAK'S POND

By the time Peter and Helen appear together in *The Corpse in Oozak's Pond*, they have settled into a comfortable marriage and often work together to solve cases, using Helen's research skills and knowledge of the Balaclava Buggins collection to turn up clues related to the town's and the college's past. The efficiency of their household and the details of their domestic life serve as a means of contrasting the chaos and disintegration that mark the home life of many criminals and their victims.

While developing the character of Peter Shandy in this series, MacLeod also defines the town-and-gown world of Balaclava College. She draws heavily on humor to present the sources of conflict found in academic life—the struggle for funding, the need for grants, the prima donna personalities of some faculty members, and the unbelievable eccentricities of others, including the school's president, Viking-like Thorkjeld Svenson and his equally imposing wife, Sieglinde. MacLeod's work reveals a realistic appreciation for the less-than-idyllic nature of college life and for the tensions that exist between a college and its host community.

To convey continuity and development in her setting, MacLeod includes information about new mem-

bers of the faculty and new residents in town. When Professor Joad joins the chemistry department and moves onto the Crescent, where almost all college faculty live, Peter consults him on a case and makes him part of the investigating team. MacLeod also allows characters to provide background information on the town's past, as Grace Porbles does in *The Corpse in Oozak's Pond*, recalling incidents and details from her childhood. This sense of change and growth in the community is accompanied by the development of minor characters, the best example of which is Police Chief Fred Ottermole. In the first few books in the series, Ottermole is a flat character whose principal function is to serve as a foil for Peter; as the series continues, however, Ottermole gradually becomes more perceptive and more likable, with his own particular quirks and mannerisms. The presence of a community that provides a context for the mysteries but does not remain a fixed and static place has helped to make this series a favorite among reviewers of MacLeod's work.

THE FAMILY VAULT

In her second series, MacLeod follows a method similar to that in the Shandy series, though the setting and the types of characters are markedly different. MacLeod again focuses on domestic activity and social relationships as the substance of the Sarah Kelling and Max Bittersohn series and creates a continuing community made up of Sarah's family, her boardinghouse tenants, and Max's family. Not all the books in this series, however, reflect MacLeod's usual humor and lightness. With its implications of human cruelty and deception, the first book, *The Family Vault* (1979), is a much darker novel than any in the Shandy series. There is little laughter in Sarah Kelling's life, other than that evoked by wry observations and black humor regarding the family's morbid enjoyment of funerals. In this novel, Sarah is married to a fifth cousin, Alexander, a man a generation older than she is, who treats her "like his child instead of his wife." Their relationship is further hampered by Alexander's mother, Caroline, a cruel and vindictive woman whose dark secrets have brought the once-wealthy family to the brink of financial collapse. Much of this first book focuses on the signs of disintegration apparent in the Kellings' domestic life as Sarah makes do for meals and enter-

taining, uses worn-out linens and clothing, and finds plaster falling on her while she bathes. The only bright moment in the course of the novel comes with the appearance of Max Bittersohn at a dinner party; Sarah finds herself attracted to him in part because he treats her like a human being and an adult. They work together to solve the mystery of an old murder that has present-day consequences, but Sarah is still held within the bonds of her marriage and her family ties. Her release from this entrapment comes with the death of her husband and mother-in-law in a car accident, and with her new independence, Sarah begins to develop her own character.

The Kelling and Bittersohn novels feature two communities: Beacon Hill and the North Shore (north of Boston), especially Ireson's Landing, where the Kellings own summer estates and members of Max's family run businesses. In this series, family members who have minor roles in early novels, including Sarah's uncles Dolph and Jem and her cousin Brooks, later become central figures within particular mystery cases. All these cases revolve around Boston's upper-class society and the world of art, making use of Sarah's knowledge of society and Max's expertise in the area of art fraud and theft. In this series, the satire is directed toward the upper class, poking fun at their foibles, their snobbishness, their traditions, and the silliness of their preppy nicknames—such as Miffy, Biff, and Lassie. Even activities and props become a part of this continuing community, as Dolph's recycling center, which is first mentioned in *The Withdrawing Room* (1980), becomes a focal point in *The Recycled Citizen* (1987) and the George Romney portrait of a Kelling ancestor mentioned in *The Palace Guard* (1981) becomes central to *The Plain Old Man* (1985). Family members also provide love-interest subplots for a number of the mysteries, and Sarah often succeeds in matchmaking for many of them.

THE BILBAO LOOKING GLASS

The novels that continue this series reveal both the changes in Sarah's character, first as she must struggle to make her own way in the world and then in the development of her relationship with Max, who becomes a tenant in her brownstone boardinghouse on Beacon Hill. While allowing the introduction of a wider range

of characters and social classes, the boardinghouse also presents an opportunity for MacLeod to expand Sarah's personality and her abilities as an amateur sleuth, though this is slow to happen. As Sarah gains experience being around people who come from different backgrounds, she becomes more self-reliant and finds that she is able to stand up to her family and assert her own views. When she appears in *The Bilbao Looking Glass* (1983), the fourth book in the series, Sarah realizes that she is not "little Sarah" anymore, and she finds that with an adult perspective on life there is more room for humor.

The growth in Sarah's character is facilitated by her relationship with Max Bittersohn, which quickly evolves into one of the love interests in the series. Max's Jewish middle-class background and strong family ties to the North Shore are gradually revealed through the first four novels in the series. Max functions as a "one-man detective agency" and enjoys a freedom of movement based on his class status and his expertise in the field of art fraud. Sarah is sometimes envious that Max is accepted in places where she is not, and she must painfully confront the issue of anti-Semitism among her own family and associates when she announces her engagement to Max in *The Bilbao Looking Glass*. Though obstacles appear, Max and Sarah do marry, again establishing the pattern of stability and domestic order that has become a mainstay in MacLeod's fiction. The two books that follow their marriage reflect little character development and are hampered by a thinness of plot, but at the end of *The Recycled Citizen*, Max and Sarah have their first child, suggesting that their roles will continue to change.

THE BALLOON MAN

The Balloon Man (1998) was the last of the Kelling and Bittersohn novels to be published. In it, Sarah and Max's son, Davy, is three years old and has become the central focus of their lives. The couple has recently moved into a new house that replaces the memory-laden Kelling home at Ireson's Landing. Once again, themes of Sarah's unhappy past ride in tension with the joyous and supportive network of family and friends that now surrounds her. The action involves stolen gems (part of the old Kelling estate), two kidnappings, and the aid of Sarah's eccentric uncle

Jem and his butler. It also involves many passages in which Sarah reminisces about her first marriage, marking a sort of transition in which she is finally able to put her first husband's ghost to rest.

JANET WADMAN AND MADOC RHYS SERIES

Writing as Alisa Craig, MacLeod set two of her series in Canada. The first, featuring Janet (pronounced "JEN-net") Wadman and Madoc Rhys, takes place in New Brunswick, with two of the books set in and around Janet's hometown of Pitcherville. Here, as in her other series, MacLeod takes as many pains to establish the identity of the community as of her characters. Many of the aspects of life in Pitcherville are revealed through the thoughts and insights of Janet Wadman, the amateur sleuth who suspects murder when an elderly neighbor dies of food poisoning in the opening novel of the series, *A Pint of Murder* (1980). Janet draws on her knowledge of country life and customs to analyze the events that occur, and her knowledge of family histories proves helpful to Madoc Rhys of the Royal Canadian Mounted Police when he appears to conduct the official investigation. MacLeod uses the character of Rhys to undercut the stereotyped image of the Mounties, as Madoc looks less like "Renfrew of the Mounted" than he does "an unemployed plumber's helper" in his rumpled clothes and baggy pants. The relationship that develops between Janet and Madoc is important for its reinforcement of middle-class values. In *Murder Goes Mummifying* (1981), the habits and behaviors of the wealthy Condrycke family are satirized and at times openly ridiculed, while Janet and Madoc agree that they will live "mostly . . . on [his] weekly pay packet." Their marriage and lifestyle develop further in *A Dismal Thing to Do* (1986), which also presents a less straitlaced Janet whose self-reliance and powers of observation support Madoc's investigation of bootlegging and possible espionage.

GRUB-AND-STAKERS SERIES

The other Canadian series focuses on the Grub-and-Stake Gardening and Roving Club of Lobelia Falls, Ontario, and its most active member, Dittany Henbit. Like MacLeod's other series, this series presents a domestic relationship at its center as Dittany marries Osbert Monk (also known as the author Lex

Laramie). His attitude toward the domestic is used in this novel as a test of worthiness: Osbert says that he loves Dittany's kitchen with its old-fashioned pantry exactly as it is, thus winning Dittany's approval and her heart. Dittany and Osbert assist Sergeant MacVicar in his efforts to solve local crimes, often serving as temporary deputies. This is the lightest of MacLeod's series of mystery novels, and though murder occurs, wordplay and farce rule the stories.

PIERRE MAGNAN

Born: Manosque, France; September 19, 1922

Types of plot: Master sleuth; police procedural; historical

PRINCIPAL SERIES

Inspector Laviolette, 1977-

PRINCIPAL SERIES CHARACTERS

INSPECTOR MODESTE LAVIOLETTE, born in the tiny town of Piégut, spends most of his active career in Digne, one of the main towns of the region, where he has acquired a house from one of the protagonists of the first novel in the series. Laviolette is portly, eats, drinks, and smokes too much, and is resolutely anti-modern, to the point of still rolling his cigarettes. He drives an old Simca Vedette, considers his television set a skylight to a world he does not much care for, and prefers to spend his leisure time reading Proust, drinking good wine, or in the company of full-bodied women. He rarely leaves his beloved Provence; his posting there, which his superiors consider punishment for his refusal to follow standard procedures and for his lack of tact with high-ranking officials, is the result of careful planning on his part. At the age of seventy-five, he returns to his birthplace to get over an unhappy love affair and lives in his old family home.

JUDGE CHABRAND is Laviolette's superior. The French criminal system puts a investigating judge, much like a district attorney, in charge of a murder investigation to supervise the police investigation. Chabrand is a physical contrast to Laviolette: Twenty years younger, he has

the lean, ascetic appearance of a fanatic. An avowed communist who wants to change the world by achieving social justice and by ridding society of its exploitive, mainly bourgeois criminal element. The Provence assignment has been a punitive posting for Chabrand with his leftist views, but he has fallen in love with its people and landscape. At one point in the series, the judge turns down a tempting (though illegal) offer from Laviolette to make him a rich man because it would have forced him to leave Provence. Although the relationship between Chabrand and Laviolette remains outwardly formal (they never use the familiar *tu*), it is clear that behind their sometimes irascible banter there is genuine esteem and even friendship.

CONTRIBUTION

Pierre Magnan's reputation as a writer of detective fiction is based predominantly on the literary qualities of his crime novels rather than the ingenuity of his plots or the machismo or the eccentricity of his protagonists. He is above all a Provençal author, in the tradition of Henri Bosco, Marcel Pagnol, and particularly his friend and mentor, Jean Giono. Magnan turned to detective fiction only to support himself at a time when he was unemployed and unable to sell his more traditional regionalist novels. He set out to create a synthesis between his historical-regional fiction and the more lucrative detective novel. Because Magnan's Laviolette novels incorporate features of all the subgenres of crime fiction, it makes it difficult to assign his work to any single subgenre.

The law enforcement positions of Laviolette and Chabrand and the use of scientific police apparatus (though often maligned) makes the novels police procedurals. However, the superior acumen and the eccentricity of both Laviolette and Chabrand suggest the orthodox detective novel. In addition, the abundant descriptions of sex and violence, combined with Oedipal motifs; the frequent empathy with the perpetrators of the crimes; and the subliminal leftist political messages evoke the French roman noir and film noir of the post-World War II years. Laviolette thus is a earthier, darker, and less domesticated Inspector Maigret figure.

Magnan's national and international reputation has grown dramatically in the last ten years; his novels have been translated into several languages, including English, and several novels in the Laviolette series have been adapted for film and television. His sales, after the publication of *La Maison assassinée* (1984; *The Murdered House*, 1999), have skyrocketed, and his work is beginning to receive critical acclaim. Many critics complain that his plots are either too convoluted or too obvious and that his novels are fairly long and require considerable effort to read because they deviate from the mystery and dwell on matters of mood, physical descriptions, and the landscape.

Magnan considers such criticism high praise. The Provençal landscape, more than Inspector Laviolette, is his main protagonist, shaping and forming his characters. Most of the crimes can be solved only by an intricate remembering of things past as they are motivated by century-old family feuds and atavistic urges. Magnan's Laviolette series is great detective fiction and superb Provençal regional fiction that would have made Jean Giono proud of his protégé.

BIOGRAPHY

Pierre Magnan was born in the small Provençal town of Manosque on September 19, 1922, and went to school there until the age of twelve, when he concluded his formal education. He worked as an apprentice typesetter, then joined the voluntary youth labor service, which substituted for the draft in occupied France. In 1937, at the age of fifteen, he became a member of the famous Contadour group around Jean

Giono, who became Magnan's friend and teacher, loaning him books from his library and encouraging him to write. Magnan writes about this period in his autobiographical novels *Apprenti: memoires* (2003; memoirs of an apprentice), and *Un Monstre sacré* (2004; a sacred monster). He wrote his first novel, *Périple d'un cachalot* (the voyage of a sperm whale) in 1938, on lined notebooks given to him by Giono, though it was not published until 1993. In 1942, to avoid the compulsory National Labor Service that would have made him perform forced labor in Germany, he joined a group of the French Resistance in the Isère region.

Magnan's first novel, *L'Aube insolite* (1945; strange dawn) draws on his experiences in the Maquis and was published to critical acclaim, but it and his two subsequent novels did not sell enough copies to allow him to live as a writer; therefore he worked for a refrigerated trucking company for the next twenty-seven years, until he was laid off because of an economic downturn. Suddenly unemployed and without prospects, as he describes in his novel *L'Homme rejeté* (1979; the rejected man), he was told by several editors that his novels were too old-fashioned in the era of the nouveau roman. He decided to write a detective novel because in that popular genre a beginning, a middle, and an end were still required, and he embarked on a new career at the age of fifty-five.

Magnan's first attempt at detective fiction, *Le Sang des Atrides* (1977; the blood of the Atrides), won the prestigious Prix du Quai des Orfèvres and sold one hundred thousand copies. However, the next three Laviolette novels did not sell nearly as well, and when he submitted *The Murdered House* to his publisher, Fayard, it was refused because of his previous poor sales. When the novel was finally picked up by Denoël, it became an instant best seller and has sold more than five hundred thousand copies.

Magnan's new fame led to bigger sales for his subsequent Laviolette novels and allowed him to turn his attention to autobiographical and regional novels. In 2000, he published the last novel in the series, *Le parme convient à Laviolette* (purple suits Laviolette), in which he kills off his famous character. Despite vociferous protests from his readership, he has not re-

vived his series protagonist, although he appeared to be wavering in a 2005 interview.

ANALYSIS

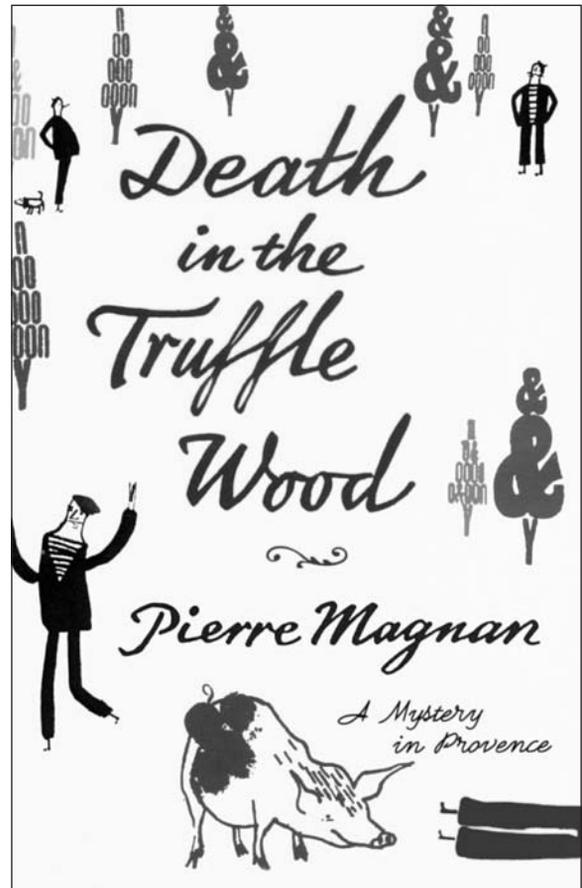

Pierre Magnan turned to genre fiction out of financial necessity, not because he was a fan of detective fiction. However, as an admirer of the great Provençal writers of the previous generation and as a strong opponent of the postmodernist French *nouveau roman*, Magnan found that the detective novel, particularly the more conservative mystery novel, as published in France by the Le Masque editions, permitted him to write highly structured novels whose investigative plots necessitate the unraveling of past events, often connected to family feuds. Magnan's preoccupation with "blood," in the sense of family and heredity, informs most of his plots, and the solution for most of the crimes in his novels can be found in the past, sometimes as far back as one hundred years.

LE SANG DES ATRIDES

Magnan's basic approach is fully developed in the first novel of the Laviolette series, *Le Sang des Atrides*. There is a series of murders, all which have been committed with a pebble propelled by a slingshot. The early victims are young men, but the case complicates itself when an old woman is found dead. An unfinished letter left at the murder scene begins, "My dear little assassin . . .," and Laviolette deduces that a child must be the murderer and that the old woman was killed because she discovered the identity of the perpetrator. Readers should be able to guess the identity of the killer and the motive from the hint given in the title of the novel: The reference is to the House of Atreus, specifically to Orestes and Elektra, who plot to kill both their mother and her lover for having been unfaithful to their father and having murdered him. However, Magnan professes to have been fairly sure that most contemporary readers of detective fiction would not be familiar enough with the House of Atreus to easily solve the puzzle.

DEATH IN THE TRUFFLE WOOD

It is not surprising that *Le Commissaire dans la truffière* (1978; *Death in the Truffle Wood*, 2005) is one of the few Laviolette novels that have been translated into English, as it is his most original and most

tightly constructed novel. One of the main characters is Roseline, a truffle sow who has made the fortune of Alyre Morelon, her owner, and is thus the apple of his eye. Laviolette is called to the small town of Banon to investigate the disappearance of several members of a small hippie community camped just outside the town. Not long after Laviolette's arrival, the body of the first missing hippie shows up in the freezer of a local eatery, drained of all his blood. Roseline's erratic behavior leads Laviolette to an old abandoned chapel, where he finds the rest of the bodies, all having been bled like pigs. One of the bodies, that of a young factory-owner-turned-hippie, appears to be out of place among the rest of the corpses.

The investigation soon begins to focus on a book of ancient magical spells and recipes by the seventeenth century alchemist Albertus Magnus, which has been stolen from the library of Laviolette's old friend, who

is soon found dead with his throat cut. When the inspector finds a copy of the book, he discovers that one of the magical recipes indicates that human blood poured on the trees near truffle beds will stimulate the growth of this expensive plant.

The climactic ending unites all the main characters on a snowy country road and ends with the death of the serial killer. Desperate for money to buy the sexual favors of Alyre's promiscuous wife, the murderer tried to increase his income from his truffle harvest by applying the ancient alchemist's gruesome method. The murderer himself is killed by the sister of the former factory owner, who unsuccessfully tries to cover up her murder of her brother over a business dispute. Laviolette clearly has more sympathy for the poor man driven to kill by his sexual obsession than for the wealthy and greedy female factory owner.

THE MESSENGERS OF DEATH

Written after the upsurge in Magnan's popularity due to the publication of *The Murdered House*, *Les Courriers de la mort* (1986; *The Messengers of Death*, 2006) is the author's masterpiece of detective fiction. Lured out of retirement by Judge Chabrand, Laviolette investigates a series of murders that have their origin and motive in a family dispute dating back to 1860. The novel describes the meager living Provençal farmers have had to scratch from their small, rocky properties for hundreds of years and the resulting custom, not supported by law, that forces all but the eldest son to leave home at the death of the father, often reinforced by the shotgun of the inheritor.

As always, Laviolette's sympathies lie with the wretched criminals rather than with the affluent victims. The sparse house of the ascetic killer, who single-mindedly tries to right a wrong committed on his great-grandfather and will stop at nothing to find the treasure one of the villains cleverly hid, is contrasted favorably with the sumptuous and sexually depraved lifestyle of his victims, which finds its climax during a bacchanalian orgy in a derelict castle in the mountains. Once more Magnan interweaves motifs of heredity, social justice, atavistic urges, folk superstition, and Freudian themes into a rich canvas of rural Provençal life.

BARRY MAITLAND

Born: Paisley, Scotland; date unknown

Type of plot: Police procedural

PRINCIPAL SERIES

David Brock and Kathy Kolla, 1994-

PRINCIPAL SERIES CHARACTERS

DAVID BROCK, head of Scotland's Yard's Serious Crimes Branch, is a large, bearded, and aging detective, legendary among the Metropolitan Police of London for his ability to solve baffling murders. Little is revealed about his past, except that he is long since divorced and has a son in America whom he has not seen in years. He is urbane, articulate, cultured, an effective leader, and highly sensitive to the psychological needs of his subordinates. He has repeatedly refused promotion, disdaining administrative work.

KATHY KOLLA is the rising star on Brock's Serious Crimes team. She is a young, single, brilliantly intuitive, and ambitious detective sergeant. Embittered by memories of her father's suicide, she is obsessive about her work. Although there is little conflict between her and Brock, she often strikes out on her own initiative, a trait that gets results but also frequently places her life in peril.

CONTRIBUTION

Barry Maitland began publishing only after a successful career as an architect and academic in both England and Australia. Even in his earliest novels he dis-

plays a mature insight into character and motivation that is rare in crime fiction. His background has also enabled him to incorporate into his fiction a breadth of learning in a number of fields, especially art, architecture, and urban history. Although Maitland's novels have been commercially successful and critically well received, they have not as yet achieved the reputation that they merit. Like the works of the British master of the police procedural, P. D. James, Maitland's novels are intricately plotted, thematically sophisticated, and symbolically suggestive.

Maitland's chief contribution to the police procedural is his imaginative and often symbolic depiction of crime settings. Broadly speaking, all of his fictions are set within the city of London or its suburban environs. Having spent many years growing up in the city, Maitland is intimately aware of its many layers of history but is also acutely aware of the changes that successive waves of immigration and social change have brought. This awareness is deftly woven into the fabric of all his novels.

BIOGRAPHY

Barry Maitland was born in Paisley, Scotland, and raised in London. He studied architecture at Cambridge University, graduating in 1966, and worked as an architect in the United Kingdom for a number of years before attending the University of Sheffield, where he earned a doctorate in urban design. In 1984 he accepted a position as dean of the School of Architecture at the

University of Newcastle, in New South Wales, Australia, where he remained until 2000. He became a full-time writer settled in the Hunter Valley region of south-eastern Australia, two hours north of Sydney.

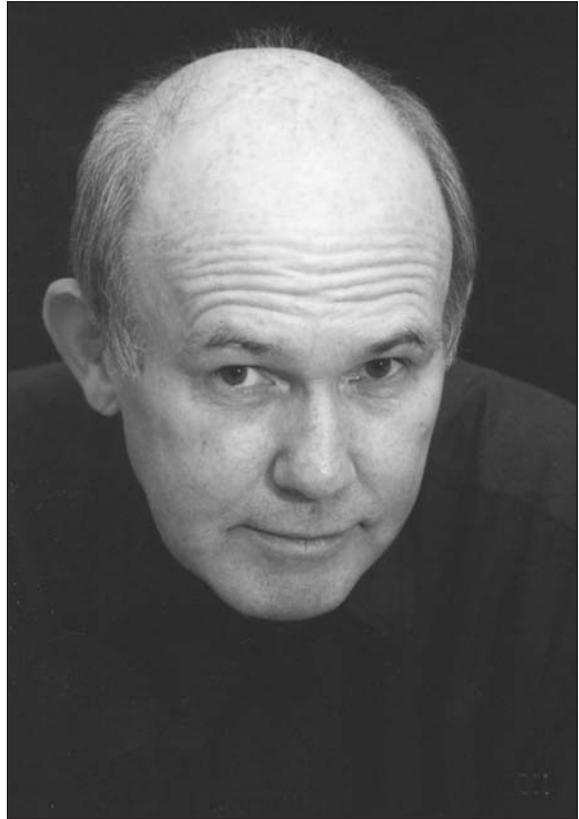

Maitland's first novel, *The Marx Sisters* (1994), was short-listed for the John Creasey New Blood Dagger award by the British Crime Writers' Association. *The Marx Sisters*, which was translated into several languages, also established the series characters, David Brock and Kathy Kolla, who would become the mainstay of Maitland's subsequent crime fiction. Maitland's second novel, *The Malcontenta* (1995), was awarded the New Kelly Award for best crime-fiction novel by an Australian author.

Before his 1994 debut, Maitland had already published several academic works on architecture and design. One of these, *Shopping Malls: Planning and Design* (1985), is a study of how shopping malls have evolved, architecturally, out of more traditional urban retail spaces and how they might become more amenable to a broader range of human social uses.

ANALYSIS

As a writer of police procedurals, Barry Maitland is no iconoclast. He works within the classical limitations of the genre. David Brock and Kathy Kolla are both brilliant but fallible and, thus, are realistic practitioners of police detection. Maitland's realism is also evident in his depiction of how the modern police detective is dependent on teams of forensic, medical, ballistics, and computer specialists. The methodical and painstaking gathering of evidence is always given its due in these novels, yet Maitland never allows his stories to become bogged down in scientific or technical detail.

In the police procedural's most commonly employed plot structure, a murder is committed in an early chapter, investigators are called to the scene of the crime, and the ensuing investigation leading to a solution constitutes the whole of the story's plot. Thus far in his career, Maitland has relied exclusively on this classic structure. Its chief advantage is that, at each step of the way, the readers know no more than do the investigators and must piece together the evidence, sort through the clues, and eliminate false trails without any prior knowledge of the relationships be-

Barry Maitland. (Howard Johnson/Courtesy, Allen & Unwin)

tween victims and perpetrators. Although Maitland's plots are not in this respect innovative, they are nonetheless distinguished by their multilayered intricacy. For example, in *All My Enemies* (1996), Brock's team investigates a murder that appears to be tied to a number of previously unsolved killings of young women. Although the main line of investigation focuses on a middle-aged amateur photographer who is believed to stalk his victims on the London subways, Kolla pursues a much less promising trail that leads to her involvement in a London theater company. What begins as a subplot ends by absorbing the primary plot in a final solution that is at once elegant and shocking.

One of the weaknesses of crime fiction as a genre, and especially of the police procedural, is that it traditionally allows little room for development of character, which is generally dominated by the exigencies of plot. Maitland addresses this weakness, first of all, in a manner typical of modern police procedurals. He al-

lows conflict to develop between his detectives' personal lives and their police careers. Given the psychological demands of the crime investigator's job, the long hours, and the brutal realm in which he or she must operate, it is almost inevitable that familial or romantic relationships will be difficult to maintain. Maitland is adept at weaving such conflicts into his novels, especially in his exploration of Kolla's troubled family history and her repeatedly unsuccessful attempts to establish stable relationships. However, Maitland is also aware that the development of his detectives as fully three-dimensional characters must remain subordinate to the demands of plot. Unlike many other modern writers of crime fiction, he does not allow the personal conflicts of his detectives to lapse into melodrama or to deflate the suspense that a satisfying work of crime fiction demands. As for Maitland's perpetrators and suspects, they are almost never mere psychological "types," but complex and realistically motivated characters.

Maitland's greatest strength, however, is his ability consistently to place his characters in settings of striking originality. This feature of Maitland's writing is already evident in the first novel, *The Marx Sisters*, in which an all but forgotten street in the heart of London, virtually unchanged since the nineteenth century, is threatened by modern development. Equally impressive in this regard are several of the later novels, including *Silvermeadow* (2000), in which a glittering new suburban shopping mall becomes not only a setting for murder but also a symbolic device for reflection on the alienated social conditions of modern consumerism; *The Verge Practice* (2003), in which the ultramodern corporate headquarters of an architectural firm becomes symbolically resonant of its founder's egomania; and *No Trace* (2004), in which an urban colony of postmodern artists becomes a staging ground for murder masquerading as performance art.

SILVERMEADOW

In *Silvermeadow*, after the horribly crushed and shrink-wrapped body of a teenage girl is found in a trash compactor at an industrial waste disposal site, investigators have reason to believe that the girl was killed at a nearby shopping mall, called Silvermeadow. After Brock and Kolla become involved, the investiga-

tion is temporarily headquartered at Silvermeadow during the height of the Christmas shopping season. Initially, the investigation centers on two suspects who work within the mall because Brock is convinced that the mall's ultramodern security arrangements would have rendered a murder or abduction by an outsider nearly impossible. The investigation is further complicated by the suspicion that at least one other girl's death is connected to the mall.

Although the plotting and characterization in *Silvermeadow* are superbly crafted, the real center of attention is the mall itself. Built on the site of an ancient Anglo-Saxon battle against the Vikings, Silvermeadow is no ordinary mall, but a megamall consisting of nearly three hundred retail outlets, cinemas, a fitness center, and a leisure pool—all spread over a million square feet of climate-controlled space. Among the many entertainments on the mall's grand concourse is an enormous, scaled model of a volcano that erupts on the hour, complete with realistic lava flows. The mall is a gigantic consumption machine designed to maximize profits by creating an all-encompassing fantasy of comfort and security for the consumer. However, Brock's murder investigation must of necessity strip away this illusion and peer behind the facade of security and manufactured Christmas cheer.

The central thematic irony in *Silvermeadow* turns on this discrepancy between the mall's carefree and reassuring appearance and the frightening reality that lurks beneath. As the investigation probes deeper into the mall's history and politics, it becomes an increasingly sinister place. Just as the mall preys parasitically on its unwary customers (and the local communities whose economies it has disrupted), so also a murderer is preying on the flocks of teenage girls for whom the mall is a home away from home. Maitland suggests that the mall stands symbolically for the larger society in which the modern individual, reduced to a passive consumer, is all too easily manipulated by the illusions of advertising and the false promises of comfort, satisfaction, and security. The essential message of the mall is that you, the consumer, may have all that you desire. What is most disturbing about *Silvermeadow* is that among the mall's thousands of shoppers, a murderer, too, has heard the same message.

In *Silvermeadow*, Maitland has clearly drawn heavily on his own architectural expertise in the planning, building, and management of malls. However, none of this technical knowledge is on display merely to impress the reader with the author's learning; all of it is central to the investigation and is revealed in a way that avoids disrupting the narrative with long digressions.

THE VERGE PRACTICE

In *The Verge Practice*, when Brock and Kolla are sent to investigate the murder of the wife of a famous British architect, Charles Verge, the evidence strongly suggests that Verge himself is the killer. However, Verge has mysteriously disappeared and Brock's Scotland Yard superiors would, for political reasons, prefer to see the great architect exonerated. When Sandy Clarke, Verge's business partner, commits suicide and leaves behind a signed "confession" to the murder of Verge's wife, Brock, against his better instincts, is forced to close the investigation. Meanwhile, Kolla undertakes an unofficial line of inquiry that leads her to Barcelona, Spain, where, she suspects, a sinister plastic surgeon may have altered Verge's appearance and aided him in fleeing to South America. Although this proves, in part, to be a false trail, Kolla does uncover a revealing videotape that points toward the eventual solution to the murder.

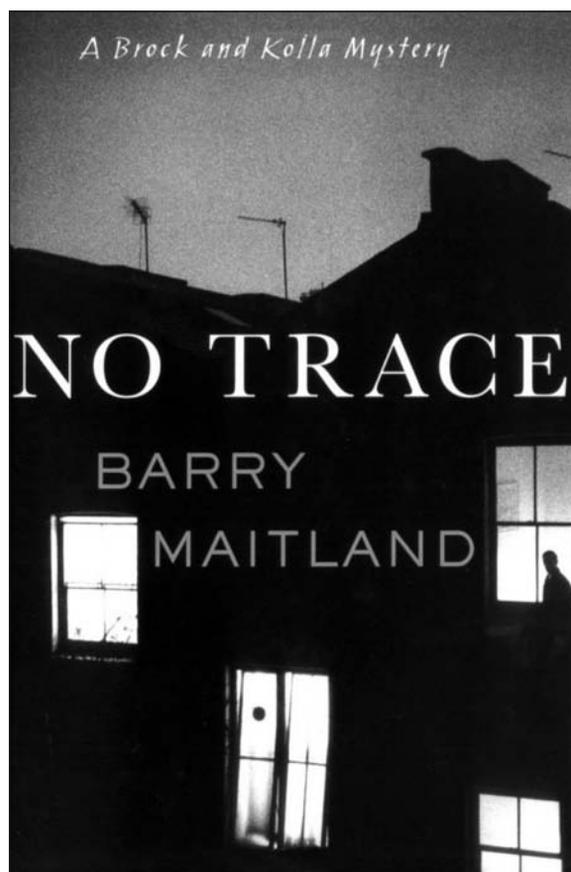

The Verge Practice has been described as Maitland's "architectural novel" with good reason. Many of the novel's most important scenes are placed in architecturally rich settings, both in England and in Spain. Three of Verge's most famous buildings are featured: an award-winning house, built early in his career; the Verge Practice corporate headquarters in London; and a recently completed, state-of-the-art, maximum security prison. All three of these buildings are striking examples of the ultramodern minimalism that has won Verge an international reputation. The novel reflects extensively on the history of modern architecture but never in a merely didactic fashion. Instead, Maitland seems most interested in exploring the underlying psychological connections between the cold and controlling personality of Verge and the minimalist austerity of the buildings he designs. Although the point is never overtly thrust on the reader, it is clear that Maitland is disturbed by the inhumane emphasis

on function over form in these buildings—a trend in modern architecture dating back to the revolutionary work of German architect Mies van der Rohe, whose aesthetics are the model for Verge's own work.

NO TRACE

In *No Trace*, two little girls have gone missing and are feared to be the victims of a serial child rapist and killer when Brock and Kolla are called to the scene of a third abduction, Northcote Square, a purely fictional neighborhood and art colony in east London. Six-year-old Tracey Rudd has disappeared from her home, and the police have reason to believe that she was taken from her ground-floor bedroom in the wee hours of the morning while her father, the famous conceptual artist Gabriel Rudd, slept in another part of the house. Rudd, a widower, is one of several suspects in the case.

Just as Maitland uses a shopping mall setting in *Silvermeadow* to comment indirectly on the social alienation reflected in mall culture, in *No Trace* Mait-

land employs an urban community of artists to make a comment on the morally repellant spectacle of postmodern art, which is here presented as essentially parasitical on the more authentic art of the past. Northcote Square is an old London neighborhood that has been recently colonized by a number of artists, some traditional, but most of them self-consciously postmodern, which is to say that their “art” consists largely of what is known as pastiche, that is, borrowings (sometimes acknowledged, sometimes not) from previous artistic styles and techniques.

Maitland’s novel takes its title from the Rudd exhibition, “No Trace,” mounted in the Pie Factory, a gallery run by Rudd’s tireless promoter and art impresario, Fergus Tait. The exhibition consists of a series of banners, each depicting in cryptic fashion a day in the course of the investigation of the abduction of Rudd’s daughter. Although Maitland is careful to include various points of view regarding the value of the artworks depicted here, there is nonetheless a strong undercurrent of satire suggesting that much of the postmodern art world is not really about art, in the traditional sense, but about the exploitation of a gullible public by cunning, self-promoting artists, their agents and promoters, and a media establishment all too willing to heap publicity on the latest outrageous artistic “statement.”

In certain respects, *No Trace* resembles the American novelist Carol O’Connell’s *Killing Critics* (1997), a brilliant police procedural in which the New York art community is similarly satirized. However, in Maitland’s novel, the satire is subtler and more effectively subordinated to the demands of the plot. In fact, the plot’s final solution turns in large part on Kolla’s ability to decipher Rudd’s artistic borrowings from an obscure eighteenth century painter, Henry Fuseli, particularly the image of a mysterious dark figure leading a small child by the hand into a dark tunnel.

MARGARET MARON

Margaret B. Brown

Born: Greensboro, North Carolina; August 25, year unknown

Types of plot: Amateur sleuth; police procedural; cozy

PRINCIPAL SERIES

Sigrid Harald, 1981-
Deborah Knott, 1992-

PRINCIPAL SERIES CHARACTERS

SIGRID HARALD, a police lieutenant in New York City, is at first essentially a loner, not sharing her personal information or her emotions. As the series continues, she begins to develop close personal relationships and becomes more open in dealing with others. She is somewhat idealistic and remains dedicated to her work. She is efficient and thorough in solving the cases to which she is assigned.

DEBORAH KNOTT is a defense attorney running for election as a judge in the first novel, and in the following novels she is a district court judge in North Carolina. The only daughter in a large family, she becomes involved as an amateur sleuth in most of her cases because they involve relatives or friends in her rural community. The first-person narrator in most of the novels in the series, she gives vivid descriptions of the area, which, like Deborah herself, changes and develops throughout the series.

CONTRIBUTION

Margaret Maron has won the hearts of a vast readership and the continuing praise of critics. Her Deborah Knott series started with *Bootlegger's Daughter* (1992), which won the Edgar, Anthony, Agatha, and Macavity Awards for best novel. To win all four major mystery and detective fiction awards in the United States was an honor that no other writer had accomplished. She has continued to receive awards for many of her works, including an Agatha Award in 2000 for *Storm Track*. Before the Deborah Knott series, Maron was already known for her mystery short stories and her Sigrid

Harald series. She has also published nonseries detective novels and collections of short stories. She is known especially for her sharp creation of characters, her effective use of dialogue and regional dialect, and her insightful depiction of rural North Carolina.

Maron has been a significant influence on other mystery writers. Following her creation of Judge Deborah Knott, several other series featuring a female protagonist and by southern female writers have appeared. They have benefited from Maron's model of an independent professional woman who is competent and likeable. Maron also incorporates important social issues in her works, a trend increasingly followed by other writers.

Maron has been an active leader in promoting the mystery genre. She was a founding member of the Carolina Crime Writers Association, serving on its steering committee (1988-1998); president of the international organization Sisters in Crime (1989-1990); president of the American Crime Writers League (1997-1998); and president of the Mystery Writers of America (MWA) in 2005. She has encouraged other writers and worked to increase the visibility and prestige of the genre.

BIOGRAPHY

Margaret Maron was born Margaret B. Brown in rural North Carolina and grew up on a farm near Raleigh. She is the daughter of C. O. Brown and Claudia Stephenson Brown. She says that from the time she was eleven years old and discovered the poetry of Edna St. Vincent Millay, she wanted to be a writer, but it was many years before she began her professional career. Shortly after high school she moved to the North. In 1959 she dropped out of college to marry Joseph "Joe" J. Maron, an officer in the U.S. Navy whom she had met while working in the Pentagon in Washington, D.C. They lived for a time in Italy, where he was stationed, and then in New York. Her time in Brooklyn later provided the setting for her Sigrid Harald series. They moved back to her family's homeplace in North Carolina. They had a son, John, and al-

though Maron says her life was full, she realized that she needed to start writing if she was ever to fulfill her childhood dream.

Maron's first interest was poetry, but when she began writing seriously and selling her work, she wrote short stories, mostly mysteries, starting with "The Death of Me" in *Alfred Hitchcock's Mystery Magazine* in 1968. She says that short stories seemed to be her natural form, and for twelve years of writing it never occurred to her that she could write novels because she was intimidated by the long form. However, the short-story market was not strong in the late 1970's, and she kept adding to one of her stories until she finally had enough pages to call it a book. Her first novel, *One Coffee With* (1981), introduced Sigrid Harald.

Maron continued to write short stories, most of which were first published in anthologies and later collected in *Shoveling Smoke* (1997) and *Suitable for Hanging* (2004). The story that was to mark the most significant development in her career was first published in *A Woman's Eye* (1991), edited by the well-known detective-fiction author Sara Paretsky. When Paretsky invited Maron to contribute a story to the anthology, Maron has reported that suddenly Deborah Knott strolled into her head and began telling a story. Deborah made her first appearance in "Deborah's Judgment." The next year, 1992, Deborah was the protagonist in the novel *Bootlegger's Daughter*. The Deborah Knott series greatly expanded Maron's readership. Deborah is a fascinating and developing central character, and the series struck a resonating chord with readers in terms of place. The American South was epitomized in the fictional Colleton County, North Carolina. Maron has commented that the mystery form is the framework on which she can hang her concerns for the passing of a culture, the despoliation of a region, and the issues of the time. She has said that if her books have a strong sense of place, she learned it all from the poet Millay.

ANALYSIS

Margaret Maron's Sigrid Harald novels are best read in order of their publication. The reader who starts with a later book in the series does so without the benefit of considerable backstory regarding Sigrid Harald and her motivations for her actions. When Maron began her se-

ries about the New York Police Department (NYPD) homicide detective with *One Coffee With*, she portrayed her as an awkward and painfully shy young woman, inept at dealing with her emotions, thus allowing Maron plenty of room to show her character's personal growth. The solitary Sigrid grows into a more confident woman, who dresses differently, views herself differently, and has a new understanding of her parents' influence in her life. She has a lover as well as friends.

After *One Coffee With*, Maron wrote six more Sigrid Harald novels between 1984 and 1991, then let four years lapse before publishing *Fugitive Colors* (1995). That novel included a tragic accident involving Oscar Nauman, a major character in the series, leaving Sigrid despondent and readers shocked. By that time, Maron had already started her second series. She has said she plans to write at least one additional Sigrid Harald novel.

Although Sigrid is a police officer in a big city, the novels are not typical police procedurals. Maron has referred to her character as a sleuth with a badge, one who has much in common with an amateur detective but who has a legitimate reason for being involved in solving a murder case. The emphasis in Maron's novels is on character development, mood, and setting rather than on the investigative process followed by the police in identifying and finding the murderer, and the presentation of the solution to the crime is like that in classically plotted puzzle mysteries.

ONE COFFEE WITH

The primary setting of *One Coffee With* is the campus of the fictional Vanderlyn College in the middle of New York City, specifically in the art department. The cramped departmental office always has people coming and going. One morning someone has put a spoonful of poison in Professor Ripley Quinn's coffee, killing him. Lieutenant Sigrid Harald, the only female homicide detective in the precinct, interviews faculty and staff and learns that Professor Quinn and Professor Oscar Nauman, the department chair, both used sugar in their coffee. Their cups were placed next to each other, so the intended victim is not clear. Almost certainly the perpetrator was someone involved with the department. The puzzle is which of the limited suspects, all of whom potentially had motive, means, and

opportunity, actually committed the murder. Sigrid must use her insights into the psychology of those involved and deduce which clues are relevant.

THE DEBORAH KNOTT SERIES

Maron's style throughout the Deborah Knott series is much more relaxed than in her Sigrid Harald series. The language is colloquial, the emphasis on place more dominant, and the main character easy for most readers to identify with and enjoy. The murder mystery plot is less dominant than the depiction of the lives of those living through changing times in the South.

Judge Deborah Knott frames the Old South through the eyes of a modern career woman. The series traces southern family relationships, traditions, and social attitudes, repeatedly demonstrating the inseparability of language, geography, and history in creating cultural norms. Like Maron, Deborah grew up on a farm in North Carolina, left for the North for several years, and then returned to her homeland and family ties. A persistent theme throughout the series is Deborah's search for autonomy and for a way to promote her own sense of justice in an area still entrenched in patriarchal control and its own long-standing brand of justice.

Judge Knott's official cases range from the more serious to the hilarious. They form a recurring backdrop in the novels to establish her as a good judge of character, fair-minded, and lenient when possible, but harsh on such matters as spousal abuse or violence against others. The courtroom is also the place where the two Souths meet, the black and the white, and Maron uses it to show the continuing problems that result from a long-standing white supremacist, patriarchal culture. Even more, however, the view that Maron presents of the South is shown through Deborah's everyday life and the murder cases she becomes unofficially involved with throughout the series.

Deborah is the youngest in a big family, the only girl, with eleven older brothers. Her widowed father, Keezie Knott, is traditional in his view of himself as patriarch of the family, and her brothers, although they differ in degree, for the most part assume a similar superior-because-male attitude and in general think they can tell Deborah what to do. This becomes less pronounced as the series continues, both because Deborah insists on doing things her way and because of

changing social attitudes toward women. Most of the brothers still live in Colleton County with their wives and children, and a sizeable network of relatives lives in the community. Deborah can rattle off the precise genealogy of her family with the fluency of the traditional southern belle. Maron eventually decided to provide a diagram of the family tree, which changes when new characters appear, at the beginning of the novels.

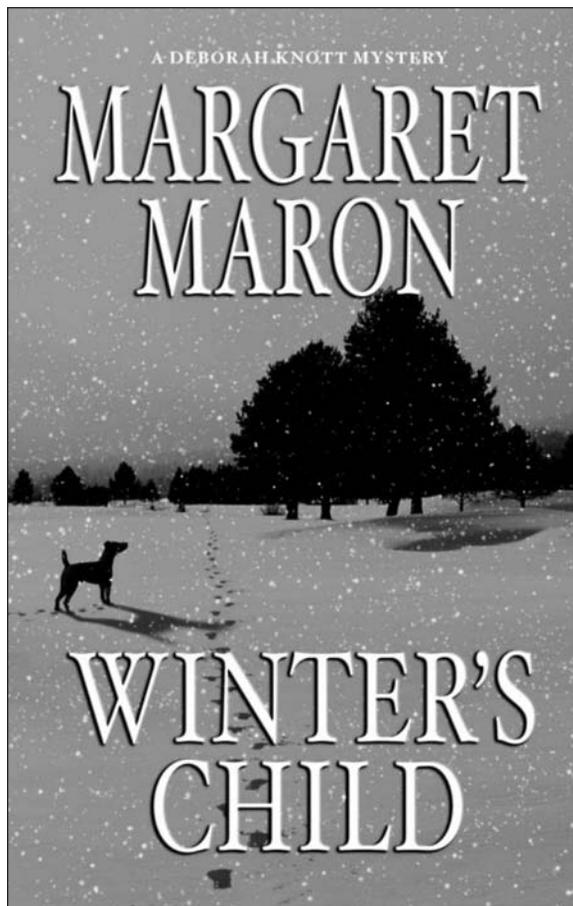

Deborah's extended family and community are a microcosm of the larger society with its racial and gender stereotypes and class attitudes that remain mainstream images of the American South. However, that image is being altered, as population changes force the intersection of the Old South's past with its high-tech nonagrarian future. The new South, with its advantages and problems, becomes more evident during the course of the series.

BOOTLEGGERS DAUGHTER

Maron's most highly acclaimed novel, *Bootlegger's Daughter*, establishes Deborah Knott's stance on the always problematic relationship between means and ends when it comes to politics. She is running for the office of district judge. If she wins, she will be the first woman to do so. Her campaigning is disrupted when Gayle Whitehead, whom Deborah has known all her life, begs her to investigate the murder of infant Gayle's mother eighteen years earlier. Deborah reluctantly agrees to try. Things escalate dramatically as she investigates, and two people are murdered. Just before election day, Deborah has not only solved the murder of Gayle's mother but also has been in a gunfight, saved Gayle's life, exposed the outcome of prejudice against homosexuals, identified the killer of the two people murdered during her investigation, and identified the culprit in another past murder. The newspapers do not get the story right in time, and Deborah loses the election. However, a judge has had a heart attack, and the governor will appoint someone to finish his term. In a complicated ending, Deborah's "daddy," Keezie, the former bootlegger, helps Deborah get appointed, even though he considers a judge's job to be inappropriate work for a woman.

WINTER'S CHILD

In this twelfth novel in the series, *Winter's Child* (2006), Deborah, whose wedding to Deputy Sheriff Dwight Bryant was the highlight ending of the previ-

ous novel, *The Rituals of the Season* (2005), becomes embroiled in a case involving her own new family. Her husband's eight-year-old son, Cal, is living with his mother in another town. Just as Dwight is starting to investigate a local murder, Cal anxiously calls to remind his father that he promised to talk to his class at school the next morning. Dwight reluctantly goes but soon realizes Cal's situation is serious: His mother has not been home for the past few days and Cal does not know where she is. Deborah comes to help. Both Dwight and Deborah are emotionally unsettled as they delve into his former wife's personal life for clues to her disappearance. As the search expands, Cal too disappears. Both his and Deborah's lives are in danger, and Dwight is being regarded as a suspect. The end of the novel reveals that violence and darkness often lurk beneath surface appearances.

JOHN P. MARQUAND

Born: Wilmington, Delaware; November 10, 1893

Died: Newburyport, Massachusetts; July 16, 1960

Types of plot: Espionage; thriller

PRINCIPAL SERIES

Mr. Moto, 1935-1957

PRINCIPAL SERIES CHARACTER

MR. MOTO, a special agent of the Japanese government, often works against elements inside his own country in the cause of the balance of international power and world harmony. Mr. Moto's distinguishing features are his spectacles and gold teeth. His extremely polite manner and self-effacing demeanor conceal a brilliant mind and a small, judo-trained body ready to attack and defend against any danger.

CONTRIBUTION

John P. Marquand wrote five novels featuring Japanese secret agent Mr. Moto between 1935 and 1942, when World War II forced him to abandon the Japanese figure as a hero. During that time, these novels, first appearing as serials in *The Saturday Evening Post* and *Collier's*, attracted many readers because of their intriguing characters, exotic and mysterious settings, action-filled plots, and polished style. Moto became one of the most popular mystery characters of the 1930's, and Twentieth Century Fox, the same studio that produced the Charlie Chan films based on the Earl Derr Biggers character, made eight films, with Peter

Lorre expertly playing Moto between 1937 and 1939. Although the films sometimes had the same titles as the novels, their plots bore little relationship to the books. Another film was added to the series in 1965, with Henry Silva as the detective. Near the end of his life, Marquand produced one more Moto book. In it, Moto aids an American intelligence agency against Russian spies.

BIOGRAPHY

John Phillips Marquand was born in 1893, a relative of such respected New Englanders as Margaret Fuller and Edward Everett Hale. When his father lost his money in the panic of 1907 and had to resume his work as an engineer, however, Marquand became a poor relation. Although Marquand eventually worked his way to the top of New England society by dint of sheet effort, there was always a taint on his achievement. He attended Harvard University, majored in chemistry, and was graduated in 1915, but he was not selected for any of the important clubs and worked only on *The Harvard Lampoon*. After graduation, he married Christine Sedgwick of the family that edited *The Atlantic Monthly*, began to work as a magazine writer, and spent more than a decade perfecting his craft. Ultimately, he was one of the most skillful and highly paid fiction writers in the United States, but he was looked down on by his associates, who wanted him to write "serious" fiction.

The tension between what Marquand had worked

To view image, please refer to print edition of this title.

John P. Marquand posing with his wife in 1943. (Hulton Archive/Getty Images)

to become and what society expected him to be was reflected in his personal life, which was unsettled. He divorced Christine Sedgwick after the birth of a son, John P. Marquand, Jr., and a daughter, Christine; he married Adelaide Hooker in 1937, had three children with her—Blanch Ferry Marquand, Timothy Fuller Marquand, and Elon Huntington Hooker Marquand—and divorced her in 1958. Marquand's frequently unpleasant relations with women were mirrored in his last, valedictory novel, *Women and Thomas Harrow* (1958). Marquand died at home in his sleep in 1960.

The financial success of Marquand's magazine stories and the Mr. Moto novels freed him to do the kind of writing he had always wanted to try—novels about a

successful man who is nevertheless unhappy because he has had to make too many compromises or because he lives in a new world that he does not understand and that does not appreciate his accomplishments and values. In this vein, Marquand wrote *The Late George Apley* (1937), for which he won the Pulitzer Prize in Fiction, and followed it with other successful social novels—*Wickford Point* (1939), *H. M. Pulham, Esquire* (1941), *B. F.'s Daughter* (1946), *Point of No Return* (1949), *Melville Goodwin, USA* (1951), and *Sincerely, Willis Wayde* (1955)—several of which were made into plays and films.

ANALYSIS

The Mr. Moto series grew out of John P. Marquand's travels to Asia as a result of his connection with *The Saturday Evening Post*, which wanted to broaden the experience of one of its most successful writers. Marquand was fascinated by Asia, particularly China, and used that part of the world as the backdrop for all but

two of the Moto books—*Think Fast, Mr. Moto* (1937) takes place in Hawaii and *Last Laugh, Mr. Moto* (1942) in the Caribbean. All the books in the series follow an easily recognized formula except for the last, *Stopover: Tokyo* (1957), which appeared fifteen years after *Last Laugh, Mr. Moto*, the last of the original series of five books.

In a pattern obviously derived from Joseph Conrad's *Lord Jim* (1900) and also suggested by elements of Marquand's own life, the central figure of each book is a thirtyish American whose career has been compromised by shady events in his past and who has fled to another part of the world to escape that past. He suffers from low self-esteem and often believes that he

has reached the end of his rope. Through association with another foreigner, often British, often corrupt, the American stumbles into a dangerous situation that threatens his life and that of a young, beautiful, and spirited woman whom he first distrusts but to whom he becomes attracted. With the help of Moto, the man and woman manage to escape the villains. The protagonist also finds that the woman has revived feelings that he thought were dead, and he falls in love with her. He finds, too, that his honor and ability were merely dormant, and he is ready to face life with new resolve.

The change in the main character is central to each novel; Moto is almost a minor character, although he ties together the various plot strands, explains the mystery, and enables the central character to triumph. Moto superficially fits the Japanese stereotype that existed at the time the books were written: He is short, has prominent teeth, wears glasses, and is unfailingly courteous. One of his favorite expressions is “very, very nice.” Nevertheless, Moto can suddenly turn violent; he is an expert in judo, and on several occasions he cold-bloodedly murders unarmed opponents—for example, at the conclusion of *Thank You, Mr. Moto* (1936), often considered the best of the series.

NO HERO AND MR. MOTO IS SO SORRY

Yet Moto is not a slavish devotee of Japanese imperialism. In *No Hero* (1935), he announces that he serves the emperor and is opposed to the more militaristic and aggressive elements that dominate the Japanese army, the elements that want to expand into China and thereby challenge the West. Moto is more representative of the Asian concept of feng shui, or balance, of which Marquand learned in China. Moto helps the main character, K. C. Lee, an aviator who has a drinking problem, to destroy a formula that would have halved the oil consumption of warships and thereby doubled their cruising radius. Because no country gets the formula, balance is maintained. In *Mr. Moto Is So Sorry* (1938), Moto is working to prevent further Japanese military adventures in Mongolia; the Japanese are using a base in Manchuria, which Japan has already seized from China.

Moto was educated in the United States and has a good understanding of Western ways; the Western be-

lief that all Asians look alike aids him in his penchant for disguise, although his one failing is that his attempts to dress like a Westerner only make him look garish and therefore highly conspicuous. Unfortunately, “Moto” cannot really be a name in Japanese; it is only a suffix like the English “-son,” a fact that Marquand discovered only after he began the series and which he notes in the last novel.

The unusual settings of the Moto books contributed much to their success: Moto foils a scheme that launders money for Chinese warlords at a crumbling gambling house near Honolulu in *Think Fast, Mr. Moto*; beautiful Peking rooms full of art treasures figure in *Thank You, Mr. Moto*; a village in the deserts of Mongolia is the final destination in *No Hero*; and in *Mr. Moto Is So Sorry*, the Japanese agent and other spies range over Japan, Korea, and northern China, finally flying to a town in Manchuria in search of a message concealed in the inlaid pattern of a cigarette case.

Hungarian-born actor Peter Lorre as John P. Marquand's Japanese detective, Mr. Moto.

LAST LAUGH, MR. MOTO

Although Moto's activities were rather surprisingly favorable to the American viewpoint, by World War II, Marquand could no longer ignore political realities. In *Last Laugh, Mr. Moto*, which appeared after Pearl Harbor, Moto and a German agent fight to obtain a bombsight from a French plane abandoned on a Caribbean island; this time, the main character, a naval officer whose drunkenness has caused him to leave the American navy, destroys the bombsight and foils the efforts of both agents. Because several elements in this novel are similar to those of the first in the series, *No Hero*, Marquand may have already decided to retire Moto for a time, as the formula was beginning to repeat itself.

STOPOVER: TOKYO

Moto did not reappear until the Cold War, helping Americans defeat Russian agents in Japan in *Stopover: Tokyo*. In this final entry in the series, Marquand varied the formula in a number of ways. The main character, Jack Rhyce, rather than being drawn into the intrigue by accident, is consciously involved in espionage as a member of an American intelligence agency. Much of the drama of the book concerns Rhyce's doubts about his actions and his fear for Ruth Bogart, the woman who works with him and with whom he falls in love. Moto seems even more peripheral to this book, which has a more realistic, sour, tragic ending than the others, reflecting the increasing bitterness and malaise of Marquand's social novels.

The Moto books are not really mysteries but spy thrillers; usually motives and the identities of the villains are clear after only a few chapters. The interest lies in seeing how Moto will extract the other characters from their difficulties. The action generated from these situations and the appeal of their exotic master of ceremonies have continued to attract readers.

Wires, Richard. *John P. Marquand and Mr. Moto: Spy Adventures and Detective Film*. Muncie, Ind.: Ball State University Press, 1990. Focuses on Marquand's detective fiction. Includes filmography and bibliographic references.

NGAIO MARSH

Born: Christchurch, New Zealand; April 23, 1895

Died: Christchurch, New Zealand; February 18, 1982

Types of plot: Police procedural; thriller; cozy

PRINCIPAL SERIES

Roderick Alleyn, 1934-1982

PRINCIPAL SERIES CHARACTER

RODERICK ALLEYN is a superintendent in the Central Intelligence Division. At the outset he is forty-two years old and single, then he marries Agatha Troy Alleyn and has one son, Ricky. Alleyn possesses an ironic wit that often runs to facetiousness. His preciosity is offset by his self-deprecating manner and his natural egalitarianism in a class-conscious society.

CONTRIBUTION

Ngaio Marsh's novels embody many of the traditions of the British Golden Age of detective fiction. Most critics include her among the grand dames: Dorothy L. Sayers, Agatha Christie, and Margery Allingham. She enjoyed a writing career second only to Christie's in longevity and productivity. She is sepa-

rated from her colleagues by her New Zealand background and loyalties, which give her a different, "outsider's," view of the England about which she writes. She transcends many of the familiar limitations of detective fiction as she creates an aristocratic professional police officer who solves crimes committed in theaters, drawing rooms, and the New Zealand wilderness. Marsh writes with a uniquely well-honed ear for dialogue and how it reveals character. Her genius lies in her synthesis of three great traditions: detective fiction, character study, and the novel of manners.

BIOGRAPHY

Edith Ngaio Marsh's life begins, appropriately enough, with a mystery. Though she was born April 23, 1895, in Christchurch, New Zealand, her father listed her natal year as 1899. This act generated confusion about which the author herself remains vague in her autobiography. She describes her father as an absentminded eccentric descended from commercially successful English stock. Her mother, Rose Elizabeth Seager Marsh, was a second-generation New Zealand pioneer. Though never financially comfortable, her parents provided their only child with an excellent sec-

ondary education at St. Margaret's College, where one teacher instilled in her "an abiding passion for the plays and sonnets of Shakespeare." This passion interrupted her subsequent education in art at the University of Canterbury when she was invited to join the Allan Wilkie Company to act in Shakespearean and modern drama. She spent two years learning her chosen craft under Wilkie's tutelage and four more years as a writer, director, and producer of amateur theatricals in New Zealand.

In 1928, Marsh visited friends in England who persuaded her to open a small business in London. The business flourished, as did her writing. Inspired by either Dorothy L. Sayers or Agatha Christie (her memory contradicts itself), she began her first detective novel, which was published as *A Man Lay Dead* in 1934. Shortly thereafter, she returned to New Zealand and remained there through World War II, serving in the Ambulance Corps and writing twelve more mysteries by the end of the war. Perhaps her best among

these books is *Vintage Murder* (1937), which incorporates many of her themes and settings.

After the war Marsh traveled extensively, maintained homes in both London and New Zealand, wrote more mysteries, and directed plays, primarily those of William Shakespeare, for the students of the University of Canterbury. Her contributions were honored by the university in 1962 when the Ngaio Marsh Theatre was opened on the campus. In 1966, the queen declared her a Dame of the British Empire. Other honors include the 1978 Grand Master Award from the Mystery Writers of America and induction into the Detection Club of Great Britain. On February 18, 1982, Dame Ngaio died in her home in Christchurch.

ANALYSIS

In many ways, Ngaio Marsh's mysteries follow the rules of detective fiction as prescribed by S. S. Van Dine in 1928. These rules emphasize the genre's intellectual purity: the puzzle, the clues, and the solution. They insist on fairness for the reader: The author must not indulge himself with hidden clues, professional criminals, spies, or secret cults. No mere trickery should sully the game between the author and the reader. There is an implicit emphasis on the classical dramatic unities of time, place, and action. In *A Man Lay Dead*, her first novel, Marsh adheres to these strictures with spare character and place description, well-planted but subtle clues to the murderer's motives and identity, and a quick solution. On the strength of this novel and the several that followed, one critic referred to her as "the finest writer in England of the pure, classical puzzle whodunit." Yet to insist on her books as "pure" is misleading. By the time she had written three novels, she was challenging some of Van Dine's most sacred tenets—not his doctrine of fairness and logical deduction but his demand for simplicity in all but plot. Her challenge succeeded in cementing her reputation as a novelist without sacrificing her commitment to detective fiction. She so successfully joined the elements of character and tone with the detective yarn that she provides a link between the older traditions of Charles Dickens and Wilkie Collins and the newer writings of Agatha Christie.

A MAN LAY DEAD

In her first six novels, Marsh introduced characters and settings to which she would return with more sophistication later. Her murders nearly always occur in some sort of theater in front of witnesses. Among the witnesses and suspects are her artistic characters, a few mysterious foreigners, the occasional fanatic, and usually one or two pairs of lovers. Their observations are shaped into the solution by Marsh's detective, Roderick Alleyn, of Scotland Yard. It is his character that unites these disparate people and places. Marsh introduces Alleyn through the eyes of Angela North in *A Man Lay Dead*:

Alleyn did not resemble a plain-clothes policeman, she felt sure, nor was he in the romantic manner—white-faced and gimlet-eyed. He looked like one of her Uncle Hubert's friends, the sort they knew would "do" for house-parties.

He is the younger son of a peer, educated at Oxford, courteous, but always somewhat detached. Alleyn's fastidious nature, combined with his facetious wit, confuses those who expect either a foppish amateur or the plodding copper. Marsh aimed at creating a normal man whose personality never cloyed or bored his creator.

Alleyn also possesses a dry, almost peculiar sense of humor about his work. In *Enter a Murderer* (1935), he leaves headquarters remarking "Am I tidy? . . . It looks so bad not to be tidy for an arrest." Earlier, he had described himself as feeling "self-conscious" about asking suspects for fingerprints. Despite Jessica Mann's contention in *Deadlier than the Male: Why Are Respectable English Women So Good at Murder?* (1981) that Alleyn does not change or develop in the thirty-two novels, Marsh gradually introduces different aspects of his personality. In *Artists in Crime* (1938), Alleyn falls in love and is refused, though not absolutely, but in *Death in a White Tie* (1938), he has won the hand of Agatha Troy, a famous painter. By 1953, in *Spinsters in Jeopardy*, the couple has a son, Ricky. Troy and Ricky occasionally embroil Alleyn in mysteries that arise in the course of their careers or lives. Their presence assists Marsh in moving Alleyn into the murder scene. Amateurs might happen on

crime with rather appalling frequency, but a professional police officer must be summoned.

DEATH IN A WHITE TIE

In *Death in a White Tie*, Alleyn's character and pedigree are assured. This novel is pivotal in Marsh's development of character description and social analysis. She quietly opens the drawing-room door onto the secrets, misery, and shallowness of those involved in "the season" in London. Lady Alleyn, the mother of the detective, and Agatha Troy attend the debutante parties, including a memorable one at which a popular older gentleman, Lord Robert, who is known by the improbable nickname "Bunchy" and the Dickensian last name, Gospell, is murdered. Murder is not the worst of it; blackmail, bastardy, adultery, bad debts, and many other ills beset these social darlings. As Bunchy himself ruminates,

he suddenly felt as if an intruder had thrust open all the windows of [his] neat little world and let in a flood of uncompromising light. In this cruel light he saw the people he liked best and they were changed and belittled. . . . This idea seemed abominable to Lord Robert and he felt old and lonely for the first time in his life.

Moments later, Bunchy is murdered. Alleyn, who was his friend, is called in to investigate.

During the investigation Marsh introduces him to some of her favorite types: the "simple soldier-man" who fought the war from the home front, the gauche American lady (whose venality drives her to accept payment for sponsoring an awkward debutante who is part Jewish), the quintessential cad who cheats at cards, and the callow youth rescued from his own obtuseness by his clever girl. These characters begin to emerge from the cardboard restrictions deemed appropriate for classical detective fiction. Marsh adds grace notes of humor, such as General Halcut-Hackett's outburst: "'Some filthy bolshevistic fascist,' shouted the General, having a good deal of difficulty with this strange collection of sibilants. He slightly dislodged his upper plate but impatiently champed it back into position." Marsh's ear for such verbal quirks as well as her eye for color and line truly set her apart from the conventions of detective-fiction characterizations. In praising Agatha Christie for her books, Marsh com-

mented that Christie was at her best in plotting: “Her characters are two-dimensional. . . . To call them silhouettes is not to dispraise them.” Marsh described herself as trying “to write about characters in the round and [being] in danger of letting them take charge.” Although some critics charge that in *Death of a Peer* (1940), the Lamprey family and their peculiarities do overwhelm the mystery, she never loses the struggle with these lively, complicated folk—rather, she enriches the yarn, encouraging her readers to care more fully about who is innocent or guilty.

OVERTURE TO DEATH

In *Overture to Death* (1939), Marsh expands her repertoire of characters by developing a type that will reappear several times throughout her subsequent novels—the iron-willed, often sexually repressed never-married woman. Her two old maids, Eleanor Prentice and Idris Campanula, rival each other for domination of community good works and for the affections of the naïve rector. Eleanor, “thin, colorless . . . disseminated the odor of sanctity.” Her best friend and yet most deadly competitor, Idris, is described as a “large and arrogant spinster with a firm bust, a high-colored complexion, coarse gray hair, and enormous bony hands.” Throughout the novel, the tension between their artificial civility toward each another and their jaw-snapping, claw-sharpening ill will fuels the plot. Idris is the victim of a bizarre and deadly booby trap. She is shot, while playing the piano, by a pistol propped between the pegs where the piano wires were affixed. A loop of string tied around the trigger had been fastened to the soft-pedal batten, and pushing the pedal discharged the report into her face. As Alleyn discovers, Eleanor, driven to desperation by what she regarded as her rival’s ultimate success with the rector, cleverly utilized what had begun as a harmless joke set with a child’s water pistol for her own nefarious purpose. Such an involved means of murder is typical of Marsh’s imagination. In this novel and others, she murders her victims by grisly methods: decapitation, meat skewers through the eye, boiling mud, and suffocation in a wool press. Though Marsh never ceased to insist that she was squeamish, her sense of the dramatic demanded a dramatic dispatch of the victim.

Running throughout all Marsh’s novels is a wry

sense of humor, often turned inward. Because she considered her life’s work to be in theater rather than in detective fiction, Marsh often parodied the conventions of detective novels in her own works. In her first novel, Alleyn comments, “Your crime books will have told you that under these conditions the gardens of the great are as an open book to us sleuths.” In *Death in a White Tie*, Marsh quotes part of the oath of the prestigious detection club when she has Lord Robert exclaim, “No jiggery-pokery.” *Overture to Death* finds a police sergeant lamenting that “these thrillers are ruining our criminal classes,” and in *Vintage Murder*, Alleyn remarks sarcastically, “so the detective books tell us, . . . and they ought to know.” In none of the works of the other grand dames of detective fiction is this self-mockery so pronounced, though Allingham and Sayers both professed, like Marsh, to be more seriously occupied in other pursuits. Marsh echoes Rebecca West’s statement: “There is this curious flight that so many intelligent women make into detective writing” in *Black Beech and Honeydew: An Autobiography* (1966, revised 1981). According to Marsh, “If I have any indigenous publicity value it is, I think for work in the theater rather than for detective fiction. . . . Intellectual New Zealand friends tactfully avoid all mention of my published work, and if they like me, do so, I cannot but feel, in spite of it.” Toward the end of her life, however, Marsh, in a revised edition of her autobiography, did acknowledge the benefits of her writing, for without its profits she could never have directed student theater and have indulged her passion for Shakespearean production.

VINTAGE MURDER

No discussion of Marsh, her life, or her detective fiction can afford to ignore her loyalty to her native New Zealand and its influence on her fiction. Four of her novels take place in New Zealand, with the faithful Alleyn still in command. In each of these novels, the setting plays an important part in the mystery; indeed, the country becomes a character—lovingly and lyrically examined in Marsh’s prose. Certainly the most beautiful aspects of the country are discussed in *Vintage Murder*. This novel, an early one, contains many elements of what would become vintage Marsh: Alleyn, the theater, a bizarre murder, a cast of flam-

boyant actors, and the country. Though Marsh paints hauntingly stark portraits of rural England, nowhere does her painterly sense serve her so well as at home. New Zealand, Alleyn senses, is a new world, clean, light, immaculate; it purges the squalid and revitalizes the jaded. In the forest, he muses,

There was something primal and earthy about this endless interlacing of greens. It was dark in the bush, and cool, and the only sound there was the sound of trickling water, finding its way downhill to the creek. There was the smell of wet moss, of cold wet earth. . . . Suddenly, close at hand, the bird called again—a solitary call, startlingly like a bell.

The forest renews him, stimulates his senses and his imagination. Marsh weaves the love of her land and of her people—Maori and Paheka alike—into her novels with elegant prose and a colorful palette.

These are “Marshmarks” as one observer has noted: sound deductive logic to please the conventions of the detective story, colorful but willful characters skillfully endowed with dialogue that is as lively as thought, and a sense of atmosphere and place that is palpable. Each of these qualities transforms her novels from a clever puzzle into an analysis of character and manners.

A. E. W. MASON

Born: Camberwell, London, England; May 7, 1865

Died: London, England; November 22, 1948

Type of plot: Police procedural

PRINCIPAL SERIES

Inspector Hanaud, 1910-1946

PRINCIPAL SERIES CHARACTER

INSPECTOR HANAUD, a detective in the French *Sûreté*, is "stout and broad-shouldered with a full and almost heavy face. In his morning suit, at his breakfast-table, he looked like a prosperous comedian." Although never pompous, Hanaud has no delusions as to his infallibility. His skill rests in his ability to glean every scrap of information from every possible source and to act swiftly on his conclusions.

CONTRIBUTION

A. E. W. Mason's five Inspector Hanaud novels and seven other mystery novels are but a small portion of the output of a very prolific writer. Indeed, Mason's primary contribution should be considered to be his historical and adventure novels. By combining excitement with character development, Mason advanced the genre of adventure fiction beyond the simplistic level that was standard for his time.

In his mystery novels he tried to "combine the

crime story which produces a chill with the detective story which aims at a surprise." His most famous detective, Hanaud, is "first of all a professional; secondly, as physically unlike Mr. Sherlock Holmes as he could possibly be; thirdly, a genial and friendly soul; and fourthly, ready to trust his flair or intuition and to take the risk of acting on it, as the French detective does." Although not in a class with later great English mystery writers such as Agatha Christie, Mason significantly contributed to the art of detective fiction that was, in 1910, still in its infancy.

BIOGRAPHY

Alfred Edward Woodley Mason was born on May 7, 1865, in Camberwell, a southern suburb of London, England. He was the youngest son of William Woodley Mason, an accountant, and Elizabeth Hobill Mason. He was educated at Dulwich College, London (1878-1884), and at Trinity College, Oxford University (1884-1887), where he earned a degree in classics. While at Oxford University, he was interested in acting and in public speaking; he appeared in numerous plays and was a notable speaker in the Oxford Union, the university's debating society.

On graduation from Oxford, he turned to acting for his first career. Although moderately successful on the stage, in 1894, encouraged by Oscar Wilde, he wrote

his first novel, *A Romance of Wastdale* (1895). Over the next seven years, he published other novels, plays, a short-story collection, and many short stories. He then wrote and published his most successful and famous work, *The Four Feathers* (1902), which was to set his style of writing, modern adventure, for the next forty years. Throughout his life Mason traveled widely and sought adventure through activities such as exploring, sailing, and mountain climbing. For five years he was a Liberal Member of Parliament for Coventry. During World War I he served in the Royal Marine Light Infantry and was involved in Naval Intelligence Division secret service missions in Spain, Morocco, and Mexico.

After the war, Mason returned to writing and achieved substantial success for the next twenty-five years in a variety of genres, including adventure, mystery, and historical fiction. His best work is considered to be in the historical novels, in which, as he matured as a writer, he showed insight and understanding of character development. Several of his novels were adapted to the screen in the 1930's (*Fire over England*, which was published as a novel in 1936, and *The Four Feathers*, among others). Mason was also a dramatist, although he was far less successful in that area.

Mason's writing success resulted in his being financially secure; he was also a member of many famous clubs, a much sought-after guest in society, a brilliant storyteller, and generally a well-liked man. Mason was never married and "refused a knighthood since 'such honours mean nothing to a childless man.'" He died in London on November 22, 1948.

ANALYSIS

In the first decade of the twentieth century, the detective novel was still young and unestablished. Nineteenth century mystery fiction writers such as Edgar Allan Poe and Arthur Conan Doyle had already established a style and formula for the writing of detective novels. The genre had become very popular, as is evidenced by the number of inexpensive, mass-produced detective-fiction magazines published at the turn of the century. Yet these stories usually focused primarily on action with very little character development. A. E. W. Mason's chief contribution to the genre was

that, while he certainly utilized action and realistic backgrounds in his novels, he paid much attention to character development.

Mason researched the locales for his novels thoroughly. In an era when Great Britain in particular and European nations in general administered and maintained peace throughout most of the world, he traveled widely. Using his yacht and his substantial income, he explored the Sudan, Morocco, Spain, South America, South Africa, India, Burma, Ceylon, Australia, and many other areas of the world. Always seeking adventure, he sailed oceans and rivers whenever he could; he also became an avid mountain climber, climbing the mountains of England, Switzerland, and Morocco. As might be expected, Mason's experiences during World War I were also adventurous; he was a secret service agent in Spain and Mexico. Using his keen eye for detail and an almost photographic memory, Mason observed many scenes that later appeared in his stories. For background information for his crime stories, Mason attended many notable trials in Great Britain and on the Continent, using these details in his stories as well.

Yet while others researched similarly, Mason's true forte in writing was character analysis. Mason's first career on the stage had taught him how to learn from observation instead of experience. He had learned to study characters and to form himself into the role that he was to play. Of necessity, he had also learned to study other characters in the plays. To develop this ability, he began to study his friends and acquaintances in order to learn their motivations and their responses to various stimuli. This passion for character development was transmitted directly to his novel writing. One need only note that many of his novels ultimately became plays, or vice versa, to see the correlation between the two. At trials, Mason would carefully study the criminal in the dock as well as the witnesses on whom the fate of the criminal rested. He wanted to know how these people felt and acted. This insight, in his best novels, led to strong character development and to insight into human behavior.

In analyzing Mason's crime novels, particularly his Hanaud series, one is immediately struck by his understanding of the importance of the detective. Mason

himself wrote, for an article titled "Detective Novels" in 1925, that

all the great detective novels are known by and live on account of their detectives. . . . The detective must be an outstanding person, actual, picturesque, amusing, a creature of power and singularity. Without such a being, the detective novel, however ingenious, will pass back to the lending library. With him it may find a permanent place on the bookcase.

Mason's creation was Inspector Hanaud of the French Sûreté. Hanaud is a large man—adroit and inventive. Although he is the best detective at the Sûreté, he is self-deprecating, describing members of his profession as "servants of chance" who "seize quickly the hem of her skirt when it flashes for the fraction of a second" in front of them. Hanaud, then, is a thoroughly believable character.

AT THE VILLA ROSE

Mason's first Hanaud novel was *At the Villa Rose* (1910). He had been planning the novel for several years. Indeed, he had visited Aix-les-Bains, the site of the mystery, in 1908 and had ridden between there and Geneva by car (the ride is an important element in the mystery). Moreover, the year before his visit to Aix-les-Bains, there had occurred in that spa the murder of a wealthy elderly woman. Many of the participants in the real murder appeared in his novel. Mason wrote, "I had thus a good deal of my story before me, both as regards the characters and the sequence of events." What Mason did was to add the detective and tell the story through the eyes of the detective's companion, the slow-witted, wine-loving dilettante, Ricardo. The mystery, however, is relatively easy to solve, and the final third of the novel is a retelling of the story, with explanations by Hanaud.

THE HOUSE OF THE ARROW

A far better murder mystery, *The House of the Arrow* (1924), was published fourteen years later. As before, the story is set in a locale that Mason knew intimately (Dijon, France). Again, the story, that of the murder of a wealthy widow, is based on a similar crime that had occurred in the same vicinity. In the novel, the local police enlist the aid of Hanaud, and through his acute detective abilities, he solves the

crime. For several stylistic reasons, this detective novel is far superior to Mason's first effort. By this time, Mason's experience and expertise in novel writing is manifest. In this novel he shows his skill at creating atmosphere, developing character, portending evil, and telling a good story. More important, the murderers are not revealed until the very end of the novel. Mason was now incorporating suspense into his work: That is, he was becoming a mature writer.

THE PRISONER IN THE OPAL AND THEY WOULDN'T BE CHESSMEN

For the next twenty years, Mason's work was never out of print. New works and reprints of earlier work testify to his popularity throughout the period. His mystery novels continued as reflections of the successful formula of *The House of the Arrow*. His third Hanaud novel, *The Prisoner in the Opal* (1928), is a morbid story set in the Bordeaux region of France. The Château Mirandel is the site of a Black Mass celebration where a human sacrifice has occurred. Hanaud and Ricardo investigate and solve the mystery. Again, Ricardo is confused by the case but records the detective's abilities. Seven years later, *They Wouldn't Be Chessmen* (1935) was published. This novel is set in Trouville, on the coast of France, and involves murder, stolen jewels, romance, and a perfect crime. In the novel, the murderers plot everything to the last detail, but all goes awry because human beings are involved, not chessmen. This novel became Mason's most successful mystery.

OTHER WORKS

Mason's other mysteries are essentially suspenseful adventure or historical novels. The mystery occurs in the vagaries of human nature and not so much in the crime. *The Watchers* (1899), for example, has as its mystery the purpose of a strange group of seafarers who are watching a house. *Running Water* (1907) is ostensibly a story about a perfect crime but is more about mountain climbing and human motivation. Indeed, Mason was at his best in the adventure and historical novel. It was an adventure novel, *The Four Feathers*, which assured his place in posterity. As a recognized author, Mason could have published almost anything that he wrote. It is to his credit that he continually improved his style. Indeed, critics deem

his greatest work to be *Musk and Amber* (1942), a novel that he completed when he was close to eighty years of age.

Mason was a prolific writer who was at home in many of the literary genres of the twentieth century. He was a talented observer, both of setting and of humankind, and he deftly transferred his keen observations to the printed page. His technique of exploring the psychological nature of his characters was relatively advanced for his time, and his novels provided a pattern for others to follow.

William S. Brockington, Jr.

PRINCIPAL MYSTERY AND DETECTIVE FICTION

INSPECTOR HANAUD SERIES: *At the Villa Rose*, 1910; *The House of the Arrow*, 1924; *The Prisoner in the Opal*, 1928; *They Wouldn't Be Chessmen*, 1935; *The House in Lordship Lane*, 1946

NONSERIES NOVELS: *The Watchers*, 1899; *Running Water*, 1907; *The Witness for the Defence*, 1913; *The Summons*, 1920; *The Winding Stair*, 1923; *No Other Tiger*, 1927; *The Sapphire*, 1933

OTHER SHORT FICTION: *Ensign Knightley, and Other Stories*, 1901; *The Clock*, 1910; *The Four Corners of the World*, 1917; *Dilemmas*, 1934; *The Secret Fear*, 1940

OTHER MAJOR WORKS

Vicarel, Jo Ann. *A Reader's Guide to the Police Procedural*. New York: G. K. Hall, 1995. Geared to the mainstream reader, this study introduces and analyzes the police procedural form used by Mason.

LIA MATERA

Born: Vancouver, British Columbia, Canada; 1952

Types of plot: Thriller; cozy

PRINCIPAL SERIES

Willa Jansson, 1987-

Laura Di Palma, 1988-

PRINCIPAL SERIES CHARACTERS

WILLA JANSSON is a San Francisco law student, then a practicing lawyer, with parents who still carry on the tradition of 1960's radicalism. Clearly focused on her career, Willa nevertheless finds herself inextricably involved in the very social and political issues that have been her parents' concern.

LAURA DI PALMA is a no-nonsense corporate lawyer who becomes involved in criminal defense work. Possessed with a social conscience, she often has to brook her colleagues' disapproval when she becomes involved in investigations of crimes. Eventually she forsakes corporate law for a practice of her own.

CONTRIBUTION

Although Lia Matera's novels tend toward the thriller format, they are based, as well, on traditional cozy mysteries. Willa Jansson, for example, would like to focus on her career and private life but keeps getting drawn into cases with political consequences. Laura Di Palma has similar career concerns—although she is, in some respects, more willing than Willa to pursue crimes that are outside the purview of her day job. In both series, however, Matera eschews the neat endings of traditional mysteries—the return to a cozy feeling that all is right with the world after the criminals have been apprehended. The novels begin in a state of anxiety that can be only temporarily alleviated by the actions of the series hero and her enablers.

Matera favors the first-person narrative. Both Willa Jansson and Laura Di Palma narrate the novels as though they were speaking to a friend in confidence. Although both characters are earnest investigators, they exhibit a wry sense of humor and even a jokey manner that enhances the informal tone of the novels,

although the Di Palma series is less lighthearted. Both series, however, include serious explorations of ethical and moral issues. Matera is especially interested in the way her characters can be set up and themselves become victims. Willa's and Laura's legal training not only guides them in sorting out the innocent and the guilty but also in establishing how they approach the nexus between crime and politics.

Matera's novels have an implicitly feminist focus insofar as they show their female protagonists in conflict with male-dominated law firms and the criminal justice system. Whatever flaws that system may contain, however, and no matter how leftist Matera's novels may seem, she demonstrates in *Havana Twist* (1998) just how worse off a society can be without an independent judiciary and a legal justice system in which defendants have rights that are balanced against the impersonal forces of the corporation and government.

BIOGRAPHY

Lia Matera was born in Vancouver, British Columbia, in 1952 into a family she describes as "Italian immigrant tailors." In 1959, the family moved to Eureka in Northern California. Her first language was Italian. As she told interviewer Walter Sorrells: "The ability to express oneself was the central issue in our lives. Add to that all the stories I heard around the dinner table—the sheer drama of being forced to leave one's homeland and start fresh with nothing. Every meal became an opera. So I was focusing on language and getting tutored in storytelling before I could even ride a trike."

Matera's leftist politics seem to have been shaped during her years at the University of California, Santa Cruz. Although she wanted to write fiction, she also prudently enrolled in law school and in 1981 graduated from the Hastings School of Law in San Francisco. Matera was on her school's law review journal, taught law at Stanford University, and practiced law for a private firm, but she resisted the ethos of a conventional law career, working only intermittently until she was able to sell her first novel. What interests her

are lawyers' lives and the way they practice law. She has said that she wants to portray the milieu of the law, not the minutiae of law cases.

Matera has collected her short stories in *Counsel for the Defense* (2000). Her stories have also appeared in anthologies, including *Sisters in Crime* (1989), *Deadly Allies* (1992), *Crimes of the Heart* (1995), *Irreconcilable Differences* (1999), and *First Cases, Volume Four* (2002). Her work has been translated into Italian, German, Finnish, Danish, Norwegian, and Japanese.

ANALYSIS

Lia Matera focuses on the psychology and sociology of the legal world. The mind-sets of district attorneys and defense lawyers are quite different. Her lawyers are shaped by what they practice, and she enjoys contrasting the attorney employed in commercial litigation with the one committed to labor unions. Her own interest is in how practicing these different kinds of law shapes personality. The process of becoming a certain kind of lawyer intrigues her as she probes the strengths and weaknesses of her characters. The lawyers become, she points out, a lot like their clients, which explains, in part, why they are attracted to certain sorts of law. It is the intersections of crime, the law, and the personalities of clients, lawyers, judges, and their cohorts that make Matera's novels intriguing. In her own account of her decision to stop practicing law, she suggests that writing was the only way for her to obtain an overview of the legal system.

Matera's novels tend to focus on single issues: She begins with the question "What do I care about now?" She has canvassed issues as different as pornography and unidentified flying objects (UFOs).

In an interview with Walter Sorrells, Matera clearly distinguished her writing from traditional thrillers: "I have a problem with the basic premise of most successful thrillers: that the system doesn't work and justice can only be achieved through personal vengeance. . . . I hate to see popular fiction glorify yahooism and add more sparks to the American tinderbox." Matera's characters fumble their way toward understanding the crimes they are investigating, and what they learn, Matera implies, is only a part of the truth.

In both the Willa Jansson and Laura Di Palma series, the main characters continue to develop—in Willa's case from law school to corporate work to her involvement in cases beyond the scope of a conventional attorney, and in Laura's case from her corporate law practice to the decision to go into business for herself. While Willa defends the poor and the indigent, Laura takes on unpopular clients and causes. The Jansson novels often present a satiric view of the law; the Di Palma novels are more acerbic about the criminal justice system. Critics have praised the interplay of Matera's offbeat and amusing characters, her irreverent and witty style, her wry attitude toward the law, and her ingenious plots.

WHERE LAWYERS FEAR TO TREAD

The first novel in the Willa Jansson series, *Where Lawyers Fear to Tread* (1987), is set in San Francisco's Malhousie Law School, an amusing name for an institution rather like the one Matera herself attended. Willa becomes acting editor-in-chief of her school's law review after its editor has been murdered. When other students are murdered, Willa begins to investigate, inspired by her childhood reading of Nancy Drew. There are suspects galore, including other members of the law review and the faculty. Unlike Nancy Drew, however, Willa finds herself arrested and a suspect, thus setting a pattern that will be repeated in subsequent Jansson mysteries. The fierce competition for good grades and jobs and the pretentiousness of law school clearly owe something to Matera's own experience.

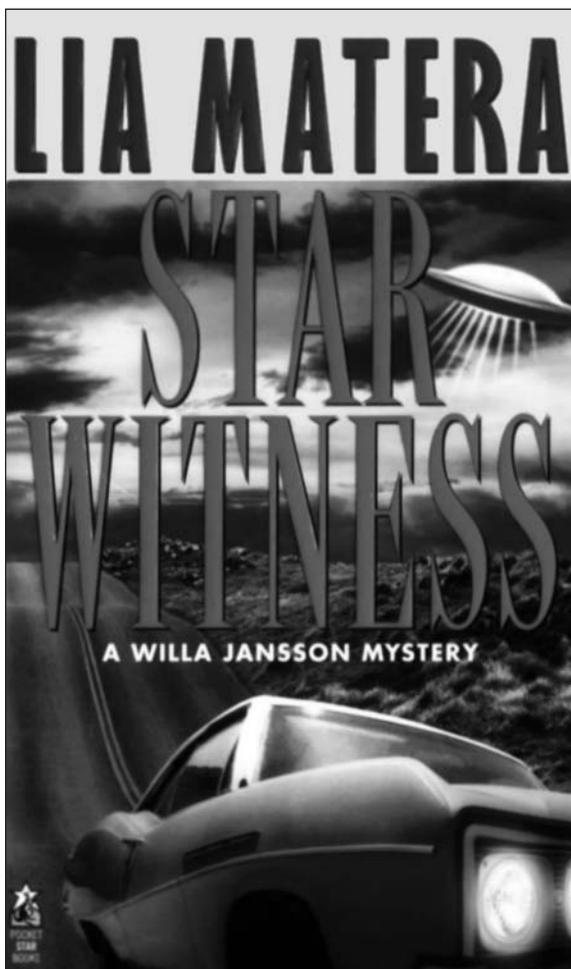

A RADICAL DEPARTURE

In *A Radical Departure* (1988), Willa is working as a first-year associate for a San Francisco law firm that caters to the rich and the powerful when her boss dies from hemlock poisoning. Willa's left-leaning mother is named in the boss's will and stands to inherit his plush home. It is all rather suspicious and rather too much for Willa, who is still trying to find her bearings after a rocky experience in law school. It gets worse as Willa begins to realize that she may be the next murder victim. She tries to relax by smoking a little dope, but it hardly helps because she has a reputation that the press cannot resist exploiting. Mixed in with her fitful understanding of what is happening is her ambiva-

lence over her parents' politics as well as over the kind of posh world the firm represents.

STAR WITNESS

In *Star Witness* (1997), Willa takes on the case of a man who claims aliens have abducted him. This is the alibi he offers when he is accused in a hit-and-run manslaughter case. He explains that his car was in a spaceship when it fell on another vehicle, killing the driver. The setting is Santa Cruz, California, and the UFO watchers are portrayed sympathetically as Willa tries to come to terms with strange phenomena such as crop circles, mysterious sightings, and assassination attempts. The plot is complex and sometimes opaque, but the evocation of a subculture is convincing, and Willa never loses her authority as a defense attorney, even though she is skeptical of her client's story.

HAVANA TWIST

Havana Twist, set in modern-day Cuba, may be Matera's most ambitious Willa Jansson novel. Willa's mother has traveled with a leftist group to Cuba, convinced that the country represents her political ideals. Willa is frustrated at her mother's inability to recognize that Cuba is a police state. When the group returns without Willa's mother, Willa begins an investigation, taking her not only to Havana but also to Mexico, where a Fidel Castro sympathizer may have information that will help Willa learn what has happened to her mother. The task is too much for Willa alone, and she accepts help from a police detective with whom she had once been romantically involved. The risk-averse Willa nevertheless finds herself in an underground Havana tunnel that the Chinese are helping the Cubans build in anticipation of an attack by the United States. Some of the plot twists are hard to follow, but Matera's evocation of everyday Cuban life and the conniving that is necessary to survive is engrossing.

THE SMART MONEY

In *The Smart Money* (1988), the debut novel for the Laura Di Palma series, Laura's San Francisco law firm delegates her to set up a branch office in Hillside. This is Laura's hometown, and she is bent on ruining the practice of her former husband. However, as so often happens in a Matera novel, the lawyer/protagonist becomes a murder suspect. In other words, Laura has jeopardized everything—her career in a prestigious firm and the notion that she has rebuilt her life after her divorce. Laura is a sharper-edged version of Willa Jansson, and Matera is not afraid to make her main character unsympathetic. Although Laura eventually regains her equilibrium, it is at no small cost to herself, since she realizes she is not quite the big-city professional she supposed herself to be.

A HARD BARGAIN

In *A Hard Bargain* (1992), Laura Di Palma has failed to make partner at her upscale corporate law firm because of her involvement in high-profile criminal cases. Taking time off, Laura retreats to the woods with her lover Hal. Soon, however, a friend draws her into an investigation of an apparent suicide that looks suspicious. The victim had a history of self-destructive behavior, abetted by a husband who would point a gun at

her. As Laura involves herself more deeply in the case, she begins to confront her own demons, including Hal's dependency on her. Caring for this traumatized Vietnam War veteran, she realizes, may just be a way of deflecting her own troubles. Unlike many legal thriller writers, Matera combines fast-paced action with sustained examination of her main character's psychology.

FACE VALUE

In *Face Value* (1994), perhaps Matera's most feminist novel, Laura Di Palma finds herself immersed in the world of pornography. A high-tech California guru, Big Mike, manipulates videotapes of people having sex, claiming that he can show them their inner selves. Laura, now in solo practice, begins to investigate Big Mike after he starts selling his tapes as pornography. Inevitably his actions lead to accusations of betrayal, followed by murder. As Laura comes to know the women on the tapes, she begins to question her own identity. This is one of Matera's darker, introspective novels set in the milieu of cults and sex clubs.

DESIGNER CRIMES

In *Designer Crimes* (1995), Laura Di Palma is a witness to a murder when she sees the lawyer she is about to hire shot in front of her at a desk in a financial district law office. Was the bullet intended for her? She is representing a high school classmate accused of murdering his girlfriend who has disappeared. The case has aroused considerable publicity and controversy. The murdered lawyer belongs to a firm that seems to be undergoing some kind of mysterious shakeup with tapped telephones and secret computer files. Why are certain employees targeted? As Laura investigates, Matera elaborates what is perhaps her most intricately plotted mystery.

SEICHŌ MATSUMOTO

Kiyoharu Matsumoto

Born: Kokura (now Kokura Kita Ward, Kitakyūshū City), Fukuoka Prefecture, Japan; December 21, 1909

Died: Tokyo, Japan; August 4, 1992

Types of plot: Police procedural; inverted; psychological

CONTRIBUTION

Seichō Matsumoto is a premier author of Japanese mystery and detective fiction. Credited with popularizing the genre among readers in his country, Matsumoto became his nation's best-selling and highest earning author in the 1960's. His most acclaimed detective novels, including *Ten to sen* (1958; *Points and Lines*, 1970) and *Suna no utsuwa* (1961; *Inspector Imanishi Investigates*, 1989), have been translated into a number of languages, including English, and remain in print. Although Matsumoto is known for police procedurals that involve intriguing criminal investigations, he also wrote novels and short fiction that feature historically based mysteries.

Matsumoto's works depart from traditional styles of Japanese mystery and detective fiction. Dispensing with formulaic plot devices such as puzzles, Matsumoto incorporated elements of social significance and postwar nihilism that expanded the scope and further darkened the atmosphere of the genre. In particular, his exposé of corruption among police officials as well as criminals was a new addition to the field. The subject of investigation was not just the crime but also the society in which the crime was committed. In a Matsumoto detective story, Japanese society is often fingered as an accomplice.

A prolific author, the self-educated Matsumoto did not see his first book in print until he was in his forties. He wrote until his death in 1992, producing in four decades more than 450 works. Although Matsumoto also produced popular historical novels and respected works of nonfiction, it is his mystery and detective fiction that solidified his reputation as a writer at home and abroad.

BIOGRAPHY

Born Kiyoharu Matsumoto in Kokura (now Kokura Kita Ward, Kitakyūshū City), Fukuoka Prefecture, on the island of Kyushu in Japan in 1909, he later adopted the pen name of Seichō Matsumoto. A product of humble origins, he was his parents' only child. Following his graduation from elementary school, Matsumoto found employment at a utility company. As an adult he designed layouts for the *Asahi Shinbun* newspaper in Kyushu. His work in the advertising department was interrupted by service in World War II. A medical corpsman, Matsumoto spent much of the war in Korea. He resumed work at *Asahi Shinbun* after the war, transferring to the publication's Tokyo office in 1950.

Though Matsumoto attended neither secondary school nor university, he was well read. As a rebellious teenager, he read banned revolutionary texts as part of a political protest. This act so enraged Matsumoto's father that he destroyed his son's collection of literature. Undeterred, the young Matsumoto sought award-winning works of fiction and studied them intently. His official foray into literature occurred in 1950 when *Shukan Asahi* magazine hosted a fiction contest. He submitted his short story "Saigō satsu" (Saigō's currency) and placed third in the competition. With three generations dependent on him (he supported his parents as well as his wife and children), Matsumoto welcomed the prize money. His modest success and the encouragement of fellow writers fueled his efforts. Within six years he had retired from his post at the newspaper to pursue a full-time career as a writer.

Renowned for his work ethic, Matsumoto wrote short fiction while simultaneously producing multiple novels—at one point as many as five concurrently—in the form of magazine serials. Many of Matsumoto's crime stories debuted in periodicals, among them the acclaimed "Harikomi" (1955; "The Stakeout," 1985), in which a woman reunites with her fugitive lover while police close in on her home. As is true of much of Matsumoto's fiction, this psychological portrait reveals more about the characters than the crime.

For his literary accomplishments, Matsumoto received the Mystery Writers of Japan Prize, the Naoki Prize, and the Yoshikawa Eiji Prize for Literature, all awards bestowed on writers of popular fiction. In 1952 he was awarded the prestigious Akutagawa Prize for “Aru ‘Kokura nikki’ den” (the legend of the Kokura diary). Considered Matsumoto’s best story, it features a disabled but diligent protagonist who seeks entries that are missing from the diary of author and army medical physician Mori Ōgai. For Matsumoto’s contributions to nonfiction, including volumes on Japanese history, society, and architecture, the Association of Japanese Journalists presented him with the Nihon Janaristo Kaigi Prize. He received the NHK Hōsō Bunka Award, a broadcasting award, in 1978 and the Asahi Award in 1990.

A lifelong activist, Matsumoto voiced anti-American sentiment in some of his writings, but he was equally critical of his own society. Many of his works of fiction and nonfiction reveal corruption in Japanese government and academia. A political radical despite (or perhaps in reaction to) growing up in a conformist society, Matsumoto associated with like-minded individuals. In 1968 he traveled to communist Cuba as a delegate of the World Cultural Congress and later that same year ventured to North Vietnam to meet with its president. Though he continued to write works of mystery and detective fiction in the 1970’s and 1980’s, the author dedicated increasing time to works of nonfiction on more political topics.

Since his death from cancer at the age of eighty-three, Matsumoto’s popularity as a writer of mystery and detective fiction has grown internationally, and he has achieved iconic status in Japanese culture.

ANALYSIS

An esteemed postwar writer, Seichō Matsumoto is credited with changing the format and expanding the content of Japanese mystery fiction. He dispensed with the formulaic insertion of clues common to the genre and added emphasis to more complex issues of human behavior and societal problems. Whereas mystery writers before Matsumoto provided readers the literary equivalent of a trail of bread crumbs, he gave readers the entire loaf. Followers of his detective fic-

tion know as much or as little as the detective; nothing is kept in confidence to create artificial surprise at the conclusion of a work.

At first glance, Matsumoto’s straightforward and sparse style of writing seems to take its inspiration from journalism, not unexpected given his earlier association with a newspaper and his focus on detective fiction. However, as a number of critics have noted, the simplicity of Matsumoto’s writing is deceptive. His prose style has been compared to haiku, a Japanese poetic form consisting of seventeen syllables that evoke a clear but expansive image. Likewise Matsumoto’s plots are carefully scripted, with elements of Japanese society playing a crucial role in the discovery of how a crime was committed. Train schedules (trains are well known for running on time in Japan) feature in several works where the time frame of an alibi is in question.

In a Matsumoto novel, more than just the crime is under investigation; postwar Japanese society also undergoes interrogation. All imposters and pretenders—dishonest officials, pretentious academics, and social climbers—have their falsities exposed. Because Matsumoto’s detectives see their society so clearly, with an outsider’s detached perspective, usually they are able to get their man (or their woman). A combination of detective ability, dogged perseverance, and understanding of human behavior guides their search. When they fail, as is the case in *Kuroi fukuin* (1961; black gospel), bureaucracy is often the culprit. Matsumoto based *Kuroi fukuin* on an actual crime in which the prime suspect was a foreign Catholic priest and the victim was a Japanese stewardess. The investigation was disbanded after the Japanese government allowed the priest to return to his own country. Matsumoto wrote his novel both to spur public interest in the case and to protest its closure.

Often Matsumoto’s investigators are civilization’s scrappy underdogs. The most memorable of his detectives, Inspector Imanishi, survives on a modest salary, fights forces of corruption within his own department, and maintains emotional equilibrium through his pursuit of outside interests. Imanishi’s composition of haiku and his tending of a garden provide readers with additional insight into the inspector’s methods. His

construction of the case is pursued with the same careful attention to detail as is required in his hobbies.

POINTS AND LINES

Ten to Sen is the novel that in 1958 secured Matsumoto's inclusion in an elite cadre of Japanese mystery writers. Published in English as *Points and Lines*, the novel introduced Matsumoto to an English-language audience and helped him gain an international following. In this police procedural, Matsumoto manipulates the number two: The plot centers on a double homicide masquerading as a double suicide and follows two detectives, one local and one from Tokyo, who join forces to solve the crime and track the criminal. Veteran Jutarō Torigai of the local precinct partners with Kiichi Mihara, a rookie from Tokyo's metropolitan force. Their investigation of the deaths of a young couple, whose bodies are found on a popular Japanese beach, eventually exposes a national crime ring. Two careful analyses of departure and arrival times in the train schedules for busy Tokyo station—one to refute the suspect's alibi and one to fix the time of the murders—are necessary for the detectives to crack their case.

Japan's highly structured society, with its divisions between social classes and workplace hierarchies, also undergoes examination in *Points and Lines*. The relationship between subordinate and superior, another duality, is scrutinized in this context. Matsumoto provides readers with two models. First, a traditional pairing in which each man conforms to his place in society is presented in the relationship between Ishida, a high-ranking ministry official, and Sayama, an assistant. Although Sayama is competent and knowledgeable, Ishida regards him as his inferior; their relationship does not allow a free exchange of information. In contrast to this standard, the relationship between novice detective Mihara and his superior officer, Inspector Kasai, breaks with Japanese convention. Though they are members of disparate social and departmental ranks, their mutual respect allows them to share information liberally to advance the investigation. As in many a detective novel by Matsumoto, Japanese society is under the microscope.

INSPECTOR IMANISHI INVESTIGATES

Perhaps the most popular of Matsumoto's works is *Suna no utsuwa* (1961; *Inspector Imanishi Investi-*

gates, 1989). The novel features a homicide detective intent on solving a murder case even after his superiors have disbanded the investigation. With a single clue—the name Kameda—to guide his search, Inspector Imanishi travels throughout the prefectures of Japan, often on the same train line that passed through the station in Tokyo where the mangled body of the victim was discovered. Uncertain whether the name is a surname or a place name, Inspector Imanishi follows maps and directories to different locales, including the provinces, where the pace of life is depicted as less hurried than in the city, but the quality of life more impoverished.

Because the setting of the novel predates Japan's economic recovery and eventual boom in the 1960's and 1970's, there is an appropriately lean quality to the novel's descriptions of the nation's cities, towns, and countryside. Matsumoto's sparse prose creates a Tokyo that is afflicted by social maladies, including vice and apathy. As part of his investigation into the murder, the middle-aged Inspector Imanishi must circulate among a younger subpopulation consisting of radical writers, visual artists, and actors. Members of this scene are less focused on reviving their city's arts than they are on subverting an inherited culture that appears to them as staid as the inspector in his suit and tie. As a writer of haiku and a gardener, Imanishi's own foray into the arts is more conventional. However, it is these tense juxtapositions between traditional and modern Japanese lifestyles, urban and rural settings, and established and emerging generations that provide the novel its context and that contribute to Inspector Imanishi's success in identifying the victim and the perpetrator.

THE VOICE, AND OTHER STORIES

The Voice, and Other Stories, a collection of Matsumoto's crime stories translated into English by Adam Kabat, was published in 1989, although the individual stories were composed in the 1950's and 1960's. These tales are set in a Japan still recovering from the economic devastation of World War II and enmeshed in the Cold War. A time of transition for most Japanese citizens, it was an era in which women clad in traditional kimono traveled by the efficient modern railway system.

The six stories are linked by the fact that each in-

volves an unsolved crime, but each story is distinct in its perspective. In some stories the detective is featured; in others, the criminal, and occasionally the not-so-innocent bystander. In “Kao” (1959; “The Face”) a movie star harbors a secret. Before achieving fame, he murdered his lover, an event witnessed by a second pair of eyes. The same exposure that will escalate his career could jeopardize his life. In this work of psychological realism, the actor cannot help but choose the allure of the spotlight over the safety of obscurity. Likewise, “Kantō-ku no onna” (1960; “The Woman Who Wrote Haiku”) examines the emotional triggers behind deviant human behavior. The story features a

terminally ill, and thereby vulnerable, poet conned into acting as an accessory to murder. In “Kyōhansha” (1965; “The Accomplice”), a businessman spies on his former partner-in-crime to ensure that his past life will not intrude on his present success.

W. SOMERSET MAUGHAM

Born: Paris, France; January 25, 1874

Died: Nice, France; December 16, 1965

Type of plot: Espionage

PRINCIPAL SERIES

Ashenden, 1928

PRINCIPAL SERIES CHARACTER

ASHENDEN, an English author turned intelligence officer, is a cultured, urbane bachelor. Assigned to carry out intelligence activities during World War I, he approaches his tasks with a curiosity about human be-

ings (the writer's raw material), a sense of irony, and cool clinical detachment. Basically tolerant, he finds eccentricities of character and behavior appealing; at the same time, he is efficient in his work and unswervingly loyal.

CONTRIBUTION

W. Somerset Maugham's sixteen short stories and sketches in the Ashenden series were among the first in English fiction to present espionage activities as realistic and even dull at times. Because of their accurate depiction, they became required reading for British

agents before World War II. Ashenden is sent first to Switzerland and later to Russia to carry out assignments, usually intended to counter German intelligence or, in the example of Russia, to influence internal politics. Both the events and characters from the series are based on Maugham's experiences as an agent for British Military Intelligence (MI6). Yet Ashenden seems more interested in describing eccentric characters and reflecting on the ironies of the human condition than in reporting on specific missions. Maugham writes in the lucid, idiomatic, and colloquial English typical of his voluminous prose. His hero is the prototype of the later reflective and analytical spymasters of Graham Greene and John le Carré.

When he collected his complete short stories, Maugham compressed the Ashenden series into six long narratives: "Miss King," "The Hairless Mexican," "Giulia Lazzari," "The Traitor," "His Excellency," and "Mr. Harrington's Washing." Fourteen other Ashenden stories, still in manuscript, were destroyed after Winston Churchill gave Maugham his opinion that they violated English laws concerning official secrets. In addition to the Ashenden series, Maugham wrote a few short stories dealing with murder, and in numerous essays and sketches he drew on his experience as an intelligence officer.

BIOGRAPHY

William Somerset Maugham, the fourth son of an English solicitor, was born in the British Embassy in Paris on January 25, 1874. He spent his early childhood in France, but following the deaths of his parents he went to England to live with an uncle, the Reverend Henry Maugham, vicar of Whitstable. In a nearby boarding school, King's School, Canterbury, Maugham found that the bitterness of his childhood only increased. A permanent stammer that developed at the time prevented his becoming a lawyer like his father and two brothers. Instead of entering an English university after his schooling, he traveled to Heidelberg, where he learned German, attended lectures by Kuno Fischer on the philosophy of Arthur Schopenhauer, and saw the dramas of Henrik Ibsen. On his return to England, he enrolled in the medical school at St. Thomas Hospital in London.

W. Somerset Maugham. (Library of Congress)

Although Maugham received his doctor of medicine degree in 1897, he found that his interest in writing overshadowed his desire to become a practicing physician. With the publication of *Liza of Lambeth* (1897), a naturalistic novel, he resolved to devote his career to writing. Although none of the numerous novels he wrote during the next decade approached the success of *Liza of Lambeth*, Maugham was to become one of the most prolific and successful English authors. He achieved sudden and unexpected fame with drama, producing numerous comedies of manners for the London stage. In 1915, Maugham published his most important novel, *Of Human Bondage*; in the same year he was recruited for service as a British agent in MI6, headed by Captain Sir Mansfield Cumming, and sent to Switzerland. After a year he was sent to Russia via the South Pacific, a trip that probably involved some intelligence work en route. Arriving in

Vladivostok, he took the Trans-Siberian Railway to Petrograd (Leningrad), where his mission was to support the government of Aleksandr Kerensky, to keep Russia in the war, and to prevent the Bolsheviks from taking power. As he himself admitted in his autobiography, *The Summing Up* (1938), his mission was a dismal failure. In 1917, he married Syrie Bernardo Wellcome, but the marriage ended in divorce after ten years.

Following World War I, Maugham traveled extensively, gathering material for his fiction. Making his home at the Villa Mauresque on the French Riviera, he continued his prolific production of literature. With the outbreak of World War II, he came to the United States, where he lived until 1946. Although he probably did some work for MI6 during the war, his age and place of residence limited his efforts. After the war, he returned to the Riviera, where he lived for the remainder of his life. Plagued with deteriorating health beginning in his late eighties, Maugham suffered a stroke at Villa Mauresque and died on December 16, 1965, at the age of ninety-one.

ANALYSIS

Ashenden: Or, The British Agent (1928) consists of sixteen stories and sketches bound by the central character, an authorial persona. Ashenden's experiences are based on W. Somerset Maugham's work with MI6 during 1915-1917, though Maugham carefully notes that the accounts are fictional. The name Ashenden, like many in Maugham's work, is common in Kent and was the surname of a schoolmate of the author at King's School in Canterbury. Maugham continued to use the name after the spy series, most notably in *Cakes and Ale: Or, The Skeleton in the Cupboard* (1930), where the authorial persona is given the first name Willie, as Maugham was called by his friends. Ted Morgan reports that sometimes Maugham introduced himself as Willie Ashenden, and there can be little doubt that the author of the stories is closely identified with his hero.

Maugham is noted for introducing the life of the workaday spy or intelligence officer, a hero who is neither heroic nor idealistic. When Ashenden is recruited by R., a British colonel who becomes his chief, the latter narrates a story of a recent event that might

be useful in fiction. An agent meets an attractive woman, forms a liaison with her, and together they go to a hotel room. During the evening she manages to drug him, and when he awakens she and his secret papers are missing. This premise, R. says, should make a good story. Ashenden's response gives the writer's perspective: "We've been putting that incident on the stage for sixty years, we've written it in a thousand novels. Do you mean to say that life has only just caught up with us?" In reality, an agent's work proves far less dramatic. In his preface to a later edition (1941), Maugham points out that intelligence work is often monotonous and uncommonly useless to a writer. To form coherent plots, an author must impose organization and provide logical connections.

Ashenden is more an intermediary than an actor in events; he receives his orders from R. and transmits information to other agents. Sometimes he serves as a supervisor, sometimes as paymaster; at other times his mission is not entirely clear even to himself. He gives the impression that he grasps a small part of a large puzzle while operating in an atmosphere rife with intrigue. When Ashenden is in Switzerland, he serves without pay; he has been told that his success will not be rewarded; thus, his failure will be his own responsibility. Skeptical, detached, analytic, and even cynical at times, he never questions his own loyalty. He would no more think of betraying his nation or its interests than of appearing to be lower class. When he finds out that R. has been receiving reports on his activities, including social ones, he reacts with wry amusement. Among the other characters in the series, only R. recurs with any regularity. Ashenden's chief is humorless and somewhat self-conscious about his lack of culture, but he is cunning, masterful, single-minded, and completely devoted to his profession.

Ashenden is first sent to Geneva with access to codes and a diplomatic passport under the name Somerville. He assures the skeptical Swiss authorities that he has come there only to write a play, since wartime England is in too much turmoil for artistic creation. The Swiss know that their country is filled with spies for both sides and accept the situation, though they are always on the lookout for flagrant and open violations of their neutrality.

“THE FLIP OF A COIN”

The conflicts faced by Ashenden in his role as an agent are revealed in the brief story “The Flip of a Coin,” which Maugham omitted when he prepared the Ashenden material for his volumes of collected short stories. An assassin has approached Ashenden with the idea of killing the King of B., a monarchy allied with Germany, and for the deed he wants five thousand pounds. Ashenden takes the matter to R., who reponds, “It’s not the kind of thing we can have anything to do with. We don’t wage war by those methods. We leave them to the Germans. Damn it all, we are gentlemen. . . .” Shortly afterward he suggests that having the king out of the way would be quite a good thing, and that if from a sense of patriotism anyone chose to arrange it, he could not object. Ashenden snaps back that he would not pay for a mission of that kind out of his own pocket. He then has to resolve the main conflict, deciding whether a saboteur should be sent to blow up German factories. The problem is that many innocent foreign workers would die, a point that Ashenden belabors to the eager saboteur Herbartus. Unable to decide the matter, Ashenden decides to flip a coin, and the story ends without providing the answer. Ashenden’s reflections on war, intrigue, and folly, however, bring him to a pessimistic conclusion: “Man, with so short a time between the cradle and the grave, spent his life in foolishness. A trivial creature!”

“THE HAIRLESS MEXICAN”

In the main, the Ashenden stories narrate the agent’s reactions to people he meets—largely Americans, Russians, or unusual Englishmen—or they deal with his efforts to thwart the German intelligence officers, as in “The Hairless Mexican.” R. Sends Ashenden to accompany an assassin, an exiled Mexican revolutionary, whose mission is to murder a Greek businessman carrying documents of interest to the Germans. The Mexican meets the Greek as he disembarks at Brindisi, Italy, strikes up an acquaintance, and in short order kills the man. Afterward, Ashenden and he search the hotel room in vain for the papers. Ashenden then opens a telegram from R. saying that the targeted individual has not yet left Greece. He turns to the assassin with the scathing remark, “You bloody fool, you’ve killed the wrong man!”

“THE TRAITOR”

Not all the missions are this disastrous. In “The Traitor,” Ashenden meets an Englishman with a German wife, a man discovered to be a traitor. R. simply tells Ashenden to make his acquaintance without any specific directions. By carefully piecing together facts and reaching a logical conclusion, Ashenden discovers that the German officer in charge of his English compatriot has demanded more information of him. The Englishman, Grantley Caypor, asks Ashenden to use his influence to secure for him a place in the Censorship Department in London, since he can no longer bear to shirk the war effort. To avoid anti-German sentiments in England, his wife will remain in Switzerland, though in reality she is there to relay to German agents any information he obtains in England. Ashenden gladly complies with the request, even arranging a visa, knowing that once Caypor has crossed the French border he will be arrested and shot.

“GIULIA LAZZARI”

In “Giulia Lazzari,” Ashenden uses his talent as a writer to secure the arrest of an Indian agitator, Chandra Lal, who stirs resentment among colonial troops from his office in Berlin. Lal has fallen in love with Giulia Lazzari, a Spanish dancer of Italian descent, who tours various European countries. On one tour, R. has her arrested on espionage charges, claiming to possess enough information to imprison her for ten years. Ashenden’s job is to persuade her to lure Lal across the French border in return for her own freedom. Ashenden accompanies her from Paris to Thonon, a town near the Swiss border, and overcomes her opposition to the idea, often dictating letters to the reluctant target. Chandra Lal is persuaded to visit her, crosses the border, is detained, and knowing that he is caught, manages to commit suicide.

“MISS KING”

In several stories, however, Maugham seems more interested in portraying a character or re-creating a setting than in narrating incidents of counter-intelligence. In “Miss King,” an elderly English governess who lives in Ashenden’s hotel suffers a stroke and asks that he come to her in the middle of the night. Ashenden hardly knows her and cannot imagine what she has to tell him. On his arrival, he finds her unable

to speak. Left alone with her by the attending physician, he sits patiently beside her bed, awaiting her recovery. Before morning, she rouses herself with great effort, exclaims "England!" and dies. The story suggests that she only wanted the company of a fellow countryman at the time of her death.

"HIS EXCELLENCY"

In "His Excellency," Ashenden dines with an English ambassador who narrates a lengthy story of lost opportunity in love and a successful career at the expense of an embittered life. Although the ambassador uses pseudonyms, Ashenden recognizes that the story is about the narrator. Among other memorable characters is the American John Quincy Harrington, whom Ashenden meets in Russia. Brimming with confidence, expansive and optimistic, Harrington implicitly believes that his American citizenship is adequate protection anywhere, even amid the chaos of revolutionary Russia, and he ignores the well-intended warnings of Ashenden and his Russian friends. He is killed by a reckless band of soldiers while trying to recover his laundry before leaving Russia. This account ends shortly after the fall of the Kerensky government and the seizure of power by the Bolsheviks, events that mark the failure of Ashenden's (and Maugham's) mission to Russia.

OTHER WORKS

Apart from the Ashenden stories, Maugham's interest in mystery and detective fiction was fitful and scattered. In *A Writer's Notebook* (1949), Maugham recorded many of his notes and sketches from Russia during 1917, and a posthumous publication, *A Traveler in Romance* (1984), includes a character sketch of the Russian terrorist Boris Savinkov. Among his short stories, several deal with murder but usually do not emphasize mystery and crime solving. In "Footprints in the Jungle," a murder results from a love triangle. The killer, though known to everyone, marries his victim's widow, and the two lead normal lives, as there is no adequate proof that he is the murderer. In "The Letter," a woman pleads self-defense to the murder of her secret lover and is acquitted. The story became accessible to a wide audience when a stage adaptation and a film version were made.

With his interest in plot and narration, Maugham

found the detective story enjoyable and highly readable. In his essay "The Decline and Fall of the Detective Story" (in *The Vagrant Mood*, 1952), he explores the genre and praises the hard-boiled detective fiction of Raymond Chandler and Dashiell Hammett. When he was called on to edit anthologies, Maugham often included detective fiction among the selections. In *The Traveller's Library* (1933) he included *Trent's Last Case* (1953) by E. C. Bentley, with a note on detective stories. In *Great Modern Reading: W. Somerset Maugham's Introduction to Modern English and American Literature* (1943), he included stories by John Dickson Carr, Anthony Berkeley, and Dashiell Hammett. He found the genre more meritorious than his short story "The Creative Impulse" suggests; in that account, a female author who has been deserted by her husband turns to detective fiction to make money.

Archer, Stanley. *W. Somerset Maugham: A Study of the Short Fiction*. New York: Twayne, 1993. An introductory survey of Maugham's short fiction, focusing on style and technique of the stories and the frequent themes of how virtue ironically can cause unhappiness, how colonial officials come in conflict with their social and physical environment, and how people are often unable to escape their own cultural background.

Connon, Bryan. *Somerset Maugham and the Maugham Dynasty*. London: Sinclair-Stevenson, 1997. Connon examines the influence that the Maugham family had on the life and works of W. Somerset Maugham. Includes bibliography and index.

Furst, Alan. Introduction to *The Book of Spies: An Anthology of Literary Espionage*, edited by Alan Furst. New York: Modern Library, 2003. Furst's introduction discusses Maugham's place in the exclusive company of literary (as opposed to merely popular) portrayals of espionage in fiction.

Hitz, Frederick P. *The Great Game: The Myth and Reality of Espionage*. New York: Alfred A. Knopf, 2004. Hitz, the former inspector general of the Central Intelligence Agency, compares famous fictional spies and spy stories—including those of Maugham—to real espionage agents and case studies to demonstrate that truth is stranger than fiction.

Meyers, Jeffrey. *Somerset Maugham*. New York: Alfred A. Knopf, 2004. This well-reviewed examination of Maugham's life and work provides comprehensive detail and new insights into his creative process.

Morgan, Ted. *Maugham*. New York: Simon & Schuster, 1980. The first full-scale biography of Maugham and therefore an essential text in all studies of the man and his work. Unlike previous biographers, Morgan enjoyed the cooperation of Maugham's lit-

erary executor and, therefore, is able to correct many distortions in previous studies. Offers a comprehensive account of the private man, including photographs, a complete primary bibliography, and an index.

Rogal, Samuel J. *A William Somerset Maugham Encyclopedia*. Westport, Conn.: Greenwood Press, 1997. Contains information on Maugham's life as well as his works. Includes bibliographical references and an index.

GUY DE MAUPASSANT

Born: Château de Miromesnil, near Dieppe, France;
August 5, 1850

Died: Passy, Paris, France; July 6, 1893

Types of plot: Psychological; inverted

CONTRIBUTION

Between 1880 and 1890, Guy de Maupassant published more than three hundred short stories in a variety of modes, including the supernatural legend, the surprise-ending tale, and the realistic story. Although he is best known for such surprise-ending tales as “La Parue” (“The Necklace”) and is most respected for such affecting realistic stories as “Boule de suif,” literally “ball of fat,” Maupassant also contributed to the sophistication of the traditional horror story by pushing it even further than did Edgar Allan Poe into the modern realm of psychological obsession and madness.

BIOGRAPHY

Henri-René-Albert-Guy de Maupassant was born on August 5, 1850, the eldest son of Laure Le Poitevin and Gustave de Maupassant, both from prosperous bourgeois French families. When Maupassant was eleven, his strong-willed mother obtained a legal separation from her husband. In the absence of her husband, Maupassant's mother assumed an exaggerated importance in his life. The most important masculine figures for Maupassant during his youth were Alfred, his mother's brilliant brother, and Alfred's literary student, Gustave Flaubert. With the death of Alfred at a relatively young age, Flaubert began to have an even more significant role, encouraging the young Maupassant to write.

Maupassant's education was aimed at training him for a career in the law, and after a brief period of military service during the Franco-Prussian War he was given a position in the Naval Ministry. However, under the tutelage of Flaubert he began to publish poetry and stories in various obscure journals. He also became part of a group of literary figures—which included Alphonse Daudet, Émile Zola, and Ivan Turgenev—that met regularly at Flaubert's home. In 1880, with the publication of “Boule de suif,” a tale that Flaubert praised extravagantly, Maupassant ceased working for the government and devoted himself completely to his writing. In the next ten years, he wrote numerous articles for newspapers, published more than three hundred short stories, and wrote six novels.

Many critics believe that Maupassant's best-known mystery story, “Le Horla” (“The Horla”), a first-person account of psychological hallucination, was the first indication of the madness (caused by syphilis) that eventually led to his death. In the last few years of his life, his eyesight weakened, his memory failed, his thinking became erratic, and he suffered from delusions. After undergoing several unsuccessful treatments for his disease and even attempting suicide, Maupassant was incarcerated in a sanatorium, where he died on July 6, 1893.

ANALYSIS

Although Guy de Maupassant is not known as a master of the detective genre, many of his stories fall within the tradition of the mystery tale developed by Edgar Allan Poe. After beginning with the supernatural legend and the revenge tale, Maupassant created

stories of madness and obsession and thus helped to develop the mystery tale from its focus on unknown forces existing outside the self to uncontrollable forces originating within the mind of man. Consequently, he was part of a larger movement that helped bring the short story as a genre into the twentieth century.

“THE HAND”

Maupassant’s mentor Flaubert encouraged the aspiring poet to turn to writing short stories, for the form was very popular at the time, and magazine publishers had been buying short tales since the 1860’s. Maupassant’s first published story, “La Main d’écorché” (“The Skinned Hand”), later reworked in 1883 as simply “La Main” or “The Hand,” belongs to a tradition of supernatural short fiction that is as old as legend itself; in its 1883 reworking, however, Maupassant grounds it within the revenge-tale tradition popularized by his

countryman Prosper Mérimée, while at the same time making the story an ironic comment on supernatural fictions. The narrator, a Corsican police magistrate quite familiar with cases of vendetta, revenge, murder, massacre, and hatred, tells of an Englishman living in Corsica who has a dried human hand mounted and chained on his wall. When the Englishman is found murdered, the hand is gone—but a finger is found between his teeth. Later, when the hand itself is found on the Englishman’s grave, as is usual with such supernatural stories, one of the fingers is missing. Although the narrator explains that perhaps the owner of the hand has come to exact revenge on the Englishman, his listeners are not satisfied with such a rational answer, preferring instead the more grisly supernatural one.

There are other stories of savage revenge and the supernatural in the Maupassant canon—such as “Une Vendetta” (“The Vendetta”), in which a Corsican widow teaches her dog to kill to exact a fearful vengeance on the murderer of her son, and “Apparition” (“The Specter”), in which a man confronts the ghost of a young woman who urges him to comb and braid her long hair. Nevertheless, the Maupassant stories that more properly belong within the tradition of the mystery tale are the group of short pieces focusing on madness, hallucination, and murder. The primary stories in this group are: “Fou?” (“Am I Insane?”), “Lui?” (“He?”), “La Peur” (“Fear”), “Un Fou” (“The Madman”), “Lettre d’un fou” (“Letter from a Madman”), and “The Horla.”

The predominant mode of these stories is not the manifestation of the ghostly supernatural in the traditional sense; instead, the stories focus on some mysterious dimension of reality existing beyond that which the human senses can perceive. Yet despite this realm of reality being justified rationally, the reader is never sure whether it truly exists “out there” in the world of the story or is a product of the obsessive mind of the narrator. The style of several of these tales is reminiscent of some of the works of Poe, particularly the stories of the perverse that combine narrative story line with narrator’s quasi-philosophical considerations of madness, murder, and the mysterious realm beyond the pale of ordinary understanding.

Guy de Maupassant. (Library of Congress)

“LETTER FROM A MADMAN”

The story that focuses most explicitly on this realm is “Letter from a Madman,” parts of which were used later in the more famous story “The Horla.” As told by the narrator to a doctor, the story unfolds a theory that the human mind receives only sparse and uncertain information about the external world because the limitations of the five senses restrict perception. The narrator argues, for example, that if humans had additional senses, they could perceive a reality that is closed to their present senses. From this assumption he tries to infer, rather than directly perceive, the mysterious, impenetrable world that lies all around. As a result, he believes himself to be in the presence of noncorporeal beings, although he does not actually have the sense organ that would make it possible for him to “see” them. Once, while sitting in front of a mirror, he could not see himself, for the invisible thing stood between him and the mirror and blocked his reflection. Since that time, he has spent hours before his mirror, going mad waiting for “It” to return, knowing that he will wait until death.

“HE?”

The story “He?” is similar to “Letter from a Madman” in its focus on some unseen but felt presence; it differs thematically, however, in that it emphasizes the appearances of the apparition as a result of the narrator’s loneliness, and it differs stylistically in that it features a more developed narrative with less discursive meditation. “He?” is very similar to stories by Poe that focus on the fear of fear itself and that emphasize the power of hallucination. The narrator acknowledges that he suffers from the disease of fear, an incomprehensible terror that causes him to fear the very madness or confusion of mind that constitutes the fear itself. He describes entering his room after a walk and seeing a man sitting in his chair before the fire. When he reaches out to touch him, there is nothing there. Although convinced that the figure was obviously a hallucination, he cannot shake the fear that it will appear again. Even though he knows that it does not exist except in his own apprehension, he cannot escape that apprehension. In both of these stories, it is the narrators’ own intense self-consciousness that constitutes their insanity; they push what they consider to be reasonable assumptions to such extremes that the inevita-

ble result is madness—that is, the perception of a state of being that exists outside the normal everyday limits of human experience, perception, and thought.

“AM I INSANE?”

In “Am I Insane?” and “The Madman,” Maupassant’s focus is on how an obsession becomes so powerful that it is translated into murderous action. In “Am I Insane?” the simpler of the two, the narrator loves a certain woman to madness. He also hates her passionately, however, for he knows that she is impure and without a soul; he intensely desires both to possess her and to kill her. When she tires of him, he becomes insanely jealous, determines that her horse (which she rides enrap-tured) is his rival, and executes it with a bullet to the brain before also killing his mistress. His madness is similar to the meaningful madness in many Poe stories; there is some basis for the narrator’s jealous obsession, both figuratively in the powerful male symbolism of the horse and literally in the narcissism and autoeroticism that the woman’s daily rides suggest.

“THE MADMAN”

In “The Madman,” Maupassant carries to extremes the concept of madness resulting from carrying a line of reasoning to its ultimate conclusions. The story consists of the journal entries of a dead judge who always seemed to know the secret hearts of criminals. Over and over again, he considers the pleasure there must be in killing. He justifies his obsession in long discursive passages in which he wonders why it is a crime to kill when killing is indeed the law of nature; inevitably, he puts his theories into action. Equating his desire to kill with the power of sexual passion, he describes in graphic detail, reminiscent of the Marquis de Sade, his murder of a young boy by strangulation and his killing of a fisherman by splitting his head open with a spade. After he sentences the fisherman’s nephew to death for the murder that he himself committed, he describes watching the boy’s head being chopped off and wishing that he could have bathed in the blood. Although the ostensible theme of the story is that many such madmen exist secretly in society, the predominating motif is the notion philosophically examined by Friedrich Nietzsche and fictionally explored by Fyodor Dostoevski that killing is the nearest thing to creation.

“THE HORLA”

Of all the Maupassant tales that focus on madness, hallucination, obsession, and the mystery of a dimension beyond the senses, the most sustained and deservedly the most famous is “The Horla.” Although many critics point to the autobiographical elements in this story (for during its writing Maupassant was possessed by his increasing madness), others suggest that the work stands on its own merits as a masterpiece of psychological horror. Told by means of diary entries, the story charts the protagonist’s growing awareness of his own madness as well as his understanding of the process whereby the external world is displaced by psychic projections.

The story begins with many of the same themes that Maupassant had earlier developed in “Letter from a Madman,” at times using much the same language as that story. The narrator begins considering the mystery of the invisible, the weakness of the senses to perceive everything in the world, and the theory that if there were other senses, one could discover many more things about the world around human life. The second predominant consideration here is that of apprehension, a sense of some imminent danger, a presentiment of something yet to come. This apprehension, which the narrator calls a disease, is accompanied by nightmares, a sense of some external force suffocating him while he sleeps, and the conviction that there is something following him; when he turns around, however, there is nothing there.

This sense of something existing outside the self but not visible to the ordinary senses is pushed even further when the narrator begins to believe that there are actual creatures who exist in this invisible dimension. This conviction is then developed into an idea that when the mind is asleep an alien being takes control of the body and makes it obey. These ideas then lead easily into the concept of mesmerism or hypnosis, for under hypnosis it seems as if an alien being has control of actions of which, when he is awake, he has no awareness. Although the narrator doubts his sanity, he also believes that he is in complete possession of all of his faculties; he becomes even more convinced that an invisible creature is making him do things over which his mind has no control. Thus, he

finally believes that there are Invisible Ones in the world, creatures that have always existed and that have haunted humankind even though they cannot be seen.

The final event to convince him of the external, as opposed to the psychological, existence of the creatures, is a newspaper article about an epidemic of madness in Brazil in which people seem possessed by vampirelike creatures that feed on them during sleep. He remembers a Brazilian ship that sailed past his window and believes that one of the creatures has jumped ship to possess him. Now he knows that the reign of humankind on earth is over and that the forces of the Horla that mankind has always feared—forces called spirits, genies, fairies, hobgoblins, witches, devils, and imps—will enslave man.

Finally, in a scene taken from “Letter from a Madman,” he “sees” the creature in the mirror when its presence blurs his own image by coming between him and the mirror. He decides to destroy the creature by locking it in his room and burning his house to the ground. As he watches the house burn and realizes that his servants are inside, he wonders if indeed the Horla is dead, for he considers that it cannot, like humans, be prematurely destroyed. His final thought is that because the Horla is not dead he shall have to kill himself; the story ends with that decision.

“The Horla” becomes distinctive with the increasing need of the narrator to account for his madness as being something external to himself. This universalizes the story, for human beings have always tried to embody their most basic desires and fears in external but invisible presences called gods, devils, and spirits. “The Horla” is a masterpiece of hallucinatory horror because it focuses so powerfully on that process of mistaking inner reality for outer that is the very basis of hallucination.

Because of his ability to transform the short mystery tale from a primitive oral form based on legend into a sophisticated modern one in which the mystery originates within the complex mind of man, Maupassant is an important figure in marking the transition between the nineteenth century tale of the supernatural and the twentieth century short story of psychological obsession.

Sullivan, Edward. *Maupassant: The Short Stories*. Great Neck, N.Y.: Barron's, 1962. A pamphlet-length introduction to some of Maupassant's basic themes and story types. Particularly helpful are Sullivan's attempts to place Maupassant's short stories within their proper generic tradition.

Wallace, Albert H. *Guy de Maupassant*. New York: Twayne, 1973. Wallace presents an excellent analysis of recurring themes in Maupassant's major works. He discusses with much subtlety Maupassant's representations of war and madness. This well-annotated book is an essential introduction to the thematic study of Maupassant's major works.

ARCHER MAYOR

Born: Mount Kisco, New York; July 30, 1950

Type of plot: Police procedural

PRINCIPAL SERIES

Joe Gunther, 1988-

PRINCIPAL SERIES CHARACTERS

JOE GUNTHER is a police lieutenant in Brattleboro, Vermont, who eventually becomes head of the Vermont Bureau of Investigation. He is a thoughtful man of simple tastes, not given to strong expression or violent gestures. Years after his first wife succumbed to cancer, Joe becomes involved with Gail Zigman, a woman of strong character who is in many ways his opposite: She is a vegetarian, while he prefers pre-packaged convenience foods; she works in the public eye, while Gunther prefers to work behind the scenes. Gunther's sensitivity to the thoughts and actions of those around him is perhaps his greatest strength, often leading to the inspiration or insight that solves the case.

WILLY KUNKLE, Gunther's colleague, is in many ways his foil as well. Impulsive in word and action, Kunkle is as abrasive as Gunther is unassuming. Although both men have their demons, they react to them differently. A former New York City police officer, Kunkle has a checkered past: He has lost the use of his left arm because of a bullet wound, and he is known to have been a heavy drinker and to have abused his wife.

CONTRIBUTION

Aside from the intricate but never unduly convoluted plots, the most noticeable quality of Archer Mayor's Joe Gunther novels is their strong evocation of—and affection for—their setting, Vermont. Mayor's familiarity with the small New England state is evident throughout the novels. The appearance of the landscape and the character of the towns and their inhabitants are Mayor's concerns as much as are the infrequent crimes he describes and the understaffed law enforcement agencies that solve them. Mayor is very much a regionalist.

Although it is one of his most interesting characteristics, Mayor's allegiance to Vermont is also one of his greatest challenges. In choosing to set more than a dozen murder mysteries in a small, sparsely populated state that has averaged no more than seven murders a year, Mayor has set himself a difficult task; it is a testimony to his talent that he has kept the novels fresh and the plots credible. Most of his early novels are set in Brattleboro, but later in the series, Mayor broadens his canvas to include all of Vermont. Occasionally, Gunther travels to cities such as Newark or Chicago to solve Vermont-based crimes. Mayor has stated that he likes to work in Vermont because it is a small state where everybody is aware of everybody else. For some characters in his novels, this ease of access to local and state authorities is a blessing; for others, the lack of anonymity is a curse.

In an interview, Mayor listed a number of authors whose work he enjoyed, and in many cases their influence on him is evident: Arthur Conan Doyle, Dashiell Hammett, Raymond Chandler, Maurice Leblanc, Georges Simenon, and Ross Macdonald are some of these authors. Mayor, however, synthesizes these influences and takes them in a different direction, in part with the small-town and rural settings he uses, and in part with the very nature of his protagonist. Joe Gunther does not have the flamboyant or strong personality of many protagonists in detective fiction; he is a man of strong character but not overpowering characteristics.

Mayor's Joe Gunther books have received positive reviews in major newspapers as well as in publications devoted to mystery and detective fiction. He is also a recipient of the New England Book Award for fiction from the New England Booksellers Association.

BIOGRAPHY

Born on July 30, 1950, on a farm in New York, Archer Huntington Mayor traveled widely in his youth and amassed a breadth of experience that has served him well as a writer. Mayor has stated that before the age of thirty, he never lived for more than four years in

the same locale. In 1980 he came to live in Vermont and in 1982 moved near Brattleboro, the town that would provide the setting for most of the novels in the Joe Gunther series. He later moved to Newfane, Vermont. Mayor has stated that moving from place to place gave him a sociologist's ability to "read" a place or situation quickly and go about fitting in; this ability surely came in handy when he returned to the United States for college after having been raised largely abroad, and it is an ability his protagonist, Joe Gunther, has in abundance.

Mayor held a variety of jobs before becoming a full-time novelist. He studied history at Yale and is the author of at least one nonfictional historical work published by an academic press: *Southern Timberman: The Legacy of William Buchanan* (1988). He has stated that in addition to writing history, he worked as a scholarly editor, a political advance man, a theater photographer, a newspaper writer and editor, a lab technician, and a medical illustrator. He also made several attempts at writing novels, which he later dismissed as "typing."

From this wide range of formative experiences, Mayor gained skills that would serve him well in his career as a novelist; persistence was not the least of these. His training as a historian is evident in the plots of several of his novels that feature the piecing together of cold cases, as well as in his meticulous documentation of the people and locales of Vermont. Although he has joked that his work as a writer of political advertisements taught him how to be a good liar, his awareness of and sensitivity to politics is a significant quality in his novels: The ambition and sometimes corruption of elected officials such as state attorneys, town selectmen, and even governors, frequently play important roles in Mayor's plots. Mayor's training as a journalist reveals itself in the sympathetic portrayal of Stanley Katz, a hard-nosed but principled newspaper writer and later editor who is a recurring character in Mayor's novels. Mayor also has attributed his ability to write to deadline and to overcome writer's block to his journalistic training and experience.

Although Mayor has been a full-time novelist for many years, he has also served his community in ways that clearly enhance his fiction. He has worked for

many years as a volunteer firefighter and emergency medical technician for the Newbrook Fire Department in his home of Newfane. He has worked in Vermont law enforcement as a town constable and as a part-time patrol officer for the town of Bellows Falls, close to the New Hampshire border. He is also an assistant medical examiner for the state of Vermont, where his job is to investigate and document all unattended deaths. He has stated that he becomes a mini-biographer of the deceased, in addition to helping the survivors begin the grieving process. Mayor participates in writers' conferences and workshops around the Northeast.

ANALYSIS

Like many other series, Archer Mayor's Joe Gunther novels are loosely connected but ultimately, discrete, stand-alone episodes in the life of the protagonist. The books can be read out of order or individually without detriment to understanding or enjoyment. Readers who approach the novels sequentially, however, will enjoy following the stories of several of the supporting characters. Although Gunther is the protagonist of most of the novels, he seems to change relatively little. This is not surprising as most of the novels are told from his point of view, whether they are narrated in the first person, as are the earlier novels, or in the third person, as they are from *The Sniper's Wife* (2002) forward. Gunther directs his attention outward, not inward.

Although Gunther is at the center of the series and his backstory is painted in considerable detail, he is not described physically. This was a conscious decision on Mayor's part; he has left the physical details of his protagonist vague so that the reader becomes a participant in the creation of the character. In *Scent of Evil* (1992) it is revealed that he hails from Thetford Hill, a town on the eastern side of Vermont, and was not a particularly ambitious young man. A voracious reader, he was content to stay around the farm, though it is his brother Leo who eventually stays home to care for their aging mother. Like Mayor himself, Gunther becomes something of a nomad early in life. After fighting in the Korean War and attending college in California, he returned to Vermont, where he married Ellen, who has died of cancer by the time the novels begin.

In the earlier novels, when Gunther is the lieutenant in charge of the Brattleboro detective squad, the cast of supporting characters remains fairly constant. They include Tony Brandt, the chief of police, who is supportive of Gunther and adept at negotiating the often troubled political waters of Brattleboro and soothing the friction between the state's attorney and the cops on the street. Willy Kunkle, an antihero who is the protagonist of *The Sniper's Wife*, is the darkest recurring character in the series, yet he is Gunther's most trusted sidekick when it comes to action. J. P. Tyler is a studious detective who has been trained in forensics; he is the fastidious custodian of the crime scene, and he is happiest in his makeshift lab, examining the garbage or personal effects of suspects and victims. Ron Kleszczewski is the youngest and most idealistic member of the department; he is serious and detail-oriented, with a head for paperwork and computers. Although he is insecure, Gunther supports and grooms him, and after the creation of the Vermont Bureau of Investigation removes Gunther from the Brattleboro force, Kleszczewski takes over the detective squad. Sammie Martens, the only female detective in a squad of men, is similarly enthusiastic and often comes close to overcompensating. Her youthful athleticism occasionally shows up the negative effects of Gunther's sedentary middle-aged lifestyle in crisis situations, as in, for instance, *Fruits of the Poisonous Tree* (1994).

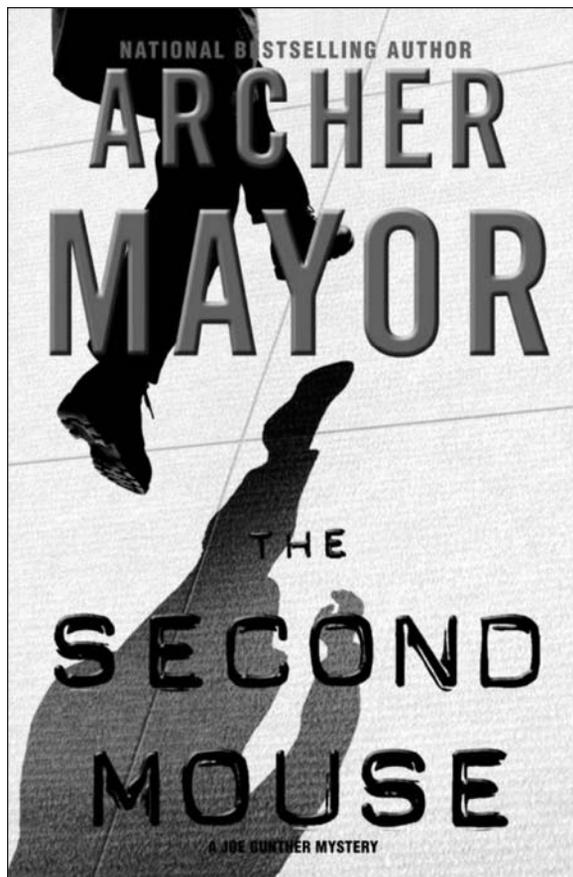

The most significant interpersonal relationship in the Joe Gunther novels, however, is not between police officers but between Gunther and his longtime lover, Gail Zigman. In the earliest novels, she is a realtor who is elected to the position of selectwoman (a member of the town's ruling council). Through the course of the novel, her career follows a steady upward trajectory. She serves as a volunteer at a women's crisis center and, after earning a law degree, becomes a prosecutor in the state attorney's office. Eventually she is elected to the state senate. Her relationship with Gunther is exclusive and long-term, if often precarious. In many ways, they are opposites: She is a vegetarian with liberal political leanings, while Gunther is resolutely moderate. He respects Gail and seems almost to be in awe of her. By *The Second Mouse* (2006), their relationship appears to be over.

As can be seen from the progression of Gail's career, time does pass in Mayor's Vermont. Gail goes from realtor to state senator. Stanley Katz, the crime reporter for the local paper, leaves for a job in a neighboring town but is lured back to his original employer, becoming editor of the town paper. In later novels, Willy Kunkle and Sammie Martens slowly develop an unlikely romantic relationship.

Other, larger changes also take place, almost in the backdrop of the individual mysteries. Political challenges abound; the state's attorney is under constant threat of losing the next election and must court public opinion while prosecuting his cases. Gunther himself, in *Occam's Razor* (1999), is drawn into a political quagmire over the creation of a new law enforcement agency with statewide jurisdiction and some degree of oversight. His promotion to a leadership position within the Vermont Bureau of Investigation further complicates his reluctant support of the measure, as earns it him varying degrees of hostility from his erstwhile peers in agencies across the state.

Mayor has said that to him, mysteries are less about puzzle than they are about process, as befits the police procedural subgenre. He is more interested in character than in the convolutions of plot. Although the crimes described in his novels are frequently sensational, even horrific, they remain within the bounds of credibility. It is clear in the Joe Gunther novels that Mayor is interested in the motivations that drive his characters' actions. He has indicated that the germ of each novel is the antagonist and that person's motivation. He decides who committed the crime and why, and lets the narrative develop around it organically rather than working from a strict outline.

People are seldom all good or all evil in Mayor's novels, and the author and his protagonist Joe Gunther both seem highly attuned to wide range of effects people have on one another. In the earlier novels, in which Gunther is the narrator, this is handled very adroitly; many of the insights that lead Gunther to the solution of a case come from his almost preternatural awareness of how his words and actions make other people feel. In the later novels, the third-person narrator's allusions to Gunther's sensitivity to the feelings of those around him may seem out of keeping with a character

in his position, but it is that quality that makes Gunther both unique and credible as the protagonist in an extended cycle of detective novels.

OPEN SEASON

In *Open Season* (1988), the first Joe Gunther novel, Gunther investigates the murder by a widow of a wealthy young man who is looking for his dog and the assault on a young woman by a man wearing a ski mask. He finds these incidents are linked because three years ago the widow and the woman both served on a jury that found a Vietnam veteran guilty of killing a young woman. Gunther is discouraged from pursuing the case; the man in the ski mask pursues him and he is injured in an auto accident in which the police chief dies. The climactic scene is in a snowstorm, and Mayor tidily wraps up the ends and reveals the identity of the masked man.

THE SECOND MOUSE

In *The Second Mouse*, the seventeenth book in the series, Gunther senses something strange about Michelle Fisher's death. When he tries to get an autopsy done, however, he runs into political problems that keep medical examiner Beverly Hillstrom from doing her work. Gunther is presented with another challenge involving Mel Martin, a petty criminal who is aiming to become a big-time player with his wife, Nancy, and friend Ellis, who may have other ideas. Mayor skillfully plays out the moves in each case, as readers wonder if and how these cases may be related.

Mayor speaks about his life and his writing, saying his writing is fueled by "ignorance and curiosity." Although his early life was nomadic, he states that he identified with his father's New England roots and therefore settled in Vermont.

JAMES MELVILLE

Roy Peter Martin

Born: London, England; January 5, 1931

Also wrote as Hampton Charles; Peter Martin

Types of plot: Police procedural; espionage

PRINCIPAL SERIES

Superintendent Otani, 1979-

Miss Seeton, 1990-

Ben Lazenby, 1994-

PRINCIPAL SERIES CHARACTERS

TETSUO OTANI is the middle-aged superintendent of the Hyogo Prefectural Police, headquartered in the large, western Japanese city of Kobe. He is traditional in outlook, and although by no means a supersleuth, he is highly skilled as both an administrator and a criminal investigator.

HANAE OTANI, his wife, is ten years younger than he and is a fairly typical Japanese woman of her generation, traditional but with some modern tendencies. She frequently functions in the role of confidante when her husband is working on a case.

AKIKO SHIMIZU, their daughter, is married to Akira Shimizu, and they have a son named Kazuo. The Shimizus appear periodically throughout the series and figure prominently in at least two of the books.

JIRO KIMURA is one of Otani's two main assistants.

Born and raised partially in the United States, he speaks fluent English. He is urbane, flamboyant, a flashy dresser, and a ladies' man. He is particularly skilled in dealing with foreigners.

NINJA NOGUCHI, the second of Otani's two principal assistants, is a gruff, scruffy-looking fellow whose particular skills lie in his understanding of and connections to the Japanese underworld.

MISS SEETON is the principal character in the Miss Seeton mystery series, originated by the British author Heron Carvic.

BEN LAZENBY figures in two spy/espionage mysteries set in Eastern Europe. The books use the author's experience in that region as a cultural diplomat in the early 1970's.

CONTRIBUTION

James Melville began his Superintendent Otani mystery series with the publication of *The Wages of Zen* in 1979. The series reflects an interest in Japan resulting from the author's posting there as a cultural diplomat in the 1960's as well as his long-time interest in mystery fiction.

The Otani series falls into the police procedural genre of mystery writing. Otani is by no means a great detective but is extremely competent in directing the

operations of a large Japanese prefectural police department. Melville employs both realism and humor in his work, and he uses highly innovative plots and an interesting array of characters that together provide a rich vehicle for the exploration of cultural differences between Japan and the West. His work has been well received critically and has been compared to the classic works of Georges Simenon as well as to the writings of such modern authors of the ethnic mystery as H. R. F. Keating, Tony Hillerman, and James McClure.

Although Melville has done other mystery writing and has published works in other literary genres, it is the Otani series that forms the basis for his reputation.

BIOGRAPHY

James Melville was born Roy Peter Martin in London on January 5, 1931. Coming from a working-class background—his father, Walter, was a postal worker and his mother, Annie Mabel, a dressmaker—he was educated at Highbury Grammar School (1942-1948) and then at Birkbeck College, University of London, where he completed a bachelor's degree in philosophy with honors in 1953. His university studies were interrupted by two years of service in the Royal Air Force Education Branch from 1950 to 1951. During the years before and after military service, he worked as a local government officer for the London County Council, and after university graduation, he was employed as a schoolteacher. In 1954 he returned to Birkbeck College, and he completed a master's degree in political philosophy there two years later. After working as deputy publicity officer for the Royal Festival Hall (1956-1960) and doing additional graduate study (1958-1959) at the University of Tübingen in West Germany, he took a position in 1960 with the British Council, working in the area of cultural diplomacy. It was this work that would eventually take him to Japan, the setting for his famous Superintendent Otani mysteries.

After first being assigned in Indonesia for three years, Melville began the first of two tours in Japan as a cultural diplomat in 1963, when he was appointed director of the British Cultural Institute in Kyoto. He quickly fell in love with Japan. His first book, *Japanese Cooking*, written with his second wife, Joan Martin, was published in 1970. After leaving Japan in

1970, his next overseas assignment was with the British embassy in Budapest, where he served two years (1972-1973) as a cultural attaché. Although less influential in his later writing than the time spent in Japan, his Hungarian experience provided the background for two later spy/espionage novels, *Diplomatic Baggage* (1994) and *The Reluctant Spy* (1995).

After spending several years in London in the mid-1970's, Melville returned to Japan in 1979, serving as a cultural counselor with the British embassy in Tokyo. In this same year, the first of the Superintendent Otani mysteries, *The Wages of Zen*, was published under the pen name James Melville, which the author later said combined the names of his sons, Adam Melville Martin and James Peter Martin. Melville wrote the book in London in the 1970's, and it became the basis of a substantial series. Melville remained in Japan in his second diplomatic posting until 1983. After his return to England, he dedicated himself full-time to his literary career.

In addition to the Superintendent Otani mysteries and the other works mentioned, Melville is the author of two historical novels set in Japan, *The Imperial Way* (1986) and *The Tarnished Phoenix* (1990), and a non-fictional work, *The Chrysanthemum Throne: A History of the Emperors of Japan* (1997, under the name Peter Martin). Under the pseudonym Hampton Charles, he wrote three books in the Miss Seeton mystery series (originated by Heron Carvic): *Miss Seeton, by Appointment* (1990), *Advantage, Miss Seeton* (1990), and *Miss Seeton at the Helm* (1998).

Melville was married to Marjorie Peacock (1951-1960) and Joan Drumwright (1960-1977), with whom he had two sons, Adam and James, before marrying Catherine Sydee in 1978.

ANALYSIS

The Superintendent Otani mysteries are an outgrowth of James Melville's love of mysteries, especially the works of Dashiell Hammett and Raymond Chandler, and his interest in discovering a vehicle for the discussion of cultural differences between Japan and the West. He first attempted writing in the genre in London in the mid-1970's, when he produced a draft of the work that was later to become, with consider-

able revision, the second book in the Otani series, *The Chrysanthemum Chain* (1980). In the original manuscript, Otani appeared only briefly as a minor character, but over time his significance for the author grew, and he became the linchpin of the series. *The Chrysanthemum Chain* also featured a young British diplomat named Andrew Walker, who was probably modeled at least in part on the author. Walker appears only in that book.

THE WAGES OF ZEN

The Wages of Zen, the first book in the Otani series, introduces the principal characters as well as some plot devices and many of the stylistic elements that characterize the series. The principal characters are Tetsuo Otani, superintendent of the Hyogo Prefectural Police, and his two main assistants, Jiro Kimura and Ninja Noguchi. Melville presents Otani's family: his wife, Hanae, and their married daughter Akiko and her husband, Akira (although Akiko and Akira are mentioned only briefly, they figure more prominently in later volumes in the series). The author uses the family members to provide glimpses into Japanese domestic life, weaving in both modern and traditional elements.

The plot, which involves the murder of a foreigner living at a Zen Buddhist temple where a number of other foreigners also reside, demonstrates a fairly common plot device found in the series, one that serves to create a high level of interaction between Japanese and non-Japanese characters. Most of the books in the series are about crimes involving foreigners. This allows Melville to introduce a wide range of foreign types into his works. In this book, for example, Melville inserts two American women, one of whom is African American; a British woman; a young Danish man; and an Irish Catholic priest.

The Wages of Zen also employs a narrative technique found in many of the books in the series, that of shifting back and forth, chapter by chapter, between the stories and perspectives of Japanese and non-Japanese characters. Melville has described his use of this technique as a way of accentuating the cultural differences between the two sets of characters.

The book, like the others in the series, contains numerous examples of Japanese traditions and practices that serve to create a sense of the often unusual (from a

Western perspective) character of everyday life in Japan. These include eating rice crackers wrapped in a strip of seaweed, using a Japanese squat toilet, and sleeping on mats on the floor. These small touches often serve to introduce a humorous tone into his works, as characters on both sides of the cultural divide attempt to understand the differences they are experiencing.

SAYONARA, SWEET AMARYLLIS

The plots of the Otani series generally follow chronologically in the order in which they were written. (The only major exception is *A Haiku for Hanae*, 1998, which is set in 1968 and is written in the form of a flashback.) This chronological sequencing allows the author to add to the background of his principal characters as the series progresses and in several instances to use an earlier character as a central figure in the plot of a later book. A good example of this occurs in *Sayonara, Sweet Amaryllis* (1983), the fifth book in the series, where additional information regarding Otani's subordinate Ninja Noguchi is provided and this individual plays an important role in the plot. During the course of the narrative the reader learns that Noguchi has been involved in a longtime relationship with a Korean woman—a cultural taboo in Japan where Koreans continue to have second-class status—and that the son they had together is now involved in a drug-smuggling ring linked to a murder. Noguchi must stand by powerlessly while his son is eventually arrested by Otani. In *The Reluctant Ronin* (1988), Otani's own son-in-law becomes a suspect in the murder of a Dutch woman. The gradual development of the series characters enhances their interest and makes reading the books in the order they were written worthwhile.

DEATH OF A DAIMYO

Death of a Daimyo (1984), the sixth book in the series, reverses the setting in which the author's exploration of cultural differences between Japan and the West occurs. Otani and his wife travel to England to visit their daughter, son-in-law, and young grandchild, who are living there. During the visit, Otani becomes involved in the investigation of the murder of a prominent Japanese businessman that occurs in this foreign locale. Otani must oversee a highly complex investigation that has connections back to Japan. The story line

thus reverses the pattern of Westerners viewed against the backdrop of Japanese culture, with the Otanis now representing the foreign side of the intercultural equation. The book offers an opportunity to see the chief character in the series interacting with Japanese living abroad and with the heads of foreign police departments, and it provides numerous chances to observe cultural differences from the perspective of first-time Japanese travelers in a foreign country. A few of these cultural oddities are Western-style beds, the oversized portions served in British restaurants, and the Western customs of paying by check rather than cash and of tipping for service. In this way, *Death of a Daimyo* offers an interesting variation on the topic of exploring cultural differences and provides an opportunity to see Superintendent Otani working and traveling in a foreign environment.

THE BODY WORE BROCADE

In *The Body Wore Brocade* (1992), the thirteenth book in the series, major changes in both character development and narrative technique occur. First, Otani is now retired from active police work, and second, the book, unlike the previous twelve in the series, uses a first-person narrative form. In a fictional foreword, Melville informs the reader that Otani has somewhat reluctantly given in to his request to provide a firsthand account of this investigation, which may be his last. Melville, does, however, hold out the possibility that Otani, who at the time of the book's writing is serving as a special consultant to the National Police Force of Japan, may again return to active criminal investigation.

The story that follows, told in Otani's own words, includes a number of additional elements of character development. At the beginning of the book, Otani describes an argument with his wife during which she accuses him of being crabby and contentious and threatens to leave him. This puts him into an introspective mood, and he reflects on the course and purpose of his life. Then, he is shot by a sniper and severely wounded, and this too contributes to the introspective tone of the work. The use of the first-person narrative, combined with Otani's advancing years, provides a deeper look into the inner workings of his character than is found in the earlier books of the series.

MARGARET MILLAR

Born: Kitchener, Ontario, Canada; February 5, 1915

Died: Santa Barbara, California; March 26, 1994

Also wrote as M. Sturm

Types of plot: Psychological; inverted

PRINCIPAL SERIES

Dr. Paul Prye, 1941-1942

Inspector Sands, 1943-1945

Tom Aragon, 1976-1982

PRINCIPAL SERIES CHARACTERS

DR. PAUL PRYE is a youngish, very tall and very bookish (his favorite author is William Blake) psychoanalyst who tends to get involved in murder mysteries. A bit clumsy but quick on the repartee, Prye attracts and is attracted to beautiful women.

INSPECTOR SANDS is both less flamboyant and less visually conspicuous than Paul Prye. He is described as "a thin, tired-looking middle-aged man with features that fitted each other so perfectly that few people could remember what he looked like." Inspector Sands is with the Toronto Police Department and has almost as much trouble keeping his police cohorts in line as he has with the ingenious murderers prowling the streets of Toronto. He is, however, always successful, thanks to his intelligence and quiet insistence.

TOM ARAGON, though a series character, has greater depth than Prye or Sands, and his books hold a darker tone more in keeping with the artistic psychological thrillers that Millar had developed by that time. A young Hispanic lawyer, Aragon is very junior in his firm, and his talents at detection are sometimes tried by uncertainty or moral doubts about the investigation.

His chief emotional support is his wife, Laurie MacGregor, with whom he has a modern, long-distance relationship, as she lives and works in another city; their frequent phone conversations help him clarify aspects of his cases.

CONTRIBUTION

Margaret Millar began her writing career with three successive novels about the amusing psychoanalyst-detective Dr. Paul Prye, but she became successful when she decided to make the psychological profiles of demented criminals and their victims her focus. With *The Iron Gates* (1945), her sixth book, Millar scored her first major success. The book centers on the effect that the monsters of fear can have on the mind of an outwardly happy, well-adjusted, well-to-do woman.

After *The Iron Gates*, Millar wrote more than a dozen books of suspense, most of which have been both critically acclaimed and commercially successful. She helped turn the psychological thriller into an art form, and she created books brimming with three-dimensional characterizations: real, breathing people, portrayed in crisp, vivid prose.

Millar's novels are concerned with the inner life of the individual, with the distortions of reality that psychopathology and stressful situations can forge in the mind. Although Millar did not focus as heavily on social analysis as did her husband, Ross Macdonald, her novels do present current social concerns whose treatment deepens over the span of her work. Her characters exist in Freudian microcosms, shaped and determined by their significant relationships: parent/child, husband/wife, brother/sister.

BIOGRAPHY

Margaret Millar was born Margaret Ellis Sturm in Kitchener, Ontario, Canada, on February 5, 1915, to Henry William Sturm and Lavinia Ferrier Sturm. Young Margaret's first love was music. She studied the piano from an early age and became an accomplished player, giving recitals when she was still in high school. At the Kitchener-Waterloo Collegiate Institute, she was a member of the debating team, along with Kenneth Millar, who would later become her husband. Their first stories appeared together in their high school magazine, *The Grumbler*, in 1931. While attending the University of Toronto from 1933 through 1936, Margaret majored in classics and developed a lifelong interest in psychology that would figure strongly in her work. She and Kenneth Millar were married on June 2, 1938, after his graduation from the same university.

After the birth of her only child, Linda Jane, in 1939, Millar was ordered to remain in bed because of a heart ailment. An invalid for some time, she began to write mysteries, achieving early success with *The Invisible Worm* (1941)—a success that allowed her husband to give up teaching high school and return to graduate school full time. Margaret's success also inspired Kenneth to begin his own attempts at writing; as her first reader and editor (though never her collaborator), he said that he learned to write from observing her work. To avoid confusion with his wife's growing fame, he adopted the pen name Ross Macdonald. Ironically, though both were successful crime novelists, and she the more widely read at the outset, his reputation would eventually eclipse hers.

While Kenneth served in the U.S. Navy, Margaret relocated the family to Santa Barbara, with which she had fallen in love during a trip to see him off. Santa Barbara would be a frequent setting in her novels, thinly disguised as "Santa Felicia" and "San Felice," and her books were often bathed in the brilliant sunlight of her adopted home. For a short period Millar worked as a screenwriter in Hollywood (1945-1946), but the bulk of her literary output was novels—mostly, but not exclusively, mysteries.

Millar and her husband shared a passion for environmental concerns that led them to found a chapter of the National Audubon Society in Santa Barbara, pro-

test an oil spill and establish the Santa Barbara Citizens for Environmental Defense, and work together to protect the endangered California condor. They were ardent dog lovers and bird-watchers, and nearly collaborated on *The Birds and Beasts Were There* (1968), which Margaret would eventually write alone.

Millar and her husband also shared the tragedy of their troubled daughter. At the age of seventeen, Linda killed a child while driving under the influence of alcohol. Two years later she dropped out of college because of the continuing weight of guilt and psychological problems. Though she later returned to her family, she died at the age of thirty-one, in 1970. Millar published nothing for six years after her daughter's death.

Millar attributed her interest in writing detective novels to having been an avid reader of suspense fiction from the age of eight. She became a world-class best-selling writer, and her books were translated into French and Swedish. She twice received the coveted Edgar Allan Poe Award from the Mystery Writers of America, for *Beast in View* (1955) and *Banshee* (1983). Two other novels, *How Like an Angel* (1962) and *The Fiend* (1964), were runners-up for Edgar awards. In 1965, she was named the *Los Angeles Times* Woman of the Year. The Mystery Writers of America honored her with the Grand Master Award for lifetime achievement in 1983 and made her the organization's president from 1957 to 1958. In 1986 Millar received the Derrick Murdoch Award from the Crime Writers of Canada. Faced with increasing blindness and grieving over her husband's suffering and eventual death from Alzheimer's disease in 1983, Millar completed only one more novel after that year. She died of a heart attack on March 26, 1994.

ANALYSIS

Margaret Millar first began writing in the style of classic Golden Age detection, with series characters, plots that challenge readers to race to solve the crime before the end, final revelatory chapters, and even her version of the English country-house mystery. Each of her series characters appears in three books, though one, *The Devil Loves Me* (1942), includes both Prye and Sands. Her first books, *The Invisible Worm* and *The Weak-Eyed Bat* (1942), were good-

natured, amusing mysteries with some clever psychological twists and insights. With her short series featuring the Toronto detective Inspector Sands, she settled into a more serious style and began to establish herself as a master of the psychological thriller.

The first of her books to win both critical and popular acclaim was *The Iron Gates*. This was her second and last book with Sands as the detective-hero. For decades, Millar abandoned the series format and wrote her novels as separate works of fiction that share only an emphasis on the psychological portrait. Each of her novels (until the Tom Aragon series in 1976) introduces the reader to a completely new cast of characters and set of circumstances. In her three or four best books, such as *The Fiend*, *How like an Angel*, and *Beast in View*, Millar created highly original and self-contained works of literature that would not have been served by having to conform to a series format.

It can be argued that the second of Millar's series characters, Inspector Sands, simply faded into the background of her books. He is a thoroughly uninteresting character whose sole mark of distinction is that he has no distinction. Indistinguishable from millions of other graying, middle-aged men, he has "no strong sense of identity" and lives "in a vacuum." With Millar's interest in the psychologically and physically colorful, such a character was bound to be short-lived.

Millar's final venture into the realm of the series detective, with Tom Aragon, belongs more to the psychological portrait novels of her later writing. Dark and often disturbing in tone, the three Aragon books are far from the amusement of Prye or the careful and successful detection of Sands. Aragon is thrust into situations that test his morals as well as his detecting skills, and he himself is nearly the victim of some of his mysteries, as in *Ask for Me Tomorrow* (1976), in which he is framed for a series of murders that follow his efforts at investigation—an investigation that he later learns has made him an unwitting accomplice of the murderer.

Although Millar does not follow any set formula in writing her novels, there are several features they share. Complex webs of plotting provide a high level of suspense that is usually resolved in the end in a final revelatory scene. During the course of the novel, shifts

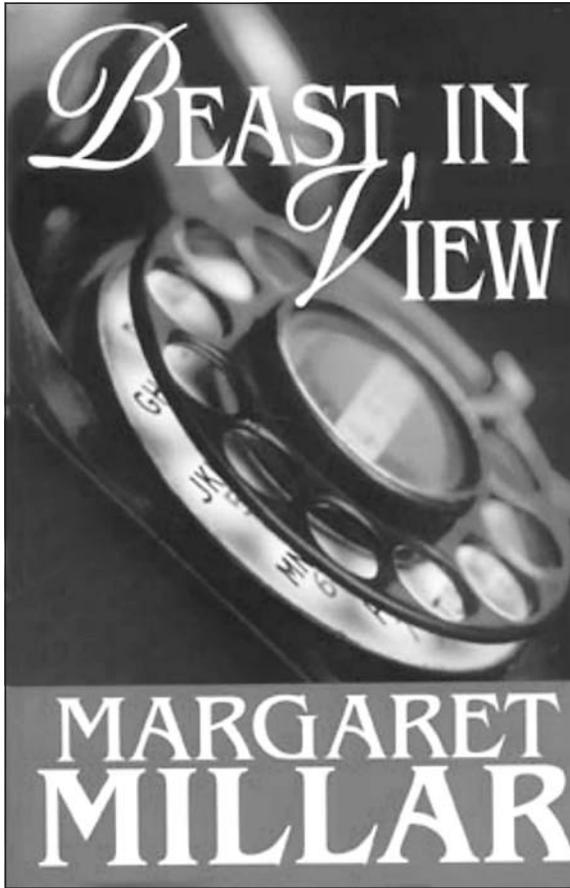

in perception and ongoing reinterpretations create a whirling effect of constant surprise in which things are never as they seem. For the most part, Millar's talent at plotting and penetrating characterization makes these shifts wholly believable, as the reader constantly comes to new understandings along with the characters. Each of her books focuses on the inner life of one character. Usually this character is under some kind of stress, caused by either a set of outward circumstances that challenges the character's notions about reality or some kind of psychological disorder. In *Banshee*, the mysterious circumstances surrounding a young girl's death change all the people around her and their relationships in sad and shocking ways.

In *The Fiend*, the protagonist is a young man whose mental problems cause his sense of reality and agency to slip. This novel brings out another feature of Millar's books: Reader are invited to merge their consciousness with that of the protagonist, Charlie Gowen, a convicted child molester. Once inside Gowen's mind, readers are treated to a ride on an experiential rollercoaster. The world perceived by Charlie Gowen—or any other of Millar's mental cases—is distorted. Reality changes shape, and what was familiar becomes alien and threatening. In Charlie Gowen's world, children are not simply smaller and cuter than adults, they are dangerously alluring.

BEAST IN VIEW

Most of Millar's books written after the Sands series are not whodunits per se. They are psychological thrillers, where the suspense lies in the acts of deception—either by cunning criminals, as in *An Air That Kills* (1957), or by a tormented mind, as in *Beast in View*—that implant distortions into the minds of the other characters and the reader. The books are chronicles of psychological afflictions and their slow and painful unraveling.

Beast in View, one of Millar's best novels, tells the story of a woman with a disorder known in psychology as multiple personality. Helen Clarvoe, a rich and lonely single woman, is being persecuted by Evelyn Merrick, a homicidal and demented young woman whom she once knew. The book chronicles the movements and thoughts of the two women as they dance a dance of death and destruction, only to merge them at

the end as the two sides of one woman. Clearly influenced by the theories of both Sigmund Freud and R. D. Laing, the book is a record of the effects parental pressure can have when exerted on a fragile personality.

HOW LIKE AN ANGEL

In *How Like an Angel*, Millar focuses on another weak and defenseless person: a man caught between two women, one strong and domineering, the other offering him pleasure and a chance to assert himself. Millar also introduces in this book one of California's numerous religious sects, replete with a slightly deranged leader, a rich and senile old woman, and a coven of colorful and clearly drawn disciples in white robes and bare feet. The hero of the book, Quinn, a sometime Las Vegas detective and gambler down on his luck, embarks on a quest for truth like a prince in a fairy tale. In the end, he has obtained not only knowledge about the mysterious events surrounding the disappearance and

presumed death of Patrick O'Gorman but also insights about himself and the world that allow him to claim the prize and marry the princess/widow.

In *How Like an Angel*, as in all Millar's books, the emphasis is on characterization and on psychological revelations. Millar is a master at describing children, primarily little girls. She created a series of portraits of nine-year-old girls starting with *The Cannibal Heart* (1949) and culminating with *The Fiend*. The portrait in *How Like an Angel* of the pimpled teenage girl is wonderfully penetrating and compelling. Even in weaker books, such as *Banshee*, which is marred by overwriting and bad similes, there are two fascinating portrayals of young girls who invite the reader into their world of fantasy and confusion about the verbal and physical behavior of grown-ups.

THE FIEND

Even when the central characters are adults, they are often remarkably childish and lost in a confusing world belonging to and defined by others. In *The Fiend*, the two protagonists, Charlie Gowen and his fiancé, Louise Lang, are outsiders who cannot fit into the adult world of marriage and adultery. In Charlie's case the result has been disastrous: He, with his nine-year-old emotions and adult body, has forced himself onto a little girl. He suffers the consequences, jail and a lifelong fear of committing a similar crime.

In the character of Charlie Gowen, Millar's writing is at its best. One sees her ability to depict a beleaguered mind. Yet in Charlie's character one also sees Millar's primary weakness: the creation of believable dialogue. Charlie Gowen is a college-educated man who holds down a job, but he speaks like a nine-year-old boy. It is hard to accept that he could have completed even the fifth grade, much less college, and it is equally hard to believe that he has a job and manages to stay out of a mental institution.

That children are trapped inside adults is a central idea in Millar's books. Another character in *The Fiend*, the immature Kate Oakley, combines an inability to face the world without the mediating agency of a man with a childish distrust and hatred of men. She is a typical Millar character, unable to function as an adult in her private or public life. Almost all Millar's books feature characters who are locked in an infantile

universe, with no escape other than crime and murder.

It is interesting that these books that chronicle the lives and worlds of people who cannot cope are written with almost clinical detachment. Millar seems to be more interested in dissecting sick minds than in expressing any sympathy for those who suffer or in trying to assess the social causes of individual disaster. The stories are absorbing because they are so convincingly told. Even Millar's weakest books are so suspenseful that neither bad similes nor her propensity for heavy-handed metaphor turns the reader away. Before everything else, Millar is a master of the plot, of the slow unfolding of a multifaceted story. Her psychological insight, great as it is, remains secondary to the genius of her architectonic plots.

A. A. MILNE

Born: London, England; January 18, 1882

Died: Hartfield, Sussex, England; January 31, 1956

Types of plot: Amateur sleuth; cozy; comedy caper

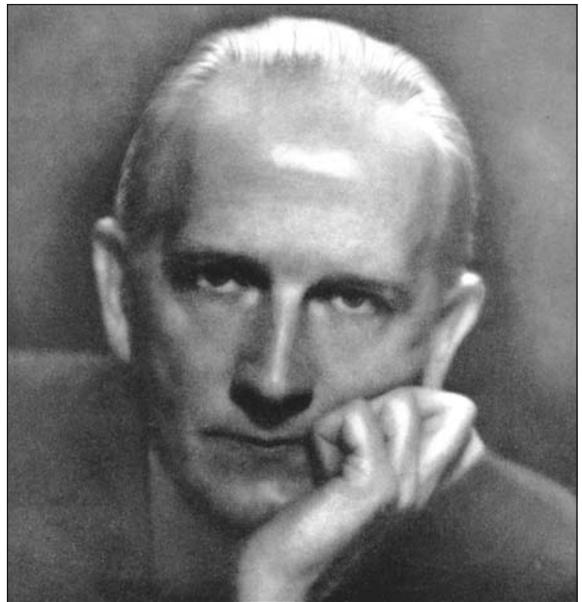

CONTRIBUTION

A. A. Milne brought his own brand of humor to the mystery story. One of his early essays for the British publication *Punch* was a satirical account of a Sherlock Holmes story. This tone stayed with him when he wrote his one famous mystery novel, *The Red House Mystery* (1922). The book borders on parody as both Milne's characters and his readers play detective. Standing at the dawn of the Golden Age of British detective fiction, Milne helped set the tone for the other pre-World War II writers. To him, the mystery was a parlor game played by the idle rich, and murder was simply an excuse to engage in a fun-filled evening of puzzle solving. He created stock characters who engage in idle diversions and who float whimsically through life until their carefree existence is interrupted by a distasteful and indecorous murder—a situation replayed over and over again in many famous murder mysteries.

Milne sets his mystery in the pristine atmosphere of the English countryside and focuses on life in the country manor house. His detective is not as stodgy as Edgar Allan Poe's C. Auguste Dupin or as morose as Sherlock Holmes. Milne's amateur sleuth is a whimsical, elfish character with a fine eye for detail and a keen sense of intuition, while his Watson character is a bright and dapper English gentleman with the zest and verve of a young prep school graduate. Milne avoids entangling his characters in romantic involvements and refuses to get his detective bogged down in the details of criminology. Violence is almost absent from his mystery, and no one is ever really threatened by danger. Having a potential murderer lurking about is merely an excuse for playing a game of hide-and-seek. For Milne, his characters, and his readers, playing detective is great fun, a perfect leisure-time activity.

BIOGRAPHY

Alan Alexander Milne, born in London on January 18, 1882, was the youngest son of John Vine Milne, the headmaster of Henley House, an exclusive school for boys. Milne won a scholarship to Westminster School, where he started to write light verse for the school magazine. Eventually, Milne went to Trinity College, Cambridge, to study mathematics; his attention, however, was diverted toward literary pursuits as he became editor of *Granta*, the college's literary magazine. Although he was graduated with honors and received his bachelor's degree in mathematics, he failed to meet his father's expectations. Using part of his inheritance, he went to London to earn a living as a freelance journalist, publishing articles in *Vanity Fair* and *Punch*. After one year, he had exhausted his funds and earned only twenty pounds. Eventually, he started writing for *Punch*, Great Britain's leading satirical journal, and in 1906, he became assistant editor, a position he held until the beginning of World War I. In 1913, he married Dorothy de Sélincourt (because, he said, she had laughed at his jokes and memorized his articles). A year

A. A. Milne. (Library of Congress)

later, he joined the Royal Warwickshire Regiment and was stationed in France.

During the war years, Milne turned to writing plays and children's literature. Encouraged by his wife, who acted as his scribe, he completed a children's book, *Once on a Time* (1917), and wrote his first play of note, *Wurzel-Flummery* (pr. 1917). Suffering from trench fever, he returned to England and completed the war years writing propaganda for the intelligence service.

After the war, Milne did not go back to *Punch*; instead, he launched his career as a playwright and children's author. Inspired by British playwright Sir James Barrie and actor-manager Dion Boucicault, Milne became the successful author of a series of light comedies. His comedy *Mr. Pim Passes By* (pr. 1919) ran for 246 performances on the London stage. Always moving in new directions, Milne scored a success with his detective novel *The Red House Mystery*. Next he began to focus on children's literature, achieving lasting fame with *Winnie-the-Pooh* (1926) and *The House at Pooh Corner* (1928). During the 1930's and 1940's, he continued to write, although never equaling his earlier efforts. He died on January 31, 1956, at the age of seventy-four.

ANALYSIS

With the exception of a few short stories, *The Red House Mystery* is A. A. Milne's only true venture into the detective and mystery genre, yet it had a great impact on the development of the English mystery novel between World War I and World War II, and it helped to shape the pattern of the tales of the Golden Age of the detective story. Alexander Woolcott called it the third-best mystery ever written. It also enjoyed immense popularity, going through twenty-two printings between 1922 and 1965. On the strength of this one novel, Milne was offered two thousand pounds for the serial rights to his next mystery novel; instead, he chose to write children's literature.

Although Milne was influenced by Arthur Conan Doyle's Sherlock Holmes series, he established some rules of his own for the detective story. First, Milne believed that a detective story should be written in a plain, unadorned style, terse, witty, and readable. He did not want to force the reader to wade through Latinate words, technical jargon, and bombastic prose. In

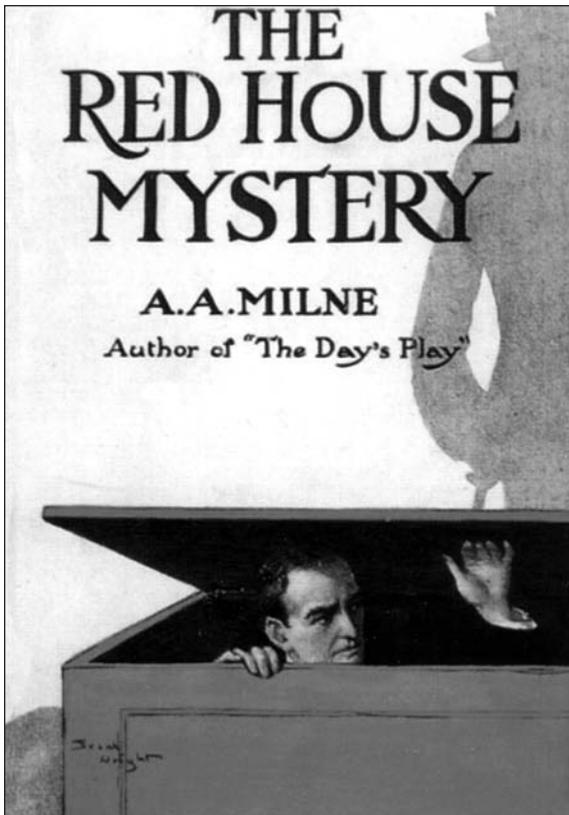

his opinion, there was no need for murderers to be "continually effecting egresses when they might just as easily go out."

Second, Milne did not believe that romance should be mixed with detective fiction, because love scenes would distract the reader from focusing on the true business of the mystery novel, the finding of the clues. The romance should be a separate genre from the mystery. Third, Milne believed that in a murder mystery both the murderer and the detective should be amateurs. The murderer should not be a shrewd, professional killer, but a man who has the same abilities as the reader. Also, because he has no criminal record, "no *dossier* nor code index nor finger-print," he can easily evade the police inspector but is fit prey for the amateur detective, who must not be a criminologist. Having no more of the complicated technology of scientific analysis at his disposal than does the ordinary reader, the amateur detective does not use blood analyses or ballistics tests but bases his investigation on "the light of cool inductive reasoning and the logic of stern remorseless facts."

This is Milne's own view of the "fairness doctrine." The reader, like the detective, is in possession of all the essential facts of the case, but these are mixed in with a number of irrelevant facts. For example, "a scar on the nose of one of the guests might suggest nothing to a detective, but the explicit mention of it by the author gives it at once an importance out of all proportion to its face-value." The joy of reading a mystery story is watching the detective carefully sort out the relevant from the irrelevant. To ensure this pleasure, the reader must see the detective at work; thus, the detective needs a foil, someone to whom he can reveal his deductions. A good mystery does not hide the detective's thoughts from the reader until the end of the novel but shows the detective's deductions piecemeal throughout the narrative. Finally, the Watson character should not be a complete fool, for he would lose the reader's sympathy. He should be a little slower than the detective but an integral part of the story, "friendly, human, likable."

THE RED HOUSE MYSTERY

Using his own guidelines, Milne helped to amalgamate the English comedy of manners with the de-

tective genre to create the comic mystery. Milne sets his story in the English country house, isolated from the bustle of the city. This setting would become the stock setting for the English murder mystery. The Red House provides a narrowly defined world with few characters, all from the upper echelons of society. This world that Milne creates is what W. H. Auden calls “The Great Good Place.” In analyzing the archetypal setting for the Golden Age detective story, Auden holds that “the more Eden-like it is, the greater the contradiction of murder.” Milne opens *The Red House Mystery* as though he were writing a pastoral idyll. On a warm summer day, the murmur of bees intermixes with the gentle cooing of pigeons. To emphasize the Edenic qualities of this environment, Milne writes, “From distant lawns came the whir of a mowing-machine, that most restful of all country sounds.” Life at the Red House is a paradise of ease and pleasure, filled with golf games and garden parties—a fairy-tale world where a ditch is called a moat; a shed, a summer

house; and a pond, a lake. It is a “delightful house” with “opportunities for every game or sport that has been invented.” It is a perfect world for high comedy, populated by upper-class comic characters who will reappear time and time again in the classic English mystery story. There is a gruff old major nursing his war wounds, a professional actress given to histrionics, a would-be writer who never writes, and a snooty maid who overhears private conversations. This ideal world, however, is jolted by a gunshot and a corpse.

At this point, the victim takes center stage. Like most mystery writers, Milne creates a victim who is worthy of his fate. Yet Milne complicates the role of the victim. First, the false victim is Robert Ablett, the black sheep of the family who has always caused trouble and who was shipped off to Australia. He is depicted as a gruff, intimidating man, constantly pressuring his brother Mark for money. Portrayed as a callous and brutal man, he is seen as an outsider whose apparent intrusion into the tranquil world of the Red House is viewed as an invasion. Thus, his alleged murder causes no one undue anguish. The true victim, however, is not Robert Ablett but his brother Mark, disguised as Robert to play a vindictive prank on one of his houseguests. At first, Mark, the owner of the Red House, is seen as a model gentleman, but later he is revealed to have been a pompous, priggish cad who ordered and regulated the lives of his guests according to his whims—a vain man who had to be pampered and praised and who always sought glory for himself. Worst of all, he was a closet alcoholic, gradually showing the signs of dissipation. As a gentleman, he broke the social code for acceptable behavior. Like the blocking character of British comedy, he arranged a marriage with an innocent, but reluctant, young socialite. It was at this point that he was killed.

True to Milne’s code, the murderer is no professional, and even though he murders for what he believes to be a good reason, he is a man with a flaw. Cayley is Mark’s younger cousin; he was groomed by Mark, yet he appears worn and not as attractive as his cousin. When Mark refused to bail Cayley’s brother out of jail and Cayley’s mother died, Cayley never forgave him and plotted to destroy him. Cayley is a clever amateur who masterminds both an elaborate charade

and a carefully worked-out cover-up by disguising Mark as Robert and then shooting him.

Nevertheless, Cayley is no match for Anthony Gillingham, Milne's amateur sleuth. Anthony is an amiable gentleman, comfortable in the world of high society. Although thirty, he has no family ties and no romantic interests. A polite, genial man, he has none of the morose characteristics of Sherlock Holmes. His comments are always urbane, witty, and free from ironic overtones. He is a perfect detective for the English comic mystery. Like other detectives who would follow him, he is a jack-of-all-trades. A tobacconist, a writer, a valet, he moves freely from one profession to another, always accomplished at what he does and always seeking a new venture. Such a cosmopolitan with eclectic talents becomes the perfect English sleuth, personable, witty, and clever. Because Anthony simply drops in to see his friend William Beverly and is not a regular guest at the Red House, Milne sees him as the perfect detective. Anthony is able to maintain the cool detachment of an outsider, one who has no emotional ties to anyone in the house and who gets all of his information from carefully observed details. Because of his detachment, he is free of personal bias and can entertain any hypothesis regardless of how odious it might seem to the inhabitants of the Red House. Even though he is detained in the Red House until the coroner's inquest, he makes sure that he keeps his room in the inn because he does not want to be an obligated guest in the house. Also, since he works solely on his own first impressions, he can take a clear, rational approach in weighing his facts.

Following the tradition of earlier detective stories and expanding on it, Milne realized the advantage of the amateur detective who could move freely, examining all aspects of the crime. The inept Inspector Birch, as a representative of the official police, becomes an almost farcical character. He always has an eye on the sensational solution, but he inevitably follows the obvious path, wasting his time charting railway schedules, documenting unreliable sightings of the murder suspect, and dragging the pond as a perfunctory part of routine procedure. He arrives at the most obvious solution: Mark murdered his brother Robert and fled.

Anthony, however, is not sure of anything. He always carefully weighs details, a skill that he practices almost unconsciously. Milne describes him as having "grey eyes which seem to be absorbing every detail." Anthony notices on what side of the door keys are placed, which windows are left open, and how long it takes to run a certain distance. He is able to remember instantly that Mark rearranged his library or to recall Cayley's shadow on the wall when Cayley left the scene of the crime. Like Poe's Dupin, Anthony has a photographic memory that can unconsciously record details and store them away for later use. This uncanny ability is compared to the ability of Sherlock Holmes, who supposedly knew the number of steps to his club. Anthony, however, does not count the steps to his club. He simply conjures up a mental picture of himself walking to his club and automatically remembers the number of steps. Milne supplements his detective's reasoning abilities with a highly active subconscious.

As for the Watson character that Milne finds essential to a good mystery, Bill Beverly serves the role perfectly. Following the Holmes tradition almost to the point of parody, Anthony tells Bill, "You're the perfect Watson. . . . You take to it quite naturally. Properly speaking I oughtn't to explain to the last chapter, but I always think that's so unfair." Bill is a model of the spry young man of English drawing-room comedy, always eager for a romp or some new adventure. Like an overzealous young boy waiting to hear a delicious secret, Bill carefully listens to Anthony's deductions, yet he is no fool. As an accomplice, he is able to ad-lib a conversation with Anthony as Anthony walks away to locate a spy. Also, he is quick-witted enough to transmit a Morse code signal to Anthony when Anthony is in danger of being discovered in a secret passage. For Bill Beverly, just as for Milne, playing detective is an exciting game. At every new discovery he exclaims, "What fun" or "How exciting."

True to his philosophy, Milne's style is simple and terse, filled with tongue-in-cheek witticisms. Composed primarily of dialogue, his novel flows smoothly, combining light banter with clever, levelheaded prose. The conversation is glib and the retorts are facile. Anthony tells Bill: "One should modulate the voice, my dear William, while breathing gently from the hips.

Thus one avoids the chest-notes which have betrayed many a secret. In other words, pass the toast.”

In *The Red House Mystery*, Milne combines some of the techniques of the Doyle/Poe detective story with the essential ingredients of the British comedy of manners to create a genteel aesthetics for the murder mystery. Milne’s novel, along with the English school of mystery writers, would come under fire from Raymond Chandler and the American school of mystery writers, who called for greater realism in detective fiction. Chandler criticized Milne for omitting exactly those details of criminology that Milne deliberately chose to overlook. Chandler found it implausible that Milne’s coroner did not attempt to identify the body or that no one tried to investigate the background of the deceased. As for Milne’s charming detective, Chandler states, “The English police seem to endure him with their customary stoicism; but I shudder to think of what the boys down at the Homicide Bureau in my city would do to him.”

Yet Milne was writing a different detective story for a different age. His novel stands in the vanguard of the English murder mystery of the Golden Age. According to George Grella, such novels demonstrate “the last identifiable place where traditional, genteel British fashions, assumptions, and methods triumph in the twentieth century novel.” In explaining the social phenomena behind this kind of novel John Patterson states:

In an age of the Boom, the Great Depression, flappers, gangsterism, and the Fascist solution, it recalls the sober gentility and crude optimism of an earlier and more complacent generation; it asserts the triumph of a social order and decorum that have all but passed away.

The age of gentility never passed away for Milne, who saw the murder mystery as a delightful way to celebrate triviality in the midst of social stability.

DENISE MINA

Born: Glasgow, Scotland; August 21, 1966

Types of plot: Amateur sleuth; psychological; hard-boiled

PRINCIPAL SERIES

Maureen O'Donnell, 1998-
Patricia "Paddy" Meehan, 2005-

PRINCIPAL SERIES CHARACTERS

MAUREEN O'DONNELL, a Glasgow native in her twenties, has survived sexual abuse and a mental breakdown. Once an art history student, Maureen works menial jobs and drinks too much, haunted by memories of her abusive father and struggling to cope with her unsympathetic mother and sisters. She becomes involved in a series of police investigations when her married boyfriend is found murdered in her apartment.

PATRICIA "PADDY" MEEHAN is a young woman from a working-class Irish Catholic family in 1980's Glasgow. Paddy pursues a career in journalism, first as an office gofer then as a night-shift reporter. Her sharp tongue and fearlessness help her gather information and earn her colleagues' respect. Overweight, always dieting and wishing she were more stylish, Paddy is engaged to a conservative Catholic boy who she fears is the only man who will have her, but she decides to forgo marriage in favor of her career.

CONTRIBUTION

Denise Mina is often cited alongside Ian Rankin, Christopher Brookmyre, and Val McDermid as a leading writer of the Scottish crime fiction popularly known as tartan noir, a reference to film noir, a genre known for its bleak point of view and focus on corrup-

tion. Tartan noir typically features black humor, profanity, and realistic, flawed characters whose behavior raises questions about the distinction between innocence and guilt.

Mina's fiction reveals a strong social conscience; her characters experience poverty, religious conflict, unemployment, workplace discrimination, addiction and the ugliness of life on the wrong side of the law, all within the framework of the traditional murder mystery. Mina goes beyond puzzle making to write realistically about young women's lives in the poorer urban neighborhoods of Glasgow, although critics note that Mina's highly detailed and often grim settings can overwhelm her novels' central crimes.

Mina's heroines are unconventional for the genre: young, working-class Scottish women who have suffered or witnessed the effects of childhood sexual abuse, rape, domestic violence, and mental illness. These characters are complex, deeply affected by these experiences but intelligent and proactive; they have been exposed to brutal violence and can even behave violently themselves. They become psychologically stronger over time, develop and maintain relationships with family and friends, defy religious and social expectations, and overcome legacies of abuse.

BIOGRAPHY

Denise Mina was born into a Catholic family in Glasgow, Scotland, in 1966. Her father, a self-educated oil engineer, traveled frequently, and the family moved twenty-one times while Mina was young. She attended convent schools across Europe. Mina left school at sixteen and took a series of jobs in London as a waitress, bartender, cook, and meat-factory worker, then as a nurse in a home for the elderly and terminally ill. Caring for people who had lived through World War II, Mina developed an appreciation for their life stories; she was particularly moved by elderly women who had once been independent, holding responsible positions in the workforce.

In 1986 Mina returned to Glasgow. At twenty-one she passed examinations allowing her to enroll in Glasgow University's School of Law. After graduating she taught classes in criminology and criminal law. At the University of Strathclyde she began research for a

doctoral degree on why women offenders were often considered mentally ill but spent more time working on her first novel, *Garnethill* (1998), about a former mental patient who becomes a suspect in a murder.

Published when Mina was thirty-one, *Garnethill* won the John Creasey Gold Dagger Award from the Crime Writers' Association, was translated into fifteen languages, and was adapted by British Broadcasting Corporation (BBC) Scotland for television. Two subsequent novels in what became known as the Garnethill trilogy, *Exile* (2000) and *Resolution* (2001) were also best sellers in Europe.

A psychological mystery published after the *Garnethill* series, *Sanctum* (2002) (released as *Deception* in the United States) brought Mina greater success in the United States. Inspired by Mina's academic research on women who develop relationships with men who have committed violent crimes, *Deception* somewhat humorously traced one man's efforts to understand his wife's involvement with a convicted murderer.

Field of Blood (2005) followed, the first in a planned five-part series featuring young Glasgow news reporter Paddy Meehan. Mina was pregnant with her first child while writing *Field of Blood*. Although friends had warned Mina that pregnancy and motherhood would diminish her interest in gruesome stories of human corruption, Mina portrayed with disturbing realism the novel's central crime, the murder of a toddler by two older children. Mina felt writing about a shocking crime involving children as perpetrators would allow her to examine problems with Scotland's treatment and rehabilitation of juvenile offenders. Mina followed *Field of Blood* with another Paddy Meehan story, *The Dead Hour* (2006), and began plans to adapt the series for British television.

Mina deliberately limited the Meehan series so contractual obligations would not force her to keep characters alive after she (or her readers) had tired of them. She had found with the Garnethill trilogy that continually writing about mental illness, drug abuse, and domestic violence had somewhat depressed her.

Mina's work includes comic books in DC Comics' *Hellblazer* series, as well as feature articles, short stories, and plays for live theater and radio. She has fre-

quently provided radio and television commentary on film and the arts for the BBC.

ANALYSIS

In both her Maureen O'Donnell and Paddy Meehan series Denise Mina follows many conventions of mystery and detective fiction. A murder occurs early in each novel and then clues are discovered and compiled until the murderer's identity is revealed. The reader has the opportunity to notice and interpret clues along with the main character and often has additional information that adds to the puzzle but has yet to be discovered by the amateur sleuth.

Both series are set in Glasgow and characterized by authentic, gritty descriptions of the city's seamy lower-class neighborhoods. Mina often links her characters' activities and moods to their observations of, and familiarity with, Glasgow's streets, architecture, and weather. Mina's use of dialogue enhances the specificity of her local setting, as her characters frequently use slang peculiar to Glasgow residents.

Mina heads each chapter with a cryptic title, the significance and humor of which is revealed in the text. These chapter headings may serve as a summing up of the main character's experience and her emotional response or may focus the reader's attention on an apparently insignificant detail.

The O'Donnell and Meehan stories are told primarily from the young female protagonists' points of view. Maureen O'Donnell and Paddy Meehan are not conventionally successful or attractive, but their low social positions and frequent lack of regard for their own safety allow them to discover facts beyond the reach of professional investigators. Both women tell lies easily and are capable of physical violence, and both are deeply loyal to, and frequently misunderstood by, their families.

GARNETHILL TRILOGY

Maureen O'Donnell is the heroine of the three Garnethill novels (*Garnethill*, *Exile*, and *Resolution*). The series follows Maureen, an alcoholic and former mental patient, through the aftermath of her married boyfriend's murder. She tries to solve the crime while coping with suspicious investigators, shielding her beloved drug-dealing brother from police scrutiny, and

struggling with the aftereffects of the sexual abuse she endured as a child.

The series departs from the traditional detective story format in that it contains two story arcs that are resolved over the course of three novels. One involves the central murder mystery. Maureen confronts the killer at the end of the first novel; the official police investigation provides a subplot in the second, while Maureen pursues an unrelated crime; and the murder story line is resolved in the third, again as a counterpoint to a more traditional mystery.

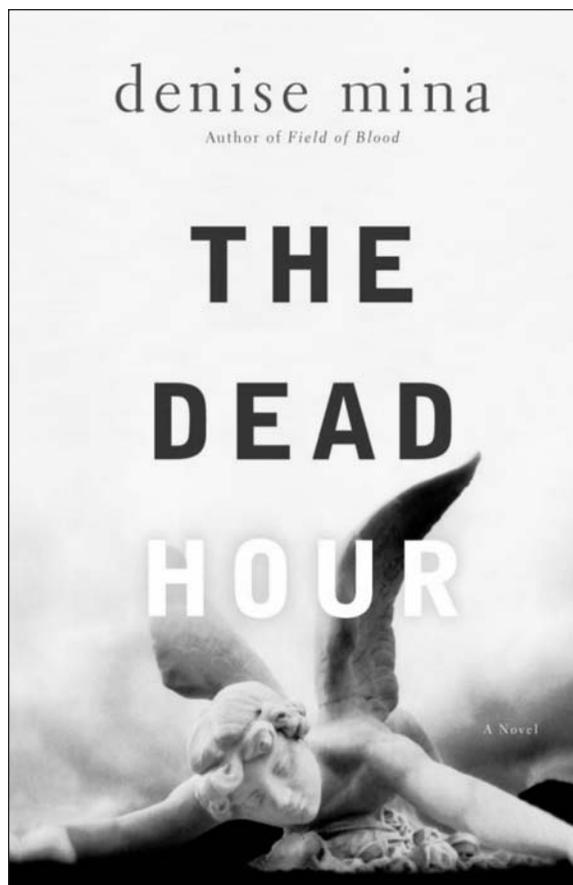

The second story arc concerns Maureen's struggles as a survivor of childhood sexual abuse and mental illness. In *Garnethill* she is recovering from a mental breakdown; in *Exile*, her alcoholism becomes more serious and the rift with her family more acute when she learns her long-absent abusive father is in Glasgow. Finally in *Resolution*, Maureen confronts her fears, makes peace with her family, and seeks sobriety.

Mina explores the effects of sexual abuse on the individual in Maureen's nightmarish visions of her abusive father, Michael, and her conviction that he is watching and waiting for her. Mina also examines how Maureen's family responds to her accusations, even though they found her hiding after an incident of abuse and Michael abandoned the family shortly afterward. Maureen's mother retreats into alcoholism and her sisters deny the abuse, even insisting on allowing their father access to Maureen's baby niece.

Mina reveals Maureen's addictive personality in her constant need for alcohol and cigarettes and the comfort they give her, only addressing Maureen's alcoholism as a naked need near the end of the series when her friends attempt an intervention. Although Maureen is a damaged character, she is sympathetic because she feels compassion and responsibility toward others who have been victimized, cares about justice, and maintains close friendships throughout the series.

PADDY MEEHAN SERIES

Paddy Meehan is a young newspaper reporter in 1980's Glasgow. Overweight and self-conscious, Paddy constantly wonders what the men in the news office think of her. She is often treated with disdain but holds her own, sparring verbally with male coworkers. Mina created Paddy as a character who would grow

and change over time; she also wanted to illustrate the evolution of the male-dominated newspaper industry. Mina planned the series to cover three decades in Paddy's life as a reporter.

In the opening pages of *Field of Blood*, two children murder an even younger child. The crime was based on the 1993 murder in England of two-year-old James Bulger by two ten-year-olds. Paddy's fiancé Sean is related to one of the murderers, giving Paddy, a gofer at her newspaper, a chance to scoop the real reporters. To protect Sean's family, Paddy ignores the story but relays it to a young woman journalist who prints it. Blamed for the public disgrace and shunned by her family and Sean's, Paddy involves herself recklessly in the case, interviewing possible witnesses under a false name, planting evidence, and inadvertently leading the murderer to one of her coworkers before the truth behind the murder is revealed.

Sean is a nice Catholic boy who thinks Paddy's am-

bitions are too manly and her sexual desires inappropriate in an unmarried woman. Paddy clings to Sean, thinking no one else will have her, but in time realizes she would rather pursue her career than marry and have children. In *Field of Blood*, Paddy loses her virginity to a reporter who helps her investigate the child murder; in *The Dead Hour*, she has sex with a police officer and, in a cliffhanger ending, discovers she is pregnant.

Paddy often makes mistakes that she fears will cost her a relationship or her career. In *The Dead Hour*, Paddy, now working as a real reporter, tries to interview a man at the scene of an apparent domestic dispute, sees a woman with blood on her face in the home behind him, and walks away after the man pushes money into her hand. Paddy tells herself she had no choice but to accept the bribe but expects when it is discovered to lose her credibility and her job.

Throughout the series Paddy pursues an interest in Patrick "Paddy" Connelly Meehan, a real-life safecracker who was falsely convicted of a 1969 murder and later pardoned largely because of the efforts of a journalist who investigated his case. Paddy has been drawn to his story since she was a child and heard his name, just like her own, on the news. She has never believed in Catholicism and feels she substituted Patrick Meehan for Jesus, taking as her inspiration Meehan's story of injustice and retribution. In *The Dead Hour*, Paddy is trying to write a book about Patrick Meehan but completely unable to begin.

GLADYS MITCHELL

Born: Cowley, Oxfordshire, England; April 19, 1901

Died: Corfe Mullen, Dorsetshire, England; July 27, 1983

Also wrote as Stephen Hockaby; Malcolm Torrie

Types of plot: Amateur sleuth; cozy

PRINCIPAL SERIES

Dame Beatrice Adela Lestrangle Bradley, 1929-1985

PRINCIPAL SERIES CHARACTERS

DAME BEATRICE ADELA LESTRANGE BRADLEY is a psychiatric adviser to the Home Office. Middle-aged when the series begins, Dame Beatrice ages until she has the appearance of a "benign lizard." Formidable, witty, stylish, holding honorary degrees from almost every university in the world, she resolves cases with reference to the suspect's psyche and the supernatural.

LAURA MENZIES GAVIN is Dame Beatrice's faithful secretary and general dogsbody. In later novels, she is conveniently married to a Scotland Yard detective. She is athletic, attractive, intelligent, intrepid, and also, as

the series progresses, the mother, somewhat reluctantly, of two children.

NOEL WELLS is a rather dim young curate who plays Watson to Beatrice's Holmes in the early novels of the series before he disappears in favor of the more satisfactory Laura Menzies (later Gavin).

CONTRIBUTION

It is tempting to compare Gladys Mitchell, the creator of Dame Beatrice Adela Lestrangle Bradley, to her contemporaries, Agatha Christie, the creator of Miss Jane Marple, and Patricia Wentworth, the originator of Miss Maud Silver. All three began writing mysteries in the 1920's with novels that featured eccentric female sleuths who occupied their spare time with knitting. There the similarities end, for in Dame Beatrice Gladys Mitchell created a far more complex and controversial character than either Christie or Wentworth imagined. In her fifty-year career, Dame Beatrice turned into the sleuth many readers loved to hate.

Gladys Mitchell's personal interests are clearly reflected in those of her female sleuth: Dame Beatrice is, among other things, a psychoanalyst and is reputedly the descendant of a woman executed for witchcraft.

This intermingling of modern psychoanalytic theory and the supernatural in Mitchell's fiction has made her books either maddening or absolutely intriguing depending on the biases of her readers.

An extremely literate writer, Mitchell constructs plots that are, at their best, exceptionally intricate and filled with digressions on various subjects (such as transvestism) and, at their worst, improbably convoluted. At times it is difficult to decide whether she is writing serious crime fiction or attempting an arcane spoof of the genre.

She was, however, nothing if not prolific, having written more than sixty novels in her fifty-four-year career as a mystery novelist. Her fiction is quirky and eccentric, in keeping with the fictional sleuth she created in 1929, but she is never dated. In fact, Mitchell's greatest strength lies in her originality and her attempts at contemporaneity.

BIOGRAPHY

Gladys Maude Winifred Mitchell was born on April 19, 1901, in the village of Cowley, Oxfordshire, the daughter of James Mitchell and Annie Julia Maude Simmonds Mitchell. After attending Goldsmith's College, University of London, from 1919 to 1921, from which she received a diploma in history in 1926, she became an elementary teacher, a career that lasted for more than a quarter of a century. Although she first began teaching out of financial necessity, her foray into the field of detective fiction in 1929 soon made her financially independent. During and after World War II she continued to teach because of the national teacher shortage.

Conservative in political philosophy, agnostic in her religious beliefs, Mitchell pursued her career as an educator until 1961; at the same time, she produced at least one mystery novel every year, writing under her own name and the pseudonyms of Stephen Hockaby and Malcolm Torrie. She was a member of the Society of Authors, the Crime Writers' Association, and the Detection Club. She was also a fellow of the Ancient Monuments Society. In 1976 she was awarded a special award from the Crime Writers' Association in recognition of her having written more than fifty mysteries. She died at her home in Dorsetshire on July 27,

1983, at the age of eighty-two. She was still writing mysteries at the time of her death.

ANALYSIS

Speedy Death (1929), the first novel featuring perennial sleuth Mrs. (soon to be Dame) Beatrice Adela Lestrangle Bradley, set the tone for Mitchell's half-century-long career as a mystery writer. In this novel Mrs. Bradley commits justifiable homicide (much as Hercule Poirot does in Agatha Christie's last book to feature the Belgian sleuth). Mitchell's refusal from the very outset of her career to make her villains totally villainous or her heroes and heroines totally heroic partly explains the difficulty critics have in coming to grips with her as a writer of detective fiction. It is exceedingly difficult to decide—since Mitchell consistently refused to give her readers direction in this matter—whether she regarded herself as a serious practitioner of the craft of crime writing or whether she wrote with tongue in cheek.

Considering the female sleuths created by Mitchell's contemporaries Christie and Wentworth, Dame Beatrice is a model of the liberated woman. Although she knits, she is more similar to Madame Defarge than she is to Miss Marple and Miss Maud Silver. Not only are marriage (at least two and possibly three husbands exist in her past) and motherhood (she has at least one son, the eminent barrister Ferdinand Lestrangle, possibly two) part of her experience; she is a woman of the world par excellence. It is not by coincidence that the first novel in which Dame Beatrice appears revolves around the question of transvestism, one of many subjects in the treatment of which Mitchell was ahead of her time. In the early novels *Speedy Death* and *The Mystery of a Butcher's Shop* (1929), for example, Dame Beatrice professes a belief in the necessity of birth control. Dame Beatrice is highly educated, sophisticated, and worldly wise. She is a psychoanalyst, soon to become psychiatric adviser to the Home Office, an amateur expert on the occult, and the recipient of too many academic honors to count.

Dame Beatrice's intellectual sophistication is matched only by her fascination with the occult. Like her creator, she values her purported descent from a witch. As the series progresses and Dame Beatrice

ages, her appearance becomes more and more witch-like. The relationship between madness and the supernatural is underlined by the titles of many of Mitchell's books: *Convent on Styx* (1975), *Merlin's Furlong* (1953), *The Rising of the Moon* (1945), *Uncoffin'd Clay* (1980), and *Here Lies Gloria Mundy* (1982).

Many of Mitchell's early novels verge on being spoofs of the genre in which she became so firmly entrenched as a writer. Even Dame Beatrice's ubiquitous knitting of unidentifiable objects serves as a parody of the fluffy pink items that Miss Marple's needles produce or the practical baby clothes that result from Miss Maud Silver's endeavors. In contrast to the limited perspectives of these two single women, Dame Beatrice's intellectual breadth and worldliness seem to represent an attempt at deliberate satire. One thing Dame Beatrice can never claim to be (especially after committing homicide in *Speedy Death*) is innocent.

Dame Beatrice's choice of Watsons also reflects her author's growing sophistication. In her early novels Mitchell provided Mrs. Bradley with Noel Wells, a curate whose brain she likens to a turnip. It is not surprising that Wells's views of Mrs. Bradley are at first unsympathetic; throughout the series, however, he comes to admire her originality and her intellect. Because he prefers old women to be soothing, Wells's discomfiture with Mrs. Bradley's character is all too understandable.

LAURELS ARE POISON

Mitchell created a far more successful companion for Dame Beatrice in Laura Menzies (later Gavin), who first appeared in *Laurels Are Poison* (1942). Like many of Mitchell's novels, this one is set in a teachers' training college, where Laura Menzies is a student. Athletic, Amazonian, given to plunging into an ice-cold bath every morning, Laura remains unperturbed in the face of whatever adventures her association with Dame Beatrice happens to bring her. In the forty years ahead of her in her role as secretary, typist, assistant, protector, and companion, Laura will need whatever sangfroid her creator can afford her. In time she acquires a husband, not without coincidence an officer at Scotland Yard, and two children, whose needs always come second to those of her employer. Her original motto is "Action! Give me action!" As Dame Bea-

trice's Watson she is certain to have her desire fulfilled.

THE SALTMARSH MURDERS

Although Mitchell's novels feature settings with which she was familiar (girls' schools, small villages, teachers' training colleges), her treatment of the events that occur in them is far from ordinary. One of the most difficult aspects of Mitchell's writings lies in the complexity of her plots and the ubiquity of her digressions. Mitchell's personal passion for the occult, the supernatural, and the depths of the human psyche frequently interferes with the progress of her novels, much to the readers' annoyance. *The Saltmarsh Murders* (1932) is a perfect example of this tendency of Mitchell to allow her own enthusiasms to baffle and confuse her readers. The vicar is an adulterer, and his wife a repressed nymphomaniac as well as a sadist. Mitchell's preoccupation with the complexities of their psyches interferes with the action of the novel. *The Saltmarsh Murders* also features a young maid who gives birth to an illegitimate child, a promiscuous actress, and a closet pornographer, not to mention bodies that end up in the wrong coffins, all heady stuff for the era in which Mitchell was writing.

In the first few novels Dame Beatrice is an amateur sleuth. Not long into her fictional career, however, she is given the role of psychiatric adviser to the Home Office. Elevation to this quasi-official status undoubtedly gives her access to a wider variety of crimes. It also allows her to exhibit a degree of professionalism not available to her female contemporaries such as Miss Marple and Miss Silver. If it were not for her marriages and her children, one would think—given Dame Beatrice's reptilian appearance—that Mitchell was trying to make her more like a male detective in the mold of Albert Campion or Roderick Alleyn.

Mitchell's novels tackle a number of fanciful aspects of British life in the 1920's, 1930's, and 1940's, most of which reflect her own wide-ranging interests. Witchcraft is foremost among them, but the topics dealt with in her many novels also include morris dancing, archaeology, pig farming (a specialty of Dame Beatrice's nephew in *Here Lies Gloria Mundy*), seawater baths, and Druidism. Contrived plots concerning arcane topics were characteristic of British mystery

writing during the 1930's and 1940's, but Mitchell continued to build her novels around them into the 1980's.

Her writing, however, has never become totally dated. Partly because she always wrote ahead of or at least outside her time, Mitchell was, even at the end of her long career, far more adept at dealing with modern subjects than was Agatha Christie. Arcane, convoluted, quirky, Mitchell's books will always be limited in their appeal, but they constitute a distinctive contribution to the mystery genre.

Mary Anne Hutchinson

PRINCIPAL MYSTERY AND DETECTIVE FICTION

BEATRICE LESTRANGE BRADLEY SERIES: 1929-1940 • *Speedy Death*, 1929; *The Mystery of a Butcher's Shop*, 1929; *The Longer Bodies*, 1930; *The Saltmarsh Murders*, 1932 (with Anthony Berkeley, Milward Kennedy, John Rhode, Dorothy L. Sayers, and Helen Simpson); *Ask a Policeman*, 1933 (with others); *Death in the Wet*, 1934 (also known as *Death at the Opera*); *The Devil at Saxon Wall*, 1935; *Dead Men's Morris*, 1936; *Come Away, Death*, 1937; *St. Peter's Finger*, 1938; *Printer's Error*, 1939; *Brazen Tongue*, 1940

MIYUKI MIYABE

Born: Tokyo, Japan; December 23, 1960

Types of plot: Psychological; inverted

PRINCIPAL SERIES

Detective Chikako Ishizu, 1998-

PRINCIPAL SERIES CHARACTER

CHIKAKO ISHIZU is an unpretentious middle-aged Japanese police detective who has risen through the ranks until appointed detective to the Tokyo Metropolitan Police arson squad when the public demanded more women detectives. She is considered rather maternal by her male colleagues. After refusing to bend the law in the course of solving her first big case, she is demoted to work at a regular police precinct, where she is confronted with another intricate case featuring a double murder.

CONTRIBUTION

Award-winning Japanese crime author Miyuki Miyabe is known to the English-speaking world primarily through the handful of her intense crime novels available in translation. Miyabe's translated work is distinguished by imaginative plots at the cutting edge of contemporary society, featuring identity theft, the dark playing fields of the Internet, and extrajudicial vengeance in face of a justice system apparently failing to react effectively to ultravicious crimes. Her focus is on young Japanese women whose violent reaction against the vicissitudes of a rigid, hostile society

turns them into explosively charged perpetrators.

The outstanding popular literary success of Miyabe in Japan resulted in one of her prize-winning crime novels, *Kasha* (1992), being translated into English as *All She Was Worth* in 1996. Miyabe's English-language publisher then decided to translate *R.P.G.* (2001) as *Shadow Family* in 2004, even though it was not the first novel in the detective Chikako Ishizu series, partly because the novel corresponds tightly to the conventions of the police procedural. *Kurosufuia* (1998), translated the following year as *Crossfire*, introduced Miyabe's detective Chikako Ishizu. Ishizu's first case in the series involves arson caused by supernatural abilities. In spite of the occurrence of pyrokinesis, the paranormal ability to start fires by willpower alone, the crimes and conflicts featured in *Crossfire* are realistic and psychologically grounded.

In Japan, Miyabe's crime fiction has won a huge following, with several of her novels made into films. For the English reader, her well-crafted focus on violent women not only offers psychologically intense portraits but also a close view at the pitfalls and problems of contemporary Japanese society. Ultimately, through her female and male detectives, Miyabe gives voice to those who do not believe that the end justifies the means.

BIOGRAPHY

Miyuki Miyabe was born in the downtown Kōtō Ward of Tokyo on December 23, 1960. She graduated from the Sumigadawa High School and started to

write fiction in 1983 while working for a law office. In 1984, Miyabe took creative writing courses offered by the Japanese publishing house Kodansha, whose subsidiary, Kodansha International, publishes much of Japanese literature in English translation and is committed to disseminating Japanese culture in the English-speaking world. Her breakthrough was the short story "Warera ga rinjin no hanzai" (1987; we are the crimes of a neighbor). Soon after, she quit her job at the law office to focus on her writing.

In 1992, Miyabe published the acclaimed crime novel *Kasha*, which won her the prestigious Yamamoto Shūgorō Prize. This success persuaded Kodansha International to commission an English translation that was published as Miyabe's first work in English, *All She Was Worth*, in 1996. Her story of two different women running afoul of Japanese loan sharks fascinated English readers and established her name among foreign crime writers in the United States.

In Japan in the 1990's, Miyabe became widely popular for not only her crime fiction but also her many novels in genres as varied as historical fiction, science fiction, young-adult fiction, and social realism. Her novel *Riyū* (1998; the reason) won the Naoki Prize in 1998, considered the top prize for Japanese popular fiction.

Miyabe's 1998 mystery-cum-science fiction novel *Crossfire* introduced Detective Chikako Ishizu of the Tokyo Metropolitan Police arson squad. Choosing an English title for her work underlined Miyabe's belief in America's vast influence on contemporary Japanese popular culture and imagination. *Crossfire* was the first of Miyabe's novels to be turned into a motion picture; the 2000 film *Kurosufaia* (*Pyrokinesis*) by director Shusuke Kaneko emphasized the science-fiction elements of the novel.

Preferring to establish Miyabe as a crime writer for her English audience and wary of the cross-genre elements of *Crossfire*, Kodansha decided to translate first the sequel, *R.P.G.* written in 2001, as *Shadow Family* in 2004. By this time in Japan, another of Miyabe's crime novels, *Mohōhan* (2001; copycat killer), had been made into a film, underlining her mass-culture appeal.

When *Crossfire* was translated in 2005, English readers could trace the first case of Detective Ishizu,

which ultimately led to her demotion, alluded to at the beginning of *Shadow Family*. Occasionally likened to a Stephen King novel because of its juxtaposition of the everyday world with the supernatural, *Crossfire* nevertheless emphasizes sound police work and modern crime fighting.

In Japan, Miyabe's fiction successfully spans many genres, mysteries being one of them. Her translated crime novels have established a loyal readership fascinated by her illumination of the dark side of modern Japanese society from the point of view of fiercely independent women who often transgress into crime when faced with obstacles and apparent injustice.

The fourth work of Miyabe to be published in English is a fantasy novel, *Bureibu sutōri* (2003; *Brave Story*, 2007), indicating her publisher's trust in her cross-genre appeal. A fifth novel, *Majutsu wa sasayaku* (1989), a mystery dealing with an orphaned teenager, was published as *The Devil's Whisper* in 2007. There are quite a few other mysteries by Miyabe that could be translated into English, and the prolific author shows no signs of stopping her creative output.

ANALYSIS

The translated mysteries of Miyuki Miyabe share a strong emphasis on the workings of the inner minds of the women perpetrators and the psychological and social factors that push them into crime. From the beginning, Miyabe is interested in the characteristics of modern Japanese society that may propel a woman beyond socially acceptable behavior.

Perhaps because ordinary, mundane crime is still relatively rare in Japan compared with the United States, the crimes that tend to stand out and shock the nation are often of an especially heinous and imaginative character. For a mystery writer like Miyabe, the challenge arises to offer her reader fictional villains with a special modus operandi that reveals a criminal energy rivaling that of the most outlandish real crime figures. At the same time, Miyabe juxtaposes the criminal with detective figures who, even though damaged by everyday life, nevertheless commit to upholding decency, morality, and human kindness.

In her greatly successful *All She Was Worth*, Miyabe combines elements of good sleuthing, echoes

of hard-boiled detective fiction, and concise social observation and criticism. The fortunate combination of these elements in this novel may be what solidified her popular fame in Japan and made it the first of her books to be translated into English.

All She Was Worth showcases Miyabe's keen interest in the intricacies of actual police work. The author has stated how she peruses publicly available materials on forensics and scientific approaches to criminal investigations and keeps in close contact with the public relations offices of the Tokyo Metropolitan Police. Thus she is able to build a realistic background for her detectives' quests. At the same time, Miyabe is intensely interested in the psychological, social, and economic factors that may drive a nondescript young person, generally a woman, into a life of crime. Her analysis of the lures of consumer culture, which may trap a soul on a trajectory of no return, fascinated readers of *All She Was Worth*.

In *Crossfire*, Miyabe uses the supernatural as a metaphor for an individual's desperate attempt to strike back at a society seen as severely out of kilter. Punishing criminals by willing fires to engulf them at first may liken the novel's young Junko Aoki to a kind of supercharged Japanese Batman meting out justice on her own. However, in Miyabe's world this approach backfires. Here the powers of society prove far more intolerant of a solitary vigilante than are the fictional denizens of Gotham City. Reinforcing the message in *Shadow Family*, Miyabe is at considerable pains to show that extrajudicial violence cannot be the correct way to end injustice.

Equally as convincing as her highly imaginative perpetrators are Miyabe's detective protagonists. From Shunsuke Honma in *All She Was Worth* to the disillusioned Detective Chikako Ishizu in *Crossfire* and *Shadow Family*, Miyabe's fictional counterparts to the world of crime are ordinary citizens who possess a strict, functioning moral guidance compass. Faced with the outlandish imagination of the criminal mind, these down-to-earth, middle-aged detectives reassert moral order and human decency even in a world that poses a threat to these values.

Japanese culture has always valued the poetic, the imaginative, and the beautiful tinged with a strong fla-

vor of death. Samurai took pains to groom well before battle so their severed heads would make proper trophies if they lost in combat. Drawing on this tradition, Miyabe's villains exude creativity, criminal energy and imagination. However, when they are brought down, social order is reestablished for everyday people. In addition, Miyabe avoids a Western tendency to excuse her villains' behavior through their victimization by society. In her mysteries, criminals become bad because of their own free will and must suffer the consequences.

ALL SHE WAS WORTH

Miyabe's first award-winning novel, *All She Was Worth*, opens inconspicuously enough as a missing-person case. On sick leave recovering from a gunshot wound to his leg, forty-three-year-old Tokyo police detective Shunsuke Honma is visited by his arrogant young cousin, who implores him to search for his fiancé, Shoko Sekine. The woman dropped out of sight when the cousin found out she had once filed for personal bankruptcy. Soon, however, the reader, following the creative sleuthing of Honma, learns that his cousin's fiancé stole the identity of another woman. Even though the cousin angrily dismisses Honma's findings, the police officer does not give up his quest to find the impostor.

In the course of Honma's inquiries, Miyabe treats the reader to a haunting portrayal of the pitfalls of modern Japanese consumer credit society. Whereas the real Shoko is able to discharge her accumulated debt legally through new bankruptcy regulations, her impostor is not so lucky. As her spendthrift father ruined the family and got involved with Yakuza loan sharks, his daughter is made to pay a terrible price that destroys her first marriage. Driven to despair, the impostor, Kyoko Shinjo, stops at nothing, even murder, to acquire a new identity. At the dramatic showdown of Miyabe's novel, Honma and his friends ready themselves to confront Kyoko with their knowledge of her crime.

The positive American reception of Miyabe's novel was based on both its superb plotting and its haunting, in-depth view of characters trapped by the intricacies of modern Japanese consumer society. Miyabe's meticulous rendition of a woman's path to despair and her imaginative efforts to obtain a new

identity against the backdrop of the Japanese public-records system fascinated her foreign readers. Even though Miyabe's narrative is not without sympathy for the woman victim turned perpetrator, at the novel's end the police veteran reasserts the importance of morality and free will even in a deeply flawed social environment. This is typical of Miyabe's crime fiction.

CROSSFIRE

Perhaps because it features the paranormal, Miyabe's crime novel, *Crossfire*, which introduced detective Chikako Ishizu, was published in English only after its sequel, *Shadow Family*. It is easy to see how the pyrokinetic ability of *Crossfire*'s antagonist, Junko Aoki, is a metaphor for a woman's desire—and ability—to effect swift vengeance. It is the social ramifications of such individually pursued justice that stand at the philosophical core of Miyabe's mystery.

Crossfire opens as—burdened by her ability, which she has used for vengeance once before—Junko Aoki stumbles on yet another crime-for-thrills by a juvenile gang. After she incinerates the gang but misses its leader, callous teenager Keiichi Asaba, Junko tracks him down. At the same time, Detective Chikako Ishizu of the arson squad of Tokyo's Metropolitan Police is called on to solve this bizarre crime spree. Middle-aged, down-to-earth, and with a son in college and a husband who is generally absent and makes only one late-night drunken appearance in the novel, Ishizu is considered both a maternal presence and a jealously disliked product of the Japanese version of affirmative action. Ishizu's sharp intellect propels her to solve the case together with male Detective Makihara, who believes in pyrokinesis for traumatic personal reasons.

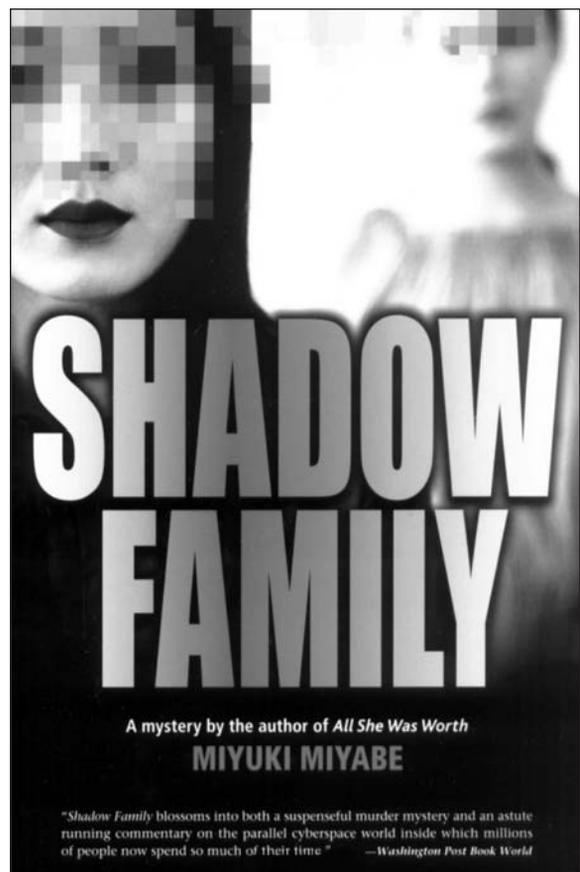

Miyabe's novel skillfully mixes the sensational with keen observations on the spiritual and emotional loneliness persuasive in contemporary Japanese society. The detectives encounter another pyrokinetic, the girl Kaori Kurata, just as Junko becomes involved in a shadowy organization of high-placed vigilantes.

For all its paranormal fireworks, *Crossfire* confronts the issue of taking the law into one's own hands. Miyabe ends her novel with the moving scene of Junko's farewell, as she dies in the snow outside a remote villa. Detective Ishizu refuses to bow to the vigilantes.

SHADOW FAMILY

Originally published as *R.P.G.*, short for "role playing games" and showing Miyabe's penchant for English original titles, *Shadow Family* revisits detective Ishizu after she runs afoul of her superiors in *Crossfire*. Working within a larger scheme dreamed up by a police veteran, Ishizu takes on the bizarre case of the murder of a man and his girlfriend. The man had created his own virtual family on the Internet to the detriment of his real-life teenage daughter. Again, Miyabe's tightly constructed plot, full of twists and surprises, fascinates as much as her meticulous rendition of the mind of her teenage woman villain.

In this tightly constructed mystery, which takes place during one afternoon in a Tokyo ward police station, Ishizu and her colleagues try to force the man's sixteen-year-old daughter, Kazumi Tokoroda, to tell the truth about the double murder by appearing to bring in the players of the virtual family of the murder

victim. Again, Miyabe treats her readers to the details of Japanese police procedures as well as to a disillusioning picture of alienation, power games, and decay within a contemporary Japanese family.

The two-way mirror of the interrogation room separating the people reenacting their roles on the Internet and the observant Kazumi observed by Ishizu is an apt metaphor of Miyabe's craft in bringing out the hidden layers of modern Japanese society through her popular crime fiction. Although there is an implication that some of the extreme violence in Japan has come from America, indicated by Miyabe's use of English titles for many of her novels, there is also a reminder that the intricacies of indigenous Japanese society are equally responsible. The conflict between social conformity and the quest for individual expression takes center stage. The fact that it is young women who lash out is what gives Miyabe's mysteries their special flair.

Williams, Wilda. Review of *Shadow Family*, by Miyuki Miyabe. *Library Journal*, 130, no. 3 (February 15, 2005): 124. Balanced review of the novel; considers Miyabe's social critique too strong.

ANNE MORICE

Felicity Wolthington

Born: Kent, England; February 18, 1918

Died: Place unknown; 1989

Also wrote as Felicity Shaw

Types of plot: Amateur sleuth; cozy

PRINCIPAL SERIES

Tessa Crichton Price, 1970-1988

PRINCIPAL SERIES CHARACTERS

TESSA CRICHTON PRICE, an amateur sleuth and actress, is the wife of Scotland Yard Detective Robin Price. Although her age and appearance remain undefined, clues suggest that Tessa is youthful and attractive. Seldom performing in a long-running play, she travels in England, visiting friends and relatives who require her detective expertise. A talkative narrator, she displays exuberance, curiosity, and perceptiveness.

TOBY CRICHTON is Tessa's curmudgeonly, reclusive playwright cousin, with whom she enjoys discussing solutions to the murderous events around her.

CONTRIBUTION

Anne Morice's twenty-one novels featuring amateur sleuth Tessa Crichton Price, the loquacious narrator, have been described as offering "sneaky endings, civilized middles and comfortable beginnings, which tell you in a page or two that you're in the company of a classic detective-story writer." Following in the tradition of Agatha Christie and Ngaio Marsh, Morice placed her characters in confined settings and examined the reality of psychological turmoil hovering beneath a facade of social harmony. Misled by skillfully placed red herrings, the reader can verify in reflection that the author faithfully provided the clues necessary to successful detection. Morice expanded the "puzzle" technique to include commentary on writing itself, creating, in essence, the metamystery. Her style simulates conversation, conveying essential information in skillful dialogue that reveals her interest in the theater. Her mysteries lend credence to the genre as a medium of social, psychological, and literary commentary.

BIOGRAPHY

Anne Morice was born Felicity Wolthington in 1918, in Kent, England, the daughter of Harry Wolthington and Morice Wolthington. She attended Francis Holland School, in London, and schools in Paris and Munich. In 1939, she married Alexander Shaw, a film director, with whom she had two daughters and one son. Several members of her family have had theatrical ties: father, a playwright; sister, an actress; brother-in-law, a theatrical producer; and two nephews, Edward Fox and James Fox, actors.

She began writing mysteries when she and her husband were living in Paris. On frequent trips to see her son, who was in school in England, she purchased the latest mysteries, eagerly sharing them with her husband on her return home. Between 1970 and 1988, she published twenty-two mysteries, only one of which did not feature Tessa, *Design for Dying* (1988). Although her husband's work with the United Nations Educational, Scientific, and Cultural Organization (UNESCO) and the World Bank enabled her to travel widely, she selected England as the setting for most of her works. She died in 1989.

ANALYSIS

Anne Morice began her mystery-writing career with *Death in the Grand Manor* (1970), and she wrote eight more novels in which Tessa's acting career remains a mere device to explain her insight into character. In *Nursery Tea and Poison* (1975), Tessa visits her godmother, Serena Hargrave, at her cottage in Herefordshire and discovers the murderess of Nannie to be Serena's "truculent" daughter Primrose. A particularly vivid scene, indicative of Morice's knowledge of set design, depicts Serena clutching a carving knife, Tessa listening to a Bob Newhart monologue on the gramophone, and Primrose vanishing. For *Death of a Wedding Guest* (1976), Roakes Common, her cousin Toby's home, becomes the setting for the wedding of Toby's daughter Ellen. Her mother, Irene, who deserted her and Toby years before, returns for the wedding, only

to be murdered because she has witnessed a hit-and-run accident committed by the mother-dominated Phillip, once Ellen's boyfriend. Portraying Tessa between acting assignments and in the midst of friends and relatives, these early mysteries establish Morice as an author of mysteries of manners.

MURDER IN MIMICRY

With *Murder in Mimicry* (1977), Morice moves the theater to center stage, using a theatrical milieu for this novel set in Washington, D.C. In it, she introduces two characters who will appear in several mysteries: Lorraine Beasely, an assertive and untidy friend with whom Tessa stays in Georgetown, and Henry Thurloe, a successful lawyer who will become Lorraine's fifth husband. Beginning before Tessa departs from England for the United States, the novel opens with Tessa and Robin having just finished a celebration lunch in honor of their fifth wedding anniversary and his promotion to chief detective inspector. At the conclusion, Robin joins Tessa and Toby at dinner as they discuss highlights of the solved case. Morice maintains this pattern, in which the mysteries begin and end with conversations between Tessa and at least one of the men in her life.

This narrative style emphasizing conversation reveals Morice's indebtedness to Rex Stout, whom she identified as her favorite author. Tessa shares Archie Goodwin's narrative facility, attention to detail, and psychological expertise. Morice particularly admired Stout's realistic description. She explained, "I still believe if I walk down 35th Street, I'll find Wolfe's townhouse, and if I look up, I'll see his orchids growing on the roof." In addition, she paid homage to Nero Wolfe by transferring many of his qualities to Toby: his reclusive nature, fondness for food, and abrasive manner. Even her decision to write mysteries of manners might have been influenced by Stout, who declared Jane Austen the greatest writer and *Emma* (1815) a masterpiece.

With the setting of *Murder in Mimicry* in the United States, Tessa begins to interject comments on the writing process itself. She and Toby speculate on creating a traditional detective story using her cohorts in the theatrical company as characters. Engaging in banter, the cousins create motives for murdering Gilbert, the supercilious star of Toby's comedy, *Host*

of Pleasures, currently appearing in Washington, D.C. Speaking of the "anti-Gilbert motif," Tessa and Toby discuss the "classic pattern," inserting names of her fellow thespians.

DEATH IN THE ROUND

Death in the Round (1980) contains more reflective commentary. Tessa evaluates the plays of Jamie Crowther, the author of the work in which she comes to the Rotunda Theatre to appear: "They neither were nor aimed to be in any way memorable or profound, but the formula was unbeatable: tautly constructed plots, sharp characterization, an innate sense of the theatre and the magic gift of being able to make people laugh." Such a formula might well be the one to which Morice subscribed in creating her mysteries. Tessa argues, "In my experience, nearly all playwrights are martyrs to neurosis in one form or another." The nervous Crowther attempts to control his fears by doing petit point to re-cover his dining-room chairs. In her later works, Morice has continued to depict the fictional author's concern for both the created work and the audience's response. Even fellow characters become involved in naming the mysteries. Tessa asks Robin, "If this had been fiction, instead of merely truth, what would you have called it?" He responds, "How about *Death in the Round*?"

THE MEN IN HER DEATH

To provide a sense of continuity, Morice allows Tessa to interact with the same friends in more than one book. In each case, the friendship itself reveals a growth. *The Men in Her Death* (1981) finds Lorraine and Henry Thurloe married since they last saw Tessa. Lorraine arrives in England to stay with Tessa and Robin as she looks for Sandy Thurloe, the daughter of Henry's sister-in-law. Roakes Common again provides the setting for much of the action. Tessa first encounters Kim Enolls, the poet who proves to be the murderer, clipping Toby's hedges. Mr. Parkes, the temperamental gardener who refuses to perform this task, appears with his iron-willed housekeeper-wife in most of the later novels. Robin saves Tessa from being killed by Enolls, who murdered Sandy because she did not sufficiently appreciate his literary talent. Authors frequently serve as suspects or victims in Morice's mysteries.

HOLLOW VENGEANCE

Elsa Carrington and her two children, Millie and Marcus, first appear in *Hollow Vengeance* (1982). Here the reader receives one clue about Tessa's age. She baby-sat Millie, now sixteen, and her brother when not too much older than her charges are now. Astounded at Elsa's naïveté, Toby argues that if he should turn the events of this mystery into a play, he must drop Elsa, because no audience would ever believe in her trusting nature. Thus, Morice continues to manipulate illusion and reality.

GETTING AWAY WITH MURDER?

Elsa and her children, who have aged two years, reappear in *Getting Away with Murder?* (1984). Once again Tessa is invited to visit them at their home, Sowerly Grange, near Storhampton, Oxfordshire. Gregory Laycock proves to be one of Morice's least sympathetic murderers. His daughter, Andrea, seems initially to be an insensitive friend of Marcus, but actually, she suffers from emotional abuse perpetrated by her father. Realizing that his guilt has been discovered, he commits suicide, a typical response for Morice's murderers. They seldom remain at the conclusion to be judged, reflecting Morice's opinion that the repeal of capital punishment has taken "the bite" from crime stories.

DEAD ON CUE

Dead on Cue (1985) typifies the distinctive quality of Morice's work. As Robin and Tessa are returning home from "one of the most disastrous first nights in theatrical history," he informs her of his invitation to speak at the Alibi Club, a group of outstanding mystery writers. Thus begins a metamystery in which linguistic peculiarities identify the murderer. The members of the club revel in their eccentricity. Tessa describes red-haired Myrtle Sprygge: "Had she been auditioning for the part of Cleopatra's grandmother during a stormy period of her life, she would have got it without opening her mouth." Before her murder, Myrtle reveals that she has sent a script to a fellow Alibi Club member, the now-deceased William Montgomerie, a playwright whom Tessa has admired. The script has not been seen, according to Montgomerie's second wife, Gwen, and his longtime secretary, Joyce Harmon. When Tessa receives a play entitled *Loop-holes* to consider, she recognizes it as Myrtle's.

Part of the plot concerns the study of a text to identify authorship. Nigel Banks, the president of the Alibi Club, exhibits that eccentricity Morice bestows on her author characters. When Tessa encounters him in a bookstore furtively rearranging his books to display them better to the buying public, he dispels her opinion that he is either an indignant or a furious fox. He reveals psychological insight with his description of Joyce:

"She picks up things most people wouldn't notice. Trouble with Joyce, though, is that she's gone through life with blinkers on. Hasn't much awareness of what's going on in the world outside. It sometimes leads her into false conclusions."

Nigel's comment causes Tessa to reevaluate the seemingly shy and ineffectual secretary. Such an analysis applies to many of Morice's murderers, who display an arrested emotional development.

Joyce, who admits that she is a liar, exhibits an unusual speech style. Tessa realizes that Joyce begins a conversation by using words that convey the opposite of her intention. When she lies, she articulates fluently. With an actress's sensitivity to speech patterns, Tessa suspects Joyce's duplicity. Moreover, Joyce's habit of tapping her fingers as "a sort of offering to the jealous gods" does seem suspicious. A chance reading of a women's magazine article on making ice sculptures provides Tessa with another clue. Her skill in synthesizing various clues to solve the mystery is foreshadowed by her admission that she is "a dedicated student of psychology" and a reader of mysteries. Although she attempts to poison Tessa, Joyce remains a poignant murderess, less a hypocrite than those who have committed no legal crime.

Throughout the series Tessa comments on the relationship between the author and the created work. She evinces surprise that Bockmer, the new member being inducted into the Alibi Club, is an "insignificant, comically shy man." Perhaps she speaks for Morice when she suggests that "the profession he had so wisely chosen enabled him to act out his secret fantasies during every minute of his working life and thereby earn enough money to carry on doing so."

DAVID MORRELL

Born: Kitchener, Ontario, Canada; April 24, 1943

Types of plot: Thriller; espionage

PRINCIPAL SERIES

Rambo, 1972-

Saul Grisman and Drew MacLane, 1984-

Frank Balenger, 2005-

PRINCIPAL SERIES CHARACTERS

JOHN RAMBO is described in *First Blood* (1972), but most people probably see him as the actor Sylvester Stallone, who played him in three films (1982, 1985, 1988). Rambo's mother died early; his father was an abusive alcoholic. The boy was often hungry

and quit school to work. Later, Rambo fought in the Vietnam War as a Green Beret and won the Medal of Honor but was tortured as a prisoner of war and left psychologically scarred. Rambo's popular characterization owes much to the films, although expanded novelizations were created for the second and third films.

SAUL GRISMAN is an orphan, who along with his friend Chris Kilmoonie is befriended by Eliot, a Central Intelligence Agency (CIA) operative. Eliot trains them as operatives but later tries to murder them. Chris is killed; Saul goes after Eliot for revenge.

DREW MACLANE is a former assassin living in a monastery when his past returns to threaten him. Saul

and Drew join forces to uncover a conspiracy that punishes sons for their fathers' sins.

FRANK BALENGER fought in Operation Desert Storm as a member of the Army Rangers. He suffered Gulf War syndrome and left the army to become a police detective. His wife, Diane, disappeared, and Balenger lost his job because he was searching for her. To earn money for his search, Balenger took a corporate security job in Iraq after the Gulf War but was captured and tortured. After his rescue, he returned to the United States and was treated for post-traumatic stress disorder.

CONTRIBUTION

David Morrell is often considered the father of the modern action thriller. He revels in that identification, and action sequences are clearly his greatest strength. His novels set a relentless pace and are filled with chase scenes, violent confrontations, and a large body count. Morrell continually tries to speed the pacing of his novels. His prose, especially since the mid-1990's, has been stripped to the bare essentials to keep the story moving. His chapters are short and often end with cliffhangers. Morrell's success with action novels has helped usher in an age of hyper-fast thrillers that make the spy novels of the 1980's look slow.

Morrell's works are generally not acclaimed by literary critics, as is typical of plot-driven novels, but his books consistently make best-seller lists and his readers are enthusiastic. It is telling that when thriller writers started organizing themselves, they immediately invited Morrell to help. He sat on the steering committee that formed the International Thriller Writers and was elected copresident. Within that community, his work is highly regarded.

BIOGRAPHY

David Bernard Morrell had a troubled childhood. His father, George Morrell, flew with the Royal Air Force in World War II but was wounded and died of pneumonia shortly after David's birth. His mother, Beatrice Markle Morrell, who struggled financially and had her own troubled childhood, temporarily put David in an orphanage when he was four. Morrell has wondered if the woman who retrieved him was the

same one who had left him. Morrell's mother then placed David on a Mennonite farm while she worked, seeing him only on weekends.

Morrell's mother eventually remarried and brought him to live with her and her new husband above a bar. His stepfather was always arguing with his mother, however, and provided a poor father figure. Morrell often slept under his bed out of fear. The family had no television or telephone. Neither his mother nor his stepfather read much, so there were few books in the home. For entertainment, Morrell listened to the radio, explored abandoned buildings, and watched drunks fight beneath his window.

After their finances improved, the family moved to suburbia. Morrell treated school as a distraction, spending his time playing pool, running with street gangs, or watching television and films. Morrell's life changed in 1960 when the television series *Route 66* (1960-1964) aired. Stirling Silliphant wrote most of the show's episodes, and Morrell found himself stimulated emotionally and intellectually by the stories. In the eleventh grade at the time, Morrell decided to become a writer. He wrote Silliphant about his plans, and Silliphant wrote back with encouragement. If it had not been for that letter, Morrell claims he never would have attended college.

Morrell married his high-school sweetheart, Donna Maziarz, in 1965. He was in college in Canada at the time, and he read a book on Ernest Hemingway by the scholar Philip Young. Young taught at Pennsylvania State University, and Morrell, his wife, and newborn daughter, Sarie, moved to the United States in 1966. Morrell became Young's student, eventually earning a master's degree and a doctorate in American literature. At Penn State, Morrell met the noted science-fiction writer Philip Klass (who wrote as William Tenn). Morrell persistently pursued Klass's help with his fiction, and after a time, the older writer agreed and gave him some personal instruction. Because of this, Morrell began reading popular suspense fiction for the first time, and his writing took on more immediacy. This culminated in the publication of *First Blood* in 1972.

After earning his doctorate in 1970, Morrell began teaching at the University of Iowa. He wrote fiction and taught literature for sixteen years, acquiring ten-

ure and full professorship, but retired in 1986 to write full time. Unfortunately, Morrell's son, Matthew, died in 1987 at the age of fifteen of complications from bone cancer, and it was several years before Morrell recovered his ability to write fiction. Morrell chronicled Matthew's death in *Fireflies: A Father's Tale of Love and Loss* (1988). In 1992, Morrell moved with his wife to Santa Fe, New Mexico, where he regained his momentum as a writer.

Morrell is cofounder and copresident of the International Thriller Writers. He has trained in weapon tactics, wilderness survival, defensive driving, and other skills that he portrays in his books. He received a Distinguished Recognition Award for *First Blood* and has twice won the Bram Stoker Award for shorter fiction. His *Creepers* (2005) tied for the Stoker Award for best novel.

ANALYSIS

The three most important elements of David Morrell's work are his focus on thrillers, his early themes (before his son's death), and his later themes (after). Morrell takes the role of thriller writer seriously. He never apologizes for writing to excite and entertain readers. Action is at the core of his work, but his books also examine specific ideas that Morrell finds interesting. *Creepers* introduced readers to urban exploration, where people venture into storm drains, abandoned subway lines, and derelict buildings in search of the past. *Scavenger* (2007) wove information about time capsules and virtual reality into the action scenes.

Because of the thriller's pace, Morrell's characters are typically sketched quickly and in broad terms. He is sometimes criticized for creating shallow characters. There are certainly commonalities among his characters. Frank Balenger was created for *Creepers* and *Scavenger*; two of Morrell's later books, but is remarkably similar to Rambo, from his first novel. Both Balenger and Rambo were in the military special forces. Both experienced the trauma of war, and both suffered capture and torture by enemies. In fact, almost all of Morrell's characters are either former members of special forces, spies, or assassins, and though Morrell was never in the military, his characters follow a military-style code that demands honor, loyalty, courage, and

self-sacrifice. After moving to Santa Fe in 1992, however, Morrell began introducing more mature male/female relationships into his work.

Before his son's death in 1987, Morrell's primary themes seemed to be fear, especially of war and violence; security and its loss; a son's search for his father; religion; and personal identity. These themes were a natural result of his own childhood. He feared abandonment because his mother had already left him once. He feared war because the father he never knew died in one, and he feared violence because he saw it on the streets and experienced it through countless arguments between his mother and stepfather. He also desperately craved a father and was envious of friends who had fathers. His search for a father led him to strong men who significantly affected his life, including Silliphant, Young, and Klass. His Roman Catholic upbringing led him to create a significant number of Catholic characters, including Rambo, and his curiosity and confusion over his own history led to a crisis of personal identity that informs many of his works.

Many of Morrell's early themes continued in the second half of his career, after his son's death, but these themes were often altered slightly, and new themes were added. Fear and violence continued to play major roles in his work, perhaps best illustrated in *The Protector* (2003), which features a chemical that can literally frighten people to death. Morrell's interest in the nature of personal identity also continued, in such books as *Assumed Identity* (1993), in which a retired intelligence agent is confused about his real identity after years of assuming the identities of others. Morrell's interest in security followed him into the 1990's and beyond, but the focus became less about personal security and more about family security. In *First Blood*, Rambo has to take care of only himself, and his personal security begins and ends with his individual skills. In contrast, in *The Protector*, the security agent hero depends on a team, and when that team is destroyed, he turns to his wife.

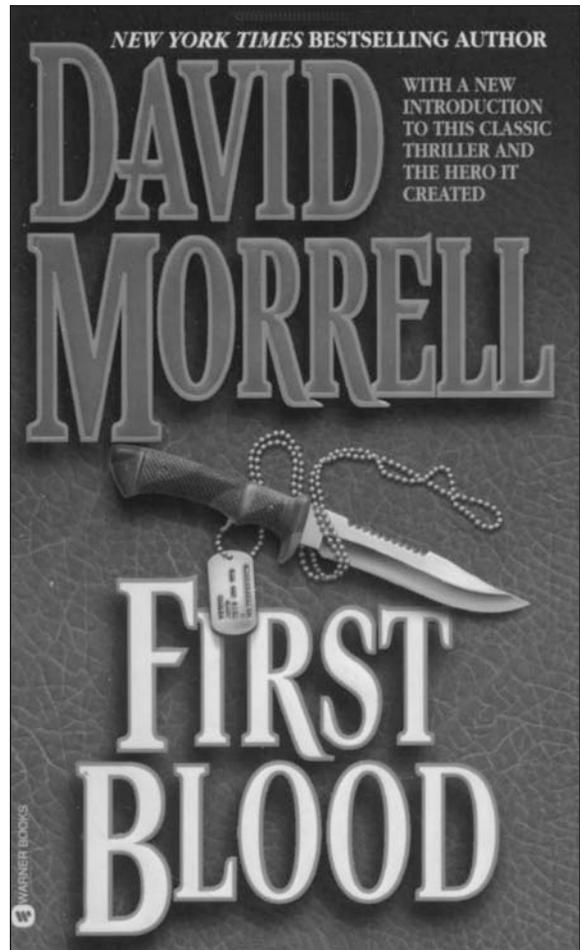

Morrell's father/son theme changed dramatically after his own son's death. In his early period, Morrell wrote about sons searching for fathers. In *Blood Oath* (1982), Morrell's most autobiographical work, an American professor journeys to France to find the

grave of his father, who was killed in World War II. Orphans searching for fathers are major characters in the trilogy that begins with *The Brotherhood of the Rose* (1984). After his son's death, however, Morrell became a grief-stricken father searching for a son. Morrell had planned a sequel to *The League of Night and Fog* (1987, the third book in the trilogy) that would continue the theme of sons seeking fathers, but he could no longer identify with such characters after the loss of his own boy. Instead, he began using fiction to recover something of his son, which played out dramatically in *Desperate Measures* (1994), a book whose main character has lost a son to bone cancer.

A theme that largely faded away during the second half of Morrell's career was his fascination with religious concepts. Although early books like the Grisman and MacLane novels all dealt with religion and religious institutions, after his son's death, only *The Covenant of the Flame* (1991) did so, and it is considered one of his weaker books. Morrell's feelings on religion are discussed in *Fireflies*. In contrast, a theme that intensifies dramatically in Morrell's post-1987 work is his concern over how humans damage the environment. In *The Covenant of the Flame*, for example, a religious group protects the environment by brutally slaughtering anyone who seriously harms it. Morrell received hate mail from nonenvironmentalists over this book. *The Covenant of the Flame* brought environmental concerns to the forefront in Morrell's work, and most of his later books touch on the subject. In *Creepers*, the theme of environmental decay and destruction is particularly strong. One notable theme that does not appear often in Morrell's work is humor, although it shows up in short stories such as "The Partnership" and "The Storm."

FIRST BLOOD

In *First Blood*, the novel on which the series of films starring Sylvester Stallone was based, Vietnam veteran and Green Beret John Rambo has returned to the United States. He is hitchhiking across the country when his rough appearance draws the attention of Wilfred Teasle, a local police chief in Kentucky. Escorted out of town, Rambo returns, and when a deputy tries to cut his hair and give him a shave, the veteran retaliates and escapes. This leads to a chase through

the mountains of Kentucky and the ultimate face-off between Teasle and Rambo. Returning Vietnam veterans, who were not greeted warmly by the public, saw something of themselves in Rambo. The success of the 1982 film based on this novel led to Morrell's writing two sequels.

THE BROTHERHOOD OF THE ROSE

The Brotherhood of the Rose was Morrell's first large-scale novel. It had more characters than his previous books and a more complicated plot involving international intrigue. The initial book in a trilogy, it illustrates most of Morrell's early themes. Saul Grisman, a Jew, and Chris Kilmoonie, a Roman Catholic, are raised in a Philadelphia orphanage. They are befriended by an older CIA operative named Eliot, who becomes like a foster father to the boys and trains them

as assassins but later tries to incriminate and kill them to protect himself from his own mistakes. Chris is killed but Saul survives and seeks revenge. This novel contains the themes of sons searching for fathers, fear of abandonment and betrayal, religion, and the code of honor and self-sacrifice that forms the backbone of a Morrell hero.

FIREFLIES

Although not a thriller, *Fireflies* is essential for understanding Morrell as a writer, particularly how his themes altered midway in his career. *Fireflies* is a memoir of his son's death. Fifteen-year-old Matthew died of a heart attack triggered by septic shock as a result of a bone marrow transplant to treat his bone cancer. However, *Fireflies* is not completely factual. Morrell fictionalized part of the account, having himself experience a nightmare/premonition about how Matthew would die and then try to prevent it. According to Morrell, however, the book accurately presents the emotional turmoil surrounding Matthew's death, and it reveals actual experiences that convinced Morrell his son's spirit survived. *Fireflies* is an emotionally wrenching read.

THE PROTECTOR

In *The Protector*, the protagonist Cavanaugh was in Delta Force, the U.S. Army counterterrorism special forces unit, for five years. Having become addicted to adrenaline, he becomes a security agent for high-profile celebrities and businessmen. He and his team try to help Prescott, a brilliant biochemist, disappear, but Prescott has invented a chemical that triggers intense fear, and after using Cavanaugh's team, Prescott turns on them, killing all but Cavanaugh. Cavanaugh must then learn to depend on his wife, Jamie, as he pursues Prescott across the country with rogue government agents hunting them all. *The Protector* is absolutely action-filled and features Morrell's prototypical hero, a former special forces soldier with a rough childhood. The book examines Morrell's themes of loss and betrayal, security, and identity.

ARTHUR MORRISON

Born: Poplar, England; November 1, 1863

Died: Chalfont St. Peter, England; December 4, 1945

Type of plot: Private investigator

PRINCIPAL SERIES

Martin Hewitt, 1894-1903

PRINCIPAL SERIES CHARACTER

MARTIN HEWITT, a private investigator, had been a law clerk, but his genial ways, powers of observation, and general acumen proved so useful in solving a crime in which his firm was interested that he decided to go into private investigative work on his own. Hewitt, a bachelor, remains in his middle years throughout the series. A corpulent, sociable type, Hewitt applies his formidable powers of reasoning to the information that he obtains by exercising his ability to charm.

CONTRIBUTION

Arthur Morrison's numerous tales of detection, including four volumes of Martin Hewitt stories, helped to create a transition between Sherlock Holmes and later hard-boiled detectives. Critics generally see Morrison's Hewitt as a more realistic and therefore believable offshoot of the Sherlock Holmes character, devoid of the Holmesian eccentricity and imperiousness that mar the sleuths of Morrison's competitors, such as Jacques Futrelle.

Beyond merely recounting processes of detection, Morrison offers reflective commentary on working-class dilemmas and other issues with political implications. His nondetective fiction, such as *Tales of Mean*

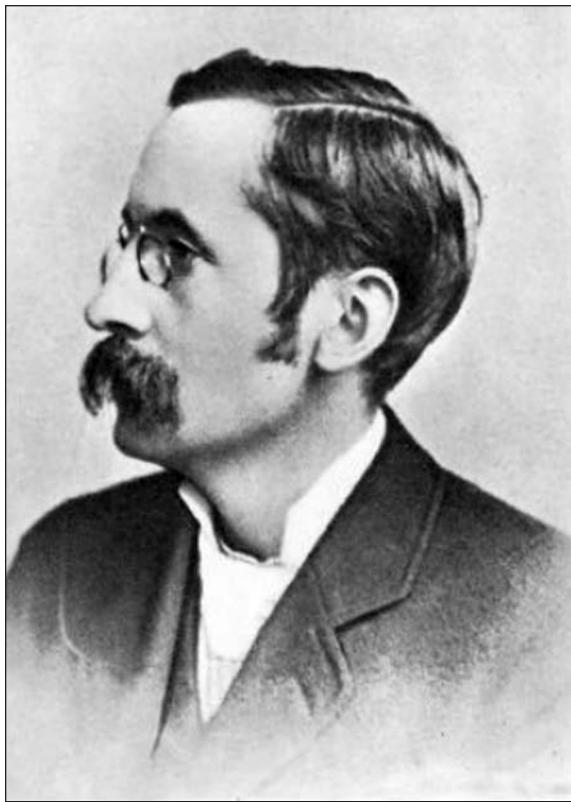

Streets (1894) and *A Child of the Jago* (1896), often focuses on themes of class struggle.

BIOGRAPHY

Arthur Morrison was born on November 1, 1863, in Poplar, England, the son of an engine fitter. Morrison seems to have desired to sever his working-class connections, for as an adult he referred to his father as a professional and asserted that he had been born in Kent, though his birth certificate indicates otherwise. His humble origins influenced him deeply; as he grew, he became a stalwart champion of talent and upward mobility as opposed to the stratification of class.

At the age of twenty-three, Morrison became a clerk for the Beaumont Trustees, a charitable organization, in the administration of the People's Palace, a social improvement facility in the East End. Here his principal interest was in cultural activities—musical performances, debates and lectures, and club and society meetings. He became a subeditor of the *Palace Journal* and wrote articles on sports and other subjects for various periodicals. In 1890, he began working as a freelance journalist. He was married to Elizabeth Thatcher, whom he had met at the People's Palace. In 1893, a son, Guy, was born to them.

In the process of becoming established as a writer, Morrison embarked on a study of the occult, which resulted in *The Shadows Around Us: Authentic Tales of the Supernatural*, published in 1891. That same year, his article describing the respectable monotony of a street in the East End aroused the interest of W. E. Henley, editor of the *National Observer*, who encouraged Morrison to continue documenting the realities

Arthur Morrison.

of working-class life. Thus, Morrison was set on the strange course of earning his living by exploring in print a background that embarrassed him and that he had desired to conceal: He became known as a working-class realist. *A Child of the Jago* has been credited with influencing public opinion in favor of slum clearance legislation.

Morrison's venture into detective fiction began after Arthur Conan Doyle shocked his readership—as well as his editors—by sending Holmes and Professor Moriarty over the Reichenbach Falls in 1893. The genre provided Morrison with the opportunity to challenge his intellect while simultaneously making use of his knowledge of crime and poverty. The first Martin Hewitt story appeared in *The Strand Magazine* in March, 1894.

Beginning in about 1895, Morrison devoted much energy to what became his chief love: the collecting of fine Asian art. In 1911, he published a two-volume study on the subject: *The Painters of Japan*. Soon, he had left journalism behind entirely and was able to

support his family from his work as an art dealer.

On her husband's death in 1945, Elizabeth Morrison, in accordance with his wishes, consigned all of his manuscripts, papers, and notebooks to the fire.

ANALYSIS

As might be expected of a writer from a working-class background, Arthur Morrison made extensive use of characters from the laboring class and lower middle class; he extended this fascination with the underdog to anguished members of the professional and aristocratic classes. He frequently subordinated the subject of murder to the subject of theft, which is uppermost in the minds of those who have had relatively little at one time. "The Case of the Dixon Torpedo," an early story, concerns the trials of an engineer, F. Graham Dixon, whose career may go under because of the theft of his plans for a torpedo in which the government has great interest. Claridge and Woollett, jewelers in "The Stanway Cameo Mystery," fall prey to guilt arising from the foisting on Claridge of a fake cameo by a confidence man. In "The Holford Will Case," an elderly lawyer, assigned as an estate executor, is befuddled by the theft of his friend Holford's will and the resulting threat to the main legatee's financial security. It is Morrison's working-class tales, however, that seem to have originated in the author's strongest feelings and evoke his reader's strongest sympathy for Morrison's hapless victims.

"THE CASE OF MR. FOGGATT"

In "The Case of Mr. Foggatt," Sidney Mason, the murderer of his father's enemy, Foggatt, is a rising young barrister whose athletic injuries give him away to Hewitt, who is seeking a culprit with a tall, athletic build. Hewitt has seen Mason before around the premises of the crime, since Foggatt, Hewitt, and the narrator, Mr. Brett, occupy chambers in the same building. The sleuth also has found marks of jagged teeth in an apple in Foggatt's apartment. In a restaurant, Hewitt, with Brett, engages Mason in a conversation about cycling. Cycling is the sport into which Mason had been led by the conditions of poverty in which he and his mother lived after the tragic death of his father. Hewitt has spotted Mason in the restaurant by the stooping posture characteristic of a cyclist. In a discus-

Detective Martin Hewitt looks for clues in a cemetery in Arthur Morrison's story "The Quinton Jewel Affair." The illustration is by Sidney Paget, who also illustrated Arthur Conan Doyle's Sherlock Holmes stories for The Strand Magazine.

sion about cycling champions of old, Mason then begins to detail his racing injuries. He exhibits

a neat gold medal that hung at his watch-guard. That was won, he explained, in the old tall bicycle days, the days of bad tracks, when every racing cyclist carried cinder scars on his face from numerous accidents. He pointed to a blue mark on his forehead, which, he told us, was a track scar, and described a bad fall that had cost him two teeth and broken others. The gaps among his teeth were plain to see as he smiled.

While the young man is addressing the waiter, Hewitt steals Mason's apple after he has bitten into it. The indentations in the fresh apple prove to match perfectly the indentations in the plaster cast Hewitt had taken from the first apple. When Mason turns back and discovers that his apple is missing, his suspicions are aroused. He already knows of Hewitt as a successful, relentless, and resourceful detective, but he has believed until now that Hewitt had no interest in the Foggatt case because of the detective's silence at the inquest.

The more important question is, however, what does Hewitt know of Mason? The latter is described as

"a rather fine-looking fellow, with a dark though very clear skin, [who] had a hard, angry look of eye, a prominence of cheek-bone, and a squareness of jaw that gave him a rather uninviting aspect." These signs of the stubbornness and distrustful nature of one who has been forced to make his own way in the world combine with the scars of the sporting tough, a role from which Mason has dissociated himself only after a struggle. What of Foggatt, the reclusive gentleman whom Mason murdered to avenge the evil done to his father? A connoisseur of fine paintings and champagne, Foggatt, "fat as he was . . . had a way of carrying his head forward on his extended neck and gazing widely about with a pair of the

roundest and most prominent eyes" Brett had ever seen, "except in a fish." Hewitt has ready sympathy for Mason, whose social climb parallels his own, and he recognizes in Foggatt the type of the wily predator who can hide himself in the urban sprawl with not even his name on the building directory.

"THE QUINTON JEWEL AFFAIR"

In "The Quinton Jewel Affair," a true lower-class type, the Irishman Mick Leamy, serves as a pathetic pawn, the patsy for Wilks, a jewel thief, who is attempting to withhold a ruby, the chief prize taken in a recent heist, from his boss, Hollams. Unwittingly, poor Leamy is made a bagman decoy by Wilks and is repeatedly savaged by Hollams's gang as they try to recapture the gem. In Leamy, who seeks Hewitt's "protecshin," Morrison achieves an authentic representation of the shanty Irish Londoner of his day.

"THE CASE OF LAKER, ABSCONDED"

Charles William Laker, a character in "The Case of Laker, Absconded," is a walk-clerk, carrying financial papers from bank to bank. He disappears, and with him disappears his wallet, which contains bills and cash totaling more than fifteen thousand pounds. Us-

ing an assortment of clues, including an umbrella, a reconstructed code message in a newspaper advertisement, and a distinctive bank doorman's jacket, Hewitt unearths the missing Laker, who has not absconded at all but has been imprisoned in the basement of a condemned building by a gang, one of whose members, impersonating Laker, has carried off the securities.

"THE LOSS OF SAMMY CROCKETT"

In "The Loss of Sammy Crockett," Sammy, an English counterpart to Mick Leamy, is lured by his unfaithful girlfriend into the hands of Danby, a bookmaker and archrival of Sammy's promoter, Kentish, who stands to lose much by Sammy's absence from the championship footraces. One of Morrison's most poignant scenes is the picture of Sammy in the basement in which he is held captive, cold and vulnerable in his track shorts. The language of such characters as Kentish and Sammy's trainer, Raggy Steggles, who aids Danby's plot, brings realism to the story.

"THE CASE OF THE MISSING HAND"

The shade of terror evoked in Sammy's story deepens considerably in Morrison's stories of superstition and the occult, such as "The Case of the Missing Hand." In this tale, Jonas Sneathy, an evil schemer come to a ruinous end, hangs himself. His death is blamed on his stepsons, who have threatened him many times for brutalizing their mother. An especially chilling feature of this case is the fact that a hand is missing from the corpse. Questioning Gypsies in the woods where the corpse was discovered, Hewitt, who is conversant in Romany, locates within the band the man who took the hand from the corpse. His intention had been to use it in an occult ceremony supposed to ensure a successful thief's hand in breaking and entering.

THE RED TRIANGLE

The specter of totalitarian rule looms in the figures of Rameau in "The Affair of the Tortoise" and of Everard Myatt in the remaining stories of *The Red Triangle: Being Some Further Chronicles of Martin Hewitt, Investigator* (1903). All these stories are set in the Caribbean. In "The Case of the Lost Foreigner," however, Morrison's villain is not a malevolent swindler but the threat of anarchism, an ominous cloud over Europe.

Morrison's real emphasis, however, is on little people, the victims and pawns of evil power. Morrison's

sympathies extend to protecting the fortunes and freedoms of Mrs. Sneathy and her sons, who have been treated abominably by Sneathy. The diminutive odd-jobman Victor Goujon is no match for the towering Rameau, nor is Gerard, tortured by the anarchist mob who will not let him renege on their plot, any match for the cruel machinations of the Bakunin Club. They can turn for assistance, however, to the affable but vigilant Martin Hewitt. Hewitt is an alter ego of Morrison himself, righting in fiction some of the wrongs that Morrison saw all about him in the London he knew so well.

JOHN MORTIMER

Born: London, England; April 21, 1923

Also wrote as Geoffrey Lincoln

Types of plot: Courtroom drama; amateur sleuth

PRINCIPAL SERIES

Rumpole of the Bailey, 1978-

Under the Hammer, 1993-

PRINCIPAL SERIES CHARACTERS

HORACE RUMPOLE spends much of his time as a London barrister representing petty criminals and the underprivileged, people scorned by his law chambers colleagues. Refusing to kowtow to the privileged, such as judges and other of society's elites, Rumpole has never "taken silk" (risen to the rank of Queen's Counsel) but regularly outsmarts those who theoretically are his betters. He is somewhat less successful besting his wife, Hilda, who has tried vainly for years to advance his position in the legal hierarchy and to whom he secretly refers as She Who Must Be Obeyed.

BEN GLAZIER, almost sixty, and MAGGIE PEROWNE, about thirty, work for the London branch of Klinsky's international auction firm, he as an art ex-

pert and she as head of the Old Masters department. Although Glazier would like a closer relationship, the two are just close friends. They work together to authenticate art objects that come to Klinsky's, searching the art underground and its byways in England and abroad. Not all their cases involve uncovering criminal behavior. Occasionally, they let their enthusiasm and suspicions involve them in futile chases after nonexistent crimes.

CONTRIBUTION

John Mortimer has created in Horace Rumpole a character who stands apart from other memorable fictional detectives—Sherlock Holmes, Hercule Poirot, Peter Wimsey—because he is more than just a brilliant and resourceful solver of mysteries. Though a self-described Old Bailey hack, he has such keen legal and ratiocinative skills that he is an effective advocate and exceptional courtroom presence. His sympathetic understanding of people, strong social conscience, and disdain for empty pomp and circumstance inform not only his legal work but also his jousts with colleagues, politicians, and other members of the establishment.

To view image, please refer to print edition of this title.

John Mortimer in 1996. (AP/Wide World Photos)

Within a format combining mystery and humor, Mortimer presents an insider's view of the British legal system, notably its hypocritical barristers and biased, sometimes ignorant, judges. Iconoclast and nonconformist Rumpole often seems to be tilting at windmills, but his frequently successful struggles on behalf of society's outsiders and oppressed imbue these comic mysteries with a thematic substance rare in genre fiction. The recurring cast of characters—the Timsons, whose generations of petty criminals have helped support Rumpole over the years; his second-rate colleague Claude Erskine-Brown; the bemused head of chambers Soapy Sam Ballard; a parade of injudicious judges; and Rumpole's somewhat shrewish wife, Hilda—creates a perfect backdrop for Mortimer's social and legal satire, as compelling as the courtroom scenes that are the climax of every Rumpole story and novel.

BIOGRAPHY

John Clifford Mortimer was born in London on April 23, 1923, the only child of Kathleen May Smith Mortimer and Clifford Mortimer, a barrister, and was educated at Harrow and Brasenose College, Oxford. Because of weak eyesight, he was exempt from World War II military service and instead made documentaries and training films with the Crown Film Unit. His first novel, *Charade* (1947), is based on this experience.

In 1948, Mortimer began practicing law in London as a barrister in divorce cases. The following year he married novelist Penelope Fletcher; they divorced in 1972, and he married Penelope Gollop. He has two children from each marriage. After becoming Queen's Counsel in 1966, he specialized in criminal law, often arguing for the defense in censorship cases, and partly

through his efforts, the Lord Chamberlain's authority to censor plays was abolished in 1968. Mortimer pursued two careers, law and literary, until he retired from the former in 1986 to write full time.

Having written six novels by 1954, the next year he turned to a different genre, the radio play, adapting his 1953 novel *Like Men Betrayed*. His first original drama for radio, *The Dock Brief* (1957), won the Italia Prize in 1958, the year he debuted as a stage dramatist with a double bill including a revised *The Dock Brief* and *What Shall We Tell Caroline?*, his first original stage play. Over the next two decades, he wrote radio plays as well as original scripts and adaptations for motion pictures and television, but he did his most important work for the stage, primarily comedies of manners and sex farces. The autobiographical *A Voyage Round My Father* (1970) is his major play, and he adapted it for television in 1982. Though he continued to do stage adaptations and translations and write a few original plays, starting in the 1980's he focused on other literary forms, including newspaper interviews of public figures and four autobiographical volumes.

In 1978 Mortimer started writing a series of witty detective stories about Horace Rumpole, which he adapted for television and which brought him his greatest popular success; created *Under the Hammer* (1994), a television series and collection of short stories featuring employees of an auction house who become part-time sleuths; and after almost three decades, resumed writing serious novels. Asked by Thames Television for something on post-World War II England, Mortimer decided that instead of adapting a book, he would write his own and then adapt it. The success of both versions of *Paradise Postponed* (1985) led to two sequels, *Titmuss Regained* (1990), again as a novel and television miniseries, and *The Sound of Trumpets* (1998), which satirized 1990's British politics. As in his early novels, these Rapstone Chronicles include mysteries and detection, as do his other non-Rumpole novels since the mid-1980's: *Summer's Lease* (1988), about an English family that rents an Italian villa and becomes consumed by strange circumstances surrounding the absent owner (Mortimer did a four-part television adaptation in 1989); *Dunster* (1992), set both in Italy and in familiar Mortimer milieus: a corporate boardroom, an English country house, and a Lon-

don law court; and *Felix in the Underworld* (1997), whose hero, suspected of murder and charged with fathering an illegitimate son, joins London's street people.

Mortimer has served on the National Theatre Board and the boards of the Royal Shakespeare Company and Royal Court Theatre. He received a knighthood in 1998.

ANALYSIS

John Mortimer, who claims to have been inspired by Sir Arthur Conan Doyle's Sherlock Holmes tales, has written dozens of humorous detective stories and a few novels featuring Horace Rumpole, who specializes in crime cases—such as shoplifting and petty burglaries—that his colleagues shun. Though his wife frets about his failure to rise to Queen's Counsel, he is satisfied with his lot, perhaps because he usually prevails over his nominal superiors, including judges and Queen's Counsels. Readers quickly become familiar with his rejuvenating visits to Pommeroy's Wine Bar, where he drinks cheap claret; his penchant for small cigars whose ashes cloak his weskit; his love for simple food like steak-and-kidney pie; his habit of quoting from William Shakespeare and William Wordsworth; and his dislike of ceremony.

The stories and novels have multiple plots, professional and personal, the latter either a domestic crisis between the old barrister and his wife or a problem with the courts or a colleague. The personal elements not only entertain and provide filler for an occasionally simple crime plot but also are complementary, offering a different take on the same theme. In addition, they further characterize Rumpole, an unlikely hero who selfishly rescues the reputations and careers of hapless colleagues and whose insight and slyness enable him to shape people and events to his own ends. It is in the courtroom, however, where he really comes alive and is most happy. His advocacy, often on behalf of unworthy clients, does not rely as much on legal knowledge as on detection skills and an ability to judge character, and he is an exemplary cross-examiner. A moral center, sophisticated comic voice, and timeliness are hallmarks of the stories.

Mortimer's vast practical legal experience is obvious throughout, and Rumpole is his creator's spokes-

person on such issues as political correctness, animal rights activism, euthanasia, penal reform, and British politics. Though Mortimer uses a standard template (for easy adaptation to television), he also provides variety. For instance, in *Rumpole à la Carte*, a 1990 collection, the crusty barrister is put in unfamiliar milieus. In the title story, Hilda's expatriate cousin takes them to a three-star restaurant where Rumpole must deal with what he calls the curse of nouvelle cuisine. In "Rumpole at Sea," Hilda books them on a cruise over his objections, Mr. "Miscarriage of Justice" Graves turns out to be a fellow passenger, and these erstwhile adversaries are caught up in a shipboard mystery that the judge bungles but Rumpole solves. In "Rumpole for the Prosecution," as the title reveals, he becomes, for the first time in his career, a prosecuting attorney, and despite his unfamiliarity and unhappiness with the role, he follows his conscience and secures an acquittal of murder for his client. In *Rumpole and the Angel of Death* (1995), Mortimer again departs from his template, which always has had Rumpole as narrator. "Hilda's Story" is in the form of a letter that She Who Must Be Obeyed writes to an old school friend, and "Rumpole and the Rights of Man" takes him to the European Court of Human Rights in Strasbourg, where he confronts the reality of an international tribunal taking precedence over decisions of British courts. Of special interest in this 1995 collection is "Rumpole and the Little Boy Lost," one of many stories in the Rumpole canon about the Golden Thread that is central to English law: the presumption of innocence until a fair trial determines otherwise.

RUMPOLE AND THE PENGE BUNGALOW MURDERS

The first full-length Rumpole novel, *Rumpole and the Penge Bungalow Murders* (2004), is about a case (to which Rumpole alludes in previous tales) in the early 1950's in which two World War II heroes were killed, apparently by a son of one of them. Rumpole, an Old Bailey novice and newcomer to the law chambers where he would spend his career, takes on the defense though the incriminating evidence seems overwhelming and others despair of saving their client. He unexpectedly triumphs, becomes an instant star, and marries the boss's daughter.

RUMPOLE AND THE REIGN OF TERROR

Mortimer's tendency to keep pace with the times informs the Rumpole novel *Rumpole and the Reign of Terror* (2006), in which a Pakistani physician in London is suspected of aiding terrorists linked to Al Qaeda, arrested without being specifically charged, and held for trial before a special tribunal that flouts hallowed legal traditions. Balancing this case against a more typical one involving a Timson, Rumpole successfully manages to finesse both, strikes a blow in behalf of the Magna Carta, and regains the respect and devotion of Hilda, who ends a brief dalliance with a judge and reveals to her husband that she too has been writing memoirs.

UNDER THE HAMMER

Less enduring than the Rumpole tales is *Under the Hammer*, a 1993 television series of just six episodes that Mortimer expanded for a collection of short stories published as a Penguin paperback the following year. The episodes revolve about employees of the London branch of Klinsky's auction house, an international conglomerate presided over by a former supermarket magnate. Ben Glazier and Maggie Perowne, art experts at Klinsky's, join forces to check the authenticity of items that come to the firm, becoming involved in escapades that take them not only to aristocrats' homes but also to the criminal underground of London and Moscow. They also must deal with the questionable ethics of coworkers and art-world colleagues. Ben in particular develops a cynicism and iconoclasm similar to that of Rumpole, but lacks a social conscience that would foster action against the system. The stories also have a dollop of romantic adventure and comic relief, as in the Rumpole stories, but the adventures of Ben and Maggie have a pervasive frivolity and focus almost exclusively on people's acquisitiveness and the mega-rich. Absent the social issues that pervade the Rumpole stories, the Klinsky adventures are little more than entertaining capers.

WALTER MOSLEY

Born: Los Angeles, California; January 12, 1952

Type of plot: Hard-boiled

PRINCIPAL SERIES

Easy Rawlins, 1990-

Fearless Jones, 2001-

PRINCIPAL SERIES CHARACTERS

EASY RAWLINS is a black, unlicensed investigator working in the Watts area of Los Angeles. He does most of his work for friends and friends of friends who pay him in friendship and favors. The series begins in the late 1940's after Easy returns from serving in World War II. His struggles with his inner self and the racist society of the mid-twentieth century United States are a significant part of the first-person narratives.

FEARLESS JONES is a black man living in Watts in the 1950's. Fearless relies on his instincts and is not afraid to use violence.

PARIS MINTON, Fearless's friend, is the second-hand bookstore owner who narrates the first-person tales. Paris plays a central role in the series, but Fearless is important to the action and is always the instinctive truth teller.

CONTRIBUTION

In Walter Mosley's first detective series, he presents in Easy Rawlins a thoughtful, powerful African American detective who deals not only with the

crimes and problems of the individuals living in Los Angeles in the mid-twentieth century but also with the racial and social complexities of the time. Paris Minton and Fearless Jones of the second series deal with similar problems and demonstrate the complementary nature of their distinct personalities.

Mosley's rich description and understanding of the black community in Los Angeles at this time reveal a part of the city not depicted by any previous detective writer. Other hard-boiled detective-fiction writers such as Raymond Chandler and Ross Macdonald set their work in Los Angeles, but none look as deeply and knowingly at the poor of that city and at the Watts area as does Mosley. Mosley's work is most similar to that of Chester Himes in his novel *If He Hollers, Let Him Go* (1945), which deals with racial justice and black alienation in Los Angeles.

Mosley's immediate popular success with the Easy Rawlins series as well as with the more recent Fearless Jones series demonstrates the interest in his subject matter. Mosley's storytelling skills and refusal to offer simple answers to complex questions add to the success of these series.

BIOGRAPHY

Walter Mosley was born in Los Angeles, California, on January 12, 1952, to an African American father and a Jewish mother. Mosley's father, who moved to California from Texas, shared with his son the sto-

ries of African Americans moving from the South to California in the 1930's and 1940's, which became the background for both of Mosley's detective series.

In 1970, Mosley entered Goddard College in Vermont. He dropped out of Goddard but later enrolled at Johnson State College, graduating in 1975 with a degree in political science. He moved to New York City in 1981 and, after working at various jobs, enrolled at City College of New York's writing program in the mid-1980's. He found success with his first novel, *Devil in a Blue Dress* (1990), and was nominated for an Edgar Award by the Mystery Writers of America and received a Shamus Award from the Private Eye Writers of America.

Mosley's literary novel *RL's Dream* (1995) was a finalist for the National Association for the Advancement of Colored People Award in Fiction and won the 1996 Black Caucus of the American Library Association's Literary Award. Mosley won the Anisfield Wolf Award, given to works that increase the appreciation and understanding of race in the United States. His 1996 short story "The Thief," featuring Socrates Fortlow, won an O. Henry Award and is featured in

Prize Stories 1996: The O. Henry Awards (1997). His short fiction has appeared in *The New Yorker*, *GQ*, *Esquire*, and other publications.

In 1995, Mosley's first novel was made into the film *Devil in a Blue Dress* starring Denzel Washington, and in 1998, *Always Outnumbered, Always Outgunned* (1997) was turned into a Home Box Office (HBO) film starring Lawrence Fishburne.

In 1996, Mosley was named the first artist-in-residence at the Africana Studies Institute, New York University. He has continued to work with that program since his residency, creating the innovative Black Genius lecture series. In 1999, a collection of these lectures, with an introduction and essay by Mosley, was published as *Black Genius: African American Solutions to African American Problems*. In 2005, Mosley received the Nero Award for *Fear Itself* (2003).

ANALYSIS

Walter Mosley uses the detective-fiction genre to write novels about race and poverty in the mid-twentieth century. His style is typical of that of the hard-boiled genre with clean sentences, fast-paced action, and psychological and social realism. The main character in his first series is a man succeeding on the edges of the system. Coming to Los Angeles after being in the service during World War II, Easy Rawlins found work at a factory and bought a small house. He seemed to be living the American Dream, but the racial discrimination of his plant foreman cost him his job and led directly to his new career as a private investigator. Detecting allows him to follow his own standards and goals and to aid others whom the system has failed.

Easy always struggles with using violence during his investigations, but his friend and sometimes partner Mouse reacts instinctively and almost always with the use of force, often deadly. For this reason, Easy is afraid of Mouse but finds himself invariably needing Mouse, almost as if Mouse completes him, suggesting that in the racially/socially unequal world in which Easy and Mouse live, violence is sometimes the only answer. Through this struggle, Mosley demonstrates inadequacies of the social and judicial system. His use of characters from the black, Hispanic, Asian, and

Walter Mosley. (Courtesy, Allen & Unwin)

working-class white communities allows him to show that poverty and abuse affect all races.

In his second detective series, Mosley introduces two characters who also work in Los Angeles and in many ways are similar to Easy and Mouse. The narrator of this series is Paris Minton, a black man from Louisiana who runs a secondhand bookstore. He lives in the back of the store and seems to have few needs beyond those that owning the store can meet. However, when trouble finds Paris, he seeks his friend Fearless Jones, a man feared and respected by the black community in Los Angeles. Unlike Paris, Fearless is not a man who thinks too much about a situation. He seems instinctively to know what needs to be done and then does whatever that is, even if it involves violence. Fearless does, however, rely on Paris to make the more complicated decisions. Paris does not seem to fear Fearless the way Easy does Mouse. In fact, Paris and Fearless seem to be more successfully synergistic than Easy and Mouse.

Mosley's series also include interesting female characters. Typically, in hard-boiled detective fiction, women are often the source of evil and violence. Such women are present in Mosley's work—for example, Elana Love in *Fearless Jones* (2001)—but more often the women are seen as victims of the system, such as Daphne Monet in *Devil in a Blue Dress*. However, other women, such as Easy's wife, Regina, who first appears in *White Butterfly* (1992), and Loretta, a Japanese woman who works for the bail bondsman Milo Sweet in the Fearless Jones series, are strong and independent. This use of three-dimensional female characters is unusual in much hard-boiled detective fiction written by men.

Mosley's rich descriptions of Los Angeles in the early 1950's turn the city into a character in the novels. Raymond Chandler similarly wrote about Los Angeles, focusing on Hollywood in the 1930's and 1940's, but Mosley seems to be the first to use the Watts area so integrally. Many of the people living in the area have moved there from the South: Easy Rawlins is from Houston's Ninth Ward, and Paris and Fearless are from Louisiana. In both series, the main characters and the other inhabitants of Watts have connections to each other through their past in the South or their family

members who still live there. Watts is rich with transplanted southern culture.

DEVIL IN A BLUE DRESS

Mosley's first novel, *Devil in a Blue Dress*, introduces Ezekiel "Easy" Rawlins, who in the opening of the novel is not a detective but a factory worker recently fired for standing up to his white foreman. After losing his job, Easy has no way to make his mortgage payments, which leads him in desperation to accept a job sent his way by Joppy, the bartender at a local establishment. Joppy introduces Easy to a threatening white man named Albright, who is looking for a white woman named Daphne Monet. Albright says Daphne's former lover wants to get in touch with her, and he wants Easy to help him find her.

A string of murders apparently connected with the missing woman alerts Easy to the danger of the situation. He is picked up and beaten by the police. On his release, he summons Mouse, his friend from Houston, a fearless man who has killed before and would not think twice about doing it again. At difficult moments, Easy hears an inner voice that tells him how to "survive like a man."

Daphne is linked to gangster Frank Johnson, a black man whom Easy is afraid of and wants to avoid. Daphne calls Easy to ask him for help, and he helps her instead of reporting her location to Albright. Daphne disappears again, taking with her \$30,000, which Easy believes Albright is after. Forced to contact Frank Johnson, Easy is about to be killed by Johnson when Mouse shows up, scaring Johnson away.

When Daphne calls again, Easy takes her for safety to the home of his Hispanic friend Primo. While there, Easy and Daphne become lovers, but Albright and his men find them and take Daphne. Easy finds Daphne with Albright and Joppy, who are trying to find out where the money is. Mouse, always interested in money, kills Joppy, mortally wounds Albright, and makes Daphne reveal the whereabouts of the money. Daphne also reveals that she is Frank Johnson's half sister. She has left her previous lover to keep him from learning that she is not white. Daphne leaves Easy because he now knows her racial secret. Before she leaves, Daphne, Easy, and Mouse divide the \$30,000. Easy is left to explain the situation to the police with-

out implicating Mouse and Daphne; he does implicate Albright, Joppy, and another man.

At the end of the novel, Easy takes Jesus, a boy he has rescued from sexual abuse earlier in the story, to live with Primo and his wife. Easy cannot make Daphne accept her own racial identity or change other social ills, but he is able to save this one child.

WHITE BUTTERFLY

White Butterfly, set in 1956, finds Easy married and raising two children, an infant from his new marriage and Jesus, the orphan from the earlier books. Easy has not told his wife, Regina, about his business holdings or his detective work.

Easy is approached by a black police officer and a number of high-ranking city officials for help in finding a serial murderer in Watts. The interest in the case is a result of the recent victim being a white college student from a respectable family. When officials threaten to pin the crime on Mouse, Easy is forced to help. Visiting local bars and asking questions lead Easy to a suspect and to the surprising discovery that the white coed led a double life working in Watts as the White Butterfly. The victim's father, a former district attorney, wants this information suppressed; this cover-up, along with that of a chain of similar murders in San Francisco, leaves Easy frustrated.

Easy discovers that the victim's father is the murderer. In part because of his lack of openness, Easy's marriage fails, leaving him heartbroken. He begins drinking heavily until Mouse and Jesus rescue him from self-destruction.

During this investigation, Easy helps his business manager, Mofass, get out of trouble with a group of white developers, which also helps solidify Easy's financial situation. So despite the failure of his marriage, he gains financial independence.

FEARLESS JONES

The first novel in this series, *Fearless Jones*, is named for one of its two main characters, Tristan "Fearless" Jones, a World War II veteran. The story opens in the used bookstore of Paris Minton, the other main character and narrator of the series. The time is 1954; the place is the Watts district of Los Angeles. The store has been open about a month, and Paris is doing enough business to pay the bills. This job allows him

to do what he likes best—read. A young woman, Elana Love, enters the store and asks for the Reverend Gross. Paris tells her that Gross used to preach at a storefront church down the street, but one night two months previously, everything was moved out from the site. Huge Leon Douglas shows up looking for Elana Love and beats up Paris.

Later that night, his bookstore is burned down. Paris needs his friend Fearless Jones to assist him, but Fearless is in jail. Paris feels guilty for having refused to pay Fearless's fine, especially because he now truly needs Fearless. Paris takes his only remaining money and goes to bail bondsman Milo Sweet to get Fearless out. Once together, Fearless and Paris start looking for Elana Love.

Fearless and Paris go to the home of Fanny and Sol Tannenbaum; Elana had told Paris that Leon is looking for her because he thinks she has a bond in Mr. Tannenbaum's name that is worth thousands of dollars. When they arrive, they find that Sol has been stabbed. After the police leave, Fanny invites them to stay with her because they have nowhere to go and she is afraid to stay alone. Before Sol is taken to the hospital, Fearless promises him that he will protect Fanny.

The case involves a crooked police officer, some Israeli agents, the mob, a Nazi pretending to be an Israeli agent, and the two other members of the Tannenbaum family, Gella and Morris. Both Fanny and Sol die, but not before Sol tells Fearless where to find the money he has embezzled from Zimmerman, the former Nazi who got the money by telling frightened Jews in Germany that he would take them to freedom in exchange for their valuables. Sol intended to go to Israel with the money. Fearless, Paris, and Milo escape a shootout with Zimmerman, Leon, and other Nazis, but Paris is arrested for arson related to the fire at his store. When he is released several weeks later, Gella has gotten the money and given Paris, Fearless, and Milo a cut before leaving for Israel. It is enough for Paris to start a new bookstore.

By using his detective team to assist the displaced Jewish family, Mosley demonstrates the possibilities for racial and ethnic harmony between Jews and African Americans.

PATRICIA MOYES

Patricia Moyes Haszard

Born: Dublin, Ireland; January 19, 1923

Died: Virgin Gorda, British Virgin Islands; August 2, 2000

Type of plot: Cozy

PRINCIPAL SERIES

Inspector Henry Tibbett, 1959-1993

PRINCIPAL SERIES CHARACTER

HENRY TIBBETT begins as an inspector with Scotland Yard and earns steady promotions through the course of the series. He is a small, mild-mannered, happily married, and friendly man who can easily conceal his identity until he springs his trap and catches a criminal. Tibbett solves crimes without violence and

without technology; he relies most often on his intelligence, his analytical powers, and his confidence in his instincts, or what he refers to as his “nose.” When Tibbett rubs the back of his neck while deep in thought, the reader knows he is about to unravel a puzzle.

CONTRIBUTION

Patricia Moyes wrote her first novel, *Dead Men Don't Ski* (1959), on a whim, and she never looked back. She produced a long series with her first novel's main characters, Scotland Yard detective Henry Tibbett and his wife, Emmy, portraying Henry's ability to solve crimes through analysis and intuition rather than through violence or typical police procedures. Her books were both critical and popular successes, praised for their intricate plots, their warmth and optimism, and their attention to detail.

Moyes's novels are peopled with complex characters who stand out from the one-dimensional figures in many mysteries. Even her villains are driven by complicated motives, and Tibbett is sometimes faced with moral ambiguity where he expected certainty. Important contributions of Moyes were the creation of dignified and respected gay and black characters at a time when to do so was rare and her subtle demonstration, through Henry's and Emmy's kindness and insight, that empathy can bring different people together.

Moyes's novels occupy a distinct place in the chronology of mystery and detective stories. She created one of the last great series of cozy detective novels, getting through the entire series without blood or sex on stage. Emmy Tibbett is also one of the last main characters to be a full-time homemaker, although one whose intelligence and bravery are undeniable. Later writers, including Susan Wittig Albert and Diane Mott Davidson, would feature happy couples and relatively bloodless imagery, but their female protagonists would play a more modern role in their domestic lives and in solving crimes.

Moyes's novels consistently sold well (although she was more popular in the United States than in Great Britain). She won the Mystery Writers of America's Edgar Allan Poe Award in 1971 for *Many Deadly Returns* (1970). She also received the Malice Domestic Award for Lifetime Achievement in 1999.

BIOGRAPHY

Patricia Moyes was born Patricia Pakenham-Walsh in Dublin, Ireland, on January 19, 1923, to Ernst Pakenham-Walsh and Marion Boyd Pakenham-Walsh. By the age of eight Patricia (known as Penny) had decided to become a writer, and from 1934 to 1939, when she attended the Overstone School, a girls' boarding academy, her writing skills drew attention and encouragement. She also revealed a gift for languages and became fluent in French, Italian, and other languages. When World War II began in 1939, she lied about her age to join the Women's Auxiliary Air Force (WAAF), where she worked until 1945 as a flight officer and radar controller.

Moyes's next job was working as a technical adviser to the film director and producer Peter Ustinov from 1945 to 1953. She was chosen for the position because Ustinov needed someone with writing ability and knowledge about radar. An eager student, she learned about the film industry from the bottom up. In 1951 she married John Moyes, a photographer, and changed her name to Patricia Moyes, the name she would use throughout her career as a novelist. In 1954 she became an assistant editor for *Vogue* magazine, writing a monthly column titled “Shophound.” During this period, Moyes crafted an English translation of a French play by Jean Anouilh, which had a successful run in London and on Broadway, earning Moyes enough money to quit the magazine and move to Switzerland. She and her husband divorced in 1959.

Moyes was an excellent sailor and skier, but it was a skiing accident, which laid her up for some months, that gave her the incentive to write her first mystery novel, *Dead Men Don't Ski*, featuring the neophyte skiers Chief Inspector Henry Tibbett of Scotland Yard and his wife, Emmy, a multilingual veteran of the WAAF. *Dead Men Don't Ski* would become the first novel in Moyes's Inspector Henry Tibbett series, the author's primary occupation over the next three decades.

In 1963 Moyes married James Haszard, an interpreter and lawyer working in the Netherlands at the International Court of Justice in The Hague. Haszard shared her passions for sailing and skiing, and the two of them settled into a life that included travel, gourmet dining, and the restoration of an eighteenth century

house on the Rhine, which they shared with a series of beloved cats. Several of Moyes's novels use elements of Haszard's work as background, as Henry Tibbett solves crimes involving international politics, set in locations where Haszard's job took the couple. In the early 1970's, Haszard joined the International Monetary Fund and they moved to Washington, D.C. During this period, Moyes published two successful non-fictional books that appealed to a new group of readers beyond the fans of her mystery novels: *After All, They're Only Cats* (1973), a memoir, and *How to Talk to Your Cat* (1978), a guidebook for pet owners.

When Haszard retired, the couple moved to the British Virgin Islands, settling on the island of Virgin Gorda. They brought their boat and several pets, and Moyes quickly developed a love for her new home. She wrote six more novels from Virgin Gorda, three of them set in the Caribbean. After Haszard died in 1994, Moyes did not write any more novels. She published one collection of short fiction and devoted much of her time to a campaign to protect and neuter the wild cats that lived in the British Virgin Islands. She died at home on August 2, 2000.

ANALYSIS

When Patricia Moyes began writing mysteries, the age of the cozy British detective story of the type written by such notables as Agatha Christie, Margery Allingham, and Dorothy L. Sayers seemed all but over. By the 1960's, readers had come to expect thrilling action and scenes of sex and violence. In spite of this, Moyes created, in her Inspector Henry Tibbett series, the kind of mysteries she herself liked to read, focusing on interesting and intricate puzzles, exotic locales, and richly drawn characters. At the center of the series is the detective, Henry Tibbett, who rises through the ranks from chief inspector to chief superintendent of Scotland Yard over the course of the series, and his wife, Emmy, a full-time homemaker. Henry is sandy haired and pleasant looking, the kind of man one does not notice in a crowd, and Emmy is plump, athletic, and companionable. The two have been married for some time and are entirely believable as a long-established couple.

In the series, Tibbett and his wife travel to the parts of the world that Moyes knew best: Italy and Switzer-

land, the Netherlands, London, Washington, D.C., and the Caribbean. They ski and sail, as Moyes did throughout her life. Wherever they go, they befriend local people who confide in the kindly couple, providing information that Tibbett, with the aid of his "nose," puts together to solve a crime. Common in the novels are comfortable domestic scenes, with the couple conversing in their simple and unfashionable home. However, there are also exciting scenes involving break-neck skiing, deathly hide-and-seek in Dutch canals, kidnapping, murder, and drug smuggling.

MURDER À LA MODE

A strength of Moyes's novels is their powerful sense of setting; the writer paid a great deal of attention to getting the small details of a location or an industry correct. Often, she drew on her own experiences to bring the reader into a fascinating corner of the world, as she did in one of her best novels, *Murder à la Mode* (1963), which revolves around the world of fashion. The novel's fictional magazine *Style* resembles *Vogue*, where Moyes worked for three years while she was in her thirties. Through the course of the novel, readers learn about the different career choices that might bring a clothing designer fame or a steady income, the long and dreary workdays of the models on whom clothing is constructed in a design studio, and the importance to manufacturers of the *toile*, the cotton model that is an exact copy of a designer original. Typical of Moyes's work, the mystery involves a crime—the stealing of original dress designs—that could take place only within the given setting.

Moyes drew on her past to create the settings for other novels. *Falling Star* (1964) involves an actor who is killed while making a film and includes technical information Moyes gained during her years working with Peter Ustinov. In *Johnny Under Ground* (1965), Moyes's sixth novel, the plot focuses on Tibbett's wife Emmy who, like Moyes herself, was a section officer working with radar in the Women's Auxiliary Air Force during World War II. When Emmy begins writing a history of her old Air Force base, it leads to the sharing of memories among her former colleagues and then to murder.

Also typical of Moyes's work is *Murder à la Mode*'s lack of sex and violence. Although the characters are

believable adults, and although Tibbett's unmarried niece Veronica Spence is suspected of scandalous behavior with her significant other, Donald McKay, there are only hints at sexual behavior. In this novel, the lack of frankness about sex feels old-fashioned—even the police are embarrassed to say that a murder victim may have been pregnant—but in later novels scenes of passion are hardly missed. By the same token, although the cases Tibbett investigates involve murder, international intrigue, and even drug smuggling, there is virtually no blood on stage. Tibbett himself is shot several times through the series, but the bullet nearly always passes neatly through his shoulder.

A final way in which *Murder à la Mode* is representative is in the character of Nicholas Knight, the first of several gay characters who appear in the series. Knight is a dress designer and an entirely sympathetic character, accepted easily by Henry and Emmy but less so by several other characters. Gay and lesbian characters were not common in popular fiction in the 1960's, and Moyes included Knight among the mix of humanity populating her novel without emphasizing his sexual orientation to make a political point. Similar characters include Air Force veteran Arthur Price in *Johnny Under Ground*, interior decorator Denton Westbury in *Who Is Simon Warwick?* (1978), and tourist Harold Vandike in *A Six-Letter Word for Death* (1983). *Who Is Simon Warwick?* also features Sally Benson, a transsexual character. Sexual orientation is not part of the motive or the solution in these novels, but simply a detail that makes Moyes's characters rich and full.

MURDER FANTASTICAL

In her seventh novel, *Murder Fantastical* (1967), Moyes turned to a more whimsical tone and created her most delightful recurring characters, the eccentric Manciple family of county Fenshire. While Tibbett solves a mystery involving long-hidden jewels, he stays with the Manciples and enjoys tea and conversation with Edwin Manciple, the retired bishop of Bugolaland, who is also an expert at solving British crossword puzzles; wacky Aunt Dora; lovelorn Cousin Maude; the communist revolutionary Frank Mason; and other relatives, who are themselves involved in preparations for the annual fair. The Manciples form an immediate close friendship

with Henry and Emmy, and the couple visit the family again when Henry needs help with a crossword puzzle at the heart of a murder in *A Six-Letter Word for Death* or information about local history and gossip in *Twice in a Blue Moon* (1993). Moyes had written comedy during her years with Ustinov, and the amusing mysteries featuring the Manciple family are among her best novels.

DEATH AND THE DUTCH UNCLE

With *Death and the Dutch Uncle* (1968), Moyes introduced a theme that runs through the series: the struggles of newly independent nations to establish autonomy. *Death and the Dutch Uncle* is set in the Netherlands, at the International Court of Justice at The Hague, where Moyes's husband James Haszard was employed as an interpreter. The plot revolves around the inner workings of that court as two young nations, Galunga and Mambesi, attempt to resolve a dispute over borders and mining rights. At issue is a series of treaties established by the former French imperialists, and the degree to which the new governments are responsible for upholding those treaties.

Moyes returned to issues of independence and imperialism in *Black Widower* (1975), set in Washington, D.C., where Moyes and Haszard were living at the time the work was written. The title refers to Sir Edward Ironmonger, the ambassador to the United States from the nation of Tampica, until recently a British colony. Ironmonger is black and is subject to racial stereotyping by Washington bureaucrats and by tourists in Tampica. As she does with homophobia, Moyes does not foreground the issue of racism but makes a subtle point by the fact that all of the characters who make casually racist remarks also reveal other flaws and that Henry and Emmy treat Ironmonger and his compatriots with dignity and respect. The political struggles of young nations surface again in *Black Girl, White Girl* (1989), another mystery set in Tampica.

As is true of many long series, Moyes's novels were uneven in quality, but readers looking for an intriguing puzzle with all the clues in place, a close-up view of an exotic location, and a cozy visit with a happily married couple were never disappointed.

ADOLF MÜLLNER

Born: Langendorf, Saxony (now in Germany);
October 18, 1774

Died: Weissenfels, Saxony (now in Germany); June
11, 1829

Type of plot: Police procedural

CONTRIBUTION

Adolf Müllner is best known in German literature for his “fate tragedies” (*Schicksalstragödien*) *Der neunundzwanzigste Februar* (1812, revised as *Der Wahn*, 1818; the twenty-ninth of February) and *Die Schuld* (1813; *Guilt*, 1819). His sole contribution to detective fiction is his short novel *Der Kaliber* (1828; *The Caliber*, 1999), which is often called the first detective novel in German literature. The story is told in the first person, the narrator being the examining magistrate charged with investigating the murder of a young man who is killed in the presence of his brother. The brother believes himself guilty, but he is proved innocent because the bullet that killed his brother was of a larger caliber than the ones shot by his pistol.

This work was kept from complete oblivion by being reprinted in obscure anthologies several times, the last as late as 1908. It seems to have had little influence and is virtually unknown in the English-speaking world. Its interest is thus primarily that of a historical curiosity.

BIOGRAPHY

Adolf Müllner was born Amandus Gottfried Adolf Müllner on October 18, 1774, in Langendorf, a town near Weissenfels, a small city in Saxony (now in Germany). His father was an official in the service of the electoral prince of Saxony and his mother a sister of Gottfried Bürger, a well-known German poet. Müllner attended elementary and secondary schools in Weissenfels and Schulpforte, and he studied law in Leipzig from 1793 to 1797. Later he obtained a doctorate from the University of Wittenberg. He settled down to a career in law, first in Delitzsch and then in Weissenfels, where he lived for most of his life. In 1802, he married Amalie von Logau, whom he had long loved but who

had first been engaged to his stepbrother, who died before the union took place.

Müllner was a prolific writer. He wrote numerous reviews of juridical works and a number of articles and books on various aspects of jurisprudence. He was also interested in literature and the theater. His first belletristic work was a lurid novel called *Der Incest: Oder, Der Schutzgeist von Avignon* (1799; incest: or, the protective spirit of Avignon). He founded an amateur theater in Weissenfels in 1810 and wrote a number of short comedies that were produced there. These works are slight and imitative but dramatically effective. They were not published until 1815.

In 1812 Müllner reached the pinnacle of his literary success with his two fate tragedies, *Der neunundzwanzigste Februar* and *Guilt*. The latter was especially successful; it is considered one of the best specimens of the fate tragedy genre, in which tragic events take place on certain fateful days or in certain fateful places. Both plays are written in trochaic tetrameter, in imitation of the classical Spanish drama. Müllner essayed his hand at two more dramas in the same vein, *König Yngurd* (King Yngurd) in 1817 and *Die Albaneserin* (the Albanian woman) in 1820, neither of which met with much success. For the rest of his life he edited anthologies and journals and wrote a number of lesser works, most of them short. His novel *The Caliber* first appeared in the 1828 issues of a journal he edited, *Mitternachtsblatt für gebildete Stände* (midnight paper for the educated classes). Müllner died of a stroke on June 11, 1829.

ANALYSIS

To qualify as a detective novel and not merely a novel depicting a crime, a work must conform to certain criteria. The mystery of who perpetrated the crime must be paramount, rather than the crime itself. The reader must be made aware of the mystery and must be shown the evidence that leads ultimately to the solution of the crime. Several suspects should be present. There should be clues for the reader to interpret, and red herrings should be drawn across the reader's path.

There must be an investigator who is perspicacious enough to interpret the evidence correctly and eventually disclose the culprit.

The many lurid tales of murder, robbery, and mayhem that were published in Europe in the eighteenth and early nineteenth centuries displayed for the most part few of these characteristics. The horrible crimes themselves were the principal object of these works, together with the biographies of the villains, who generally ended up on the gallows or under the executioner's ax. Literature of a higher order that dealt with crime was interested in the motivations of the perpetrator, or in his guilt, and seldom was much concerned with the detection of his crime.

THE CALIBER

There is some disagreement among German scholars as to whether Adolf Müllner's *The Caliber* should be labeled a detective novel or novel depicting a crime. Certainly it contains a number of the characteristics mentioned. The story takes place in 1816 somewhere in Germany. The work is told in the first person, the narrator being an *Untersuchungsrichter*, or examining magistrate, roughly equivalent to an American district attorney. In those days the task of investigating crimes fell into the hands of such magistrates. Therefore, to the extent that such was possible in this period, this is a police procedural.

One autumn evening, the magistrate is perusing documents pertaining to robberies that took place in the nearby forest. He is interrupted by a young man coming to his door. The man is a commercial traveler named Ferdinand Albus, and he informs the magistrate that his brother Heinrich was shot to death by a robber in the forest, yet he is not able to describe the robber. The magistrate goes to the scene of the crime with Ferdinand and the appropriate officials and finds the brother lying there shot through the heart, with his cane-sword beside him, partly unsheathed. Ferdinand tells the magistrate that he had left his pistol at the murder site, but it cannot be found. The young man is overcome with grief and cries out, "Mariane—Mariane! You won't be able to bear it—I can't bear it! Both—both lost!" At first the circumstances make the magistrate suspicious of Ferdinand, but he decides that there is really no evidence against him.

An autopsy shows that Heinrich was killed by a bullet that penetrated the heart and lungs but that remains lodged, only partly out of shape, in the shoulder blade. The magistrate learns that the Mariane whose name Ferdinand had invoked is the daughter of a rich merchant. He meets the daughter and becomes her confidant. He learns that she is engaged to Ferdinand, but that Heinrich, too, had been in love with her. In the meantime, with the help of the militia of the adjacent state, the robber gang has been apprehended, and the members have been divided up between the two states to answer to justice.

When spring arrives, the magistrate is informed by Mariane that Ferdinand is obsessed by the idea that he was responsible for his brother's death. He cannot bring himself to marry Mariane because of his guilt feelings. Mariane persuades the magistrate to convince Ferdinand that he is innocent. The magistrate apparently does so, and the wedding date is set. On the eve of the wedding, however, Ferdinand confesses that he perpetrated the crime. He and his brother had quarreled, and his brother had started to draw his cane-sword on him. Fearful for his life, Ferdinand had drawn his pistol and struck Heinrich's arm with it. The gun had accidentally fired and killed Heinrich.

The magistrate finds an able attorney to defend Ferdinand's interests—Dr. Rebhahn. Rebhahn finds the case interesting because it deals with a gray area between intentional guilt and accident. Ferdinand had intended to strike his brother in self-defense, but he had not intended to kill him. In spite of his spirited defense, Ferdinand is found guilty and sentenced to death.

To gain time, Rebhahn procures a stay of execution until the murder weapon is found. A search is made, and the pistol is found in a nearby river where Ferdinand said he had thrown it. It is a double-barreled pistol called a *Terzerol*, and to everyone's surprise both barrels still contain a ball, indicating that the pistol had not been fired. Even more surprising, it is found that the type of bullet used for this pistol is of a smaller caliber than the one lodged in Heinrich's shoulder. Amazingly, Ferdinand, still obsessed by the idea of his guilt, refuses to listen to the new evidence, believing that the devil is behind the efforts of his friends to help him. The court, too, refuses to amend its verdict, al-

though it does grant a further stay of execution.

Soon help arrives from an unexpected quarter. A package comes from the adjacent state, containing Heinrich's signet ring, which had been found on the person of one of the robbers who had been apprehended. It is accompanied by a copy of the confession of the robber to the crime and his weapon, which fired bullets of the same caliber as the one that killed Heinrich. When Mariane confronts Ferdinand with this fresh evidence, he realizes that he is innocent. The court now comes to the same conclusion, and Ferdinand is completely exonerated. He and Mariane get married and emigrate to the United States.

The German critic Albert Ludwig has contended that the author had no intention of engaging the reader's interest in the question of the guilt or innocence of the hero, that it was not the unraveling of the mystery that he wished to present but rather the love story and the history of the hero's demented state and consequent recovery.

Hans Otto Hügel, however, the author of a learned work on the history of the German detective novel in the nineteenth century, disagrees. He notes that the story is told completely from the perspective of the examining magistrate as he investigates the case in the course of his duties. The magistrate reveals his suspicions to the reader as they occur or are dispelled, presenting all the facts of the case. He never describes the suspect's mental state as a fact, but rather indicates what he appears to be thinking or feeling.

When the magistrate first hears of the crime, he is immediately suspicious of the witness's statement, as an examining magistrate should be. He asks Ferdinand about his gun, which he declares he left in the woods. Ferdinand is unable to describe the assailant—his memory seems to fail him, says the narrator. At the scene of the crime a feverish horror seems to overcome him when he views the corpse. His excessive grief and his invocation of the name of Mariane feed the magistrate's suspicions. The narrator says:

Even the unworthy suspicion that the witness of the murder himself could be the murderer occurred to me, and tried to impress itself on my mind, while my heart discarded it in disgust. A criminal magistrate will be

pardoned such a thought. This position accustoms even the best-humored person to attribute the greatest malevolence to others. But mind and heart became united before I arrived at the village. The horrible suspicion was basically without foundation except for the excess of grief on the part of Ferdinand Albus and the invocation of a "Mariane."

When he learns that Heinrich, too, was in love with Mariane, the magistrate's suspicions are again aroused. He realizes that Ferdinand is the one loved by Mariane, but he wonders if Ferdinand knew this when he invoked Mariane's name and cried, "Mariane, you won't be able to bear it!" When Mariane describes Ferdinand's character to him, however, especially his tendency to torture himself, the magistrate discards his suspicions again. After Ferdinand's confession, the magistrate is forced to believe him guilty of manslaughter, if not of deliberate murder, but the reader sees him change his mind again when the pistol is found.

The story is replete with clues that the shrewd reader can interpret. The significance of the condition of Ferdinand's pistol, with the barrels still loaded, and the disparity in caliber strike the reader before they are elucidated by the narrator. For example, if the ball had been shot from close range it would not have been stopped by the shoulder blade, according to Hügel. (Whether this was so for the muzzle-loading pistols of this era only an expert on weaponry of the period can say.) More interesting, perhaps, is the fact that an autopsy was performed (surely a rarity in this period) when it was clear how the victim had died; also, the use of evidence from the autopsy, evidence eventually strong enough to free the accused, is unusual. That Ferdinand could not remember how the alleged robber looked adds to the intrigue.

The title supports Hügel's contention that *The Caliber* is a prototype of the mystery. The caliber of the bullet is, after all, the central clue in the mystery, and the title surely emphasizes that for Müllner the mystery and its clarification formed the salient material. Although the ballistics evidence is crude from a modern point of view, this certainly is one of the first works in crime fiction in which ballistics plays an important role.

The theme of rivalry between two brothers for the hand of a girl, as well as involuntary fratricide, also

appeared in Müllner's drama *Guilt*. In the drama the protagonist kills his rival, who is married to the object of his passions, but he is unaware that the two of them are brothers. Doubtless this theme originated in the author's personal life. He and his stepbrother loved the same girl, who, however, favored the stepbrother, whom Müllner despised. Fortunately for Müllner, his stepbrother died young, and he was able to marry the girl he loved. Perhaps he expiated his guilt by writing on the theme.

The actual crime depicted in *The Caliber* is not a very likely one. The fact that the robber shot from some distance at the exact moment that Ferdinand struck his brother is hardly realistic, nor is it quite believable that Ferdinand mistook a distant shot for one from his own pistol. Also, why did the robber not dispatch Ferdinand at the same time and rob both of them? Did Ferdinand actually see a robber? If not, and it appears that he did not, it is again quite coincidental that the very story he made up turns out to be true. Clearly, *The Caliber* is not a great work, yet as an early example of the detective genre, it is not without significance.

N

SHIZUKO NATSUKI

Born: Tokyo, Japan; 1938

Types of plot: Inverted; police procedural; thriller

CONTRIBUTION

Shizuko Natsuki has enjoyed enormous success and popularity in Japan, publishing more than eighty books. Translations of several of her mysteries have brought her international recognition as a mystery writer. In 1973, she won the Mystery Writers of Japan Award for *Jōhatsu* (vanishing). In 1989, she was awarded the French Prix du Roman d'Aventure for *Daisan no onna* (1978; *The Third Lady*, 1987).

BIOGRAPHY

Shizuko Natsuki was born in Tokyo in 1938. She graduated from Keio University with a degree in English literature. She married in 1963 and moved to Fukuoka, where she has lived since that time with the exception of nine years spent in Nagoya. Natsuki is not only one of Japan's best-selling mystery writers but also one of the most prolific. She has written more than eighty novels and short-story collections, and more than forty of her novels and stories have been made into films.

Natsuki published her first mystery novel, *Tenshi ga kiete iku* (the angel has gone), in 1970. The first of her novels to be translated into English was *W no higeki* (1982; *Murder at Mount Fuji*, 1984). Several of her short stories have been published in translation in *Ellery Queen's Mystery Magazine*. Natsuki's writing, like that of many other Japanese mystery writers of her generation, often shows the strong influence of well-known mystery writer Seichō Matsumoto.

ANALYSIS

Shizuko Natsuki writes murder mysteries that are meticulously developed through detailed analysis

of what did or could have occurred and what will happen. Detailed description is very important for building suspense and atmosphere in her novels. She accumulates precise details of the plot, often with considerable repetition of exactly what occurred or may have occurred, without really explaining its importance. This technique imbues the story with a sense of the unknown. The puzzle plot is a common structure in her novels. In *Kumo kara okuru shi* (1990; *Death from the Clouds*, 1991), she portrays detectives who reconstruct the crime in various ways by reasoning out how it may have taken place. Her use of this technique recalls the analytical style of Seichō Matsumoto.

Another technique that Natsuki often employs is that of the public inquiry. This plot structure is built on collaboration between the police and the people questioned. By portraying the interaction between the police and the public in slightly different ways, she creates complex plots in her novels and challenges the reader to solve them. She uses this technique in *Fuhō wa gogo niji ni todoku* (1983; *The Obituary Arrives at Two O'Clock*, 1988). The relationship between the police and the public is often not portrayed as totally positive. There is a reluctance on the part of many of the characters to talk with the police. They view the police with a mixture of respect and fear.

Natsuki also uses the inverted plot structure and a variation on it. In *The Third Lady*, Kohei Daigo plots and reasons about the murder that he is planning to commit. Natsuki uses this type of plot in the traditional way, giving the killer's view and interpretation of the murder. In *Kokubyaku no tabiji* (1977; *Innocent Journey*, 1989), Yoko Noda and Takashi Sato enter into a suicide pact, but when Yoko wakes up from the sleeping pills, she finds Takashi has been murdered and she is likely to be the prime suspect in his death. In an effort to find Takashi's killer before the police arrest her,

Yoko attempts to reconstruct the crime and find the psychological motivation for it. Here the crime is not portrayed through the eyes or mind of the murderer but rather through the eyes of the innocent suspect.

Natsuki's novels inform the reader about social customs and the Japanese lifestyle. Japanese temples and their social and financial relationship to the public are extensively discussed in *Death from the Clouds*. The settings of her novels also reveal much about life in Japan. Her male characters are typically businessmen whose lives revolve around their companies. Business trips are common, and the men are often called away on such trips; thus, business hotels and coffee shops play a major role in her novels.

Telephone calls also play a significant role in Natsuki's mysteries. Her businessman husbands often call

to inform their wives that they will not be home that evening or that they are going away for a few days on a business trip. The lives of her wives are centered on their homes and children, while their husbands' daily lives are controlled by their companies. Natsuki portrays a society in which married couples live separate lives.

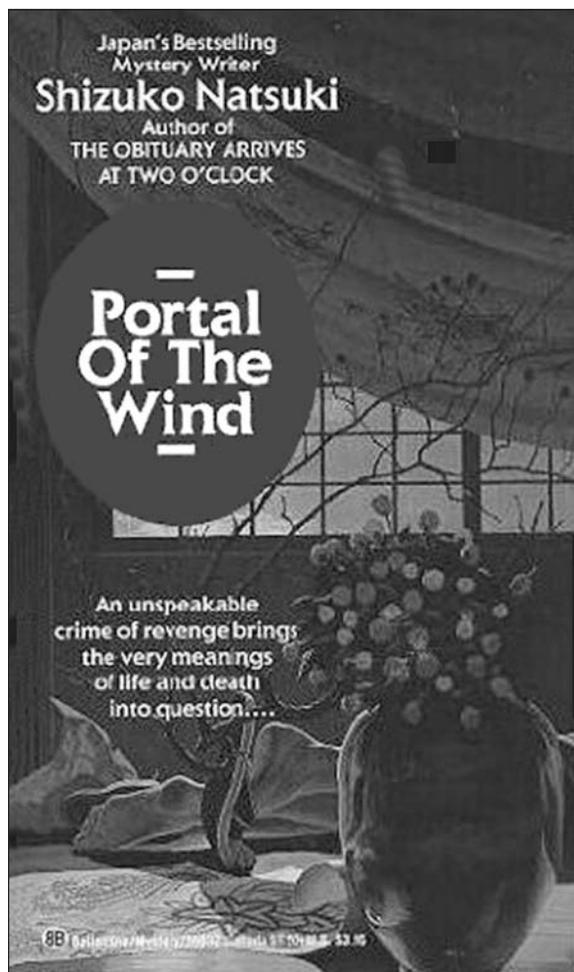

The social background of the characters—their financial and social class and family status—are important in the plots of Natsuki's novels. She demonstrates the affluence of her characters by giving them golf club memberships, very expensive in a nation where real estate is at a premium. Family relationships and status form the driving force of the plot of *Murder at Mount Fuji*. Chiyo, the favorite in the Wada family, suddenly claims that she has killed her grandfather; however, the death actually appears to have been an accident. Concerned for their family reputation and for Chiyo, the family bands together to create alibis, deceive the police, and throw the blame on someone who is not a member of the family.

Natsuki's murder mysteries are permeated with psychological drama and a sense of an inexplicable supernatural element. *Kaze no tobira* (1980; *Portal of the Wind*, 1990) recounts a murder that may not have happened. A man's photograph in a magazine has a mysterious, overwhelming attraction for a young woman, and a bereaved daughter has a sense of a tragedy that she cannot identify. The protagonists are continually forced to cope with loneliness, isolation, and a sense of dread. The characters are also fascinated by death; suicide and murder occupy them as they accumulate facts about potential acts of destruction either of themselves or of someone else.

THE THIRD LADY

The Third Lady is a novel of revenge and of a strange quasi-religious sharing of love, which leads to a murder pact. In Chateau Chantal, a hotel in France, Kohei Daigo meets a mysterious woman named Fumiko. Sitting in the dark salon of the hotel during a severe thunderstorm and blackout, Daigo and Fumiko experience an inexplicable bonding that causes them to reveal their darkest secrets and hatreds. Both return to Japan fatalistically bound to murder for each other.

The novel has been compared to *Strangers on a*

Train (1950) by Patricia Highsmith. However, Natsuki's novel intensifies the suspense as her characters' motivations are not rational. The end of the novel reveals a shocking surprise for Daigo and for the reader: Fumiko has killed the colleague whom Daigo hated because he was responsible for causing cancer in a number of children. Daigo has in turn killed Midori, who murdered Kume and whom Fumiko hated—or so Daigo believes. Fumiko's sister Akane, pretending to be Fumiko, meets Daigo in a darkened room, recreating the scene in the salon of the Chateau Chantal. She reveals to Daigo that he killed Fumiko when he killed Midori. Fumiko had chosen him as her executioner. The novel ends with Daigo, eyes glazed over, waiting to board a plane to France to refine the illusion he had experienced in the salon of the Chateau Chantal.

The police have constructed a more practical series of events for the crime. According to them, Daigo and Fumiko/Midori had made a murder pact. Midori poisoned Daigo's colleague. However, instead of carrying out his part of the pact, Daigo betrayed and killed Midori to keep her from revealing the pact.

THE OBITUARY ARRIVES AT TWO O'CLOCK

In *The Obituary Arrives at Two O'Clock*, Natsuki uses a fake wrong-number call to frame the protagonist Kosuke Okita for murder. A woman dials Kosuke seemingly by mistake, and moved by her desperation, he rushes to help her. Meanwhile, Nasuno, an entrepreneur who owes Kosuke money, is killed with a golf club. Kosuke's wife, Shimako, and Kinumura have framed Kosuke, who figures out what they have done. He devises a plan to make them reveal that Kinumura is actually the murderer. Kosuke sends a note to Shimako stating that he has been kidnapped. Then, he cuts his finger off and recuts it such that the finger appears to be from a dead man. He sends this finger to Shimako. Relying on his belief that the shocked and frightened Shimako will immediately go to her accomplice, Kosuke hopes to cause them to reveal themselves. His plan works.

As well as being an entertaining mystery, this novel is an excellent source of sociological detail about Japan. The business activities among the owners of the golf club and the landscaping companies and the portrayal of the employees who sell the memberships de-

pict business life in Japan. The detailed description of Shimako's life as she waits for news of Kosuke provides an insight into Japanese home life.

Objects play an important role in this novel. A five iron is missing from Nasuno's set of clubs, and the golf club, along with a towel and a pair of gloves, is found under a shed in Kosuke's backyard. The five iron is identified as the murder weapon. Natsuki foreshadows this discovery by mentioning dogs barking in the neighborhood. It is assumed that the neighbor's dog, who has a habit of digging in the Okitas' yard, has dug up the items. In a separate incident, a child's tricycle is placed in the road to stop a car. The driver is put in immediate danger when he stops, so the tricycle becomes a sinister object that signals someone is about to be hurt.

A common theme in Natsuki's novels is a love interest or a developing love affair between a fleeing suspect and a younger woman. Kosuke is romantically involved with Chiharu, who, of course, believes in his innocence. As in Natsuki's other novels, she portrays the lovers, here Kosuke and Chiharu, clandestinely meeting in coffee shops as the suspect attempts to clear himself.

INNOCENT JOURNEY

Innocent Journey is an extremely complex novel. It is a novel of revenge, criminal pasts, and characters who have taken new identities. The novel begins with the relationship between Yoko Noda and Takashi Sato. Takashi and Yoko met in the Jugon bar where she works as a hostess and have entered into a casual sexual relationship. Takashi is the president of the Sato Metal Company, a wholesale firm on the verge of bankruptcy. Takashi acquired his position by marrying the only daughter of the previous president and was adopted into the Sato family. His wife died because of an abnormal pregnancy and he remarried. He is in an awkward position because his connection to the Sato family is through his dead wife. In addition, Takashi has accidentally killed a little girl who ran in front of his car. Disgusted with life, he asks Yoko to commit suicide with him. Yoko, who suffers from depression and schizophrenia, agrees to the suicide pact without really knowing why.

Yoko and Takashi go into the mountains and take what they believe is a fatal dose of sleeping pills. However, the suicide attempt fails. A very sick Yoko

wakes up to find Takashi dead, not from the pills but from a knife in his back. Yoko is now the most likely suspect, and Natsuki introduces the technique of reconstruction and analysis of the crime into the novel.

Yoko's search for the real killer leads the reader through an extraordinarily complex tangle of events. Yoko is helped in her search by Taki, who is looking for his missing brother-in-law Tanaka, who was last seen at the Jugon bar looking for Takashi. When the crime is finally solved, it is revealed that Takashi Sato is still alive. Takashi's wife, Midori, killed Tanaka, and she substituted his body for Takashi's at the suicide site. Tanaka had been looking for Midori, who was Jiro Miki until he had a sex-change operation, because Midori killed Tanaka's fiancé. This tale of murder, subterfuge, and disguise is the most complex of Natsuki's translated novels.

FREDERICK NEBEL

Born: Staten Island, New York; November 3, 1903

Died: Laguna Beach, California; May 3, 1967

Also wrote as Grimes Hill; Lewis Nebel

Type of plot: Hard-boiled

PRINCIPAL SERIES

Captain Steve MacBride and reporter Kennedy, 1928-1936

Donny Donahue, 1930-1935

Jack Cardigan, 1931-1937

PRINCIPAL SERIES CHARACTERS

CAPTAIN STEVE MACBRIDE, a police officer, and KENNEDY, a newspaper reporter, form an unlikely but effective team of crime fighters. MacBride is the tough but intelligent cop who supplies the muscle, and Kennedy is the heavy-drinking, irreverent, and intuitive oddball who usually sets the investigation on the right trail.

DONNY DONAHUE, an investigator with the Interstate Detective Agency, is a former cop who was kicked off the force when he refused to sanction bribery and corruption. He is an extremely tough and cynical man, capable of both quixotic acts of altruism and savage retributive violence. He dispenses his own brand of justice without worrying about legal technicalities.

JACK CARDIGAN, a private investigator for the Cosmo Agency in St. Louis, is a somewhat more conventional version of Donny Donahue. Where the latter makes his own rules and fights his way through to the truth, Cardigan's cases tend to emphasize the causal chain in the process of detection, though with plenty of action and abrasive dialogue.

CONTRIBUTION

Although Frederick Nebel published three novels, two of which have to do with crime, his major contribution was the large number of hard-boiled short stories he wrote between 1926 and 1937. Along with Dashiell Hammett, Carroll John Daly, Raoul Whitfield, Erle Stanley Gardner, and a few others, he was one of the writers closely associated with the magazine *Black Mask* under the editorship of Joseph Shaw. Although his later decision to abandon crime fiction in favor of slicker, mass-market journalism has led to his being almost completely forgotten, Nebel should be considered one of the seminal figures in the development of the hard-boiled style. Grimy, realistic, graphically violent, and often pitiless in their contempt for human frailty, his best stories merit the same serious literary consideration given to those of Dashiell Hammett and Raymond Chandler.

BIOGRAPHY

Frederick Nebel was born Louis Frederick Nebel on November 3, 1903, in Staten Island, New York. He dropped out of school at the age of fifteen to work on the New York waterfront. In 1920, he traveled to northern Canada, where he helped his granduncle operate a farm. In 1922, he returned to New York, found a job as a railroad brakeman, and began to write about some of the things he had seen in his travels.

Having sold several tales of life in the Canadian backwoods to *Northwest Stories* in 1925, a year later Nebel sold his first story to *Black Mask*. Thus began an association that during the next ten years would make him one of the major influences on the development of hard-boiled detective fiction and would result in a close friendship with Dashiell Hammett. In 1930, he married Dorothy Blank, whom he had first met during a visit to Paris two years earlier, and settled down in their Ridgefield, Connecticut, home to write steadily for *Black Mask* and other pulp magazines such as *Action Stories*, *Danger Trail*, and *Sea Stories*.

In 1933, his first novel, *Sleepers East*, was published, and its brisk sales and lucrative screen-rights optioning alerted Nebel to the possibilities of other markets. He obtained a literary agent, wrote two more popular novels in the next three years, and began to submit his work to such slick periodicals as *Cosmopolitan* and *McCall's*. During the 1940's and 1950's, he also penned a number of television scripts, and he made a brief return to mystery fiction with the ten stories he wrote for *Ellery Queen's Mystery Magazine* between 1956 and 1962.

In 1958, Nebel's failing health necessitated a move to California, and in the following year he and his wife settled in Laguna Beach. His last story was published in 1962, although during the remaining five years of his life he worked intermittently on a novel that he was unable to finish. On May 3, 1967, three days after a severe cerebral hemorrhage, he died at the age of sixty-three, an obscure yet significant figure in the development of the classic hard-boiled detective story.

ANALYSIS

Frederick Nebel sold his first mystery tale to *Black Mask* in 1926, and during the next two years eleven

other stories of his appeared in the magazine. In 1928, editor Joseph Shaw encouraged him to develop a series character to whose adventures readers could regularly look forward, and Nebel obliged by creating the team of Captain Steve MacBride and reporter Kennedy.

"WINTER KILL"

Richmond City is the mythical community in which MacBride and Kennedy operate, and like Dashiell Hammett's Poisonville or Raymond Chandler's Bay City, it is scarred by political corruption and police graft. MacBride is an honest cop who copes as best he can with this situation, but it is the hard-drinking Kennedy whose irreverence toward authority allows him to think and act in ways that help solve MacBride's most difficult cases.

Although the atmosphere of impending violence and general social decay that characterizes the hard-boiled idiom is an important element in the MacBride-Kennedy stories, the stories also feature a sophisticated humor rarely found in the genre. Kennedy's shenanigans often transcend mere wisecracking and approach the surreal zaniness of the Marx Brothers' films. Thus, in the story "Winter Kill," Kennedy wanders into a bereaved man's den, becomes interested in a pair of snowshoes, and astounds everyone by asking if they are for sale. At the conclusion of the narrative, after having solved the case by following a hunch, Kennedy gets drunk and is arrested for trying to snowshoe down a busy street. As MacBride listens to this latest exploit with stolid calm, the arresting officer supplies a downbeat punch line by adding that Kennedy "can't snowshoe worth a damn."

"TAKE IT AND LIKE IT"

Nebel's clever blending of suspense, action, and comedy make the MacBride-Kennedy stories models of their kind. In "Take It and Like It," the plot begins in medias res, as Kennedy's drunken quest for a highly recommended "chili joint" is interrupted by an encounter with an even more intoxicated young woman. He takes her to his room, puts her to bed, resumes his search for the restaurant, and eventually returns home to find her murdered. As the prime suspect, he must avoid the police at the same time that he pursues the murderer, and the ensuing multiple-chase narrative is

hilariously punctuated with such comic set pieces as this bizarre mock confession:

“What,” said Flannery, “was your real reason for killing her? I mean the one thing that finally drove you to it?”

Kennedy sighed. “She did not know how to make a Martini.”

“Hell, he’s completely screwy!” Rube Wilson said.

Kennedy cried: “I killed her because she was too beautiful for this world. This world is so crass and desigining, and so full of filth and tragedy. I killed her because—well, because she was a flower, a fair flower.”

If the MacBride-Kennedy stories emphasize the humorous possibilities of hard-boiled fiction’s general irreverence toward authority and convention, Nebel’s Donny Donahue tales are squarely in the tough-guy tradition. Donahue is a law unto himself, and he pursues his prey with a relentless concentration that recognizes neither physical obstacles nor ethical constraints.

“ROUGH JUSTICE”

“Rough Justice” offers a typical example of Donahue’s modus operandi. Assigned to recover a stolen ring, he treats the world of cops and criminals as a hornet’s nest that when vigorously shaken will yield up his quarry. Donahue’s attitude toward the series of murders and maimings that results is strictly pragmatic: Whatever helps him find the ring is good, and anything else—even the shooting of a police officer—is irrelevant. At the conclusion of the story, with his task accomplished, Donahue lets the man who stole the ring escape in a characteristic display of his contempt for the letter of the law. As he has explained earlier in the story, “My job is to get the ring, and not the killer of a cop that didn’t watch his tricks.”

“RED PAVEMENT”

If Donahue often operates outside the law, he does, however, have his own peculiar kind of sentimental morality. In “Red Pavement,” his initial involvement in a case of murder among thieves occurs when he helps a drunk into a taxi. When the drunk is gunned down, Donahue feels compelled to help the victim’s naïve girlfriend. After ensuring that the killers receive their just deserts, however, the girlfriend double-crosses ev-

eryone in a way that only confirms Donahue’s misanthropic view of human nature: “When you got right down to it, the girl as a personality meant nothing to him; she was significant only for the fact that her death would bring the cops down on him.”

The sardonic wit of reporter Kennedy and the cynical ruthlessness of Donny Donahue are perhaps reflected in the personality of Raymond Chandler’s Philip Marlowe; it is quite possible that Nebel provided Chandler with some of his inspiration. Although Chandler made no formal acknowledgment of any debt to Nebel’s example, he did state that he read *Black Mask*’s hard-boiled fiction with a scholar’s thoroughness. Thus, it is likely that Nebel exerted some degree of influence on one of the most famous characters spawned by the genre.

Nebel, for his part, had been impressed by Dashiell Hammett’s Continental Op, whose combination of intelligence and toughness set him apart from such essentially thuglike *Black Mask* detectives as Carroll John Daly’s Race Williams. Hammett and Nebel were close friends and drinking companions who respected each other’s work, and both would eventually abandon the hard-boiled idiom for greener commercial pastures. Nebel and Hammett expanded the conventions of hard-boiled fiction by demonstrating that a lone wolf had better be a very intelligent wolf, although they also served up enough action and violence to keep even the dimmest pulp-magazine readers satisfied.

When writing for other pulp periodicals, Nebel was forced to adhere more closely to the genre’s norms. The forty-three Jack Cardigan stories he wrote for *Dime Detective* are much more conventional and much less interesting than his work for *Black Mask*, as “Murder by Mail” all too effectively demonstrates.

Dime Detective wanted Nebel to write at novelle length, which meant an approximately fifteen-thousand-word manuscript divided into five chapters. That was about half again as long as his usual *Black Mask* story, and he made up the difference by padding the narrative with superfluous verbiage: Each new character receives a full paragraph of description rather than a few concise but telling details, and events to date are periodically summarized in speeches by Cardigan. Things also tend to happen in multiples, so that if Cardigan

takes a gun out of a suspect's right hand, it is more than likely that the latter's left hand will shortly be holding some variety of weaponry.

"MURDER BY MAIL"

"Murder by Mail" exhibits all of these qualities while putting Cardigan through a complicated and not very believable plot concerning a murder and a postal swindle. Even his wisecracks about the police, one of the staple topics of hard-boiled humor, seem less than inspired: "Well, I always wondered what happened to cops when they became lieutenants, and now I know: they put their brains away in mothballs." The Cardigan stories do permit their female characters a greater degree of action and independence than is usually the case in the genre, but this is virtually the only positive quality of a series that seldom exhibits anything more than Nebel's professional competence as a prolific producer for the pulps.

SLEEPERS EAST AND FIFTY ROADS TO TOWN

Nebel's first novel, *Sleepers East*, is a smoothly constructed thriller set on a passenger train, with political conflict rather than criminal intent the dramatic spring of the narrative. Both here and in his next novel, the diffuse family saga *But Not the End* (1934), private detectives play minor roles as sleazy, immoral underlings; the contrast with his pulp series heroes accurately represents the difference between his magazine and his book-length fiction. His final novel, *Fifty Roads to Town* (1936), concerns a small town's reaction to a mysterious disappearance, but Nebel undercuts the possibility of suspense by dwelling at inordinate length on the problems of minor characters. Nebel's novels are written in a polite, chatty, and often glibly superficial style that bears little resemblance to his hard-boiled fiction, although it does demonstrate how easy it was for him to switch markets and write for the slick magazines.

In assessing Nebel's role in the development of the hard-boiled idiom, it is probably best to view him as a necessary but by no means sufficient force in the transition from the suburban gardens of genteel British sleuths to the mean streets of the American private eye. He was a significant member of that small group of *Black Mask* writers who made its 1926-1936 issues a gold mine of evocative hard-boiled writing. His

abandonment of the genre for more lucrative markets, however, and the fact that only one book of selections from his pulp fiction was ever published ensured that he would always be one of the more obscure figures in the development of the vivid, violent, and still-vital world of the hard-boiled detective story.

BARBARA NEELY

Born: Lebanon, Pennsylvania; 1941

Type of plot: Amateur sleuth

PRINCIPAL SERIES

Blanche White, 1992-

PRINCIPAL SERIES CHARACTER

BLANCHE WHITE, an African American maid who works for wealthy white families, uses the invisibility of her race and station as an opportunity to gather clues. Her dark skin, age, occupation, gender, and weight all suggest a “mammy” stereotype, but her keen awareness of social injustices, which she vocalizes in sharp critiques of white characters and culture, not only makes clear that she is no mammy but also deconstructs the stereotype itself. Blanche is an entertaining, astute, and outspoken sleuth who educates readers about racial and social issues as she solves her crimes.

CONTRIBUTION

Barbara Neely’s Blanche White mysteries help make a traditionally conservative genre a vehicle for exploring social ills—especially those with racial implications—and for analyzing American cultural attitudes and practices. Each book in this series focuses on a different social problem, beginning in *Blanche on the Lam* (1992) with the impact of racial stereotypes and class prejudices. Neely’s second book, *Blanche Among the Talented Tenth* (1994), explores the psychological and social impacts of Western standards of beauty, especially the color hierarchy among African Americans; the plot of her next book, *Blanche Cleans*

Up (1998), concerns political corruption, homophobia, and environmental issues; the fourth, *Blanche Passes Go* (2000), exposes the frequency and emotional consequences of physical abuse of women. In all her works Neely shows the relatedness of race, class, and gender issues. Neely’s Blanche White was a landmark character when she first hit the scene: Not only was she one of the few female African American protagonists in a mystery series, but she also was one of the few sleuths who reflected a working-class perspective. Blanche’s persona as an outspoken, politically savvy lower-class black woman was an instant success with readers.

BIOGRAPHY

The daughter of Ann Neely and Bernard Neely, Barbara Neely grew up in Lebanon, Pennsylvania. Although she lived in a neighborhood populated by loving members of her extended family, throughout her school years she was often the only African American child in her class. Both her grandmothers were important figures in Neely’s childhood, especially her maternal grandmother, a woman she describes as the matriarch of the family and who against all odds achieved financial success with her earnings as a domestic worker.

At the age of nineteen Neely moved to Philadelphia, where she began what was to become a lifetime of social activism. She became involved with the Association for the Study of Afro-American Life and History and helped organize the Philadelphia Tutorial Project. She came to believe that she could do more for her causes if she acquired a graduate degree. Al-

though she had always enjoyed writing, it did not occur to her to enter a creative writing program, she later explained. Instead, she earned a master's degree in urban studies from the University of Pittsburgh. Her thesis proposed integrating women's prisons into suburbs; after graduating she was employed as director of a women's correction center in Pittsburgh, where she was able to help establish a women's residential prison as she had envisioned in her thesis.

Over the next decades Neely held a series of jobs across the country—in Pennsylvania, North Carolina, California, and Massachusetts. These included stints as a Young Women's Christian Association (YWCA) director and at Head Start, being a consultant for non-profit ventures, and working at the Institute for Social Research, the African News Service, and *Southern Exposure Magazine*. She has been a director of Women for Economic Justice and helped found Women of Color for Reproductive Freedom. Neely has won several awards for her efforts to address social ills. In the 1980's she and her partner moved to Jamaica Plain, near Boston, where she became the host of the radio program *Commonwealth Journal*. During this time Neely also began writing short stories, which have been published in a variety of magazines and anthologies. Neely incorporates her experiences as a social activist and her knowledge of different parts of the country into her novels: *Blanche on the Lam* and *Blanche Passes Go* are set in North Carolina; *Blanche Cleans Up* is set in Boston.

ANALYSIS

Barbara Neely's Blanche White series, while not extensive, shows evolution of intent and scope. The first novel, *Blanche on the Lam*, introduces readers to Blanche, whose voice and persona set the tone for the series. A middle-aged domestic worker, Blanche quickly begins educating readers on the injustices and indignities that African Americans often experience in their daily lives. The book opens with Blanche's appearance in court, a scene that suggests connections between race and poverty and that exposes hypocrisies in class structure in the United States. Soon, however, Neely begins to focus on racial stereotypes (especially that of the mammy), exposing how prevalent and how

psychically damaging such perceptions of African Americans are. Throughout the novel Blanche comments on prejudices against dark-skinned persons (in both black and white communities) and the invisibility of lower-class service personnel.

Neely surprised reader expectations in her second novel, *Blanche Among the Talented Tenth*, by turning away from black/white relationships to examine color prejudice among African Americans, a prejudice that privileges light-skinned African Americans and has created a market for an array of beauty products designed to make black people look whiter. Throughout, Blanche comments on elitist attitudes among affluent African Americans and worries about her adopted daughter's growing preoccupation with and acceptance of the white culture's standards of beauty. Neely also uses this novel to show Blanche's rejection of traditional Christianity in favor of an African-influenced spirituality that includes calling on the guidance of ancestors.

The plot in the third Blanche White novel, *Blanche Cleans Up*, is set against a backdrop of political corruption, urban environmental hazards, and Blanche's worries about her children's need to be smart about sexual choices. All these issues cross race lines, but Blanche knows that African Americans and the poor are often disproportionately affected by them.

The fourth book in the series, *Blanche Passes Go*, brings resolution to an incident alluded to in the first novel: the rape of Blanche by a white employer. More thematically focused than the previous book, this novel weaves together crimes that collectively show the scope of abuse against women—a societal pattern that crosses race and class lines. This work has a psychological dimension not always present in Neely's work, as Blanche struggles to overcome the fear of her previous attacker and to vent her righteous anger without succumbing to a resentment and distrust of all men.

As these descriptions suggest, readers are more likely to recall each story's social concern more than the plots and to enjoy Blanche's personality and her interaction with her immediate circle of family and friends than to become engrossed in the whodunit aspect of the novels. The antagonists are not particularly memorable, but for most readers that will be forgivable. What keeps

readers coming back for more is Blanche's voice, with its no-holds-barred, tell-it-like-it-is explanations of the ways of the world for African Americans and for female domestic workers of all ilks.

BLANCHE ON THE LAM

Blanche on the Lam introduces Neely's protagonist Blanche White and opens with a scene that sets the tone for the series: Blanche is in court, waiting to be sentenced for writing a bad check, thinking about all her white clients who so often fall behind in paying her wages. Blanche is a domestic worker who supports herself and the two children she is raising by cooking and cleaning homes for white families. When Blanche realizes the judge is sending her to jail instead of letting her pay a fine, she panics and bolts. She hides out as a live-in maid for a white family and soon learns that they have secrets of their own. Blanche looks like a stereotypical mammy, but readers immediately perceive that she is anything but—instead, she is a feisty, opinionated woman with a keen sense of how intertwined race, class, and gender issues are. Blanche's personality dominates the story, which is peppered with her comments to readers on the ways of white folks, on what is wrong with American culture, and on what it means to be black in the United States. Although the bulk of her criticisms are of whites and white culture, she also has plenty to say about blacks who buy into white values that demean blacks and black culture—a theme Neely returns to in her second book.

Blanche's commentary is contained within a mystery plot, as Blanche tries to discover the family's dark secrets—secrets, it turns out, that involve racial injustices. Set in Farleigh, North Carolina (a fictional rendering of Raleigh, where Neely briefly resided), the story addresses racial attitudes that are both steeped in Southern history and nationally ubiquitous. An interesting twist to the plot, largely peopled by one-dimensional villains, is the emotional complication Blanche experiences as she gets to know and like Mumford, whose affliction with Down syndrome, Blanche comes to realize, causes him to experience many of the same social rejections as African Americans. Neely ends this novel in a way that goes against reader's expectations—and that perhaps uncovers readers' own stereotypic assumptions about the relationships between mummies and

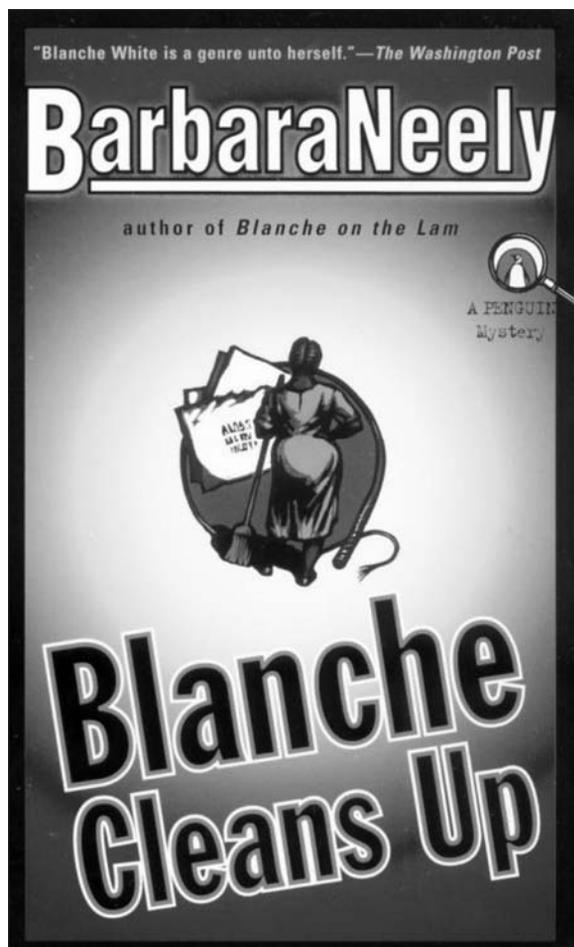

their white charges. *Blanche on the Lam* won several awards designated for an author's first novel: the Agatha, the Macavity, the Anthony, and the Go On Girl!

BLANCHE AMONG THE TALENTED TENTH

The title of Neely's second novel, *Blanche Among the Talented Tenth*, alludes to W. E. B. Du Bois's use of the phrase "the talented tenth" to describe the well-educated, affluent, socially prominent African American elite that he felt would be the catalyst for racial uplifting. Blanche, however, does not find sisterhood among this elite; instead, when she goes on vacation to a ritzy black resort on the coast of Maine, she is ostracized because she is dark-skinned. Blanche, as usual, has plenty to say about the situation, and her comments provide a critique of the color hierarchy among African Americans and the self-loathing that this hierarchy instills in many blacks. Blanche fumes about the popularity of skin lighteners, hair straighteners, and other beauty products meant to help blacks conform to white America's standards of beauty. Her anger is fueled by frustration: Her efforts to keep her daughter from accepting these values have been met with stubborn resistance. There is a mystery plot amid the commentary, and Blanche uncovers the truth about a death at the resort, but readers are more likely to be interested in Blanche's critiques of the black community's classism and color hierarchy, her rejection of "black" standards of beauty, and her personal quest for spiritual fulfillment—which involves spiritualist readings, invoking her ancestors, and rejection of any religion molded by white Western culture.

BLANCHE CLEANS UP

Set in Boston, where Blanche and her family have relocated, *Blanche Cleans Up* is the most urban of the Blanche mysteries. As usual, Neely's plot focuses on specific social issues, and her tone is set by Blanche's personality. Political corruption, teen pregnancy, pornography, homophobia, and urban environmental issues—specifically, lead poisoning—all get their share of the spotlight here. This novel also highlights more than others the struggles black mothers have in raising children healthy in both body and spirit in urban America. Blanche struggles to cope with her son's new pre-adolescent machismo and her daughter's self-esteem

issues, all the while trying to decide how to deal with the fact that both children are now young adults who will soon be making sexual decisions that could alter their lives. Meanwhile she becomes aware—as she had in *Blanche on the Lam*—of how much common ground working-class African Americans have with other marginalized persons, from gays to immigrants. The plot exposes the depth and scope of corruption in local politics, but it also suggests the possibility of getting results through working within the system—a lesson Blanche’s son learns as he ventures for the first time into social activism.

BLANCHE PASSES GO

Blanche Passes Go is Neely’s most feminist novel and Blanche’s most self-reflective story. Readers learned in the first novel in the series that years ago Blanche had been raped. She had kept quiet about the

incident and thought she had coped fairly well with the crime’s psychological aftermath. In this novel, though, Blanche moves back to Farleigh, North Carolina, to become a partner in her friend Ardell’s catering business and begins to reexperience her old terrors when she sees her rapist again. Her feeling that danger surrounds her is heightened as she begins to notice other acts of violence against women—a local young woman is killed, and a neighbor, she suspects, is being abused by her husband. Blanche soon realizes that her lack of closure is affecting her ability to trust any man—even the seemingly very nice man she has begun dating—and she resolves to deal with her feelings in a more open and honest way. She finally does so—and not only discovers the young woman’s murderer but also confronts her neighbor’s abuser and conquers her fears of her rapist.

Blanche’s crisis illustrates the lifelong effects of being a victim of violence. Because previous books so consistently portray Blanche as an assertive, in-your-face, no-holds-barred woman, this story provides a surprising—yet believable—new dimension to her character. Blanche’s vulnerability seems all the more poignant because it goes against readers’ expectations, and it makes her final triumph all the more satisfying.

In *Recovering the Black Female Body: Self-Representations by African American Women*, edited by Carla L. Peterson. New Brunswick, N.J.: Rutgers University Press, 2001. Looks at the invisibility of African American domestic servants in the greater community and Neely's portrayal of Blanche.

RICHARD NEELY

Born: New York, New York; April 18, 1920

Types of plot: Thriller; psychological

CONTRIBUTION

Richard Neely's writing career is a success story: He has worked steadily at his craft and has seen his novels rise from paperback obscurity to the best-seller lists. He has not been a groundbreaker in the field, nor do lines of influence radiate from his work, yet that work has been consistent, never failing to show the touch of the professional.

BIOGRAPHY

Richard Neely was born on April 18, 1920, in New York City and attended high school in Montclair, New Jersey. Before turning to writing as a full-time career, Neely was first a newspaperman and then an advertising executive in New York. He settled in Marin County, California, north of San Francisco.

ANALYSIS

Although Richard Neely has more than a dozen novels to his credit, all of them reliant on "thriller" or suspense elements, his work cannot be fit comfortably into any generic pigeonhole. Neely writes about crimes and criminals, yet his novels seem only peripherally concerned with the psychology of crime. He places his characters in dire jeopardy, yet he does not insist that his readers earnestly desire their rescue. He often locates his characters among the new gentry of modern society, yet there is not an ounce of genuine social criticism to be found in any of his novels.

Two questions thus naturally present themselves: What is Neely after in his work and what are the most productive ways into his work? The answer to the first question is problematic and speculative; the second can be gotten at a bit more easily by considering the fictional world that Neely's thrillers (for lack of a more precise term) create.

In the world of the typical Neely thriller, the everyday codes of moral behavior have been suspended and replaced by a curiously ad hoc morality. In Neely's world, morality is situational in application and Darwinian in function. Significant human action is almost always governed by pragmatic rather than ethical exigencies. Value finally resides, if it exists at all in this mechanistic system, in survival and success. The abstract principles of innocence and guilt may have legal but seldom moral meaning; ideas of "good" and "evil," per se, have virtually no meaning at all.

As a result, Neely's men and women play out their dramas against a moral backdrop that is relativistic and frequently even neutral. The reader is invited to observe the goings-on from a distance that renders empathic or sympathetic involvement difficult. Even the most basic of reader responses—desiring success for some characters and failure for others—is only conditionally evoked. Consequently, just as other binary oppositions fail to yield much meaning, the categories of "hero" and "villain" seem moot. Yet there is a catch. Though legitimate heroes may be in short supply in Neely's world, most of the villains are small, relatively petty, and so paper-thin as to cast no appreciable shadows. (Compared with even a minor villain in a John D. MacDonald novel, they seem particularly bloodless.) From his distance, with no characters to applaud, the reader looks on dispassionately, engaged in the cool, primarily intellectual pleasures of anticipating the next plot twist and, ultimately, of determining "whodunit."

In most ways, Neely is a traditionalist. His characters, for example, are motivated exactly as though they were stock James M. Cain creations: That is, their crimes proceed from motives of lust (though seldom love), revenge, and—most important—money and the social and personal power that goes along with it.

AN ACCIDENTAL WOMAN

Neely is unusually hard on his women, who more often than not are portrayed as Circean seductresses who employ sex as a kind of emotional currency with a murderous rate of exchange. In fact, this view of women seems to be a hallmark of the Neely thriller. With few exceptions, women in significant roles are portrayed as cunning (though not always intelligent),

ruthless, and sexually opportunistic. This is true in one of Neely's first novels, *The Plastic Nightmare* (1969), and in one written almost ten years later, *Lies* (1978). In perhaps his most popularly successful work, *An Accidental Woman* (1981), the title character undergoes a slightly bungled brain operation that "accidentally" transforms her from a timid, sexually repressed being into a virtual nymphomaniac who uses and discards men at a speed even Harold Robbins might admire. That this woman's sexual "liberation" coincides with her meteoric rise up the corporate ladder in a Madison Avenue advertising agency suggests that Neely may be, if not quite a misogynist, at least a cynic.

Neely's male protagonists are scarcely more attractive. They range from a victimized amnesiac (*The Plastic Nightmare*) to a modern-day Jack the Ripper (*The Walter Syndrome*, 1970) to a cirrhotic newspaper editor who nearly kills his publisher in a drunken rage (*Shadows from the Past*, 1983). In *The Sexton Women* (1972), the putative "hero" is a Vietnam veteran turned would-be filmmaker who returns home long enough to bed his beautiful young stepmother and to get himself involved in other equally unsavory affairs. The two central male characters in *The Japanese Mistress* (1972) involve themselves in adultery, murder, extortion, and what seems—for a brief time—to be incest. The unfortunate protagonist of *A Madness of the Heart* (1976) enjoys a minor extramarital tryst, only to discover that while he was conveniently away, his wife was raped and murdered, leaving him the principal suspect.

What these characters seem to share, in addition to bad luck, is a certain native incompetence. Simply put, they are seldom up to the jobs Neely assigns them. Things may turn out relatively well (though Neely is not exactly generous with happy endings), but rarely as a direct result of their labors. At times it even seems that Neely takes pleasure in frustrating them. Terry Donovan, the ace reporter whose detective work accounts for a major chunk of *Shadows from the Past*, uncovers and doggedly pursues several intriguing red herrings (among them yet another hint of incest), but not a single item of real use in solving the novel's core mystery. His function seems to be to divert the reader's attention, the ironic joke perhaps being that the ace reporter does ab-

solutely no useful reporting. The one apparently competent male in *Lies* is Frank Reno, a tough ex-cop who claims to be very good at one thing: catching criminals. Yet the character who finally pieces together the puzzle and dramatically names the culprit is Lee Brewer, a handsome nobody whose sexual misadventures were partly responsible for three murders.

Readers who go knowingly to a Neely thriller are not likely to be in search of the perceptively keen, believable characters that can be found in the work of Elmore Leonard, nor are they likely to be after the complex, richly nuanced themes that mark Ross Macdonald's work. They go instead for the one pleasure that Neely offers and always delivers: a conclusion that will probably surprise even the most experienced veteran of the genre. To this end, Neely does not merely "twist" his plots; he wrings them into Gordian knots. At this aspect of his craft, Neely is something of a master. Particularly deft surprise endings can be found in *The Walter Syndrome*, *A Madness of the Heart*, and *No Certain Life* (1978).

THE WALTER SYNDROME

Such narrative victories, however, have their price. Moreover, one cannot help but wonder how many readers derive unmitigated pleasure from Neely's manipulations. *The Walter Syndrome* is a case in point. Here Neely's passion for the surprise runs him smack into the difficulties often attending "unreliable" first-person narrators, in this case the two halves of a split, homicidally deranged personality. By creating a kind of narrative liturgy, with each half of the principal narrator's personality alternately responding to the other, Neely manages to pull off a genuinely shocking conclusion, yet the reader is given little to hold onto during this roller-coaster ride. With one exception, the characters emerge as shabby, pitiful creatures whose lives lack even the quiet desperation that might make them worth the reader's time and sympathy. By allowing his mad narrator to tell his own story, Neely forces his reader into the role of father confessor. The result is too much like overhearing a lengthy obscene phone call: The initial titillation soon gives way to an uneasiness just short of embarrassment.

SHADOWS FROM THE PAST

Shadows from the Past, a later but less successful

work, is also revealing on this point. Here Neely presents his readers with a curiously fractured narrative: The first-person narrator, newspaper editor Max Willis, occasionally relinquishes his storytelling responsibilities to an unnamed third-person narrator, the point—presumably—being to heighten the suspense of discovering just who might have wanted to put a bullet in the head of Charles Dain, Willis's rich, handsome, somewhat priapic publisher. The sadly anticlimactic payoff (related by Dain, fresh out of a coma) is the revelation that the assailant was Max Willis himself. The reader, unfortunately, must trudge through more than three hundred pages to arrive at this knowledge—too stiff a cost for the sake of another surprise ending.

To return to the question previously asked: What is Neely trying to achieve? A proper answer must begin with a frank acknowledgment both of Neely's skills and of his limitations. As what Graham Greene might call "entertainments," most of Neely's books come off reasonably well. Four of his most readable novels—*The Plastic Nightmare*, *The Walter Syndrome*, *The Japanese Mistress*, and *Lies*—are honest, workmanlike attempts to engage the reader's interest in characters that are seriously flawed and unattractive. This is no easy task, and Neely should be commended for maintaining what seems the courage of his convictions. If these novels finally lack art, they do not lack craft; readers will not be disappointed. *The Smith Conspiracy* (1972), a political assassination thriller reminiscent of Richard Condon's *The Manchurian Candidate* (1959), also passes muster. Less successful are Neely's attempts to transcend his own limitations in ambitiously "big" novels. What he seems unable to capture winningly is the "feel"—the multilayered texture—of a particularly rich time and place. *Shadows from the Past*, with its suggestions of *Citizen Kane* (1941), is largely unsuccessful at re-creating New York in the 1940's. Without that background to illuminate them, Neely's characters skitter one-dimensionally across a dim surface. This is even more the case in *An Accidental Woman*, whose Madison Avenue setting fails to convince and whose array of stereotyped characters fails to interest the reader.

O

CAROL O'CONNELL

Born: New York, New York; May 26, 1947

Types of plot: Police procedural; psychological

PRINCIPAL SERIES

Kathy Mallory, 1994-

PRINCIPAL SERIES CHARACTER

KATHY MALLORY, a New York Police Department sergeant, was a child living on the streets when she was caught stealing by New York police inspector Louis Markowitz, who, with his wife, Helen, raised the girl. There are many facets to Mallory: the computer hacker, the police sergeant, the dutiful daughter, the lost child, the sociopath, and the vengeful, rebellious girl. Mallory ("not Kathy") is an extremely aloof, even feral, but highly intelligent young woman. She is repeatedly depicted as a gunslinger, at times wearing a duster or a cowboy hat, flipping back her jacket to display her gun, or sharpshooting a gun out of someone's hand. Her sense of morality was developed during her early years on the street fending for herself and is tempered by the influence of her foster mother and father: Mallory has her own code of honor and conduct, similar to a gunslinger's ideology with an overall theme of an eye for an eye.

CONTRIBUTION

Carol O'Connell's first novel, *Mallory's Oracle* (1994), was very well received by readers and reviewers, lauded as a completely new mystery with an original character, and nominated for an Edgar Award. The novel brings in elements of many genres, crossing the police procedural and the cozy mystery with a bit of contemporary intrigue and a gothic air. *Mallory's Oracle* reinvents the mystery genre, partly by creating a character who is almost too dysfunctional not to be real. The plot has many twists and turns, drawing dis-

parate events or random details together and weaving them into a complex story line that moves toward an inevitable but unpredictable conclusion.

Kathy Mallory is an innovative main character, engaging and perplexing at the same time; this causes the reader to wonder about her, trying to divine what is going through her head or why she did something. Her character, even as the series progresses and more of her background is revealed, remains an enigma. Therefore, O'Connell's novels featuring Mallory are always compelling and fresh, the last one as gripping as the first.

BIOGRAPHY

Carol O'Connell was born May 26, 1947, in New York to Norman O'Connell, an accountant, and Berta O'Connell. She received a bachelor of fine arts from Arizona State University and trained as a painter at the California Institute for the Arts. She lived as a surrealist painter for several years in Greenwich Village, supplementing her income with such freelance jobs as copy editing and proofreading.

In her forties, O'Connell turned to writing. She made many submissions to American publishers without much luck, finally deciding that she might have a better chance with British publishers. The character of Kathy Mallory was born in a manuscript called "Whistling Dogs," which was not specifically about Mallory but rather about a police officer named Louis Markowitz. O'Connell has said that both characters were so strong that they were at odds. She sent this manuscript to Hutchison, the publisher of one of her favorite writers, Ruth Rendell. This first manuscript was turned down, but the rejection letter was complimentary enough to give O'Connell some direction and encouragement.

O'Connell was forty-six years of age before she finally achieved success as a writer of mysteries with a

second manuscript sent to Hutchison, this one with Kathy Mallory as the primary character, investigating the murder of her foster father, Louis Markowitz. The manuscript was immediately recognized by publishers as an imaginative and engaging work, garnering interest on both sides of the Atlantic, and at the Frankfurt Book Fair, it sold to Dutch, French, and German publishers. It was also sold for \$800,000 to an American publisher, who published it as *Mallory's Oracle*.

It may be that O'Connell's past struggles have made her conservative, for she treats writing as both a calling and a commitment, working more than eight hours a day and essentially publishing a new book every year, all written to the same caliber and level of innovation as her first one.

ANALYSIS

Mallory's Oracle is both a traditional mystery and a psychological thriller, in which the investigator tries to figure out the motives of the killer and understand the crime from the killer's perspective. The reader becomes intrigued trying to determine the motivations of Sergeant Kathy Mallory, who is stalking the suspect. O'Connell's work is noteworthy for its compelling characters, who have the depth and grittiness that make them resemble real-life people.

Mallory is socially dysfunctional, even perhaps sociopathic, and a genius with the face of an angel and an ability to draw people to her. To her friends, there are two sides to Mallory: the lost child and the vengeful police officer, two personas that may seem at odds but are perfect complements. Her friends are both charmed by her and afraid of her, and they find it difficult to predict how she will react or know what she is thinking.

Charles Butler, the one character in the series who could be called noble, seems to stand apart from the action, almost as if he is representing the reader. He is often accused of being gallant or "born in the wrong century." In the beginning of the series, he makes a living by investigating unusual talents and debunking the paranormal. The perfect foil for Mallory, he partners with her on a professional level and balances her on a personal level with his optimistic point of view.

Louis and Helen Markowitz, Mallory's foster family, play a large role in the series, although Louis is a

widower who dies in the first novel. The couple act as Mallory's conscience, lurking in the background and stopping her from acting inappropriately so that she can interact in polite society. Because Mallory is most likely a sociopath, she can clearly understand what motivates criminals. This trait also allows her to blackmail people for the information she needs to find the answers. Mallory lacks a real conscience, but she is not without feeling; however, her feelings resemble those of a young child or a wild animal, intense and uncontrolled. As opposed to struggling in a male-dominated world, she dominates it, drawing men to her even as they realize that she is using them. In a real sense, she is a femme fatale. She is a gifted liar whose philosophy, learned at Louis Markowitz's knee, is "Everybody lies," and who knows how to figuratively cut the truth out of people.

O'Connell's books are somewhat different in that the plot always contains two equally compelling mysteries: the murder or crime that Mallory is trying to unravel professionally and the mystery surrounding Mallory—her origins and the forces that shaped her personality. Each novel reveals a major piece of the puzzle: who her mother was, where Mallory came from, why she left her home, what she did on the street, who her father was, how she was found, and how she came to be a police officer. It is the mystery around Mallory that makes this series so engaging and appeals to the reader at least as much as if not more than the solution to the murder.

O'Connell retains a third-person point of view in her novels but tells the story from the perspective of nearly every character—Detective Riker, Charles Butler, Lieutenant Coffey, and even the murderer—but almost never Mallory.

MALLORY'S ORACLE

Mallory's Oracle, published in 1994, contains a mixture of old magic tricks, spirit mediums, and good old-fashioned greed. It opens with the murder of Louis Markowitz and the impact it has on his foster daughter, Kathy Mallory, who is a sergeant with the New York Police Department. She is ordered to take bereavement leave and does not hesitate to do so, starting an investigation of her own and becoming a partner in a consulting firm owned by Charles Butler, a friend of

the Markowitz family. Butler has earned a livelihood by identifying “special” talents and advising people on the most productive way to use them as well as by debunking the supernatural. Their first case together concerns a young boy who may be psychokinetic or haunted; inexplicably, knives have gravitated toward his stepmothers, the first two of whom have died under suspicious circumstances.

In pursuing the mystery surrounding Markowitz's death, Mallory moves into an apartment building where she believes the killer lives and gets to know the residents (or, in her mind, suspects), including Butler's aunt. The aunt has made a name for herself as a medium and is the widow of a famous magician who died in a spectacular magic trick gone wrong, an accident that she predicted. The interaction between Mallory and the other residents involves much verbal and non-verbal fencing, with a finale that eclipses all predictions.

THE MAN WHO CAST TWO SHADOWS

The Man Who Cast Two Shadows (1995) opens with the murder of a woman who looks like Mallory, and initially, a number of Mallory's friends assume that she has been killed. Mallory, decidedly alive, resolves to investigate the murder. It becomes a cat-and-cat game with the killer—one stalking the other, one taunting the other.

Charles Butler sheds some light on Mallory's psyche as he reaches a conclusion:

And now his eyes took on some pain as he clearly understood their separate roles in this business. Mallory could crawl into the mind of a killer with disturbing ease. She had left the difficult job to him, the job of identifying with a frail human being who had no pathology or defenses in a brutal landscape peopled with those whom Mallory best identified with. . . . And a game it was to Mallory. Murder was the best game.

In a way, Mallory maneuvers her friends as much as her suspects, in an effort to get to the truth.

Charles also builds his own sense of reality, employing a technique learned from his uncle, a former magician who talks to his dead wife: Charles starts an imaginary relationship with the victim who resembled Mallory, and she becomes what he wants Mallory to

be, revealing his own growing feelings for her. His compassion for Mallory is only strengthened when it is revealed that when Mallory was a child, the makers of a snuff film had intended to make her their victim. This he sees as a possible reason for her present emotional dysfunction.

STONE ANGEL

Stone Angel (1997) provides many answers to the mysteries regarding Mallory's childhood, her pathology, and even her name. Mallory returns to the town in Louisiana where she grew up and where her mother was stoned to death. In the graveyard in this town stands a stone angel carved in the likeness of Mallory's mother and in her honor; it is the spitting image of Mallory. The bayou provides a lush and mysterious backdrop for the story, which starts out with an autistic savant having his hands broken for playing piano, Mallory saving a sheriff's deputy who had a heart attack, and a faith healer being murdered. The day concludes with Mallory in jail.

The characters are memorable and steeped in southern culture, including a clever, aging southern belle who does a lot of plotting of her own. The stage is set for determining not just who killed the faith healer but also who was involved in stoning Mallory's mother seventeen years before and why. Although the details of her early childhood are revealed, Mallory remains an enigmatic character, and even her friends Charles and Riker do not know what kind of retribution she has in mind for the mob that killed her mother.

The mysteries are intertwined, as many such stories are in small towns. In spite of Mallory's ferocious tendencies, everyone is trying to protect her from herself, from the truth, and from the killers. Through it all, Mallory has set the scene in an effort to find and punish the killers—regardless of the collateral damage. However, she does achieve her end. Always knowing how to make an exit, she walks off into the sunset, and despite his best intentions, Charles follows her.

JUDAS CHILD

In *Judas Child* (1998), O'Connell took a break from Kathy Mallory and introduced two new characters, Rouge Kendall and Ali Cray. Kendall is a police officer investigating the disappearance of two girls who have been kidnapped, as his own twin sister was

many years ago. Ali Cray is a forensic psychologist specializing in pedophiles who enters the picture with a secret of her own.

Running throughout this story is guilt: the guilt of a parent whose child has been taken; the guilt of a psychiatrist maintaining the confidentiality of a repeat pedophile and serial murder; the guilt of a childhood friend used as a lure, or Judas goat, to catch her friend; the guilt of the surviving twin; and the guilt that comes from punishing the wrong suspect. Redemption and forgiveness bring the story to a close.

After *Judas Child*, O'Connell returned to the overwhelmingly successful Mallory series, publishing *Shell Game* (1999), *Crime School* (2002), *Dead Famous* (2003), and *Find Me* (2006).

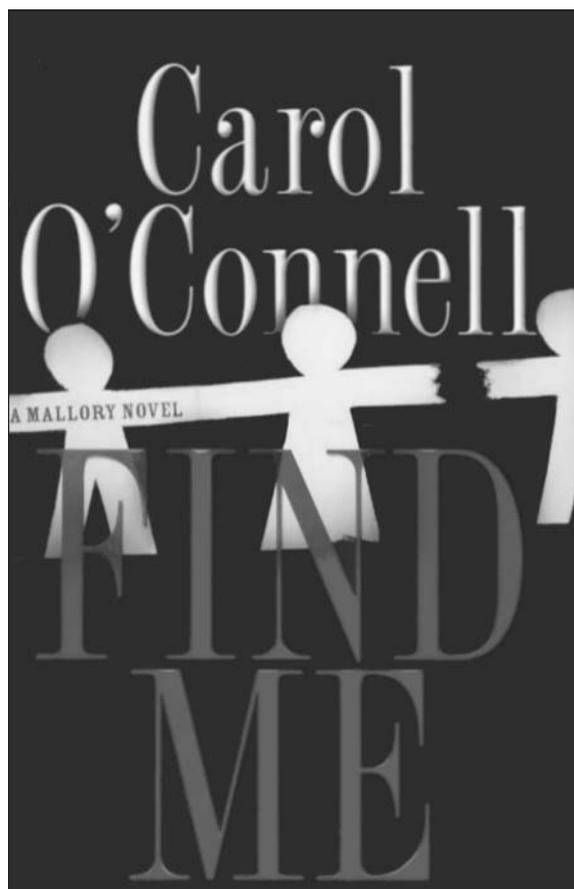

FIND ME

Find Me is the story of a serial killer who over the years has abducted and killed children along Route 66

as a tribute to the Mother Road. The story begins with a woman found dead in Mallory's apartment and Mallory nowhere to be found. Ultimately, Charles and Riker track her to Chicago, where she is peripheral to an investigation into a murder. The murder is of a parent of one of the missing children who are presumed victims of the Route 66 serial killer. Charles, Riker, and Mallory then join a caravan formed by the families of the missing children and fraternize with Federal Bureau of Investigation agents who are led by a seemingly incompetent and self-absorbed agent who has a lot of information he is not sharing.

More murders ensue, including the death of a former priest/psychologist who has been counseling the killer, all leading to the abduction of a child, sister to one of the missing children. Mallory uses a pipe and her Volkswagen to ram and impale the killer, leaving the abducted child unharmed in the seat next to him. The story ends with Mallory surprising her long-lost father, who never knew she existed. His surprise is palpable, and Mallory's response, bizarrely enough, is laughter.

E. PHILLIPS OPPENHEIM

Born: London, England; October 22, 1866

Died: St. Peter Port, Guernsey, Channel Islands; February 3, 1946

Also wrote as Anthony Partridge

Types of plot: Espionage; thriller; police procedural

CONTRIBUTION

E. Phillips Oppenheim contributed more than 150 novels to the mystery and detective genre. Because he served in the British Ministry of Information during World War I, Oppenheim was privy to at least some of the workings of the British Secret Service, and his protagonists are frequently Secret Service employees. There are no detective series in Oppenheim's work; each novel introduces a new set of characters. Oppenheim wrote about wealthy supermen and their way of life. His largely upper-class characters share a love of good wine and smoke exotic cigarettes. The women are beautiful and virtuous. While the men fall in love in almost every novel, the excitement of adventure takes precedence over that of romance. Oppenheim claimed to have begun each book with "a sense of the first chapter and an inkling of something to follow," and his plots are rarely dull.

That the plots of his immense oeuvre are not repetitive is a credit to Oppenheim's fertile imagination.

Most of his books involve some kind of international intrigue, and many of them reveal a surprise hero. His single greatest literary influence was probably his neighbor in the French Riviera, Baroness Orczy, author of *The Scarlet Pimpernel* (1905). Louis, the maître d' of the Milan Hotel in *A Pulpit in the Grill Room* (1938) and *The Milan Grill Room: Further Adventures of Louis, the Manager, and Major Lyson, the Raconteur* (1940), is reminiscent of Orczy's armchair detective, the Old Man in the Corner.

BIOGRAPHY

Edward Phillips Oppenheim was born in London on October 22, 1866. He left the Wyggeston Grammar School in Leicester in 1882 before graduation because his father, a leather merchant, was having financial problems. During World War I, Oppenheim served in the Ministry of Information, an experience that fed his imagination and allowed him to write so many novels of international intrigue. He married New Englander Elsie Hopkins, and the couple had one daughter. Until World War II, they lived on the French Riviera; forced to leave, they moved to Guernsey, in the Channel Islands. Oppenheim, who occasionally wrote under the name Anthony Partridge, died in St. Peter Port, Guernsey, on February 3, 1946.

ANALYSIS

E. Phillips Oppenheim, dubbed “The Prince of Storytellers,” was a master of the spy novel. As a longtime resident of the French Riviera, Oppenheim kept his finger on the European pulse; he located his intrigues in Poland, Russia, England, and Africa, as well as in a small, imaginary European country. He was a monarchist whose characters did not like Germany, Russia, socialism, or communism. Oppenheim boasted that he had foreseen the expansionist ambitions of Russia, Japan, and, particularly, Germany. His writing before World War I was so anti-German, in fact, that his name was on a list of British citizens to be eradicated if the Germans successfully invaded England. Ironically, when the Germans did obtain control of the Channel Islands, the Luftwaffe chose Oppenheim’s house on Guernsey as their headquarters.

In *A Maker of History* (1905), a young Englishman obtains a copy of a secret treaty between the kaiser and the czar detailing an agreement to wage war against England. In *The Double Traitor* (1915), a diplomat ob-

tains a list of the German spies in England and is able to identify them when war breaks out. In *The Kingdom of the Blind* (1916), an English aristocrat proves to be a German spy. Oppenheim had little faith in the ability of the League of Nations or the United Nations to obtain a permanent world peace, and he frequently emphasized the power and importance of secret societies engaged in world trade.

MYSTERIOUS MR. SABIN

Among the novels that established Oppenheim’s reputation as a spy novelist was *Mysterious Mr. Sabin* (1898), in which the protagonist steals British defense documents to sell to Germany. He plans to use the money to finance a new French revolution. Sabin’s secret society, however, orders him to burn the documents obtained through blackmail, and Sabin must convince the other characters that he meant well all along.

THE GREAT IMPERSONATION

Another successful novel, *The Great Impersonation* (1920), describes the impersonation of the German major-general Baron Leopold von Ragastein in England of his former Etonian classmate Everard Dominey. Ragastein’s intent is to influence enough British citizens to keep England from entering World War I against Germany. His attempt is frustrated by his double, Dominey, a British aristocrat who has become an alcoholic. (This novel was later adapted as a film, featuring Edmund Lowe.)

THE DUMB GODS SPEAK AND THE WRATH TO COME

In the prophetic novel *The Dumb Gods Speak* (1937), Oppenheim describes the discovery of an all-powerful weapon in the year 1947. It is not an atomic bomb; rather, it is an electrical ray that can stop fleets of warships in the ocean without any casualties. In the novel, a single American warship defeats Japan by immobilizing its entire fleet. The people of the world deplore this action so much that they legislate against any future wars. In *The Wrath to Come* (1924), a German-Japanese plot for a joint attack on the United States is uncovered and prevented by the appearance of a *deus ex machina* in the form of a document.

MISS BROWN OF X.Y.O.

In the novel *Miss Brown of X.Y.O.* (1927), the bored secretary Miss Brown is sitting on the steps of a

E. Phillips Oppenheim. (Library of Congress)

London mansion with her typewriter when she is called in to take a deposition from a dying famous explorer. If the dictated information should fall into the hands of the Bolsheviks, a European war would result. The dying explorer proves to be a healthy secret agent, and after withstanding many enemy attempts to steal the important document, Miss Brown and the agent not only save Europe from war but also fall in love.

UP THE LADDER OF GOLD AND THE GALLOWES OF CHANCE

Oppenheim's sympathy with the wealthy and aristocratic is demonstrated in both *Up the Ladder of Gold* (1931) and *The Gallows of Chance* (1934). In the first novel, a fantasy about the power of money, the rich American Warren Rand corners the gold market and, using this power, tries to persuade the nations of the world not to go to war for forty years. Rand commits crimes for a good cause, and clearly Oppenheim approved. In *The Gallows of Chance*, Lord Edward Keynsham, a member of an illegal bootlegging syndicate, is allowed to escape indictment for murder because he is beloved in his community. Indeed, he will marry his love, Katherine Brandt, an otherwise law-abiding leading actress who knows of his crimes. His best friend, Sir Humphrey Rossiter, resigns as home secretary to escape the duty of prosecuting Lord Edward. This occurs in spite of the fact that Lord Edward and his syndicate had kidnapped Sir Humphrey and threatened to hang him unless he met their demands to stay the execution of a convicted murderer.

MR. MIRAKEL

In *Mr. Mirakel* (1943), the protagonist sets up a utopia to which he takes his followers; they escape with him, not only from war but also from an earthquake. The powerful leader is able to convince his followers that they will achieve a lasting peace.

THE SEVEN CONUNDRUMS

One of Oppenheim's most unusual books, *The Seven Conundrums* (1923), has a Faustian theme. Maurice Little, Leonard Cotton, and Rose Mindel, three down-at-the-heel performers, sell their souls to Richard Thomson in return for professional and financial success. In seven different actions, the three go where they are told and carry out Thomson's typed and mysteriously delivered orders. After each order is carried out, they ques-

tion Thomson. Instead of a reply, he counters with "That is the First [or Second . . .] Conundrum." Although the performers refer to Thomson as Mephistopheles privately, he promises to return their souls at the end of a year; at that time, he supplies answers to all seven conundrums and reveals his own identity as a member of the British Secret Service. The structure, the allusions, and the credible love story make *The Seven Conundrums* one of Oppenheim's finest works of fiction.

THE OSTREKOFF JEWELS

Although many of Oppenheim's tales of intrigue involve spies acting alone, *The Ostrekoff Jewels* (1932) pits American diplomat Wilfred Haven against a beautiful Russian spy, Anna. The two escape from Russia together, the last leg of their journey to England taking place on a commandeered, antiquated, German plane. Not until the end of the novel does Wilfred trust Anna, although he had fallen in love with her at first sight. She proves to be the Princess Ostrekoff, the rightful owner of the crown jewels for which Wilfred has risked life and career.

THE STRANGERS' GATE

Mr. Treyer in *The Strangers' Gate* (1939) is another of the Germans determined to topple the British government. In this story, Nigel Beverley, president of a British-owned company, represents the Crown. In a situation unusual for an Oppenheim protagonist, Nigel has to choose between three women: his fiancé, a wealthy socialite who is the daughter of his business partner, Lord Portington; Katrina, a beautiful opera singer who is the mistress of Prince Nicolas of Orlac and who makes advances toward Nigel; and Marya, an impoverished princess from Orlac who has been reared in a convent. Nigel chooses the innocent Marya, who will learn how to be the wife of a businessman-socialite. The action centers on the conflicting attempts of Great Britain and Germany to control the bauxite mines of Orlac.

Whether detective story or straight espionage, Oppenheim's fiction is infused with his love of storytelling. So successful was his writing career that Oppenheim was able to enjoy the same luxurious lifestyle of many of his characters. Read by millions of thrill seekers, his works betray his interest in "world domination

for good purpose, especially pacifism, his admiration for the superman of wealth, and his fascination with the game of world politics played as on a chess board.”

BARONESS ORCZY

Emma Magdalena Rosalia Maria Josefa Barbara Orczy

Born: Tarna-Örs, Hungary; September 23, 1865

Died: London, England; November 12, 1947

Type of plot: Amateur sleuth

PRINCIPAL SERIES

The Old Man in the Corner, 1905-1925

Lady Molly of Scotland Yard, 1910

Patrick Mulligan, 1928

PRINCIPAL SERIES CHARACTERS

THE OLD MAN IN THE CORNER (BILL OWEN) is an extremely eccentric man who spends much of his time in a restaurant, the A.B.C. Shop, working untiringly at tying and untying knots in a piece of string. He is ageless and apparently unchanging. Not much concerned with justice or morality, he is interested in crime “only when it resembles a clever game of chess, with many intricate moves which all tend to one solution, the checkmating of the antagonist—the detective force of the country.”

POLLY BURTON, a journalist, is the Old Man in the Corner’s foil. An invariably baffled reader of stories of mysterious deaths in the newspapers, she comes to the A.B.C. Shop to hear the old man unravel the mystery.

LADY MOLLY OF SCOTLAND YARD is a strong-willed, direct, and clever woman who time after time manages to beat her male colleagues at the game of crime solving. She is somewhat of a feminist, if only in the sense that she claims that her feminine intuition—as opposed, presumably, to male intellect and logical thinking—equips her better for the job of detecting than any man.

MARY is Lady Molly’s confidant and foil. This young police officer tells the story and represents the intrigued but skeptical reader.

PATRICK MULLIGAN, an Irish lawyer, is a hero of still another volume of detective stories written by the prolific baroness. Both the Lady Molly and the Patrick Mulligan stories are far inferior to the first two volumes of stories about the Old Man in the Corner, although they are very similar in construction and execution.

CONTRIBUTION

One student of crime literature calls Baroness Orczy’s stories about the Old Man in the Corner “the first significant modern stories about an armchair detective.” They are also rather unusual because of the purely cerebral interest the old man has in crime as a kind of mind game. The extent of his amorality is brought out in the story of “The Mysterious Death in Percy Street.” In this story, Polly Burton realizes, after the old man has laid all the evidence and a damning piece of evidence—a length of rope with expert knots in it—before her, that the old man is the murderer, reveling in his own cleverness.

All the stories about the Old Man in the Corner and his journalist friend, Polly Burton, are set in the A.B.C. Shop, where he habitually sits, as the baroness describes him in her autobiography, “in his big checked ulster [and] his horn-rimmed spectacles,” with “his cracked voice and dribbling nose and above all . . . his lean, bony fingers fidgeting, always fidgeting with a bit of string.” Either he or Polly brings up some mysterious death or crime that is currently intriguing the public. The events are outlined by the old man, who, when he is not sitting in his corner, is an avid reader of newspapers and spectator in courtrooms. He is unfailingly—and jeeringly—contemptuous of the police and their feeble efforts at untying the knots clever criminals tie. With Polly as a respectful but not necessarily credulous listener, he proceeds—once the facts as he sees them are presented—to point to the logical and necessary solution to the mystery. He scoffs at offering his insights to the police because he is sure that they would not listen to him, a mere amateur, and because he admires the clever criminal who can outwit the entire Scotland Yard. Thus, the emphasis is on the ingeniously planned crime and the intelligent, rigidly logical unraveling of it, not on psychology, human relations, or morality.

BIOGRAPHY

Emma Magdalena Rosalia Maria Josefa Barbara Orczy was born in Hungary on September 23, 1865,

the daughter of Baron Felix Orczy, an able composer and conductor, and Emma (née Wass) Orczy. Problems, including a peasant uprising, persuaded the Orczys to move first to Budapest, then to Brussels, followed by Paris and, finally, London. Young Emma, or Emmuska, as she preferred to be called, was educated first as a musician and later, when it was decided on the advice of Franz Liszt—a family friend—that she did not have the gift of music, as an artist. Emmuska attended the West London and Heatherly schools of art. She showed promise and was for several years an exhibitor at the Royal Academy. While she was at the Heatherly School of Art, the young Hungarian met another student, Montagu Barstow, who was to become her husband.

It is intriguing that a woman who did not speak a word of English until she was fifteen years of age should have become one of the most prolific and popular writers of her time, writing more than thirty books in her adopted language. Baroness Orczy explained how the idea of becoming a writer first came to her. She and her husband were staying with a family whose members wrote stories that they sold to popular magazines. Orczy, observing that people with little education who had never traveled were successful as authors, decided that she, with her international background and solid education, should be able to do at least as well. She wrote two stories and found to her joy not only that they were accepted immediately—by *Pearson's Magazine*—for the amount of ten guineas but also that the editor asked that she give him first refusal on any future stories she wrote. A literary career had begun.

It was suggested to the baroness that she write detective stories, somewhat in the style of the then very popular Sherlock Holmes stories. As a result, she created the strange old man who sits in his unobtrusive corner, playing with his string and expounding in a haughty and self-assured manner to the reporter from *The Evening Observer* on crime and criminals. The stories caught on and ran as a series in *The Royal Magazine* before their publication in book form under the title *The Old Man in the Corner* in 1909.

Baroness Orczy produced four series of stories featuring Bill Owen, the peculiar old man, and Polly Burton. The first two series ran in *The Royal Magazine*

from 1901 to 1904 and were later published as *The Old Man in the Corner*; the third series was first published in book form as *The Case of Miss Elliott* in 1905. The fourth and last series was published in 1925 as *Unravelling Knots*. Baroness Orczy is most famous, however, not for her detective stories but for being the author of that epic of trans-Channel derring-do and genteel romance, *The Scarlet Pimpernel* (1905).

At the outbreak of World War I, Barstow and Orczy moved to Monte Carlo, where they lived until his death in 1943; at that time, the baroness moved back to London. During her later years, Orczy's literary output slowed down considerably, although she kept writing until the end—her autobiography, *Links in the Chain of Life* (1947), being her last published work. Baroness Orczy died in London, at the age of eighty-two, in 1947.

ANALYSIS

Although Baroness Orczy wrote more than thirty volumes of fiction, she is remembered principally as the author of the books about the Scarlet Pimpernel and to a lesser degree for her stories about the arm-chair detective in the corner of the A.B.C. Shop, Bill Owen. The first of these stories, "The Fenchurch Street Mystery," appeared in the May, 1901, issue of *The Royal Magazine* and is typical of all of them.

"THE FENCHURCH STREET MYSTERY"

Polly Burton, a journalist at *The Evening Observer*, is sitting in the A.B.C. Shop reading her newspaper and minding her own business when a curious little man irritably pushes his glass away and exclaims, "Mysteries! . . . There is no such thing as a mystery in connection with any crime, provided intelligence is brought to bear on its investigation." Burton is, not surprisingly, somewhat taken aback by being spoken to by a total—and very strange—stranger, but even more so because he seems to have read her thoughts: She is reading an article in the paper dealing with crimes that have frustrated the police.

Such is the opening of the first story about the Old Man in the Corner. Each of the stories is structured in the same way: First, the reader is drawn into the mystery to be investigated and solved via a conversation in the A.B.C. Shop between the two series protagonists;

Baroness Orczy was a comparatively prolific writer, but she is now remembered almost exclusively as the creator of the dashing Scarlet Pimpernel.

next, the data of the case in question are presented, usually by Bill Owen; and finally, Owen presents a neat, logical solution.

In the exposition phase, the old man gives what almost amounts to an eyewitness account of the facts of the case. He often carries with him photographs he has taken or obtained of the protagonists of the case or, as is the case in "The Fenchurch Street Mystery," copies of pertinent letters or other documents. The old man also spends a considerable amount of his time in courtrooms listening to cases and taking notes. He is always early enough to get a seat in the first row, enabling him to see and hear everything. His account of the facts is lively and full of colorful adjectives and verbatim quotations from witnesses. He makes sure to

call Burton's attention to those aspects of the case that seem to him pertinent to its solution.

Despite the old man's care to present the case so that all an intelligent person has to do is make logical deductions, Burton, like the police before her, invariably has to give up and leave the unraveling of the mystery to her interlocutor. The cases discussed at the A.B.C. Shop are to everyone but Owen true mysteries that seem to resist all attacks. To Owen there are no mysteries. He is so cocksure about this that he irritates Burton, who insists that crimes the police have despaired of solving are, for all intents and purposes, insoluble. The old man demurs: "I never for a moment ventured to suggest that there were no mysteries to the *police*; I merely remarked that there were none where intelligence was brought to bear on the investigation of crime." He has deep contempt for the public, the journalists covering crimes, and, especially, the police. The last phase of each story is the protracted denouement: the Old Man in the Corner demonstrating how, with a minimum of insight into the human psyche and a keen intelligence, he can make any case that to the rest of the world is opaque become crystal clear.

This three-part structure is characteristic of every one of the stories about the Old Man in the Corner. Orczy makes the reader her confidant and interlocutor. The stories are told in the first person by Polly Burton as if she were telling them to a friend over a cup of tea. The relationship between the reader and the narrator is, in other words, somewhat like that between Polly Burton and the old man who tells his stories to her. This device of pulling the reader into the narrative by making him an intimate, common in nineteenth century literature, is used to great effect by Orczy.

The stories move back and forth in time and place, between the present in the A.B.C. Shop and the various events in the past that are presented as facts pertinent to the case. The old man creates in vivid narrative the situations in which the protagonists in the case have found themselves, or he re-creates the testimonies of witnesses at the trial in colloquial detail and color. Thus, the reader must follow the case on two levels: as Polly Burton's alter ego or confidant and as a witness to key events and the proceedings in court. The mixture is both entertaining and pleasing.

In the end, the reader, along with Polly Burton, must put up with the old man's annoying complacency and self-congratulatory air as he points out where the police and everybody else went wrong. The old man jeers at the police and brims over with conceit because he has presented all the evidence so that any intelligent person should be able to come to the one and only conclusion to the case, the conclusion that he has made and that makes sense of all the facts. When he has made the last knot on his string and thrown his pearls before the swine, he gets up, leaving Polly and the reader to wonder what exactly has happened. Have they just witnessed a brilliant amateur sleuth at work, or is the old man a hoax, fleet of fingers and mouth but actually merely testing the credulity of novelists and their readers?

Perhaps the most interesting aspect of the stories about the Old Man in the Corner is that they are totally devoid of morality and human compassion. The world conjured up by the author is one where greed and the will to outsmart society's laws and their representatives reign supreme. The emphasis is on how a smart criminal can get away with nearly anything. The criminal described and hailed as a hero by the old man—and by extension by his author and her alter ego, Polly Burton, who is only minimally interested in seeing justice served—is a virtual Nietzschean superman, a Raskolnikov who is not plagued by the monsters of conscience and who is never caught. If a criminal comes to a bad end in the stories, it is through the agency of fate, not the police or society. The successful culprit, as in "The Dublin Mystery," sometimes lives only a short time to enjoy the results of his mischief before being overtaken by fate and a natural death. It is almost as if the author wanted to suggest that even if the agents of socially defined justice are slow of wit, the most vicious of malefactors—the father murderer ("The Dublin Mystery") and the murderer of the rightful heir to the earldom ("The Tremarn Case"), to name two examples—will eventually be brought to justice and executed by some kind of higher agency.

This bare-knuckled social Darwinism, where the smart outwit, defraud, and kill the less smart with no immediate punishment, is both the strength and the weakness of Orczy's stories. The Old Man in the Cor-

ner and his cases are interesting because they introduce readers to an amoral universe that lies beyond the stories found in the newspapers. These stories are superior to the later series about Lady Molly of Scotland Yard and the Irish lawyer Patrick Mulligan because they are not sentimental. Their amoral tone is refreshing because it is so unexpected and so unusual. The weakness, however, is that it is hard for the reader to care about anything or anybody in the stories. The two protagonists, Polly Burton and Bill Owen, are too sketchy and, in Owen's case, too unsympathetic to like, and the people whose dramas are being retold are unreal and even unbelievable, mere shadows of real people, pawns to be moved about on the old man's chessboard.

The stories about the Old Man in the Corner are good early examples of the armchair-detective subgenre, with interesting and well-designed plots. Their weakness lies in the characterizations and in a certain moral and emotional callousness.

P

STUART PALMER

Born: Baraboo, Wisconsin; June 21, 1905

Died: Glendora, California; February 4, 1968

Also wrote as Theodore Orchards; Stuart Palmer
Orcles; Jay Stewart

Types of plot: Amateur sleuth; cozy

PRINCIPAL SERIES

Hildegarde Withers, 1931-1969

Howard Rook, 1956-1968

PRINCIPAL SERIES CHARACTERS

HILDEGARDE MARTHA WITHERS, a dry-witted and keenly observant amateur sleuth, is about forty when she first appears. An elementary school teacher in the early books, she later retires to devote more time to detecting. Although a single woman throughout the series, she is engaged to Oscar Piper for approximately half an hour between the events of the first and second books. Palmer based her on his high-school English teacher, Miss Fern Hackett, and on his father.

OSCAR PIPER, inspector, New York City Police Department, is about forty, graying, tall, and gaunt. Rough-spoken, with a taste for whiskey and with a cigar constantly in the corner of his mouth, Piper is the opposite of the prim and abstemious Miss Withers.

HOWARD ROOK, a retired newspaperman, is a middle-aged misogynist, overweight and sloppy, who, forced into retirement, maintains a running argument with the police.

CONTRIBUTION

Stuart Palmer's fourteen novels and three short-story collections featuring Hildegarde Withers are most notable for forging, in a period dominated in America by male detectives, a woman who can hold her own in a male world. Palmer also created, with quick sketches and convincing settings, an ability that

complemented one of his most intriguing techniques: opening novels with a scene that sets a mood but that is often only tangentially related to the ensuing mystery. This technique is responsible for establishing some of the humor in the novels, and it is for his dryly witty style, embodied in Miss Withers, that Palmer is best known. He created an enduringly popular character, the subject of six motion pictures and one made-for-television film.

BIOGRAPHY

Stuart Palmer was born as Charles Stuart Hunter Palmer in Baraboo, Wisconsin, on June 21, 1905, the son of Jay Sherman Palmer and Nellie Secker Palmer. He attended the Art Institute of Chicago from 1922 to 1924 and the University of Wisconsin, Madison, from 1924 to 1926. Palmer began writing as a child; his first short story was completed when he was six, and at twenty he had his first publication in a college literary magazine. Before turning to writing as a career, Palmer held a variety of jobs that provided background for some of his books. Among these were sailor, apple picker, Ringling Brothers clown, iceman, cabdriver, publicist, reporter, copywriter, editor, poet, and ghostwriter.

In 1928, Palmer married the first of five wives, Melina Racioppi, from whom he was divorced in 1937, and in 1931 he wrote his first mystery, *Ace of Jades*. This novel was followed in the same year by the first of the Hildegarde Withers books, *The Penguin Pool Murder*, which was an immediate success. After the success of the Miss Withers character, especially of the 1932 film version of the first Withers book, Palmer went to Hollywood to work as a screenwriter while continuing to produce novels and short stories featuring Miss Withers.

In 1939 Palmer was married to his second wife,

Margaret Greppin (they were divorced in 1945), and in 1942 he enlisted in the United States Army. As an army major, he served first as a training-film instructor in the field artillery school and then as the liaison officer between the United States Army chief of staff and Hollywood production companies, as well as with all newsreel production companies. In 1947, still in the army, he was married to Ann Higgins.

Discharged in 1948, Palmer returned to screenwriting, and in 1950 he began writing for television as well. Having been divorced from Ann in 1950, he was married for the fourth time in 1952 to Winifred Graham. In 1954-1955, he was president of the Mystery Writers of America; in 1956, he wrote the first of two books featuring Howard Rook, *Unhappy Hooligan*, set in a circus and drawing on his own experience as a circus clown. Divorced again in 1963 and remarried three years later to Jennifer Elaine Venala, Palmer died on February 4, 1968, in Glendora, California.

A prolific writer, Palmer left, in addition to dozens of film and television scripts, fourteen Hildegard Withers novels, three collections of short stories featuring Miss Withers, two Howard Rook novels, and five other mystery books. A fifteenth Miss Withers book was in rough draft when he died; it was completed by Fletcher Flora and published posthumously in 1969.

ANALYSIS

Stuart Palmer's second mystery, *The Penguin Pool Murder*, was an immediate success. In it he introduced the character who was to become one of the most popular amateur sleuths in American fiction. He also established in that book the qualities that were to become his hallmark as a writer: strong characterization of major characters, humor, convincing settings, clever plotting, and a rapid-fire style that captured mood and setting.

Hildegard Withers is Palmer's greatest creation, and her first appearance indicated her personality, for she appeared not as a person but as an anonymous force. A fleeing purse snatcher is sent sprawling by an umbrella thrust between his legs from a crowd. The umbrella belongs to Miss Withers, and its use suggests, before the reader sees or meets her, the presence of someone who takes action when others are too surprised or confused to act. Her desire for action pushes

her into the center of events, because not content with giving the police an account of finding a body in the penguin pool at the New York City aquarium, she proceeds to take shorthand notes of the other witnesses' statements, as well as of Inspector Piper's musings and orders to his officers. She makes herself so useful that he allows her to accompany him.

MURDER ON THE BLACKBOARD

This determination not to be left out but to act recurs in each book. When, in *Murder on the Blackboard* (1932), Inspector Piper is seriously injured by a murderer, Miss Withers announces to his second in command that she will be Piper's understudy and assist in the investigation, and the reader knows that she will do so despite the sergeant's hesitancy. Left alone while the police are excitedly examining an apparent grave, Miss Withers remains behind, seizing the opportunity to do some uninterrupted sleuthing. She goes through the desks of several of her fellow teachers and discovers clues that later help her solve the mystery, clues that the police misinterpret. Later her investigative determination leads to decidedly unladylike action for a middle-aged woman: "With much grunting and bustling, together with a certain amount of damage to the lady's serge skirt, Miss Withers clambered to the board and from that eminence managed to squirm through the hole in the ceiling."

Palmer complements his character's determination with keen powers of observation. Withers, like her contemporary never-married sleuth, Agatha Christie's Jane Marple, notices details. She notices a sliver of light where there should be none in *The Penguin Pool Murder*; she is aware of the sound of a fellow teacher's footsteps as she goes down the hall and, more important, registers a difference in sound when she returns. Her powers are honed by close contact over the years with third-grade students; just as Miss Marple believes that observing behavior in a small town allows her to understand human behavior on a wider scale, Miss Withers believes that observation of the behavior of small boys gives her an understanding of adult duplicity.

THE PUZZLE OF THE RED STALLION

Her observation and determination are not, however, infallible. In *The Puzzle of the Red Stallion* (1936), Miss Withers finds at the scene of a murder a briar pipe that

the police have overlooked. Convinced that it is a clue, she deduces from this single object that the owner is middle-aged, has traveled in Europe widely, is well-to-do, has excellent taste, works with chemicals, is sometimes careless, and wears dentures. Palmer's humor comes into play when Miss Withers discovers that the pipe belongs to the medical examiner, who dropped it while examining the body. These occasional slips and Miss Withers's reactions to them add greatly to the reader's delight in the character and to the appeal of the books.

Much of the series' popularity stems from such humor, which also springs from Hildegard's acerbic wit. Never one to suffer fools gladly, when an unimaginative police sergeant decides the murderer must be someone familiar with the school in *Murder on the Blackboard*, Miss Withers says, "Simple, isn't it? . . . You've narrowed the suspects down to thirty or forty thousand." Again, in *The Puzzle of the Red Stallion*, while walking her dog, Miss Withers is stopped by a pair of particularly doltish police officers who charge her with violating the city's muzzle ordinance; when Sergeant Greeley says that her clearly gentle dog might bite someone, her barbed response is: "There are times when I would consider it in the light of a direct answer to prayer," a jab rendered all the more humorous by the obtuse sergeant's failure to recognize it.

Comic situations add much to the reader's pleasure in Palmer's novels. In *The Puzzle of the Red Stallion*, Miss Withers, hot on the trail of the murder weapon, is being followed by Inspector Piper and Sergeant Burke, who are hot on her trail to see what she will discover. Miss Withers encourages her dog to fetch an object that she believes to be the weapon from a small pool in Central Park. Burke and Piper look down from an elevated transverse:

At the moment the quiet of this sylvan scene was being rudely shattered by a small and excited terrier who was leaping about in the shallow water near the shore and barking at the top of his lungs.

Beside him, perched precariously upon a teetering rock which threatened every moment to tip and hurl her headlong into the water, stood Miss Hildegard Withers. She was engaged in poking at the depths with a thin willow switch.

That the much-sought-for object proves to be a turtle amplifies the ridiculousness of the scene, but even more amusing are the quirks of character revealed by the situation: the bungling ineptitude of the professionals who must follow the superior, if amateur, sleuth, and the awkwardness of the lady prodding at the water while her dog yaps at her.

Palmer similarly undercuts the seriousness of the opening scene in *Murder on the Blackboard*: "The solitary prisoner sat quietly, his hands clasped in front of him. One shoe moved up and down against its mate, but there was no quivering of his lips. He'd show Them if he could take it or not!" The prisoner, however, is a small boy kept after school, and the release of tension that the reader experiences on learning the prisoner's identity causes a smile of relief and amusement. Palmer moves between comedy and threat, even terror, in his mysteries, and that movement enhances the reader's interest in both character and plot by striking a balance between the two. The results are compelling novels.

The opening scene of *Murder on the Blackboard* exemplifies another Palmer device: the opening that creates a mood and sets a scene but frequently has little to do with the actual case. In this mystery, the mood of threat is established, then dissipated; the dissipated threat does not mean that this has become an ordinary day, however. It is not: The situation described in the opening scene gives rise to Miss Withers's varying her ordinary routine, and as a result she finds the body and eventually solves the case. Palmer's opening scene thus establishes the mystery and begin the series of steps toward its resolution. Any other opening would demand a different approach telling the story.

THE PUZZLE OF THE HAPPY HOOLIGAN

Related to this type of opening is Palmer's ability to create convincing settings. The brevity of the opening scene in *Murder on the Blackboard* is typical of Palmer's technique. In *The Puzzle of the Happy Hooligan* (1941), Miss Withers becomes a technical adviser for a film to be made about Lizzie Borden, and is given her own office:

There was a big oak desk, a typewriter on a stand, two chairs and an uncertain-looking lounge. The one window was covered with a Venetian blind, but since the

view consisted only of the flat roofs of studio sound stages, with some round brown hills beyond, that was small loss.

In only a few words, Plamer gives the reader an understanding of place, something which many writers would spend more time doing. The single phrase "uncertain-looking lounge" tells as much about the office as could several paragraphs of description.

Palmer at times used his own experiences as background for his books. *Unhappy Hooligan* (1956), for example, is set in the circus, and Palmer's stint working as a clown for Ringling Brothers is clearly responsible for the setting's realism. Similarly, *The Puzzle of the Happy Hooligan*, set in Hollywood, with much of the action taking place in a film studio, draws on Palmer's experiences as a screenwriter. Palmer is not above inserting inside jokes into his novels; in *The Puzzle of the Happy Hooligan*, Hildegarde is at one point mistaken for Edna May Oliver, the actress who played Miss Withers in three motion pictures: *The Penguin Pool Murder* (1932), *Murder on the Blackboard* (1934), and *Murder on a Honeymoon* (1935).

Palmer's plots are complicated, not because the motives or methods of murder are complicated, but because the reader learns things only as Miss Withers does. Therefore, clues may not be recognized, and false scents may be followed. On the other hand, Palmer's plots are usually tightly constructed, and the reader, like Palmer's protagonist, is given enough information to solve the case. The quick-witted reader can see where Miss Withers is going astray.

Nevertheless, readers may find that there are some irritating flaws in plot and characterization. The principal asks Miss Withers to investigate in *Murder on the Blackboard*, then nervously withdraws the invitation; his actions are never adequately explained. In the same novel, the reader never learns how the suspect circumvented an exacting system of identification. Still, these flaws are negligible compared with Palmer's failure to develop minor characters adequately. He devotes his energies to the major characters, plots, and settings, leaving the supporting cast largely two-dimensional. The police are, with the exception of Oscar Piper and a very few others, dumb Irish flatfeet who are unimaginative

and incapable of detecting anything. The head of Mammoth Productions, Mr. Thorwald L. Nincom, is a broadly drawn composite of the popular image of a film producer; he is thoroughly two-dimensional. Yet one can also credit such stock characterization as the source of much of these novels' humor, in a medium where humor and atmosphere often count for more than fully rounded characterization on all levels.

Miss Withers was created in the depth of the Depression, and she and her exploits provided some respite from the problems of the time. That she remains a charming figure and an appealing sleuth long after the 1930's is testimony to her enduring qualities.

Krystan V. Douglas

SARA PARETSKY

Born: Ames, Iowa; June 8, 1947

Types of plot: Private investigator; hard-boiled

PRINCIPAL SERIES

V. I. Warshawski, 1982-

PRINCIPAL SERIES CHARACTERS

V. I. WARSHAWSKI is a female private investigator in her mid-thirties who practices in Chicago. A tough professional with a wry sense of humor, she specializes in financial crime.

BOBBY MALLORY, Warshawski's frequent nemesis, is a friendly lieutenant on the Chicago police force who provides the foil needed by most private investigators.

DR. LOTTY HERSCHEL, Warshawski's closest friend, is a woman in her fifties who operates a clinic for women and children. She is a renowned perinatologist at the fictional Beth Israel Hospital.

MURRAY RYERSON, head of the crime desk at the fictitious Chicago *Herald-Star*, often feeds Warshawski information, but more often than not, he is eager for leads on her investigations. Ryerson and Warshawski were lovers early in the series and have since devolved into drinking buddies.

CONTRIBUTION

Sara Paretsky is notable in the mystery and detective genre for her ability to shift the conventions of the hard-boiled private investigator tradition to a female charac-

Sara Paretsky in 2001. (AP/Wide World Photos)

ter. Her V. I. Warshawski is a tough-minded, able woman whose gender does not hamper her in the line of duty. Paretsky takes many opportunities to play against the expectations of the genre and to point out the competence of women in roles traditionally held by men. Paretsky imbues Warshawski with wit, cynicism, and a feminist perspective that allows her to deliver sardonic observations about her interactions and adventures. One of the most sharply drawn of the first wave of female private investigators, Paretsky's protagonist has also paved the way for subsequent, equally distinctive, generations of the breed. Warshawski is one of the most sharply drawn of the steadily growing tribe of female private investigators. In 1992 Paretsky received an Anthony Award for *A Woman's Eye* (1991), a collection she edited. The Crime Writers' Association awarded Paretsky a Silver Dagger for *Blood Shot* (1988; published in England as *Toxic Shock*), a Gold Dagger for *Blacklist* (2003), and a Cartier Diamond Dagger Award for lifetime achievement in 2002.

BIOGRAPHY

Reared in Kansas within a large family that was liberal and socially activist—except where concerning the roles of girls and women—Sara Paretsky began creating heroines and stories for herself early on. Although her brothers were sent to college, she was sent to secretarial school, so she worked to put herself through college on her own. She later settled in Chicago, the city that provides the generous, colorful details of her novels' settings. She earned a doctorate in history at the University of Chicago but has no formal training in fiction writing. She was working as an executive at a large insurance company when she began writing detective fiction; this background is apparent in the insurance company-related plots and settings of her first three novels.

Paretsky credits the women's movement of the 1960's with helping her see that she could "occupy public space," and she later used the visibility afforded by her success in the socially conscious tradition in which she was reared. A founding member of Sisters in Crime, she mentors high school students in downtown Chicago and has endowed scholarships for students in the sciences and arts. Dorothy L. Sayers's attention to relationships and class issues has influenced Paretsky's work, but her novels replace Sayers's typically lettered style with a more colloquial, vigorously American and contemporary assessment of relationships and of women's social roles. One of her reasons for creating the V. I. Warshawski series was to portray a woman character freed from stereotypically passive feminine traits.

Paretsky hit a writer's slump after *Tunnel Vision* (1994). During this time, she "dug out of a drawer" a number of unpublished Warshawski short stories and collected them as *Windy City Blues* (1995). Taking a break from detective fiction, over the objections of her publisher, Paretsky wrote *Ghost Country* (1998), a novel about Chicago's homeless. Readers welcomed Warshawski back in *Hard Time* (1999), but *Total Recall* (2001) suffered both from a general pall inflicted by the September 11 terrorist attacks and from many fans' impatience with the intrusion of larger political issues into the business of murder, a trend that accelerated as Paretsky became increasingly alarmed by the

policies of the George W. Bush administration. Her concerns are expressed in the meditative memoir *Writing in an Age of Silence* (2007).

ANALYSIS

Sara Paretsky's V. I. Warshawski series simultaneously works within and comments on the conventions of the hard-boiled genre by changing the gender of the central character. The tough, hard-boiled detective, who operates alone, outside traditional law-and-order systems, is a mythic figure of American folklore. He is typically envisioned as Humphrey Bogart, wearing a raincoat and a slouch hat, squinting over a perpetually smoking cigarette. Warshawski is carved from the Sam Spade tradition—with a few humorous references to Nancy Drew—and yet her gender makes for a very different reading of the same character type. When the hard-boiled characteristics are assigned to a woman—traditionally women figure in this detective genre merely as the private eye's love interest or the femme fatale—the device can offer insights into the nature of gender roles and a refreshing new slant on the genre's conventions.

Warshawski's gender adds another dimension to the detective's traditional marginality with respect to dominant legal and social systems. While the myth of the male hero allows for the individual man to buck the system, or at least step outside it by riding off on his lone horse into the sunset, women are generally expected to remain protected by, if not subservient to, the dictates of law and order. Warshawski is a member in good standing of the Illinois bar but gave up her career in the district attorney's office to work alone.

Warshawski's choice to strike out on her own continually infuriates police lieutenant Bobby Mallory, a character who serves several functions in Paretsky's narratives. On one hand, the Mallory character is relatively predictable within the conventions of the genre. He is Warshawski's link with the system; he resents her intrusions on his cases, yet admires her ability to get the results that his position keeps him from obtaining.

In addition to being the aggravated law enforcement officer, Mallory serves now and then as a father figure for Warshawski. The usually predictable relationship is given a new dimension by the gender con-

siderations. Mallory worked with Warshawski's father, who was an officer on the Chicago police force. Mallory glowers paternally at Warshawski when she gets involved in cases that seem inevitably to cross his desk, but his anger is a mixture of professional jealousy and fatherly concern.

Paretsky's novels often open with seductive descriptions of the Chicago locale in which Warshawski thrives, evoking the special relationship between the detective and the city for which Raymond Chandler, in his tributes to Los Angeles, is famous. Most of the Warshawski series takes place in the heat of the summer. The steamy atmosphere tends to intensify Warshawski's interactions with other characters and her own dogged pursuit of her cases. The details of the Chicago setting help to particularize the Warshawski series and lend it veracity. Each story is a compelling travelogue into the intricacies of one of Chicago's many locales: finance networks (*Indemnity Only*, 1982), shipyards (*Deadlock*, 1984), Catholic dioceses in ethnic neighborhoods (*Killing Orders*, 1985), and suburban hospital settings (*Bitter Medicine*, 1987). The mix of fiction and fact in Warshawski's wry descriptions provides Paretsky with an outlet for the acute, sardonic social observations in which she specializes.

The Warshawski character is crafted with the mix of cynicism and compassion that marks the best of the private investigators. Her specialty is financial crime, a venue that has allowed Paretsky to comment on corrupt bureaucracies and the machinations of those in the higher strata of the social order. *Indemnity Only* centers on an insurance hoax perpetrated by the officers of Ajax Insurance, a company later involved with illegal dealings and intrigue in the shipping industry in *Deadlock*. The suspect dealings of Ajax come under investigation again in *Total Recall*, when payment is denied to a widow at the same time that the unscrupulous mishandling of policies belonging to Holocaust victims comes to light.

In 1992's *Guardian Angel* Warshawski unearths a complex bond-parking conspiracy, in *Tunnel Vision* there is a money-laundering scheme involving Iraq, and *Hard Time* takes on the subject of the privatization of American prisons and the corruption and abuse—all for the sake of financial gain—it affords. However, all

these novels deal with a great deal more than financial crime, for the financial crimes usually reside at the nexus of many other social ills—homicide, spouse and child abuse, exploitation of illegal immigrants, homelessness, corrupt politicians, venal lawyers, and cruelty to animals. In *Fire Sale* (2005), Warshawski investigates big-box retailer By-Smart (a very thinly veiled Wal-Mart), contrasting the mind-boggling wealth acquired in an ethical vacuum with the lives of Chicago's poorest.

Although Warshawski frequently deals with the chief executive officers of large corporations, her clients tend to be middle to lower class. Her own financial status is best described as “down at the heels”—her office is in an old, dimly lit building near the financial district in downtown Chicago. The elevator to her fourth-floor suite rarely works, and the building lobby is often home to street people. Warshawski's setup is reminiscent of Toby Peters's office locale in Stuart M. Kaminsky's detective series. Warshawski's lack of a generous income does not cramp her style. She can afford the Johnny Walker she regularly orders at the Golden Glow, a serious drinker's bar in the south Loop run by a dignified black woman named Sal. Paretsky's attention to detail helps to build a convincing portrait of Warshawski as a woman comfortable in her surroundings, one who knows exactly what she needs and who can navigate through the obstacles that come her way.

The Warshawski stories are written in the first person, which gives the narrator the observer's status, always slightly marginal to the events she describes. Warshawski is something of a loner. Rather than playing sports, she stays in shape by running in the early mornings along Lake Michigan. Her running, her scotch drinking, and her often insulting irreverence evince her comfort with her outsider status.

In contrast to the detached cynicism of most of the male characters in the genre, however, Warshawski tends to become personally involved in the events she describes and to evoke the larger picture into which they fit. Indeed, in *Hard Time* she gets so involved—against the advice and pleadings of her friends—that she ends up in prison for several chapters. Warshawski, in fact, is quick to joke about her well-developed sense

of social justice and her ability to do automatic affirmative action tallies in large groups of people. Her feminism, too, is displayed through humor, often in the aphorisms by which she operates. Paretsky thus contributes to the subtly crusading spirit that pervades the genre but refrains from didacticism by continually commenting on her sarcastic observation of social mores.

Warshawski's investigative method is relatively unscientific. She pokes around talking to people and begins to fit events and suspects into logical patterns. Paretsky's plots grow complex and then unravel by accretion—their climactic moments are ones of logical disclosure rather than fast chases or violent encounters. Yet they do not lack suspense or tension—Warshawski's methods are frequently illegitimate, if not illegal. For example, she is adept with lock-picking tools left in her possession by a burglar she once defended in the district attorney's office. She gathers information directly from her sources, which often involves nighttime visits to offices in which she does not belong.

Warshawski is not above relying on her feminine wiles to advance her cause, but Paretsky uses her heroine's moments of false identity and disguise to comment on the traditional expectations of the female role. If some men generally expect women to be less intelligent than Warshawski, she will impersonate a more foolish woman to get some piece of vital information. In her own guise, she is adamant that no one condescend to her, and her feminism is more pronounced.

MEN, FRIENDS, AND FAMILY

In the tradition of the detached observer, Warshawski's relationships with men are casual and short-lived, rarely figuring prominently in the development of the plot. More traditional detective stories typically punish sexually active women under the auspices of the femme fatale stereotype. Warshawski's casual, healthy attitude toward her sexual encounters reflects the feminist premise that grounds Paretsky's writing.

Warshawski and journalist Murray Ryerson are occasional lovers, but their interactions are based more on mutual respect, affection, and the sharing of information than on building a long-term, secure commitment. In *Deadlock* and *Killing Orders*, Warshawski takes up with an English reinsurance broker named

Roger Ferrant, whose expertise gives Paretsky a way to include information on securities and insurance transactions necessary for her plots. In *Bitter Medicine*, Warshawski has an affair with Peter Burgoyne, the head of obstetrics at Friendship V Hospital (he was the doctor in charge during Consuelo's treatment and subsequent death). Warshawski's involvement with Burgoyne eventually becomes suspect when she realizes that he and the hospital administrator have been involved in Tregiere's murder and the cover-up of various illicit operations and false advertising practices. She takes up with a new beau in *Guardian Angel*, only to have him decide to step back from the relationship because of her lone wolf style in *Tunnel Vision*.

Warshawski's lack of permanent romantic involvements is incidental to Paretsky's stories. Her character's professional veneer is fleshed out with humanizing notes from her family history. Like the city she loves, Warshawski is a melting pot of ethnicity—her mother was an Italian immigrant who married a Polish Jew. A good-natured but alcoholic and underhanded aunt gets Warshawski involved in arson, the homicide of a young hooker, and other difficulties in *Burn Marks* (1990). The spirit of Paretsky's innocent, revered mother is evoked in each of her stories with mention of the red Venetian wineglasses that were her mother's legacy. In "Grace Notes," a story in *Windy City Blues*, a long-lost cousin turns up looking for sheet music that belonged to Warshawski's mysterious mother, and a bit more is revealed about her. In *Hard Time*, events and losses cause Vic to contemplate her mother's death on other levels.

Warshawski's closest friend, Dr. Lotty Herschel, often serves as a model of social consciousness that Paretsky contrasts with the corruption of top-heavy bureaucracies. A Viennese immigrant, Herschel fled Nazism by coming to the United States as part of the Kindertransport, as revealed in *Total Recall*. She has dedicated her life to helping disadvantaged people as a response to the evils she has personally endured. Herschel is a woman of stature within the medical field. In addition to her regular duties as a perinatologist at Beth Israel Hospital, she runs a clinic for low-income families in the run-down Chicago neighborhood where Warshawski rents an apartment.

Herschel is a woman with enormous personal dignity and compassion; her commitment to her work supersedes expectations of the more traditional female role. Although her suitors are distinguished gentlemen, she refuses to marry. Herschel offers companionship and support, and she is even something of a role model. Her advice provides a counterpoint to Mallory's blustery admonitions to be more of a conventional "girl."

BITTER MEDICINE

Herschel figures largely in *Bitter Medicine*, the fourth novel in the Warshawski series and Paretsky's first excursion outside the realm of financial crime. Warshawski is present at the scene of the untimely death of a pregnant teenage girl, who happens to be the sister of Herschel's nurse. Consuelo's death at a tidy suburban hospital whose staff is unaccustomed to treating low-income emergency patients raises the specter of malpractice suits against both the hospital and Lotty Herschel. When Herschel's partner, Malcolm Tregiere, is murdered and his dictation on Consuelo's case is missing, Warshawski begins to seek out the pattern that ties together Consuelo's death, Tregiere's murder, an antiabortion rally at Herschel's clinic, and the less-than-honest machinations of the suburban hospital's administration. *Guardian Angel* finds Warshawski pursuing a course of action that puts her and Herschel at odds and strains their friendship.

Bobby Mallory is somewhat displaced in *Bitter Medicine* by Detective Rawlings, a black man assigned to the case. Attention to racial issues is an integral part of the story's development, from Warshawski's maneuverings through the intricacies of implicit racism toward her Hispanic friend to a Hispanic gang's probable involvement in the murder of a black doctor. The gang theme allows Paretsky to place her female sleuth on turf usually addressed only by white male police officers in violent displays of machismo.

Bitter Medicine allows Warshawski her first trip outside Chicago's city limits, and it gives Paretsky the opportunity for some playful commentary on the difference between affluent suburban and low-income city values. Warshawski's former husband, Richard Yarborough, appears for the first time, as the high-priced lawyer representing a sleazy antiabortionist.

Warshawski's dialogues with Yarborough are intentionally nasty. He has exchanged his marriage with her for one with a more traditionally feminine woman, and he is easily angered at Warshawski's frank jabbing at his bourgeois lifestyle. The Chicago suburbs appear as empty, sanitized havens from the gang violence and poverty of inner-city living—a milieu that Warshawski prefers.

KILLING ORDERS

Killing Orders embroils Warshawski in a case that touches her personally when her Aunt Rosa is accused of placing counterfeit securities in a Dominican priory safe. There is little love lost between Warshawski and her reproving, hostile aunt, but family obligations require that Warshawski see the case through. In the process, emotional ghosts add a more complex layer to Warshawski's personality. In her investigation, she must deal with murder, the Dominicans, an international conglomerate, and the Mafia, and she begins to suspect her lover, Roger Ferrant, or her aunt might be responsible for some of the crimes.

Not a polite, urbane lady sleuth in the Sayers tradition, Paretsky's Warshawski is a female private investigator based on the traditional male model. Warshawski is kin to an ever-growing host of female detectives fashioned in the hard-boiled tradition. The new women investigators are smart, physical, hard-living women, whose facility to move through the cracks and underbellies of big cities makes them well suited to their work. Although hard-boiled, such a character is not afraid to let her emotions and intuition influence the way she handles her cases. Paretsky and other female mystery and detective writers are reshaping a pervasive American myth by creating admirable female characters who get the job done as well as—or better than—their male predecessors.

those of Marcia Muller, Sue Grafton, and Paretsky.

Reddy, Maureen T. "Loners and Hard-Boiled Women." In *Sisters in Crime: Feminism and the Crime Novel*. New York: Continuum, 1988. Reddy's book locates Paretsky's work in a historical context of women investigators in detective fiction.

Scaggs, John. *Crime Fiction*. New York: Routledge, 2005. Contains significant discussion of Paretsky's work. Scaggs sees Paretsky's appropriation of the hard-boiled detective model as a validation of the form.

ROBERT B. PARKER

Born: Springfield, Massachusetts; September 17, 1932

Types of plot: Hard-boiled; private investigator

PRINCIPAL SERIES

Spenser, 1974-
Jesse Stone, 1997-
Sunny Randall, 1999-

PRINCIPAL SERIES CHARACTERS

SPENSER is a wisecracking private eye, a former professional boxer and police officer fired for insubordination. He is highly literate, notices what people wear, and cooks gourmet meals. He lives by a code of honor that involves keeping his word and protecting the helpless. Spenser is a faithful lover to Susan Silverman, a psychologist with a doctoral degree from Harvard. Spenser has a circle of loyal friends, ranging from police officers to criminals; his closest friend, Hawk, a black thug, works with him on most of his cases.

JESSE STONE is a former Los Angeles homicide detective who has been fired for alcoholism. Corrupt city officials in Paradise, Massachusetts, hire him as chief of police because they assume that he will be ineffective, but he proves them wrong. His unfaithful former wife, with whom he is still obsessed, has followed him to Massachusetts.

SUNNY RANDALL, a petite blond private investigator, lives alone with her mini bull terrier but receives help from her gay sidekick. She is still involved with her former husband Ritchie, whose family has mob connections.

CONTRIBUTION

Robert B. Parker is heir to the tradition of the hard-boiled detective most notably embodied in Raymond Chandler's Philip Marlowe. Parker's Spenser is principled and honorable but not a loner like Chandler's Marlowe. Spenser has a monogamous relationship with an intelligent and liberated woman, Susan Silverman, and he is ably assisted by Hawk, a formidable African American who is less principled but just as honorable as Spenser. In 1976 Parker received the Edgar Allan Poe Award from the Mystery Writers of America for *Promised Land* (1976). In 1995, Parker and John Lutz jointly received the Eye, a lifetime achievement award from the Private Eye Writers of America. In 2002 Parker was named a Grand Master by the Mystery Writers of America. In 2006 he received a Lifetime Achievement Award from the Bouchercon World Mystery Convention.

In addition to his detective series, Parker has written three mainstream novels, *Wilderness* (1979), *Love and Glory* (1983), and *All Our Yesterdays* (1994).

Critics have described them as thoughtful and well written but flawed, and they have not achieved the popularity of his detective series. Parker's Spenser series has been optioned for television and films, and he acted as a consultant for the television series *Spenser for Hire* (1985-1988). In 2005-2007, several novels in the Jesse Stone series were turned into television films starring Tom Selleck. Parker's female detective, Sunny Randall, was created because he was asked to write a novel that could be adapted as a film vehicle for Helen Hunt, the Academy Award-winning actress.

BIOGRAPHY

Robert Brown Parker was born in Springfield, Massachusetts, on September 17, 1932, to Carroll Snow, a telephone company executive, and Mary Pauline (Murphy) Parker. During his youth, he read widely in pulp fiction, learning the conventions of the hard-boiled detective. He attended Colby College, where he met Joan Hall, whom he married on August 26, 1956, two years after he graduated with his bachelor's degree. He served in the U.S. Army from 1954 to 1956 in Korea. After completing his military service, he returned to school and received his master of arts degree from Boston University in 1957. He then sought employment as a technical writer to support his wife and son David, born in 1959. His second son, Daniel, was born in 1963. In 1957 he was a management trainee with Curtiss-Wright Company, Woodridge, New Jersey. From 1957 to 1959 he worked as a technical writer with Raytheon in Andover, Massachusetts, then went into advertising with Prudential Insurance Company in Boston from 1959 to 1962. At the same time, from 1960 to 1962, he was a partner in his own advertising agency, Parker-Farman Company.

In 1962 Parker's wife, Joan, persuaded him to return to Boston University and complete his doctoral degree, which he received in 1970. While completing his doctorate, he held positions as an instructor at Boston University (1962-1964), the University of Lowell (1964-1966), and Massachusetts State College at Bridgewater (1966-1968). From 1968 to 1974 he was an assistant professor at Northeastern University. He completed his dissertation, "The Violent Hero, Wilderness Heritage and Urban Reality: A Study of the

Private Eye in the Novels of Dashiell Hammett, Raymond Chandler, and Ross MacDonald" in 1970 (later published as *The Private Eye in Hammett and Chandler*, 1984).

Parker estimates that it took him two and a half years of writing in his spare time to complete his first novel, *The Godwulf Manuscript*, published by Houghton in 1974. He was promoted to associate professor in 1974, and after publishing *God Save the Child* (1974), *Mortal Stakes* (1975), and *Promised Land*, he was promoted to full professor in 1976, the same year that *Promised Land* won an Edgar Award.

Parker became a househusband while his wife, Joan, attended graduate school to earn a master's degree in early childhood development. She began a teaching and administrative career in education. In 1977 Joan was diagnosed with breast cancer and underwent a mastectomy two weeks later. Parker and his wife coauthored a personal account published the following year as *Three Weeks in Spring* (1978). This devastating experience made Joan aware of tensions in her marriage, and in 1982 she asked for a separation. During their four years of separation, they each underwent psychotherapy. They decided to remain together and purchased a house, which they remodeled to create two separate entrances leading to different levels, two kitchens, and two baths. Parker has made use of this arrangement in his fiction: Spenser and his longtime lover, Susan Silverman, have separate residences. Parker also has used his experience as the father of two sons in depicting Spenser's relationship with Paul Giacomin, a lost young man whom Spenser befriends.

ANALYSIS

Robert B. Parker is the acknowledged literary heir to Raymond Chandler. In 1988 he was asked by the Chandler estate to complete the thirty-page manuscript that Chandler was working on at the time of his death. The resulting *Poodle Springs* (1989) carried both authors' names. Parker also wrote a sequel to Chandler's *The Big Sleep* (1939), which he called *Perchance to Dream: Robert B. Parker's Sequel to Raymond Chandler's "The Big Sleep"* (1991). Although Parker's Spenser has remained true to the conventions of the American hard-boiled detective as established

by Chandler, Dashiell Hammett, and Ross MacDon-ald, Parker differs from his predecessors in having combined the detective novel and the love story. Spenser is in love with Susan Silverman, a psychologist with a doctorate from Harvard. Spenser and Susan are not married and do not live together, but they have a monogamous relationship. Parker has also changed the locale from Chandler's Los Angeles to Boston. His Boston is so fully realized that he and one of his fans, Kasho Kumagai, compiled a book entitled *Spenser's Boston* (1994).

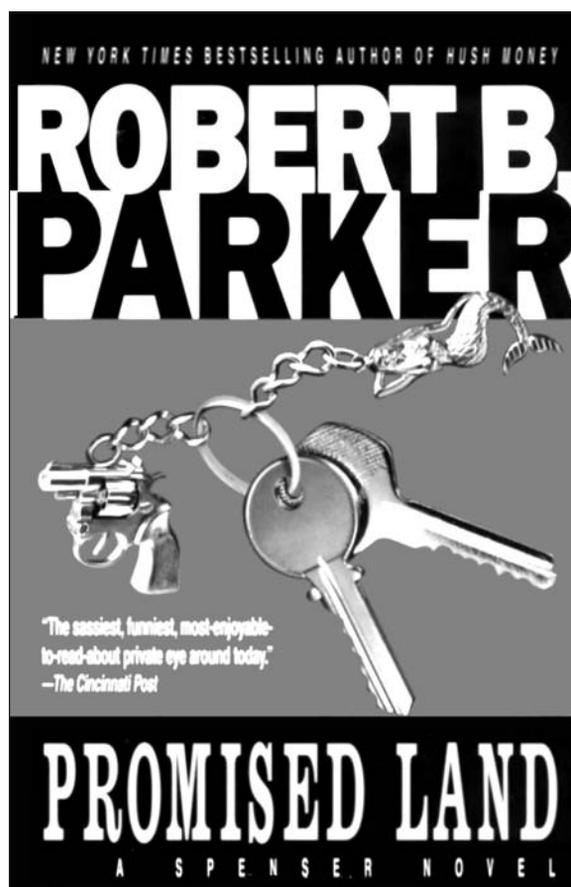

With unerring skill, Parker writes in first-person narrative interlaced with dialogue. The reader sees everything through Spenser's eyes; his wit enlivens every conversation. Parker's work is highly literate. Spenser, his detective's name, is a reference to Edmund Spenser, regarded by his contemporaries as the heir to Geoffrey Chaucer and the leading sixteenth century nondramatic English poet. The selection of name is deliberate. Chandler initially called his hero Malory after the English poet Sir Thomas Malory, author of *Le Morte d'Arthur* (1485). Parker's Spenser is well aware that his literary namesake wrote *The Faerie Queene* (1590, 1596) and just as aware that few of the police officers and mobsters who populate his world have heard of the English poet. Nevertheless, he frequently quips "Spenser, spelled with an 's,' like the English poet." Each book of Edmund Spenser's *Faerie Queene* focuses on a knight who engages in a quest relating to a particular virtue: holiness, temperance, chastity, friendship, justice, and courtesy. Like these literary knights, Parker's Spenser is concerned with virtue. He lives by a code that involves protecting the weak and never engaging in gratuitous murder or violence; he is faithful to Susan in spite of temptation. Honor matters; the means that he uses to solve a crime becomes as important as his success in completing a case.

Hawk, Spenser's longtime friend, always keeps his word, and he understands but does not share Spenser's values. Tall, black, and bald, with a ghetto background, Hawk dates Harvard professors but has shady connections with the underworld. He makes his living by working in a criminal world that Spenser knows about but rejects. Whenever Spenser needs backup, Hawk is there, working for free and exchanging wisecracks

with his buddy. Other repeating characters include Martin Quirk, a police lieutenant; Lee Farrell, a homosexual police officer; Vinnie Morris, a thug who is a good shooter and loyal to Spenser and Hawk; and Rachel Wallace, a feminist and gay activist. Parker, like William Faulkner, deliberately uses the past history of his characters in new stories. This developing fictionalized context becomes its own world.

PROMISED LAND

In *Promised Land*, Spenser is hired by Harvey Shepard to find his wife, Pam. She has taken up with Rose and Jane, who plan to organize a women's movement modeled on the Black Panthers; they set up a bank holdup to get money to buy guns. Pam participates in this holdup, in which a man is killed. Spenser discovers that Harvey has invested unwisely in a real estate development, the Promised Land. To make good on some bad debts, he is now in the clutches of the

loan shark and gangster King Power and his enforcer, Hawk. Spenser works out a scheme in which King Power sells guns to Rose and Jane, and the police pick them up. He lets Hawk know in time for him to get away from the police, and in return, Hawk saves Spenser's life during the violent denouement.

A CATSKILL EAGLE

The title of *A Catskill Eagle* (1985) is taken from Herman Melville's *Moby Dick: Or, The Whale* (1851). Spenser comes to grips with despair and jealousy when his relationship with Susan Silverman is threatened. To pursue her career, Susan has separated from Spenser. She has left him for another man, Russell Costigan, the son of the wealthy and unscrupulous Jerry Costigan. Spenser receives a short note from Susan saying that Hawk is in jail in Mill River, California, and that she also needs help. Spenser and Hawk pursue the Costigans and free Susan. Susan returns to therapy to regain her independence, and then she is reunited with Spenser.

SMALL VICES

In *Small Vices* (1997), the lawyers who defended Ellis Alves, a black rapist and general bad guy, think that he may have been framed for the murder of Melissa Henderson, a white coed. The law firm of Rita Fiore hires Spenser to investigate the case and see if it should be reopened. The title is taken from William Shakespeare's *King Lear* (pr. c. 1605-1606):

Through tattered clothes small vices do appear;
Robes and furred gowns hide all. Plate sin with gold,
And the strong lance of justice hurtless breaks:
Arm it in rags, a pygmy's straw does pierce it.

The vices in this case are not small. Spenser discovers that the facts of the murder were covered up to protect Melissa's rich-kid, tennis-star boyfriend. His adoptive and very affluent family hires a hit man to assassinate Spenser. After a brush with death and long rehabilitation, Spenser returns to even the score with his assassin and arrange for justice.

IAIN PEARS

Born: Coventry, England; August 8, 1955

Types of plot: Amateur sleuth; cozy; police procedural, thriller

PRINCIPAL SERIES

Jonathan Argyll, 1990-

PRINCIPAL SERIES CHARACTER

JONATHAN ARGYLL is a British art historian, professor, and somewhat less than successful art dealer who lives in Rome. Along with General Taddeo Bottando and Flavia di Stefano of the Italian National Art Theft Squad, he tracks down stolen paintings. He is also romantically involved with Flavia.

CONTRIBUTION

Iain Pears, in his Jonathan Argyll series, introduces the mystery reader to the world of art collecting and art theft. It is a world populated by art historians, collectors, and dealers who are often less than scrupulous; thieves who are willing to murder to obtain valuable paintings; and the Italian National Art Theft Squad, which is beset by never-ending bureaucratic problems and politics, making recovery of stolen art difficult. The novels form a subgenre of their own: the art-history mystery. Pears's mysteries appeal to a wide variety of readers. They combine elements of the police procedural, the amateur sleuth novel, the thriller, and the cozy in an entertaining yet erudite narrative. The Jonathan Argyll series foreshadows Pears's volu-

minous historical mystery *An Instance of the Fingerpost* (1998). Filled with complex plots, likable characters, various cultural settings, and a light ironic tone, Pears's mystery novels have earned him recognition as an international best-selling author.

BIOGRAPHY

Iain George Pears was born in Coventry, England, in 1955. He received his education at Wadham College of Oxford University, where he completed a doctorate in art history. Pears enjoyed a varied career working as an art historian, a journalist, and a television consultant before becoming a writer. He worked for the British Broadcasting Corporation in both England and Germany. From 1982 to 1990 he lived and worked in Italy, France, the United Kingdom, and the United States as a correspondent for the international news agency Reuters. These experiences provided him with a broad knowledge of topics from financial activities to sports. In addition, they served as a sort of writing apprenticeship, training him to gather information and immediately turn it into written text to meet the deadlines faced by a news reporter. Writer's block has not been a problem for Pears. Living in these diverse countries, Pears developed an appreciation for cultural differences and a particular fondness for Italy, which became the major setting of his Jonathan Argyll mysteries.

In 1987, Pears became a Getty Fellow in the Arts and Humanities at Yale University. While in residency there, he completed the book he was writing about eighteenth century British art. In 1988, he published *The Discovery of Painting: The Growth of Interest in the Arts in England, 1690-1768*. The erudite and well-researched book was well received in the intellectual community and has often been referenced in subsequent works on art and cultural history.

By 1990, Pears had left his position as a correspondent for Reuters and was writing fiction full time. Combining his expertise in art and his predilection for Italy, he completed his first mystery, *The Raphael Affair* (1990), which launched the popular Jonathan Argyll series. Pears's art-history mysteries immediately enjoyed success among mystery readers and received praise from critics of the mystery genre. Drawing on

his ability to avoid writer's block that he acquired as a news correspondent, he added five more mysteries to the series by 1996.

Pears then became interested in writing a historical novel. Fascinated by the similarities that he found between the period of the Restoration in England and his own time as well as the differences, he chose to set his novel in Oxford, England, in 1663, the height of the Restoration. The novel *An Instance of the Fingerpost*, published in 1998, was a best seller, was translated into several foreign languages, and brought him international renown. In 1999, he received the Martin Beck Award from the Swedish Academy of Detection. In 2000, Pears returned to his mystery series and wrote a seventh book in which he brought to a conclusion the theme of the Italian National Art Theft Squad but not the series. The last pages of the novel suggest new possibilities of a less official nature for Jonathan Argyll, Flavia di Stefano, and General Taddeo Bottando. Still intrigued by the myriad possibilities of the historical novel, Pears wrote another nonseries historical work, *The Dream of Scipio* (2002), a complex novel set in three different centuries. In 2005, he published *The Portrait*.

Pears says that his writing has been influenced by many different writers, including British novelist Lawrence Sanders, French novelist Marguerite Yourcenar, art historian Erich Gombrich, and French detective novelist Georges Simenon.

ANALYSIS

Complexity is the term that best describes Iain Pears's writing. Although Pears has not written any theory of the novel, he is intensely interested in the elements of the novel—character, structure, setting, voice, and plot—and in the ways in which they can be used to create complex, multilayered narratives.

Pears uses a standard plot structure. He proposes a mystery to be solved and then recounts events leading to its resolution, yet he uses various devices to obscure answers and to create confusion. Subplots abound in his novels. In the Jonathan Argyll series, there is always an art theft and more often than not a murder to be solved. In addition to this main plot, Argyll is constantly burdened with career problems. Bottando is

having his usual problems with the bureaucracy, and Flavia and Argyll are trying to find time for each other. Pears adds another dimension to his series as a result of this multiplot structure. Although the series is referred to as the Jonathan Argyll series and Argyll is a principal character, he is not really the only principal character. From Argyll's arrest and initial contact with General Bottando and Flavia in *The Raphael Affair*, the three characters form a triumvirate that creates a multicharacter protagonist. Argyll provides the expertise in art necessary to solve the crimes, General Bottando the police procedural knowledge and skill in handling the corrupt political system under which they work, and Flavia the practical investigation techniques and legwork.

Pears's characters are also complex and multifaceted. Many of them are not what they at first appear to be. As the plots unfold, surprising facts are revealed about the characters, but the characters themselves remain believable. For example, Mary Verney, the likable art thief who appears in a number of the mysteries, including *Giotto's Hand* (1994) and *The Immaculate Deception* (2000), is the best example of this technique. Pears also creates what might be called "false characterization" through the description of characters by other characters. In *The Immaculate Deception*, Elena F. is described as a former terrorist capable of the worst atrocities by two of the individuals Flavia interviews in her investigation. On talking with Elena, Flavia instinctively feels that the woman is not as she has been described. Thus, Pears creates another mystery within the mystery.

Pears explores the many possibilities of narration in his novels. He uses primarily third-person narration, which gives him ample opportunity for description. Dialogue plays a significant role in his mysteries, as it affords him the opportunity to multiply the levels of narration. These narrators are usually unreliable and further complicate the solving of the mystery.

The majority of the Jonathan Argyll series novels take place in Italy, primarily in Rome. Pears's familiarity with and love of Rome and Italy, coupled with the importance of art in Italian culture, make this the ideal setting for the series. Pears's sensitivity to cultural differences and attention to authenticity of detail give the

settings of his novels a place of almost equal importance with the characters. This is particularly true in *Giotto's Hand*. In this novel, Argyll conducts part of the investigation in a small village in England. Local customs and ways significantly affect how he proceeds.

Pears's novels are permeated with an irony that ranges from light humorous satire to the philosophical. In *Death and Restoration* (1996), he satirically portrays police procedure as Flavia assigns the new recruit Giulia to the surveillance of Mary Verney. However, much of the irony in Pears's work is more philosophical and leads toward a question found in his *The Dream of Scipio*. Given the complexity of life and the rarity of times when a totally right answer can be found, which is the better choice: to act or to opt out?—this is the question hinted at in the Jonathan Argyll novels and fully proposed in this novel.

THE RAPHAEL AFFAIR

The Raphael Affair is the first novel in the Jonathan Argyll series. Here the reader is introduced to General Taddeo Bottando, to Flavia di Stefano, and to Jonathan Argyll. Pears devotes a considerable amount of the novel to developing the characters. He carefully delineates the relationship that exists between General Bottando and Flavia. Both of them love Rome and prefer life there to anywhere else. The general, who is almost sixty years old, is set in his ways, skeptical, and very good at dealing with the Italian bureaucracy. He admires Flavia and has a high opinion of her ability. Flavia is hardworking yet at times flippant and almost always rebellious.

Argyll—brash, English, and a graduate student in art history—becomes involved in their search for a lost painting by the happenstance of his false arrest. Consequently, Argyll becomes unofficially a consultant to the Italian National Art Theft Squad and finds himself becoming romantically involved with Flavia.

GIOTTO'S HAND

Giotto's Hand, the fifth novel in the Jonathan Argyll series, gives an in-depth look at police procedures as Bottando's competency as head of the Italian National Art Theft Squad is challenged by his colleague Corrado Argon. The portrayal of Bottando presenting his defense reveals Pears's skill in developing characters.

Set in Rome, Florence, and a small village in England, the novel also contains an interesting depiction of local color. Argyll finds life in the small English village vastly different from that in Rome. Complex plots and unreliable narrator Mary Verney play important roles in the novel. The end of the novel takes a philosophical twist as Argyll is confronted with a situation in which there is no totally right decision that he can make. In *The Dream of Scipio*, Pears returns to this philosophical problem and develops it extensively.

THE IMMACULATE DECEPTION

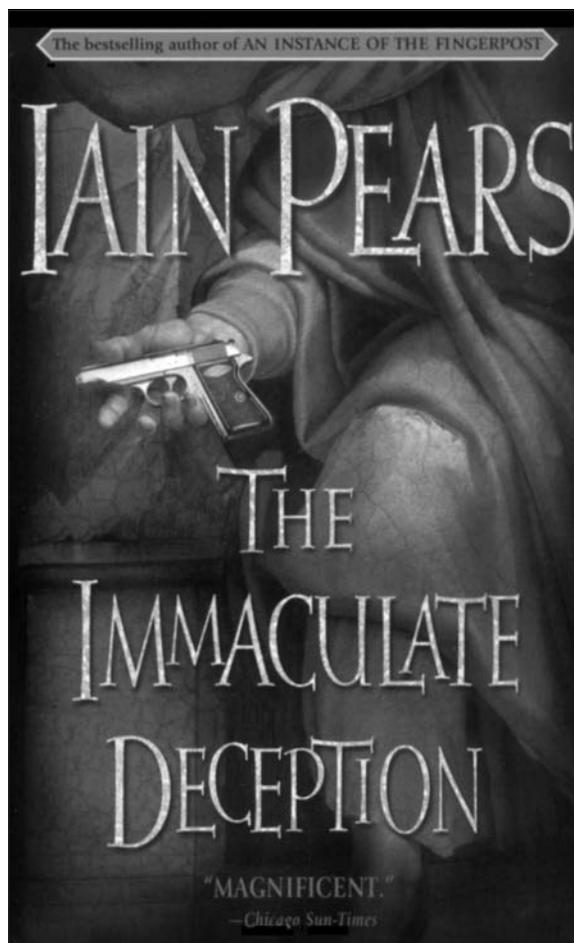

The seventh novel of the Jonathan Argyll series, *The Immaculate Deception*, brings the series to an apparent close but leaves open the possibility for it to continue. At the end of the novel, neither General Bottando nor Flavia is still connected with the Italian National Art Theft Squad. General Bottando has re-

tired. Flavia, who has married Argyll, is expecting a baby and has taken a payout and left the squad. However, Argyll is already proposing the possibility that they continue to recover stolen paintings, but as private investigators working for individual collectors. Therefore, the possibility of Pears sharing more adventures of the intrepid threesome with his readers remains.

In this novel, Pears also plays with the reader as he presents facts that tend to mislead the reader into believing that General Bottando may not have been the law-abiding police official he has appeared to be. Wanting to identify the artist of a painting Bottando received as a retirement present, Argyll discovers some very disturbing facts about the painting. Even more suspicion is aroused when Flavia and Argyll find General Bottando, who simply disappeared after his retirement, sitting on the veranda of art thief Mary Verney's Italian villa. Throughout the series, Mary Verney has been a very perplexing character. Although she is admittedly a thief and has even committed murder, she is likable and introduces the idea that often there is no totally morally right decision possible. Mary reveals that she and General Bottando have shared a long romantic involvement that began at the time of her first theft. Bottando had been sent to England as part of an Italian National Art Theft Squad investigating the theft. She also justifies her own activities in that she stole only from those who could afford to lose valuable property. She explains that the valuable painting in Bottando's apartment was a gift from her that she had bought for him.

AN INSTANCE OF THE FINGERPOST

An Instance of the Fingerpost is rich with details of life in 1660's London. The judicial system, the medical profession, the importance of religion, the inns, the university system, and the fairs are all meticulously described. Historical and erudite, the novel holds the reader's attention just by its immense amount of detail and description, but the novel is also a multilayered, multifaceted murder mystery. Murder has been committed, but what are the facts? Pears uses four narrators in the novel: Marco da Cola, who identifies himself as an Italian and a physician; Jack Prescott, the son of a traitor who fled to escape execution; Dr. John Wallis, a mathematician and cryptographer; and An-

thony Wood, a mild-mannered Oxford antiquarian. Each narrator recounts the details of the murder of Dr. Robert Grove, but each account is significantly different. Although all the narrators are convincing, three of them turn out to be unreliable. Marco da Cola not only is unreliable as a narrator but also has misrepresented himself as a physician: He is actually a priest. The ending of the novel is unexpected and takes the reader by surprise. Pears also uses this technique of the surprise ending in his Jonathan Argyll series.

Scaggs, John. *Crime Fiction*. New York: Routledge, 2005. Contains a chapter on historical crime fiction as well as one on mystery and detective fiction, providing perspective for understanding Pears's novels.

GEORGE P. PELECANOS

Born: Washington, D.C.; February 18, 1957

Types of plot: Hard-boiled; private investigator; historical

PRINCIPAL SERIES

Nick Stefanos, 1992-

Dimitri Karras and Marcus Clay, 1996-

Derek Strange and Terry Quinn, 2001-

PRINCIPAL SERIES CHARACTERS

NICK STEFANOS, an electronics salesman, is the main character in three of George Pelecanos's first four books and figures prominently in several others. Popularly considered Pelecanos's alter ego, Nick transforms from angry punk to amateur sleuth to disillusioned drunk. Nick is the typical tough Pelecanos hero.

DIMITRI KARRAS and MARCUS CLAY are at the center of Pelecanos's District of Columbia quartet, although the series focuses on Dimitri. In the first novel, Dimitri is born to Peter Karras, a Greek American and World War II veteran. A small-time pot dealer in the second, Dimitri teams with African American Marcus Clay, Vietnam vet and the owner of Real Right record store. By the third novel, Dimitri has been a teacher and is a cocaine user who works for Marcus. In the fourth, Dimitri is in his fifties, and his five-year-old son, Jimmy, has been killed by a robber's getaway car.

DEREK STRANGE is an aging private detective and TERRY QUINN is a former police officer who left the force under controversial circumstances. Like so many of Pelecanos's characters, Strange and Quinn are defined by the music they listen to, the films they watch, and the books they read. African American Strange prefers Sergio Leone Westerns and Ennio Morricone scores, while Irish American Quinn devours Westerns by Elmore Leonard and Ron Hansen and listens to albums by Bruce Springsteen and Steve Earle. Strange and Quinn are, like Karras and Clay, an excellent vehicle for Pelecanos—who is haunted by the racial divide in Washington, D.C.—to further explore the issue of race.

CONTRIBUTION

Equally influenced by punk music, the highly stylized action films of the 1960's and 1970's, and writers of noir fiction, George P. Pelecanos has lifted the hard-boiled genre to new heights. Early in his career, he announced that his goal was to take what he had learned from hard-boiled masters such as Dashiell Hammett, Jim Thompson, and David Goodis and mix it with what he had learned from the punk-music scene (namely bands such as Husker Du, Fugazi, and the Replacements) that swept through the District of Columbia in the 1980's to update the hard-boiled genre to encompass modern urban concerns. Having been successful in this regard, Pelecanos's other major contribution to current crime literature is his crisp dialogue (heavily influenced by the crime novels of Elmore Leonard) that captures the various voices of the District of Columbia's mean streets spanning the last hundred years. Pelecanos strips clean the language and expertly adopts the voices of private investigators, police officers, gangsters, members of street gangs, and—above all—working-class people, those who live on the knife edge between the dark abyss of themselves and the dark abyss of humanity. Pelecanos has been branded the “coolest writer in America,” and he is widely acknowledged as a modern master of the hard-boiled genre. He has received praise for each of his novels and continues to be well received by his contemporaries, including Jonathan Lethem, Dennis Lehane, Stephen King, Daniel Woodrell, and Vicki Hendricks.

BIOGRAPHY

George P. Pelecanos grew up in the Mount Pleasant area of Washington, D.C., and in Silver Spring, Maryland. The son of Greek immigrants, he began working at a young age at his father's lunch counter. Marked by a strong work ethic that he attributes to his Greek American roots, Pelecanos worked at a variety of jobs—stock boy, shoe salesman, bartender, consumer electronics salesman, and film producer—before becoming a full-time writer. He received a bachelor's degree in film studies in 1980 from the University of Maryland.

George Pelecanos. (Theo Maschas/Odyssey Magazine/
Courtesy, Little, Brown and Company)

While studying at the University of Maryland, Pelecanos took a class on hard-boiled detective fiction that changed the course of his life. Being exposed to writers such as Dashiell Hammett and Raymond Chandler instilled in him a love of the genre that would lay the groundwork for his literary career. It would also leave him with a voracious appetite for books, as his professor, Charles Misch, got him into the habit of reading at least two books a week. Like so many of his characters, Pelecanos often, in interviews, riffs on his favorite books of the moment, bringing up key works by contemporaries such as Vicki Hendricks and Daniel Woodrell and classics by David Goodis and Newton Thornburg. His early life is marked by a vibrant love of film and music, two other media that have served to shape his life and career.

At the age of thirty-one, Pelecanos quit his well-paying general manager job with appliance dealer

Bray & Scarff and pursued writing full time. The loosely autobiographical *A Firing Offense* (1992) was his first book. Pelecanos sent the completed manuscript to only one publisher—St. Martin's Press—and though it was a year before he heard back, the book was accepted for publication. After this initial success, he continued to publish books at the rate of about one a year. He began to receive wide recognition in the mid-1990's, as books such as *The Big Blowdown* (1996) and *The Sweet Forever* (1998) won for him prestigious awards. During this time, Pelecanos also worked as a film producer for Circle Releasing, a company best known for producing the early films of Joel and Ethan Coen. In 2002, Pelecanos began working as a story editor/writer for David Simon's Home Box Office series *The Wire* (began in 2002), gaining even more critical acclaim.

ANALYSIS

Pelecanos has been haunted by an incident in which he accidentally shot a good friend in the face with his father's .38 special at the age of seventeen. His precise and evocative exploration of violence has defined his work from the start. He is concerned primarily with working-class and lower-class inhabitants of Washington, D.C.; with children whose consciences have been deformed by society; and with broken men and women in desperate need of atonement and some sort of human communion. He is a master at capturing the various voices of District of Columbia inhabitants—punks, loners, gangbangers, workaholics, alcoholics, drug addicts, and pretty much anyone whose voice has been lost in the mess of the city. His books are never concerned with mere social criticism, but Pelecanos is surely intent on telling the stories of the capital city's million sinners. Never writing mere tales of detection, he simply sets the oldest hard-boiled stories of them all—Adam and Eve, Cain and Abel, stories about hard falls from grace, about sin and redemption—in his city, a place that he knows inside out.

Like Ernest Hemingway and Elmore Leonard, Pelecanos is a clean and precise writer who chooses his words carefully. His language not only makes his work accessible to the masses but also is a reaction against often stilted “high literature.” Above all, Pele-

canos is concerned with the sounds and rhythms of American speech, with the language of the streets, and with the dangerous and the damned. He has no interest in the academy, instead concerning himself with autodidacts, with those who have been baptized by fire.

Similarly, the Pelecanos hero, like the Hemingway hero, must operate under extreme conditions and must perform his or her duties with grace under pressure. He or she must be able to take punishment. Consider Pete Karras in *The Big Blowdown*. His sins lead him to be wounded horribly. He never complains about it, though the quality of his life seriously deteriorates after his grievous wounding. The only thing he can do is to make one last decent gesture, a gesture that shows the goodness of which he is capable. In Karras's case (as in the case of many hard-boiled heroes), he saves a prostitute from a life ruled by heroin and nasty pimps. The Pelecanos hero must also hold fast to his or her work, friends, and loved ones. Like Mark Twain's Huck Finn, Pelecanos's exemplars are sound of heart even when their consciences falter, and they exhibit physical durability, always maintaining a hard-boiled pose. On the other hand, criminals and other antiexemplars in the Pelecanos universe are marked by their inhumanity, phoniness, or sloppy sentimentality.

The definition of hard-boiled in the Oxford English Dictionary is "hardened, callous; hard-headed, shrewd." This is a fine rundown of Pelecanos's work. His fiction, no matter what else it is, is certainly not soft. He is not concerned with softness and sentimentality, which are equated with weakness. He is wholly concerned with toughness, with maintaining a tough pose even if in a broken, battered condition.

A FIRING OFFENSE

Pelecanos's first novel, *A Firing Offense*, introduces young Nick Stefanos, who weaves his way through Pelecanos's District of Columbia for years to come. A consumer electronics salesman, Stefanos is disturbed by the disappearance of Jimmy Broda, a stock boy who has fallen in with some local toughs. Stefanos, his life in disarray, applies for a private investigator's license and attempts to find the lost boy. Like many of Pelecanos's protagonists, Nick is perched on the edge of madness, one step away from turning into the sort of bad man that he despises. What

keeps him from crossing the line is concentrating his energy on doing one good thing. In this case, it is finding and helping young Jimmy Broda. *A Firing Offense* is not Pelecanos's best work, but—as his first—it is a brilliant introduction to the dark and deadly District of Columbia that continues to serve as his muse.

THE BIG BLOWDOWN

The Big Blowdown is perhaps Pelecanos's most ambitious crime novel. It tells the story of Pete Karras, the father of Dimitri Karras, who figures prominently in the next three books of the District of Columbia quartet. Pete grows up in the District of Columbia during Prohibition, fights in World War II, and comes back home badly in need of a job. His buddy Joey Recevo, an unlikely friend to the son of Greek immigrant parents, gets him work as an enforcer for a local mob boss. When the mob boss turns on Karras because he is not tough enough on Greeks in the neighborhood, he is beaten close to the point of death while Recevo watches. Disabled by this incident, Karras limps through the streets of the District of Columbia, defeated. He fathers Dimitri, treats his wife poorly (often cheating on her with a mistress), and works as a short-order cook at a lunch counter, depressed by his station in life. In short, Karras is the perfect hard-boiled hero, a broken man with one last shot at redemption.

Redemption comes in the form of Lola Florek, a small-town girl from Pennsylvania who has found out the hard way about the District of Columbia's seedy underbelly. Having fallen into a life of drugs and prostitution, Lola is searched out by her brother, Mike, a naïve kid focused on saving his sister. Enter Lola's only hope: Pete Karras. Morally torn, spiritually broken, and resigned to live with the consequences of his poor choices, Karras devotes himself to helping Mike track down Lola, to doing one good final thing.

SHAME THE DEVIL

Its title taken from a Robin Trower song, *Shame the Devil* (2000) is the fourth book in the District of Columbia quartet. Here, Pelecanos switches gears and begins the novel with a violent heist scene in which Jimmy Karras, Dimitri's five-year-old son, is accidentally killed. *Shame the Devil*, unlike Pelecanos's earlier novels, begins with a horrific act and deals with

the fallout from the tragedy. Nick Stefanos, back as a major character, finds a broken-down Karras a job as a dishwasher. The novel brings the quartet full circle, as a violent shootout brings readers back to the landscape of *The Big Blowdown*, and the histories of the Karras and Stefanos families come together in a thunderclap.

RIGHT AS RAIN

In *Right as Rain*, Pelecanos was aiming at something markedly different from his earlier novels: a hard-boiled urban Western that would put a spotlight on the racial divide in Washington, D.C. Derek Strange, an African American former police officer turned private investigator, and Terry Quinn, an Irish American former police officer turned bookstore employee, prove to be the perfect pair of protagonists by which Pelecanos can explore the issue of race. Strange is hired by Leona Wilson, the mother of an African American police officer shot by Terry Quinn in his last tragic act as an officer. Now working at a secondhand bookstore, Quinn is haunted by his mistake. Strange interviews him, and they form the unlikeliest of investigative partnerships. More than that, they become fast friends, and their relationship is at the center of Pelecanos's next two books, *Hell to Pay* (2002) and *Soul Circus* (2003).

DRAMA CITY

In *Drama City* (2005), Pelecanos moves away from his principal series characters to tell the story of Lorenzo Brown, a good-hearted former convict turned street investigator for the Humane Society. Lorenzo, like the typical Pelecanos hero, is trying to reform, to atone for his past sins. Surrounded by people whose despair has transformed into full-fledged violence, Lorenzo walks a fine line between atonement and falling back into his old habits. Figuring prominently into the story is Lorenzo's parole officer, Rachel Lopez, who is a dedicated to her job but also attracted to an alternate lifestyle that finds her drinking excessively at dive bars and having casual sex with strangers. As usual, Pelecanos moves back and forth between these stories at a breakneck pace, bringing them together in the violent final act.

HUGH PENTECOST

Judson Pentecost Philips

Born: Northfield, Massachusetts; August 10, 1903

Died: Sharon, Connecticut; March 7, 1989

Also wrote as Philip Owen; Hugh Philips

Type of plot: Amateur sleuth

PRINCIPAL SERIES

George Crowder, 1961-1990

Pierre Chambrun, 1962-1988

Peter Styles, 1964-1982

John Jericho, 1965-1970

Julian Quist, 1971-1987

PRINCIPAL SERIES CHARACTERS

GEORGE CROWDER, a once-noted county attorney, left his home and career after discovering that he had prosecuted an innocent man. Ten years later he returned to his hometown and built a cabin on Lakeview Mountain. There he lives a rustic life with his dog, Timmy, and teaches the lore of the woods to his nephew, Joey. His skills (in and out of the woods), his wisdom, and his kindness make him a hero to Joey and a central figure in the Lakeview community.

SHERIFF RED EGAN is part of the local law enforcement in Lakewood and is a friend to Crowder, who often helps him in seeking justice.

PIERRE CHAMBRUN is the resident manager of New York City's top luxury hotel, the Beaumont. A resistance fighter with the French in Paris during World War II and a noted gourmet, Chambrun presides over a diverse staff and clientele.

PETER STYLES, a writer for *Newsview* magazine, devotes his life to fighting injustice and the senseless violence of the modern world. Violence became a part of his life when his father burned to death and he himself lost a leg in a car crash deliberately caused by thrill-seeking youths—and, again, when his wife (whose first husband was murdered by fanatics) was killed by terrorists. His job takes him all over the world, crusading against the terror he has experienced.

FRANK DEVERY, Styles's publisher and editor, is an old friend of Pierre Chambrun.

JOHN JERICHO uses his skills as a painter to illustrate people's inhumanity to others. Six feet, six inches tall and 240 pounds, Jericho sports a flaming red beard (matching his red Mercedes), making him a highly visible figure whether fighting in a special commando troop in Korea or traveling throughout the world. His moving paintings convey a message of concern to the world and illustrate his private crusade for lost causes. When not traveling, Jericho lives in a Greenwich Village studio.

JULIAN QUIST, the glamorous, handsome head of a public relations agency, moves among the gilded rich and is often present when murder strikes. His instinct for derring-do is shared by his associates.

MARK KREEVICK, lieutenant of the Manhattan Homicide Squad and Quist's close friend, believes in preventing crime rather than simply apprehending criminals. He often works with Quist.

CONTRIBUTION

Hugh Pentecost created a world of characters who, to his wide readership, are as familiar in their personalities and relationships as old friends. His characters are generally affluent, physically striking, urbane, intelligent, and articulate. Most of his series are set in New York City, with the specific setting featured in one series likely to appear peripherally in another. When the action called for a rural environment, Pentecost chose the vicinity of Lakeview—located in a New England state sometimes, though not always, identified as Connecticut. The issues treated in Pentecost's work are usually defined in terms of right and wrong (with occasional moralizing—against drugs, for example), and although nice people sometimes die, virtue triumphs in the end. The writing is clear, the characters are both believable and likable, the plots are deviously complex, and the solutions seem both inevitable and surprising. Pentecost published his first short story in 1923, and by 1936 he had begun the prolific output of novels that, though unlikely to become literary classics, clearly contribute to the mystery and detective genre.

BIOGRAPHY

Hugh Pentecost was born Judson Pentecost Philips in Northfield, Massachusetts, on August 10, 1903. His father, Arthur Philips, was an opera singer and his mother, Fredericko Pentecost, was an actress. A great-uncle, the original Hugh Pentecost, was a criminal lawyer in New York City at the start of the twentieth century. Educated in England and the United States, Pentecost received a bachelor of arts degree from Columbia University in 1925. He began his career as a writer while still in school, selling the first story he ever wrote, "Room 23," to *Flynn's* during his junior year in college. He was employed as a reporter by the *New York Tribune* in 1926 and simultaneously wrote stories for a variety of magazines, ranging from *Black Mask* to *Collier's* and *Ellery Queen's Mystery Magazine*.

In addition to his constant productivity as a writer, Pentecost followed a variety of other careers. From 1949 to 1956 he served as co-owner and editor of the *Harlem Valley Times* (Amenia, New York). He also served as a political columnist and book reviewer on the *Lakeville Journal* (Lakeville, Connecticut). In 1951, he was married to the actress Norma Burton. Their son completed his family, which included one daughter and two sons from a previous marriage. Pentecost served as founder and director of the Sharon Playhouse (Sharon, Connecticut) from 1951 to 1972. He also worked as a radio talk-show host for WTOR in Torrington, Connecticut, from 1970 to 1976. All these experiences find their way into Pentecost's mystery plots.

Widely respected by his peers, Pentecost served as president of the Mystery Writers of America. In 1973 (fifty years after his first published work), Pentecost received the Mystery Writers of America's Grand Master Award. In 1982, he was again honored, as the recipient of the Nero Wolfe Award. In addition to his many novels and short stories, Pentecost wrote scripts for both radio and television. He died in March, 1989.

ANALYSIS

Hugh Pentecost, whether writing under his given name or one of his pseudonyms, was one of the United States' most prolific mystery writers. The sheer volume of his work gives evidence to a highly disciplined

approach to writing. His diverse and imaginative plots are always precisely structured, are more than adequately believable, and conclude with a solution that is both reasonable and consistent with the characters developed in the novel.

When asked how he created plots for so many novels, Pentecost replied:

It has been said that there are only thirty-six dramatic situations, only about half of which are not too raunchy to use. . . . The only variation any writer has is the people he writes about. There are endless variations in people. . . . The name of the game is people, and they are endlessly rewarding, never uninteresting, and where everything begins and ends.

Indeed, Pentecost's characters are what give his novels their appeal; his books escape being mere literary froth by the unique quality of the people they describe.

QUIST, CHAMBRUN, AND STYLES

Few readers could fail to be intrigued by the debonair style of Julian Quist, the knowledge and power of Pierre Chambrun, or the passion (with its hint of suffering) of Peter Styles. For those who return repeatedly to Pentecost's mysteries, the comfortable familiarity of these and other main characters heighten the drama of the stories. Correctly assuming that readers of one series are likely to become readers of other series as well, Pentecost occasionally intermingles his series characters. Because many of his novels are set in New York City, the Hotel Beaumont is likely to appear in novels other than the Pierre Chambrun series. The same police officials investigate murders in many of the novels, assisted by first one and then another of the amateur sleuths.

Given Pentecost's focus on high society, it is not surprising that the locale and characters occasionally overlap from series to series. Julian Quist, himself comfortably affluent and widely recognized by the press of New York, in his public relations work serves aristocrats and those in the glamorous entertainment industry, people who can afford the services of his firm. The Hotel Beaumont caters to the rich and to the international membership of the United Nations delegates. Only the wealthy can afford the paintings of John Jericho, and Peter Styles's press credentials give

him access to the world of economic and political power. George Crowder, though a resident of a smaller town, is recognized as one of its leaders and, while choosing to live alone in a cabin, moves with ease among the upper classes of Lakeview. Mystery novels, it has been said, are a source of escape from the realities of daily life; it seems appropriate that the escape Pentecost offers is among the wealthy, who, indeed, are not like the rest of us.

MURDER IN LUXURY

Although Pentecost seldom exposes his readers to the underclass of society, he does open the door to the world of violence that lies just beyond the edges of civilized life. Although often the murderer is the nearest and dearest of the victim, just as often the violence is nonpersonal—terrorism, for example, which is all the more frightening because there is no rational explanation for the selection of its victims and, therefore, no way to protect against its violence. As Pentecost wrote in *Murder in Luxury* (1981), one

can't eliminate greed, or jealousy, or a passion for revenge, or the impulse to treachery or betrayal in the individual man or woman. And so, as in every other place on earth, these ugly psychoses disrupt men's efforts to live peaceful and orderly lives.

Pentecost's mysteries are, above all, pleasant entertainment. There is violence, but the descriptions are seldom so gory as to upset the reader. There is always some hint of romance (especially among the principal series characters), but there is no explicit sex to distract from the mystery or offend the puritanical.

Because Pentecost wrote so many novels, his oeuvre is of uneven quality. He has been praised for his clean, hard prose and his ingenious story lines, which move at a brisk pace. His style, however, has been criticized as "stolid," and his plots called "unconvincing." His novels are somewhat dated, drawing, as they do, from current events. Furthermore, some of the characters are described in terms of their physical resemblance to popular film and television figures—a practice that also dates the novels. Yet it is the verdict of his readers that is most valid—and their support has sustained Pentecost through what must surely be one of the longest careers on record. He wrote for the en-

joyment of his readers. With more conversation than description and more action than analysis, Pentecost's works have attracted a loyal cadre of readers.

In short, Pentecost was an able storyteller. He provided the reader with interesting plots, attractive characters, and believable solutions, in which the guilty are duly caught and punished. There is suspense in the identification and pursuit of the guilty, but the reader soon realizes that all will end well in Pentecost's well-structured world.

THOMAS PERRY

Born: Tonawanda, New York; August 7, 1947

Type of plot: Thriller

PRINCIPAL SERIES

The Butcher's Boy, 1982-

Jane Whitefield, 1995-

PRINCIPAL SERIES CHARACTERS

THE BUTCHER'S BOY is an unremarkable man, who is in his mid-thirties when first introduced and in his mid-forties in his next appearance. He could be mistaken for a college professor, but in reality he is an almost totally amoral, affectless professional hit man.

JANE WHITEFIELD is a "guide" who helps people remove themselves from desperate situations, installing them in new identities. She is tall, with long, black hair, the daughter of a Senecan father and an Irish American mother. She is particularly adept at reading the signs around her, whether those in a crowded airport or in her own dreams.

CONTRIBUTION

Thomas Perry began his career writing thrillers about flawed heroes engaged in sometimes less-than-legal schemes and missions, who appear sympathetic only because their opponents are more morally reprehensible than they are. His best works in this vein are the two novels in the Butcher's Boy series about a professional hit man. His later works, his most successful and popular novels, are those in a series about a Native American woman, Jane Whitefield, who helps make victimized people "disappear." Whitefield is a capable, believable, and sympathetic hero who resorts to force only when necessary and uses her intelligence and culture to defeat her foes.

Perry's later novels have been uneven because he has eschewed a series hero and his protagonists are sometimes bystanders who are drawn into investigating a mystery by their characters or circumstances. However, Perry remains a master at structure, pacing, constructing believable plots, and creating sympathetic and plausible characters.

BIOGRAPHY

Thomas Edmund Perry was born on August 7, 1947, in Tonawanda, New York, an area that became the setting for his Jane Whitefield series. He is the son of Richard Perry, a superintendent of schools, and Elizabeth Perry, an English teacher. He attended Cornell University, receiving a bachelor's degree in 1969, and received a doctorate in English literature from the University of Rochester. He was a member of the Air National Guard.

After his studies, Perry worked for a year as a commercial fisherman before working in higher education, first as assistant to the provost of the College of Creative Studies at the University of California at Santa Barbara from 1975 to 1980. There he met his second wife, Jo Anne Lee, also a writer with a doctorate in English, whom he married in 1980; they have two daughters, Alix and Isabel. He then became assistant coordinator of the general education program at the University of Southern California. His third attempt at writing a novel, *The Butcher's Boy*, was published in 1982. The book won an Edgar Award from the Mystery Writers of America in 1983 and a silver medal from the Commonwealth Club of California the same year. His next novel, *Metzger's Dog* (1983), was named a *New York Times* notable book for 1984.

In 1984, Perry began to work in television as both a producer and a writer. Although he worked mainly for the light detective series *Simon and Simon* (1981-1988), he also wrote for *Twenty-one Jump Street* (1987-1991) and *Star Trek: The Next Generation* (1987-1994). He and his wife cowrote some episodes, including "Reunion" for *Star Trek*, but when their first daughter was born in 1989, Perry's wife decided to stay at home to raise her, and Perry resolved to become a full-time novelist.

Perry's first novel about Jane Whitefield led to a series, and these books, like many of Perry's other novels, have been optioned for films. Of Perry's later, nonseries novels, *Pursuit* (2001) won the Gumshoe Award for 2002.

ANALYSIS

Thomas Perry's fiction usually involves stretching one element of the thriller novel—the chase—into the mainspring and focus of his plots. The hunted and the hunter can also change roles, sometimes unknown to each other and perhaps even to the reader. In his early works, it is sometimes difficult, but never totally impossible, to tell the good characters from the bad.

The main device that Perry uses to distinguish his protagonists from his villains in his early novels is to change the point of view from the main character to another character, often filling in that character's back story, but never at a length that significantly retards the action. Thus we learn that the person whom the main character is going to kill or cause to die is even more worthless than the often amoral protagonist. For example, as the Butcher's Boy, Perry's first main character, moves across the United States, killing off various syndicate bosses so that he can survive, readers learn that his victims often need eliminating. The Butcher's Boy's lack of a proper name through his first novel reinforces reader identification, and his back story inspires sympathy: Taken in by an older professional assassin, Eddie Mastrewski, whose cover is his butcher shop, the boy can react only as Eddie taught him. The Boy has his own primitive sense of justice: When the syndicate in Buffalo kills an old man who helps people disappear because he tried to help the Boy, he avenges the old man by killing his assassins and their superior, to pay off a debt, as he calls it.

Perry's next major character, Jane Whitefield, proved to be his most popular. Some critics have attributed this popularity to a supposed deliberately calculated appeal to politically correct shibboleths, such as Jane's ethnicity and her gender, but as a character, she feels authentic, plausible, and sympathetic. Her Native American heritage is an outgrowth of her growing up in the area of New York in which Perry grew up. Jane's Deganawida seems very close to Perry's Tonawanda. Her motivations for becoming a guide fit in with her heritage and her own sense of justice, and she relies on her skills of observation rather than on superior firepower or violence, which she employs only when necessary. Perry also skillfully weaves in Senecan legends and history to support the

narrative, and Jane must be as skillful in interpreting her own dreams as she is in her observation of her surroundings.

It could be argued that Perry's need to make Jane a believable heroine weakened the later novels in this series. Jane is devoted to her calling, but not enough that she would give up a chance at domestic happiness, so when she receives a marriage proposal, she accepts. Her marriage means she must gradually withdraw from her life as a guide and that her motivations for helping victims in her third, fourth, and fifth novels are more tenuous than those in the first two, which are also more effective as novels because their villains are stronger. *Shadow Woman* (1997), the third Jane Whitefield novel, is not significantly weaker than the first two novels because the villains are mirror images of Jane, but their involvement with her husband is less credible. In *The Face-Changers* (1998), she becomes a guide at the request of her husband, whose mentor has been falsely accused of murder, and her opponents are shadowy and amorphous until the end. *Blood Money* (1999), the fifth novel in the series, is even less believable, both in her reasons for helping the victims and in the schemes they all concoct to foil the villains—who are virtually the entire American Mafia. Perry wisely chose to give Jane a sabbatical after this novel.

Perry's later novels involve him in the problem of maneuvering a somewhat naïve yet good-hearted character to solve a mystery or uncover a criminal scheme, as happens in *Dead Aim* (2002) when a businessman investigates why a girl committed suicide, and in *Death Benefits* (2001), in which a newly hired worker at an insurance company must discover why a coworker with whom he was in love has been murdered. Often, the less experienced character is aided by a veteran, and usually less scrupulous, partner, as happens in *Death Benefits*, *Pursuit*, and *Nightlife* (2006), even when the less experienced character is connected to or involved in law enforcement, as in the last two titles. Whatever the initial premise, Perry is an expert at easing readers into a willing suspension of disbelief, with his control of narrative viewpoint and talent for creating interesting and credible secondary characters. His skill at constructing plots and situations usually means the level of disbelief is never high from the start.

SLEEPING DOGS

At the beginning of *Sleeping Dogs* (1992), the second novel about the professional hit man, the Butcher's Boy has been retired for ten years, living in England under the name Michael Schaeffer and having an affair with an upper-class Englishwoman. When an attempt is made on his life by an American mafioso who recognizes him, Schaeffer embarks on a killing spree, changing his name as he travels across the United States. Once again, as in *The Butcher's Boy*, Justice Department investigator Elizabeth Waring is enlisted by her benighted bosses to figure out what is happening.

The hallmarks that made Perry's debut novel so successful remain: believable action, sympathetic quarry and pursuer, and accurate snapshots of the various portions of the United States (and England) that his characters travel through. The novel emphasizes two points. First, both the Butcher's Boy and his Mafia opponents initially misunderstand each other's motives. Schaeffer believes that a coincidental sighting and attack on him is the result of a deliberate assignment, so he goes across the United States, killing the underbosses and bosses who he believes are responsible, resulting in a grisly comedy of errors. Second, Schaeffer's view of America is colored by his ten years' absence, so that he is almost a tourist in his own country, who must re-educate himself on how to survive and attack.

The person with the clearest understanding of the plot is, again, Waring, but even she makes a crucial error in judgment that proves nearly fatal. The Butcher Boy's confrontation with Waring at the end of the novel is not as innocent as the one that concludes *The Butcher's Boy*, and while Schaeffer remains a somewhat sympathetic character, his motivations for restraining himself, self-centered as they are, make him less likable.

DANCE FOR THE DEAD

The second Jane Whitefield novel, *Dance for the Dead* (1996), begins almost in medias res, as Jane attempts to save a young boy from predators who are trying to claim his inheritance, and the plot never lets up from that point. The novel features a character who is perhaps Perry's finest creation as a villain: the omi-

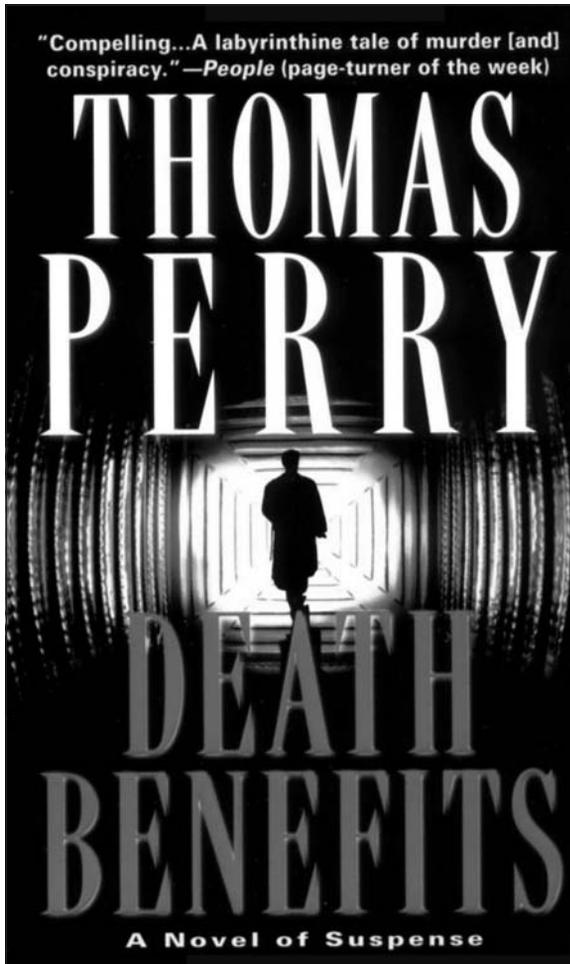

nously named Barraclough (whose name is often misheard as "Bearclaw"), a former police officer turned security specialist who uses his position to find weak criminals or victims to bleed of their stashes or inheritances. He is all appetitive brutality, the personification of the Senecan deity Hanegoategeh, the destroyer. As such, he is Jane's worthiest opponent, for she is the representative of Hanegoategeh's brother, Hawenneyu, the creator and nurturer.

Barraclough's crimes are suitably savage, and the justice that Jane metes out to him is highlighted by a change in point of view at the end of the novel as Barraclough pursues Jane through a deserted industrial area. Once again, Perry uses this narrative device to make his villains appear even worthier of punishment and to show the perception in the villain that the hunter has become the hunted as well as to sustain suspense. The morality implicit in the Whitefield novels is also made explicit when Jane asks the judge who is hearing the case of the boy she rescues whether he wants to be the person who helped the boy, or the person who did not. In Perry's novels, morality is the sum of a series of such choices.

DEATH BENEFITS

Death Benefits, Perry's first after the fifth book in the Jane Whitefield series, was published in 2001, the same year as *Pursuit*, which suggests that Perry was perhaps eager to explore other types of thriller plots. In this one, a young actuarial examiner for a well-established insurance company, John Walker, is enlisted by an outside expert, Max Stillman, to discover why Ellen Snyder, with whom Walker fell in love during their training sessions, disappeared after apparently arranging a multimillion-dollar swindle. During their investigation, Walker learns that he is not the type of person who can spend his career in an office cubicle; Stillman offers Walker a glimpse of the freedom that Walker never knew he wanted. Such freedom comes with a price: When Walker is forced to kill an attacker, he realizes that the action changes not only his future but also his past.

The novel's weakness is the introduction of Walker's love interest, a woman who works for a computer hacker whom Stillman employs for information. She fits in thematically, in that she has already em-

braced the type of career that Walker wants, but she also seems like an amor ex machina when she pursues Walker to join him in bed. The novel's strengths include the reality of its plotting; Stillman is no Holmesian expert and at one point complains that they have no plan and are just reacting to their circumstances. Another is the villains, who are as ruthless as any Jane Whitefield eludes, and are also original in conception, so that the climax of the novel involves a confrontation and chase of such breadth that it is claustrophobic, yet almost as American as apple pie.

PRINCIPAL SERIES

Jacqueline Kirby, 1972-

Vicky Bliss, 1973-

Amelia Peabody, 1975-

PRINCIPAL SERIES CHARACTERS

JACQUELINE KIRBY is a middle-aged librarian who uses her sharp brain and lethal handbag in solving mysteries. Her glasses slide down her nose and her copper-colored tresses fall down in moments of excitement. She enters each story with some academic swain but leaves with another man, usually the police officer.

VICKY BLISS is a tall, blond art historian with a keen sense of humor and a healthy interest in men. Drawn into mysteries by her work at a Munich museum, she solves them with intelligence, cunning, and breaking and entering, rescuing herself and often the hero.

SIR JOHN SMYTHE is the *nom de guerre* of Vicky's lover, an English art thief of good family. He claims to be a coward but comes through when needed. He disappears at the end of every mystery, only to embroil Vicky in another scam in the next.

AMELIA PEABODY is an independent, wealthy Victorian Englishwoman. When traveling to Egypt, she falls in love with the country, pyramids, and Egyptologist Radcliffe Emerson, whom she marries. Armed with an irrepressible faith in her medical and detective abilities (as well as a steel-shanked parasol and a pistol), she manages everyone and everything. Passionately fond of her husband and sensible of her son's shortcomings, she comments acerbically on Victorian mores and solves mysteries by leaping to conclusions based on intuition, blithely changing her theories as they become untenable.

CONTRIBUTION

Barbara G. Mertz uses her tremendous energy to write in two opposing genres, mystery and detective fiction (as Elizabeth Peters) and gothic romance (as Barbara Michaels). The bridge between Mertz's alter egos is her knowledge of history, especially that of ancient Egypt. Her nonseries Peters titles are essentially historical romances hung on suspense plot lines. Her reputation as a mystery writer rests on her three detective series, particularly on the Amelia Peabody books.

In Peters's series characters, she has created three distinctly different heroines, each educated, independent, and driven by curiosity as much as by a sense of justice. At one end of the spectrum there is Jacqueline Kirby, a university librarian who takes love where she finds it but does not allow herself to be defined by romantic entanglements. At the other end is Amelia Peabody (later Emerson), whose Egyptologist husband regards her as his equal (while the reader and Amelia know that she is his superior). The intermediate stage is occupied by Vicky Bliss, for whom Peters has invented Sir John Smythe, a delightful but unsuitable lover who disappears at the end of each book, thus relieving Vicky of the customary denouement of marriage and leaving her free to play the field.

Although sex and violence are never too far away, these soft-boiled sleuths remain unruffled by either. Peters's detectives appeal to cozy mystery fans, who do not mind a little hot sex in the interest of relieving the tensions that naturally build during the course of investigating murder. Exotic settings, unlooked for chivalry, unladylike derring-do from mothers and librarians, and a good dose of historical adventure have built for Peters a devoted readership. Jacqueline, Amelia, and Vicky have also bolstered the ranks of women on the crime-fighting side of crime fiction.

BIOGRAPHY

Elizabeth Peters was born Barbara Louise Gross on September 29, 1927, in Canton, Illinois, the daughter of Earl Gross and Grace (Tregellas) Gross. She at-

tended the Oriental Institute of the University of Chicago, where she studied Egyptology. Peters received a bachelor of philosophy degree in 1947 and a master of arts degree in 1950, the same year she married Richard R. Mertz. She completed her doctorate in 1952 with a dissertation titled "Certain Titles of the Egyptian Queens and Their Bearing on the Hereditary Right to the Throne." Following a pattern typical of her generation, Peters worked after marriage as a typist and secretary before having a baby. She followed her husband to various cities in the United States and abroad, cities that she would later use as settings in her fiction both as Elizabeth Peters and as Barbara Michaels.

Under her own name, Peters published two popular books about Egypt, one in 1964 and another in 1966; her first Barbara Michaels book was published in 1966. When her editor suggested that she write more light-hearted books about modern heroines using exotic locales, she borrowed the names of her two children, Elizabeth and Peter, to form her new pseudonym. A true storyteller, she has produced at least a book per year. Peters was divorced in 1969. Her two-hundred-year-old stone house outside Frederick, Maryland, reportedly houses cats, dogs, antiques, and a ghost.

A former president of the American Crime Writers League, Peters has been a member of the editorial board of *The Writer*, the editorial advisory board of *KMT, A Modern Journal of Ancient Egypt*, and the board of governors of the American Research Center in Egypt. In 1989, Hood College named her an honorary Doctor of Human Letters. In 1990, she won the Agatha for best novel for *Naked Once More* (1989), and in 1998 the Mystery Writers of America named her a Grand Master.

ANALYSIS

By the time Barbara Mertz began writing as Elizabeth Peters, her talents as a spinner of romances were already well developed. Writing her dissertation had taught her to handle a long manuscript. In the late 1950's, she and her husband, Richard R. Mertz, collaborated on several thrillers; although these early works were never published, they served as an apprenticeship in form, plotting, and character development. Her first published novel was a gothic romance, *The*

Master of Black Tower (1966; as Barbara Michaels).

Soon afterward Peters's editor suggested that she write the contemporary romances she later published under the pseudonym Barbara Michaels. In these books she successfully managed the transition from the gothic to a lighter style while retaining her mastery of the romance, manipulating and expanding the form but retaining its major elements and adapting them to modern settings. She also began to shed the love-as-goal central theme in favor of justice as prime mover and catalyst for adventure, mystery, and suspense.

Peters asserted that the "softer" mysteries written from a female point of view are as valid as the more violent thrillers written from a male point of view. As a scholar, Peters places truth before all else, so a major theme in her books is the conflict between superstition and reason, with reason winning every time. Despite their comic elements, both Amelia Peabody and her husband, Emerson, are true turn-of-the-century logical positivists in their rational, secular, scientific mind-set. Emerson is anticlerical and democratic, and Amelia, while firmly believing that if God exists, he is an Englishman, is nevertheless a feminist and an egalitarian (both radical positions for a nineteenth century Englishwoman), believing in the value of education as a means of producing a new and better society. Emerson's strictures on archaeological method show the scientific mind at work, bringing order and method to this new field, and his slanderous comments on his colleagues reflect accurately relations between early (and present-day) Egyptologists.

Peters did more than draw on her archaeological knowledge to create the Amelia Peabody novels, her most popular series. Though wholly her own, with complex personalities, Peters's characters are loosely based on historical figures. Radcliffe Emerson is similar in many ways to the early Egyptologist William Flinders Petrie—both are handsome, dark-haired, and bearded, with amazing energy, competitive spirits, quick tempers, and apt appellations bestowed by Egyptian workers: "Father of Curses" for Emerson and "Father of Pots" for Petrie.

Amelia has a namesake in Amelia B. Edwards, a Victorian woman who wrote the travel diary *A Thousand Miles Up the Nile*. She lends Amelia Peabody her

taste for adventure and her eccentricity, as well as the nickname of one of Edwards's friends, "Sitt Hakim," or "Lady Doctor." Another of Amelia's spiritual forebears is Lady Hilda Petrie, wife of Sir Flinders. Hilda was also a scholar who enjoyed the archaeological life and was, like Amelia, unstoppable in her investigations. Actual historical figures make brief appearances throughout the series, lending verisimilitude—a few of these include E. A. Wallis Budge, the keeper of the Egyptian collection at the British Museum and Emerson's professional rival, and James E. Quibell, who requests medicine for Petrie's party during a documented historical occurrence. The excavation sites and travel routes are so well detailed that Amelia's adventures may be followed on a map or excavation guide. Finally, Amelia's voice and writing style are a perfect match for the journals, diaries, and letters of Victorian women travelers, with the original historical spellings of Arab and Egyptian names intact.

Between 1972 and 1975, Peters established three series characters through whom she could explore a second theme, that of the autonomous female, a woman whose happiness is not conditional on capturing a man. Independent women in the early 1970's were widely considered pathetic, if not desperate, or worse, sexually aberrant. With the characters of Jacqueline Kirby, Vicky Bliss, and Amelia Peabody Emerson, Peters developed three variants of the independent woman, at the same time bringing changes on the romance form by creating heroines for whom marriage and monogamy are not life's most important issues. At the same time, she avoided the rape solution common to romances, in which the strong-minded heroine is overcome by superior force.

JACQUELINE KIRBY SERIES

All Peters's heroines are committed to some abstract value, whether it be truth, scholarly integrity, or Jacqueline Kirby's simple belief that murder is wrong. That is why her heroines, even the least experienced, must solve the problem that the book presents, no matter what the danger. University librarian Jacqueline Kirby, who first appears in *The Seventh Sinner* (1972), is decidedly independent. A mature woman with two children in their early twenties, she makes no mention of the children's father. During the course of the se-

ries, she exhibits several personas. As the stereotypical librarian, with her long copper hair snatched back in a tight bun and a pair of glasses perched precariously on her nose, she is the no-nonsense professional; with her hair flowing down her back and her voluptuous body clad in an emerald silk pants suit, flirting with some male target, she is a version of her era's Total Woman.

Jacqueline's sharp mind is furnished with a mixed bag of information that she uses to unravel the mystery, elucidating it in the library at the end of the book. Her trademark is a large handbag containing a faintly satirical variety of useful objects. The purse itself often comes in handy as a weapon. Another constant is that she enters the action with an academic swain but leaves the party with a debonair police officer, proving herself to be as attractive to men of action as she is to men of intellect. She is pointedly autonomous by choice.

Jacqueline is not only independent, indeed she is cynical and hard-nosed, willingly placing herself and others in jeopardy to solve the mystery. In her, Peters has developed a woman with a tough mind and high standards who is, nevertheless, extremely sexy. Peters uses the series to criticize the classical mystery form; more specifically, in *The Murders of Richard III* (1974), she draws on her knowledge of Ricardian scholarship to provide a corrective to Josephine Tey's uncritical *The Daughter of Time* (1951).

Although the Jacqueline Kirby books are basically classically plotted mysteries, their plots revolve around private vices and satirize petty human pretensions. *The Murders of Richard III* makes fun of the antiquarian defenders of Richard, *Die for Love* (1984) mocks a convention of romance writers in New York, and in *The Seventh Sinner* plagiarism motivates murder in a Roman art institute.

VICKY BLISS SERIES

Peters's second series heroine, Vicky Bliss, is an art historian, a woman who finds men drawn to her for all the wrong reasons. She is not above breaking and entering in pursuit of the solution to the mystery, which she explains in classic fashion in the last chapters. Vicky Bliss pursues the Schliemann treasure in Bavaria in *Trojan Gold* (1987), a pre-Viking chalice in Sweden in *Silhouette in Scarlet* (1983), and an art forgery ring in Rome in *Street of the Five Moons* (1978).

What is unique to the Bliss series is the slim, blond, English jewel thief and confidence man Sir John Smythe, who first appears in *Street of the Five Moons*. Smythe commonly avoids violence by withdrawing from the action, but when Vicky is involved, he cannot choose that option but must stand and fight. In an inversion of the typical romance plot, Bliss usually rescues Sir John as they solve the mystery. After several romantic interludes, he disappears, leaving Vicky to resolve the mystery on her own, only to appear in the next book, to her mingled delight and disgust. The love-hate relationship between the two adds tension and spice to the plots.

In Smythe, Peters has developed the perfect foil and demon lover for an autonomous woman. Because marriage was the implicit goal of any sympathetic heroine in the 1970's, when the series began, Vicky might have been expected to face another of the era's emerging social questions: the two-career problem. Peters, however, does not impose on her sleuth the burden of giving up crime fighting so that her husband can have a fulfilling career as a jewel thief. Instead, she makes him a bit of a slippery cad, thereby sustaining the romantic tension from novel to novel without endowing Vicky with false hopes or an inclination to pine.

AMELIA PEABODY SERIES

Peters develops her final variation of the autonomous female character in Amelia Peabody in *Crocodile on the Sandbank*. This series, unlike the others, is written in the august and convoluted prose common to Victorian novels and is at once a crashingly good high romance and a satire so delicious that large portions of it beg to be read aloud. Using the style and plot devices of the gothic romance in the Peabody series, Peters combines the theme of marriage between a man and a woman who are equals in every way with an investigation into the conflict between faith and reason in which the ghosts and walking mummies are explained rationally as the concoctions of the villains.

Although Peters bowed to her publisher's requests for more "sensational" titles for several of the earlier Peabody books (*The Curse of the Pharaohs*, 1981, and *The Mummy Case*, 1985), the series later followed her original artistic intent of using lines from Egyptian literature that have symbolic significance for the story at hand. The titles thus add a further element to the mys-

tery, as readers seek the source of the quotation and consider its relevance.

CROCODILE ON THE SANDBANK

In *Crocodile on the Sandbank*, Peters uses stock characters such as the Plain Jane, the Innocent Heiress, the Irascible Grandfather, the Wicked Cousin, the Faithless Lover, the Poor-But-Honest Hero, and the Bad-Tempered-But-Lovable Older Man and stock situations such as the midnight elopement and the missing will, but she infuses new vitality and a large dose of humor into a plot that is as old as the Egyptian tombs in which it is set. With wicked wit, Peters brings her fast-paced novel crashing to a highly satisfying conclusion: the unmasking of the wicked and married bliss for both pairs of lovers.

THE CURSE OF THE PHAROHS

The arrival of a son in *The Curse of the Pharaohs* completes the Emerson family. Walter Peabody Emerson, called "Ramses" because of the resemblance of his profile to that pharaoh's, is the perfect academic offspring—"catastrophically precocious," long-winded, and nearly always right. Amelia sees Ramses through the unsentimental eye with which she views the universe, recognizing his strengths (he is very bright and always obedient) and weaknesses (he would get dirty in a vacuum and has a fine Jesuitical mind that allows him to escape parental prohibitions). She addresses him as if he were an adult. Ramses allows Peters to comment acerbically on children and domesticity.

Amelia is not only the central character but also the engine that makes everything work. While she loves her husband and son passionately, she sees them with a clear eye and manages them firmly, Emerson with sex and Ramses with direct orders. She also manages everything else. Her excursions into detecting lead the couple into deadly peril, from which Ramses has lately taken to rescuing them, once from being immured in a flooded tomb (*The Mummy Case*) and once from a cellar in the decaying castle of a depraved aristocrat (*The Deeds of the Disturber*, 1988).

NONSERIES NOVELS

Peters' nonseries novels are more grounded in the romance tradition. Her female characters tend to be young, often students, and make errors in judgment that lead to danger. The prize for unraveling the mystery is

the love of the hero and sometimes the added bonus of giving up her work to join in his. Allure, sexual sophistication, and a somewhat inferior intelligence quotient are generally assigned to bad women. Male characters are assigned to each heroine in pairs, though only one may turn out to be a villain. Because Peters's main themes in these novels have to do with the individual struggle for self-definition and love, she focuses her plots on matters of private rather than public morality.

In all her novels, Peters uses her historical training to create realistic plots that involve genuine historical problems or artifacts. For added romance, she locates the stories in glamorous foreign cities or at archaeological sites and exploits her special knowledge to provide verisimilitude in the story line. In *The Jackal's Head* (1968), model Althea Tomlinson discovers the secret of her father's death as well as the lost tomb of Nefertiti in Egypt. Undergraduate Carol Farley journeys to Mexico and falls in love with pyramids while searching for her runaway father and helping to break a drug ring in *The Night of Four Hundred Rabbits* (1971). D. J. Abbott, a graduate student in anthropology, discovers human remains along with mammoth bones in Arizona in *Summer of the Dragon* (1979).

PETERS'S CHARACTERS

Peters sees the exotic locales and sophisticated people in her stories through mildly Puritan and very American eyes. The foreign city is a place of excitement, danger, and decadence, where the heroine must fight to protect her values and virtue. People of wealth or good family who do not also work for a living are soft and corrupt. The villain is often a suave and superficially attractive aristocrat, while the hero is a hard-working American who is knowledgeable but uncorrupted by foreign ways.

Peters's heroines, however, are not Puritans. They regard sex as a normal human instinct and enjoy it, or expect to enjoy it. Love is distinguished from sex and is an irrational but pleasant state achieved only with the right man. Its arrival is sudden, unbidden, and final. Jacqueline Kirby's rejection of love's final solution to her problems and Vicky Bliss's half love for her disappearing jewel thief do not invalidate this generalization but point up the independence of the two women and keep the reader turning the pages to find

out whether this time it will be different. If it is, it will be the men who change, and the characters will be promoted to the bliss of an equal relationship like that enjoyed by the Emersons.

Peters has frequently commented in articles and interviews about her series characters. While some mystery authors have found series characters limiting, Peters sees the special requirements of a series character as both challenging and, in some ways, freeing. The challenge comes from the need to reintroduce the characters each time without boring continuing readers, as well as having to discard otherwise worthwhile plots that are not right for a particular character. Peters has solved the latter problem by alternating work among three different series and her nonseries fiction as Barbara Michaels.

The rewards for Peters are worth the effort: Within a series, characters can truly grow and develop, providing greater interest for readers and an opportunity for ongoing craftsmanship for the author. *The Crocodile on the Sandbank* is set in 1884-1885, and the series continues through the turn of the century, World War I, and the discovery of the tomb of Tutankhamen in 1922. The Emersons meet, marry, rear a son from precocious child to secret agent (*The Golden One*, 2002), and become grandparents even as Howard Carter snatches from their grasp the greatest archaeological discovery of the twentieth century (*Tomb of the Golden Bird*, 2006).

Peters's style is light and breezy. Her heroines, even the youngest, have a humorous attitude toward the world, and have, or gain, a wry self-knowledge. Her more mature heroines have a sharp eye for hypocrisy and a cynical wit that makes the exposition and the dialogue crackle. With all of its violence and corruption, Peters's world is an essentially rational and happy one in which the evildoer has produced an imbalance. Her heroines use their intelligence and courage to correct that imbalance and live happily ever after.

AUTHORS

ELLIS PETERS

Edith Mary Pargeter

Born: Horsehay, Shropshire, England; September 28, 1913

Died: Shropshire, England; October 14, 1995

Also wrote as Jolyon Carr

Types of plot: Amateur sleuth; historical; police procedural; thriller; cozy

PRINCIPAL SERIES

Felse family, 1951-1978

Brother Cadfael, 1977-1995

PRINCIPAL SERIES CHARACTERS

GEORGE FELSE is detective sergeant and later detective chief inspector of the Criminal Investigation Department in Comerford, a provincial town in central England. Felse, is a highly professional and honest police officer. A middle-aged family man, Felse is deeply in love with his wife and devoted to their son. He is dependable, mature, understanding, and reasonable.

BERNARDA "BUNTY" ELLIOT FELSE, the wife of George Felse, was a concert contralto before she married George. Bunty is a loyal and devoted wife and mother. Intelligent, sensitive, and thoughtful, she proves to be shrewd and fearless when she accidentally becomes involved in detection.

DOMINIC FELSE, the son of George and Bunty Felse, matures in the course of the series from a thirteen-year-old boy who discovers the corpse in his father's first murder case to a young Oxford University graduate. Engaging, adventurous, and aware, Dominic figures directly as an amateur detective in several of the novels, and peripherally in the others.

BROTHER CADFAEL, a twelfth century Benedictine monk, is a Welshman in his early sixties. Cadfael fought in the Crusades and had several amatory adventures as a young man before retiring to Shrewsbury Abbey. His youthful experiences gave him an understanding of human nature, and his present work as gardener and medicinal herbalist figures in his detection of criminals.

PRIOR ROBERT, a monk of Shrewsbury Abbey, is around fifty years of age. He is handsome, aristocratic, authoritative, and ambitious. His scheming for power in the abbey sets him at odds with Brother Cadfael and makes him that character's principal foil.

HUGH BERINGAR, sheriff of Shrewsbury, is a bold and keenly intelligent man in his early twenties. He is the friend and principal secular ally of Brother Cadfael and aids him in solving several of his cases.

CONTRIBUTION

Ellis Peters's Felse family series and her chronicles of Brother Cadfael are in the British tradition of detective-fiction writers such as P. D. James and Ruth Rendell. These writers' works, while displaying the careful and suspenseful plotting characteristic of the detective genre, frequently transcend the effect of pure entertainment and share with the traditional "literary" novel the aims of engaging in complex examinations of human character and psychology and achieving thematic depth and moral vision.

Peters herself expressed her dislike for the distinction between detective fiction and serious novels and succeeded in interweaving traditional novelistic materials—love interests, the study of human growth and maturation, the depiction of communities and their politics—with the activity of crime solving. The Brother Cadfael chronicles are her most popular as well as her most impressive achievements, locating universal human situations in the meticulously particularized context of twelfth century England. These novels are masterpieces of historical reconstruction; they present a memorable and likable hero, Brother Cadfael, and a vivid picture of medieval life, in and out of the monastery, in its religious, familial, social, political, and cultural dimensions.

BIOGRAPHY

Ellis Peters was born Edith Mary Pargeter on September 28, 1913, in Horsehay, Shropshire, England, the daughter of Edmund Valentine Pargeter and Edith

Hordley Pargeter. (Ellis Peters is a pen name that she adopted in 1959 after having published numerous books.) She attended Dawley Church of England Elementary School in Shropshire and Coalbrookdale High School for Girls and earned an Oxford School Certificate. She worked as a pharmacist's assistant and dispenser in Dawley from 1933 to 1940. During this time, she also began writing novels on a wide range of historical and contemporary subjects; the first was *Hortensius, Friend of Nero* (1936). From 1940 to 1945, she served as a petty officer in the Women's Royal Naval Service, receiving the British Empire Medal in 1944. During World War II she developed an interest in Czechoslovakia because she was haunted by the Western powers' betrayal of that country at Munich. After the war, she translated many volumes of prose and poetry from the Czech and Slovak and continued writing her own fiction.

Her first detective novel, which she published as Edith Pargeter in 1951, was *Fallen into the Pit*. It initiated a series of thirteen novels featuring the Felse family, a series that continued until 1978. Peters wrote five other detective novels and numerous detective short stories during this period as well. Her interests in music, theater, and art are reflected in several of these works. In 1977, she began publishing the Brother Cadfael novels.

As both Edith Pargeter and Ellis Peters, this writer received much recognition for her work, including the Mystery Writers of America's Edgar Allan Poe Award in 1963 for *Death and the Joyful Woman* (1961), which was cited as the best mystery novel of the year; the Czechoslovak Society for International Relations Gold Medal in 1968; and the Crime Writers' Association's Silver Dagger in 1980 for *Monk's-Hood* (1980). She was awarded the Crime Writers' Association's Cartier Diamond Dagger for lifetime achievement in 1993. Peters died on October 14, 1995.

ANALYSIS

Ellis Peters came to detective fiction after many years of novel writing. Disliking the frequently made distinction between detective novels, or "thrillers," as she called them, and serious novels, she stressed that "the thriller is a novel. . . . The pure puzzle, with a cast

To view image, please refer to print edition of this title.

Ellis Peters in 1995. (AP/Wide World Photos)

of characters kept deliberately two-dimensional and all equally expendable at the end, has no attraction for me." Her detective novels bear witness both to her life experiences and to her statements about her art.

Peters was essentially a social novelist. Murder serves as her occasion to dramatize a wide variety of human interactions and motivations in settings that are vividly realized. One might think of an Ellis Peters mystery in terms of a set of concentric circles. At the center is the detective character, usually preoccupied at the beginning of the novel with something other than crime. Frequently, he or she is an amateur who assumes the role of detective only circumstantially. The amateur status of several of her detectives allows Peters to move the narrative comfortably beyond crime into other areas such as love relationships, fam-

ily interactions, and the struggles of adolescents maturing toward self-discovery. Except for *Death Mask* (1959), Peters's detective novels are narrated from a third-person point of view through an anonymous persona. Peters is able to narrow or broaden her perspective with ease, and therefore to present the inner workings of her central characters' minds and to focus on external matters—landscapes, social or historical background, local customs—with equal skill.

The central character is generally carefully placed within the circle of a close family or community that is described in depth. The earlier mysteries often focus on Central Intelligence Division detective sergeant George Felse of Comerford, his wife, Bunty, and their son Dominic. Although George and Dominic are the most actively involved in detection, Bunty too becomes accidentally involved in solving a murder in *The Grass-Widow's Tale* (1968). Peters's later series places its central character, Brother Cadfael, within the twelfth century Benedictine community of monks at the Abbey of St. Peter and St. Paul in Shrewsbury, England. Although the Felse family series ranges in locale from central England to such places as the Cornish coast, Scotland, Czechoslovakia, Austria, and India, the Brother Cadfael novels usually stay within the vicinity of Shrewsbury, allowing Peters to develop her picture of medieval life in great depth.

Beyond these family and community circles, there are larger milieus. For the Felse family, these include a variety of worlds—for example, those of concert musicians, of diplomats, and of professional thieves. Brother Cadfael and his fellow monks live in the Shropshire of the late 1130's and earlier 1140's and frequently find themselves caught in the political strife between Empress Maud and her cousin King Stephen, who contend for the British crown. At other times, the political feuds are more local if not less complex and bitter.

THE GRASS-WIDOW'S TALE

Typically, Peters's detective novels begin at a fairly leisurely pace. In *The Grass-Widow's Tale*, for example, Bunty Felse at the outset is feeling frustrated that her husband and son are going to be absent on her forty-first birthday, doubtful about her identity and accomplishments, and gloomy as she ponders "age, infirmity, and death." The plot of this novel takes many

surprising twists and turns before focusing on the solution of a murder and robbery case, a case that becomes the occasion for Bunty to find renewed meaning in her life and to discover some precious truths about the nature of human love.

A MORBID TASTE FOR BONES

In *A Morbid Taste for Bones: A Mediaeval Whodunnit* (1977), the first chronicle of Brother Cadfael, Peters begins with the background for the Shrewsbury monks' mission to Wales to obtain the bones of Saint Winifred and proceeds to dramatize the initial results of that mission and to establish the novel's major characters and subplots. It is only on page 91 of this 256-page novel that a murder case surfaces.

Once the scenes have been set and the characters established, Peters's detective novels become absorbingly suspenseful and often contain exciting action scenes. *The Grass-Widow's Tale* includes a terrifying episode in which Bunty and her companion, Luke, must fight their way out of a cottage in which they are being held by a gang of ruthless professional criminals who are planning to murder them. *Saint Peter's Fair* (1981), one of the most suspenseful of the Brother Cadfael chronicles, features a remarkable chase-and-rescue sequence.

A highly skillful creator of suspense, Peters proves to be at least as gifted as a student of human character. She has explained her interest in crime novels thus:

The paradoxical puzzle, the impossible struggle to create a cast of genuine, rounded, knowable characters caught in conditions of stress, to let readers know everything about them, feel with them, like or dislike them, and still to try to preserve to the end the secret of which of these is a murderer—this is the attraction for me.

BROTHER CADFAEL

The most successfully realized of Peters's characters is Brother Cadfael, who combines worldly wisdom and experience with moral and spiritual insight. He is a middle-aged man who entered monastic life after fighting for many years in the Crusades. His experiences and travels to such places as Venice, Cyprus, and the Holy Land afforded him a knowledge of human nature unusual in a monk and developed in him

courage and a liking for adventure. He came to know not only the ways of men but also those of women; he has been a lover as well as a warrior, and he readily acknowledges that he committed a fair share of “mischief” as a younger man.

This “mischief” is to be distinguished, however, from evil. Brother Cadfael is essentially a good man. It was the desire to develop his spiritual side that led him to retire to the Benedictine abbey at Shrewsbury, where he has been living as a monk for fifteen years when the chronicles begin.

Cadfael’s experiences of a life of action set him apart from most of the other monks; his experiences as a monk, in turn, set him apart from people living a worldly life. Even his birthplace sets him apart: He is a Welshman in an English monastery. Like many other famous detective heroes, Cadfael is unique in his milieu, a more complete person than his contemporaries. As a man of action, moreover, he shares the abilities, though never the ruthlessness, of hard-boiled detectives, while as a participant in the contemplative life, he bears some resemblance to armchair detectives.

MONK’S-HOOD

At the abbey, Brother Cadfael is in charge of a flourishing garden. He specializes in herbs used for seasoning and medicine. Some of these herbs can be dangerous, and, to Cadfael’s horror, malefactors sometimes steal them from the garden to use them as poisons. Cadfael becomes involved in several of his cases through such circumstances. In *Monk’s-Hood*, for example, he commits himself to solve the murder of Master Bonel, who died after being served a dinner sent from the monastery. The dish proved to be laced with liniment prepared by Cadfael himself and containing monkshood (wolfsbane), a deadly poison.

Cadfael’s garden is a living symbol of the hero himself as well as of the human world around him. Growth takes place there, as it does in human life, growth of things either healthful and nourishing or harmful. Just as Brother Cadfael cultivates, nurtures, and controls his plants, so too does he foster the proper kinds of growth in his community. In a number of the chronicles, Cadfael has a young assistant, a novice monk whom he lovingly guides toward psychological and spiritual maturity. Sometimes this guidance takes

the form of transplanting. In *A Morbid Taste for Bones*, Cadfael recognizes that Brother John lacks a vocation for the monastery and eventually helps him to begin a new life with the woman with whom he falls in love in Wales.

THE DEVIL’S NOVICE

In *The Devil’s Novice* (1983), Cadfael obtains justice for Brother Meriet, a “green boy” who has been banished to the monastery for a crime he did not commit. Cadfael’s detective activities extend the gardening metaphor further—he weeds out undesirable elements in his community and distinguishes the poisonous from the harmless. Cadfael’s herbs are most beneficial as medicinal aids, and he himself is, ultimately, not merely an amateur detective but also a healer of physical, moral, and spiritual maladies.

In his role as healer, Brother Cadfael exemplifies Peters’s principal concerns as a novelist. She has commented, “It is probably true that I am not very good at villains. The good interest me so much more.” Her villains are typically motivated by ambition or greed, dehumanizing vices that lead them to murder and treachery. The element of treachery makes Cadfael’s cases something more than simply puzzles to be solved; it invests them with an enhanced moral dimension. Peters declares that she has “one sacred rule” about her detective fiction, apart from treating her characters “with the same respect as in any other form of novel”:

It is, it ought to be, it must be, a morality. If it strays from the side of the angels, provokes total despair, willfully destroys—without pressing need in the plot—the innocent and the good, takes pleasure in evil, that is unforgivable sin. I use the word deliberately and gravely.

The villains in the Brother Cadfael series characteristically attempt to destroy “the innocent and the good.” Brother Cadfael repeatedly becomes involved in his cases when a young person is unjustly accused of murder. In *A Morbid Taste for Bones*, for example, Engelard, an exiled Englishman in love with the Welsh squire Rhisiart’s daughter, is wrongly thought to have killed Rhisiart, who had opposed Engelard’s suit. The murderer proves instead to be a fanatically ambitious young monk. Brother Cadfael works to prove the innocence of Master Bonel’s stepson Edwin when Bonel

dies of poisoning in *Monk's-Hood*. A complicating motivational force in this novel is the fact that Edwin is the son of Richildis, Cadfael's sweetheart of long ago, whom he has not seen in forty-two years.

**THE LEPER OF SAINT GILES AND
THE SANCTUARY SPARROW**

In *The Leper of Saint Giles* (1981), the lovely Iveta is about to be married by her ambitious and greedy guardians to a man she does not love. When that man's mangled body is found in a forest, the man she loves is accused of the murder, and Brother Cadfael steps in to prove that he is innocent. Cadfael saves Liliwin, a traveling performer who seeks sanctuary at the abbey, and proves his innocence of robbery and murder in *The Sanctuary Sparrow* (1983).

**ONE CORPSE TOO MANY AND SAINT
PETER'S FAIR**

Although threats to innocent young men in the Brother Cadfael chronicles usually take the form of false accusations of crime, threats to innocent young women tend to involve actual or potential entrapments requiring their rescue, as in *One Corpse Too Many* (1979) and *Saint Peter's Fair*. Peters's young female characters are not passive victims, however, but intelligent, persistent, and courageous, and they frequently work with Brother Cadfael in solving his cases. In doing so, these young women are motivated not only by the desire for justice but also by love. Young love, at first thwarted and then fulfilled, is omnipresent in these novels, and Brother Cadfael is its chief facilitator. As surely and steadily as he brings murderers to the bar of justice, he brings lovers to the altar of marriage. The chronicles of Brother Cadfael follow the literary tradition of social comedy: affirming love; thwarting whatever blocks it; reestablishing the social order that has been upset by ambition, greed, and murder; and promoting the continuity of that order in future generations.

Although Edith Pargeter will ever be better known as her alter ego, Ellis Peters, the success of the Brother Cadfael series brought recognition to all of her writings. In 1991 Mysterious Press began reissuing the Felse novels, and these were followed in 1993 by *The Heaven Tree* (1960), *The Green Branch* (1962), and *The Scarlet Seed* (1963) bound as a set and re-

christened the *Heaven Tree* trilogy. Though these historical novels did not enjoy the acclaim of the Brother Cadfael series, they were created with the same eye for detail and filled with the lively atmosphere of medieval Britain.

BROTHER CADFAEL'S PENANCE

The last Brother Cadfael novel, *Brother Cadfael's Penance* (1994) was published a year before the author's death. The venerable series attained even greater fame when the BBC produced several television installments starring Derek Jacobi as Brother Cadfael. The books have also been recorded, and an entire line of Brother Cadfael paraphernalia, including maps, handbooks, needlework, glassware, and numerous trinkets, is available in the United Kingdom and the United States.

To Peters this was all icing on the cake; her goals were purely literary when she was writing her historical characters, "to demonstrate," as Rosemary Herbert wrote in *Publishers Weekly* in 1991, "that people from distant ages can be portrayed with vitality and intimacy." In this, Peters more than succeeded—millions mourned her death at the age of eighty-two and the loss of her extraordinary creations.

Died: Broadclyst, Exeter, England; December 29, 1960

Also wrote as Harrington Hext

Types of plot: Amateur sleuth; police procedural

PRINCIPAL SERIES

John Ringrose, 1925-1926

Avis Bryden, 1932-1933

PRINCIPAL SERIES CHARACTERS

JOHN RINGROSE, recently retired from the Criminal Investigation Department of Scotland Yard, first appears as a central character in *A Voice from the Dark* (1925). Made wiser and cynical by his years with the yard, Ringrose relies on hard-nosed investigation and careful analysis based on fact.

AVIS BRYDEN, born Avis Ullathorne, is a young woman reared in humble surroundings who becomes the mistress of a Devonshire farmer, Peter Bryden, and bears his child.

CONTRIBUTION

Eden Phillpotts's significance in the history of mystery and detective fiction derives largely from his occasional inventiveness in the matter of how fictional crimes are committed and, more important, from his highly detailed and carefully crafted descriptions of southwest England, the setting for most of his work. This area, which includes Dartmoor National Park, contains hundreds of square miles of rolling moorland, within which are mysterious mists, fierce winds, and peaceful villages. His careful evocation of the spirit of this region informs almost all of his fiction.

Phillpotts also achieved some standing in the English literary community for his novels about the moors, and his forays into detective fiction certainly helped to legitimize the genre for many in the English-reading public.

BIOGRAPHY

Eden Phillpotts was born in Mount Abu, India, on November 4, 1862, to Captain Henry Phillpotts, an Indian army officer, and Adelaide Matilda Sophia Waters, whose father worked for the Indian civil service. When he was three years old, his father died, and his mother, barely twenty-one years old, returned to Devonshire, England, taking Eden and his two brothers with her. He was educated at public school in Plymouth, which he left at the age of seventeen for a clerk's job in an insurance firm in London. Phillpotts studied acting for several years in his spare time but decided that he was not suited to it and began trying his hand at writing. By 1890, he had become somewhat successful at marketing some of his writing, and he left his job with the insurance company to become an assistant editor for *Black and White*, a minor periodical. Practice and an enormous creative energy enabled Phillpotts to give up his editorial work and devote himself full-time to writing. He moved from London to Devon, settling first at Torquay, where he spent thirty years. In 1929, he moved to Broadclyst, a town near Exeter, and not far from the Dartmoor National Park. He remained at Broadclyst until his death in 1960.

In 1892, while still in London, Phillpotts was married to Emily Topham. Together they had a son, Henry Eden, born in 1895, and a daughter, Mary Adelaide, born in 1896. Soon after his wife died in 1928, Phill-

potts was married to Lucy Robina Joyce Webb, the daughter of a physician.

During his long life, Phillpotts wrote more than one hundred novels, of which nineteen were tales of mystery and detection. He also wrote some forty-five plays, numerous short stories, verse, and children's literature. In addition, he published essays, travel writing, and memoirs. At his death he also left behind some six thousand letters written during his lifetime.

ANALYSIS

Eden Phillpotts began his novel-writing career with a work of detective fiction—*The End of Life* (1891)—and produced many other detective novels and short stories over the course of the next sixty years. Of the twenty-some works in the detective genre, only *The Grey Room* (1921), “*Found Drowned*” (1931), and *The Red Redmaynes* (1922) have earned much positive critical attention. Never an innovator, Phillpotts brought a solid knowledge of craft and a fine eye for detail to his detective fiction. While some of the plot complications and their resulting denouements stretch credibility to the breaking point, his painstaking delineations of the people and places of the Moorlands give his work a ring of authenticity. In fact, Phillpotts's detective novels are, for the most part, examples of the work of a local colorist whose story lines are really subservient to his celebration of the region.

Southwest England was the area to which Phillpotts's mother brought him from India in 1865, and southwest England, specifically Devon and Cornwall and the area known as Dartmoor, is the place to which he returned when his writing gave him independence. For sixty years, he wrote about the place and its people. Agatha Christie, whose work Phillpotts encouraged when she was very young, dedicated *Peril at End House* (1932) to Phillpotts, whom she called “the Hardy of the Moors.”

The use of setting as a major element in mystery and detective fiction was certainly not a new idea; in the work of writers such as Raymond Chandler, for example, setting can play a major part in shaping the motivation of characters and in establishing tone. In Phillpotts's fiction, however, setting has little impact on the characters. Instead, it is often the subject of long, slow

passages in which the writer rhapsodizes about the physical beauty of a particular place or geographic feature. These passages seldom have anything to do with driving the narrative or complicating the plot. It is as if the writer pauses in mid-story to comment on a matter unrelated to the action. That these passages are carefully written, providing accurate pictures of the region Phillpotts knew so well, does not mitigate their deadening effect on the story itself.

THE THING AT THEIR HEELS

The detectives with whom Phillpotts peopled his novels fall into two rather general categories: those who are inexperienced and given to a number of false starts and those who are much older and much less naïve about the potential for wrongdoing that lies just beneath the surface of many an innocent-looking person. The writer's worldview as evidenced by these creations seems not to differ significantly from the standard values of early twentieth century English society. Villains are villains primarily because of flaws in their characters and not because of flaws in their social environment. Persons whose views differ markedly from those of the majority are suspect. For example, in *The Thing at Their Heels* (1923), which Phillpotts wrote under the pseudonym Harrington Hext, four people are murdered by a clergyman who is a social-reform zealot. The reader soon realizes that the clergyman's views are so far afield from those of his community that he is suspect. Further, Phillpotts's world is one in which hard work, honesty, and thrift are rewarded. Greed of any kind—but particularly the lust for money—is the soil in which evil grows.

THE MARYLEBONE MISER

Solving crimes is not always easy for Phillpotts's detectives. He strews endless numbers of red herrings in their paths, confusing them and many of his readers in the process. Moreover, Phillpotts tries out most of the then-standard conventions in the genre, appearing in the process to be more interested in whether he can use the convention than in its applicability to the tale he is telling. In *The Marylebone Miser* (1926), for example, a Scotland Yard detective named Ambrose and the retired Central Investigations Department man John Ringrose are involved in a locked-room mystery. Yet the focus of the action in this lumbering story is on

murders that occur elsewhere, and the mystery of who killed an old miser in the locked room is left largely unresolved at the end of the novel.

THE GREY ROOM AND THEY WERE SEVEN

Another characteristic of Phillpotts's detective novels is his penchant for inventing bizarre means for committing crimes. In one of his best-known novels, *The Grey Room*, persons who spend the night in a particular bedroom are found dead in the morning. After endless peregrinations and exhaustive analyses of possibilities, Phillpotts finally reveals to his readers that the bed belonged to members of the Borgia family, who used it to murder their enemies by an ingenious method of causing poison to be emitted from the bed covers whenever anyone lay on it for a period of time. Other novels, for example, "*Found Drowned*" and *Monkshood* (1939), feature murderers who use rare and almost impossible-to-detect poisons. In *They Were Seven* (1944), seven people, all cousins, conspire in an unlikely fashion to murder an uncle, but they bungle the attempt. A Scotland Yard detective, no less a bungler, muddles through in the end, but the book contains one improbability after another.

"FOUND DROWNED"

On a few occasions, Phillpotts managed to get most things right and produced work that serious students of the genre have admired. One such example is "*Found Drowned*." Two friends, a small-town police officer and a retired physician, are given depth of character rarely seen in Phillpotts's detective fiction. They exude a certain warmth, and they are not without wit. Phillpotts mixes in popular notions about politics, and he introduces a private investigator to aid the two friends in the resolution of the single murder that occurs in the novel. Shorter than many of his other novels, "*Found Drowned*" is more tightly constructed and is mercifully freer of long-winded passages describing the landscape. His use of rural dialect in contrast with the somewhat stilted speech of the central characters gives the tale another nice touch.

THE RED REDMAYNES

The Red Redmaynes is another Phillpotts novel that, though extraordinarily long, is well controlled. It features an American private detective, Peter Ganns. He is full of idiosyncrasies, but he is equal to the task

at hand: tracking down a villain who is the murderer of the brothers Redmayne. Though the novel is primarily set in Cornwall, the action ranges as far away as Italy, and the suspense is well maintained.

BRED IN THE BONE

Three of Phillpotts's mystery novels featured Avis Bryden, born Avis Ullathorne, who first appears in *Bred in the Bone* (1932). The young woman, the wife of farmer Peter Bryden, meets a police inspector, Victor Midwinter, who is in the area to investigate a murder in which her husband appears to be involved. By the novel's end, Avis has become the instrument of her deranged husband's death, but she has earned the respect of Inspector Midwinter.

Serious students of the genre should be familiar with Phillpotts's fiction because it provides some indication of the wide variety of the sort of detective writing that was being produced in the United States and England during the 1920's and 1930's. For the most part, however, his mystery and detective fiction is unremarkable, and few of his characters remain long with the reader.

NANCY PICKARD

Born: Kansas City, Missouri; September 19, 1945

Types of plot: Amateur sleuth; cozy

PRINCIPAL SERIES

Jenny Cain, 1984-

Eugenia Potter, 1993-

Marie Lightfoot, 2000-

PRINCIPAL SERIES CHARACTERS

JENNIFER “JENNY” CAIN is the daughter of Massachusetts clam entrepreneurs, James Damon Cain III and his first wife, Margaret. She earned a master’s degree in business administration from the Wharton School of the University of Pennsylvania. A trust fund supplements the income she earns as Port Frederick Civic Foundation director. In her thirties, she balances the complex dynamics presented by her younger sister, parents, friends, coworkers, enemies, husband Geof Bushfield, and his son David Mayer. Although Jenny is from the upper class, she is concerned about the welfare of people in her community. She seeks answers to family secrets that perplex and frustrate her.

EUGENIA “GENIA” POTTER is a widowed chef in her sixties. Originally from Iowa, she lives on a vast Arizona ranch that her husband had bought. Genia’s property also includes a house in Maine, and she often visits family in Rhode Island. She collects and tests recipes, which she shares with friends. An amateur sleuth, she investigates deaths and crimes that occur among relatives and acquaintances or occur at locations where she travels.

MARIE LIGHTFOOT is the pseudonym of a true-crime author who was born in northwestern Alabama and lives in Bahia Beach, Florida. Born to social activists Michael Folletino and Lyda Folletino, Marie was raised by her aunt and uncle with her cousin Nathan after her parents allegedly abandoned her. A journalist, she writes fact-based crime books, earning significant income and fame. Residing in a gated community near the shore, Marie prefers her solitude, although she pursues a relationship with divorced African American state attorney Franklin DeWeese, which of-

ten complicates her life because of their sometimes conflicting professional and personal interests.

CONTRIBUTION

Nancy Pickard was one of the first female mystery writers to introduce feminist elements to traditional cozy mysteries in the early 1980’s, depicting a female amateur sleuth with a career unlike previous female protagonists, who solved mysteries without professional commitments interfering with or benefitting their efforts. In her later works, Pickard has continued creating affluent, savvy protagonists and supporting characters who are educated and experienced in their fields, earn incomes, and contribute to their communities economically and intellectually.

Pickard’s versatile sleuths enable her to incorporate diverse elements to portray autonomous, competent women who can tackle crooks using new resources, such as computing skills, to investigate financial fraud and white-collar crimes. Pickard’s novels preceded mysteries by such authors as Linda Grant, Carolyn Hart, and Joan Hess, who featured corporate or entrepreneurial women sleuths.

Most critics and peers consider Pickard an exemplary mystery author, and her talents have been recognized with numerous awards. In 1986, Pickard’s second novel, *Say No to Murder* (1985), received the initial Anthony Award for best paperback original at the Bouchercon Mystery Convention. Malice Domestic Mystery Convention attendees voted for Pickard’s novel *I.O.U.* (1991) to receive an Agatha Award. That mystery also won a Shamus Award from the Private Eye Writers of America and was a Mystery Writers of America’s Edgar Allan Poe Award nominee. Pickard’s mystery, *The Virgin of Small Plains* (2006), was nominated in 2007 for both Edgar and Agatha best novel awards.

BIOGRAPHY

Nancy Pickard was born Nancy J. Wolfe on September 19, 1945, in Kansas City, Missouri, to Clint Wolfe and Mary Wolfe. As a child, she enjoyed read-

ing Nancy Drew books. After high school graduation in 1963, she enrolled in journalism school at the University of Missouri. When she was a senior, Pickard took a creative writing class. The teacher mocked aloud to the class a short story she had written, inhibiting Pickard from writing additional fiction. She completed a bachelor's degree in 1967.

Pickard reported for *The Squire* in Overland Park, Kansas, then wrote training programs for Western Auto at Kansas City, Missouri, through 1972, before seeking freelance writing assignments. In 1976, she married Guy Pickard and lived on a Flint Hills, Kansas, ranch. By 1981, Pickard had stopped writing freelance articles and turned to fiction. An avid reader, especially of mysteries, she relied on her reading experiences and writing guides rather than formal instruction to create mysteries. She soon sold a short story, "A Man Around the House," to *Ellery Queen's Mystery Magazine*.

During the early 1980's, an editor rejected Pickard's initial novel, saying the manuscript confused her as to whether it was a mystery or romance with suspense. She considered those comments and focused on mystery, resulting in her first published novel, *Generous Death* (1984).

Pickard's son, Nicholas, was born in 1983 (she and her husband later divorced). That year, Pickard read Virginia Rich's mystery, *The Cooking School Murders* (1982), and wrote Rich, who responded, telling Pickard she had a fourth book in progress. After Rich's death in 1985, her husband asked Pickard to complete that author's fourth Eugenia Potter book, *The Twenty-seven-Ingredient Chili Con Carne Murders* (1993), and allowed her to continue the series.

Throughout the 1980's, Pickard wrote mystery novels prolifically. Despite her success with novels and her initial success in the short-story form, she was unable to sell other short stories. At a writer's conference, a speaker emphasized that short stories must include epiphanies. Pickard began applying that revelation to her stories, publishing her work in *Alfred Hitchcock's Mystery Magazine*, *Mystery Scene*, *Armchair Detective*, and numerous anthologies. She studied peers' books, especially Sue Grafton's mysteries, to improve her writing techniques. Pickard edited sev-

eral mystery anthologies and contributed a chapter to the serial novel *Naked Came the Phoenix* (2001).

In 1986, Pickard helped establish Sisters in Crime (SIC) and served on that organization's first steering committee. From 1988 to 1989, Pickard presided as SIC president. She also was active in the Mystery Writers of America (MWA), becoming a member of that group's national board. Pickard's experiences on the MWA committee choosing an Edgar Allan Poe Award true-crime book winner resulted in her analyzing those books' structure. Her contemplation served as a catalyst for her trilogy featuring true-crime author Marie Lightfoot.

In 1990, Pickard's favorite Jenny Cain mystery, *Bum Steer*, set on a Kansas ranch, was published. The Kansas City, Kansas, public library presented Pickard its Edgar Wolfe Award in 1997. Pickard collaborated with psychologist Lynn Lott to write *Seven Steps on the Writer's Path: The Journey from Frustration to Fulfillment* (2003), describing her struggles as a writer. Tired of series writing, Pickard wrote *The Virgin of Small Plains*, published in 2006. Pickard has spoken at writers' conferences. She has served on panels at Boucheron, and has led workshops at SIC meetings.

ANALYSIS

Nancy Pickard depicts resourceful, independent female protagonists in her mysteries, emphasizing their intelligence, bravery, and competence. Her characters and plots represent many of the qualities found in innovative mysteries featuring female sleuths and detectives written by female authors including Margaret Maron and Sue Grafton in the 1980's. Pickard's sleuths exemplified similar traits of strength, resilience, and perseverance. Creating appealing narrators, she sought to provide readers with entertainment as well as to offer protagonists with whom they could identify.

Although the structures of Pickard's series varied, her writing style exhibited constants, especially strong voice, effective use of setting, and intricate layers of seemingly unrelated characters and events to hide clues and enable plot twists revealing connections. Her characterizations were strengthened with humor, often dark. Although criticisms of her writing have

noted that her narratives often include too much explanation and that some of her character development is implausible or flat, many reviewers have praised Pickard's ingenious plots and pacing.

Pickard focuses on the theme of family in most of her mysteries. Characters feel compelled to support their relatives emotionally despite deceptions and other wrongdoings inflicted on them. Family is equated with other themes, particularly power and prestige. The absence of strong family ties can be detrimental to characters who lack supporters to defend and protect them. Without an intact family structure, characters struggle against outsiders' biases, often negative or incorrect, which shape public opinion. Varying forms of family, offered by lovers and friends, bolster characters. Family can paradoxically provide characters with safety or weaken them. The theme of disintegration, represented by people falling apart financially or emotionally, intensifies the somber tones of such Pickard novels as *Marriage Is Murder* (1987).

Social issues are important aspects of Pickard's mysteries, often enhancing characterizations and strengthening plots. Pickard became aware of such concerns, particularly mental health, because her grandmother died in a state mental hospital, similar to Jenny's mother dying in a private facility. Coming of age during the 1960's, she witnessed social movements demanding improvements. Her friends participated in assisting abused spouses and indigent people, increasing Pickard's knowledge of how bureaucracy and politics affect services, which provided her details to improve the authenticity of her characters' conflicts. Altruism is present as some characters strive to help people, despite their flaws, reinforcing character development within her novels and throughout her series.

Pickard's settings help reflect her characters' moods and establish tones to alert readers to potentially dangerous situations and people capable of inflicting pain and anguish. Her small communities, in New England and the Midwest, both nurture and stifle characters. The seemingly pleasant ocean community of Port Frederick deceptively contains vengeful residents. The prairie's bleak territory intensifies characters' fears and sense of isolation. Fog rolls across scenes and in people's minds to convey sinister ele-

ments and distortion. Twilight in her novels blinds and confuses people. Snow proves deadly and conceals crimes. Storms and fires obliterate evidence necessary to determine the truth and expose secrets.

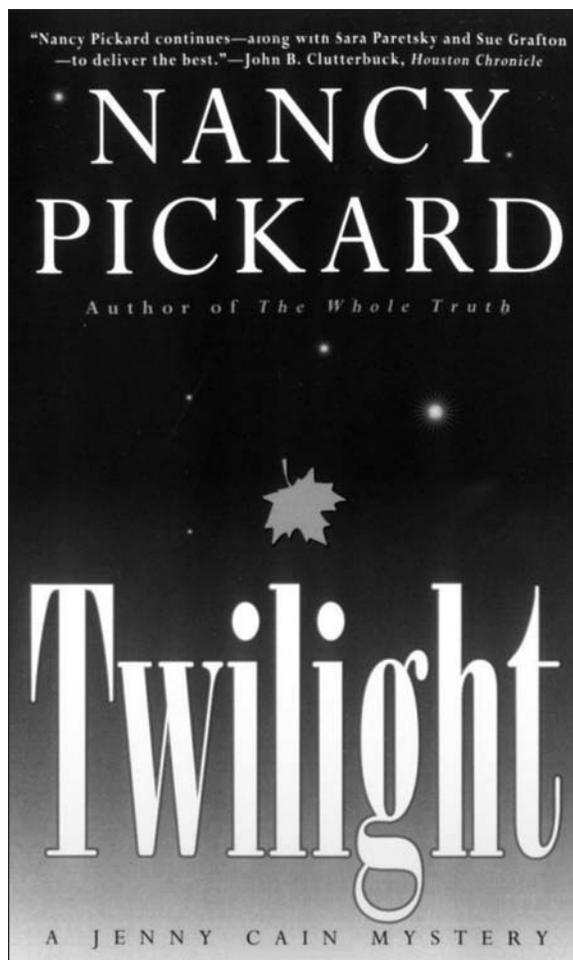

I.O.U.

In *I.O.U.*, commitment to duty and truth guide Jenny Cain, whom Pickard introduced in *Generous Death*, as she grieves after her mother Margaret Cain's death and is confronted by physical and emotional threats. At the cemetery, someone shoves Jenny and murmurs a request for forgiveness. Unsure who spoke to her, she initiates inquiries in an attempt to comprehend what happened to her mother to cause her to become mentally ill and institutionalized in a psychiatric facility. Her mother's emotional collapse occurred just as Jenny's family's business, Cain Clams, declared bankruptcy, terminating the employment on which many Port Frederick residents relied.

Jenny starts with research at the library, applying her business knowledge in her investigation. She interviews her family, including her aloof father, unaware of the impact he has had on the community; colleagues; and friends. Jenny feels accountable to her mother and the community, feeling she owes them a debt that must be repaid through her deeds. As she boldly pushes to determine the truth, Jenny risks agitating enemies and encounters perils, including becoming exhausted and almost suffocating on carbon monoxide in her car. Some people think she has tried to commit suicide, which causes Jenny to question her mental well-being and consider leaving her professional position. Themes of wealth and greed and tones of despair interplay as Jenny reassesses her assumptions regarding familial and community relations, revealing that trusted relatives and friends can be liars and foes.

TWILIGHT

Clarity and transition are the underlying themes of *Twilight* (1995), the tenth Jenny Cain mystery, which resolves many issues present throughout the series. As the Judy Foundation's director, Jenny is planning a fall festival; however, she despairs as she is unable to obtain the necessary insurance coverage and fears that she will run out of time to do so. Antagonists, particularly Peter Falwell, a former employer, enjoy taunting Jenny, saying that the festival will be canceled.

Additionally, Jenny becomes involved in a controversy debating whether a nature trail should be closed because several people, including a young girl, have died at a highway crossing. Enduring angry fundamentalists and environmental protestors who burn her in effigy, Jenny finds comfort in runes that her delivery woman Cleo Talbot interprets for her. Devastating fires and physical attacks, including a brutal assault on David Mayer, Jenny's stepson, and the unresolved insurance dilemma intensify suspense.

Child characters and several adults who interact with Jenny emphasize themes of innocence and vulnerability, while pride and opportunism set the tone for others' hostile actions and deceptions for monetary and egotistical gain. Jenny's family and friendship ties are reinforced, and enemies' true intentions are ex-

posed as transparency and serenity replace the confusion Jenny associates with twilight.

THE TRUTH HURTS

The third volume of Pickard's Marie Lightfoot series, *The Truth Hurts* (2002), explores Marie's past, which the previous books, *The Whole Truth* (2000) and *Ring of Truth* (2001), foreshadowed. Confronted by a tabloid's claim that her parents were racists, Marie is shaken. She is unsure of the truth because her parents abandoned her in 1963 when she was a baby. When she receives threatening e-mails from a man named Paulie Barnes, Marie fearfully submits to his requests to write a book that will feature her murder. Suspense builds as Barnes sends Marie a copy of John MacDonald's *The Executioners* (1958) and mails her an airplane ticket to Birmingham, Alabama, near her hometown of Sebastian. Marie's cousin Nathan arrives in Sebastian, lured there by Barnes, whom Marie desperately is seeking to identify. She questions residents who knew her parents in 1963, gaining self-knowledge and revising her perceptions of civil rights and family history. She discovers and embraces some truths.

The theme of truth resonates in these three books. Structurally, chapters present Marie's published account of a true crime, often manipulating facts to protect people, in past tense; she narrates present-tense sections, divulging her thoughts and what she perceives is true. Characters' misperceptions and paradoxes contribute to plots twists, exposing truths.

THE VIRGIN OF SMALL PLAINS

In *The Virgin of Small Plains*, which takes place in 2004, Abby Reynolds slides into a ditch while driving on an icy road because she had been startled by the sight of her former boyfriend Mitch Newquist's elderly mother wandering through a snowy cemetery near Small Plains, Kansas. Flashing back to 1987, when she was in high school, Abby recalls when her relationship with Mitch abruptly ended. Alternating characters' perspectives reveal what each person experienced seventeen years before: Mitch was at Abby's house when he watched, horrified, while Abby's physician father and the sheriff disfigured a woman's corpse. When Abby went to Mitch's house the next day, he was gone and his parents refused to tell her where he went.

In the Small Plains cemetery where Abby saw Mitch's mother, an unknown girl was buried. Credited with miracles, she has been dubbed the Virgin of Small Plains, and people flock to her grave desiring her help. Abby is determined to identify the girl and mark her grave properly. Shifting between 1987 and 2004, Pickard presents clues about both past and present events. Themes of memory, betrayal, and lost innocence strengthen the plot as Abby deals with Mitch's return. The Kansas prairie personifies this mystery's suspense, enhancing elements of solitude and foreboding. Weather represents perils the characters endure as they encounter deception and violence from people they trust. Like most of Pickard's fiction, fear and terror boil underneath the surface of seemingly innocuous people and places.

Based on an interview with Pickard, reveals how she perceives her writing changed during three phases of her career, undergoing doubt then confidence to alter and enhance her style and techniques.

EDGAR ALLAN POE

Born: Boston, Massachusetts; January 19, 1809

Died: Baltimore, Maryland; October 7, 1849

Types of plot: Amateur sleuth; psychological

PRINCIPAL SERIES

C. Auguste Dupin, 1841-1844

PRINCIPAL SERIES CHARACTER

C. AUGUSTE DUPIN is a young French gentleman of an illustrious family who has been reduced to living on a modest inheritance in Paris. Extremely well-read, highly imaginative, and master of a keen analytical ability, Dupin is the original armchair detective, the progenitor of every amateur sleuth in detective fiction from Sherlock Holmes to the present.

CONTRIBUTION

Although Edgar Allan Poe's career was relatively short, he was the leading figure in the mid-nineteenth century transformation of the legendary tale into the form now known as the short story. Experimenting with many different styles and genres—the gothic tale, science fiction, occult fantasies, satire—Poe gained great recognition in the early 1840's for his creation of a genre that has grown in popularity ever since—the tale of ratiocination, or detective story, which features an amateur sleuth who by his superior deductive abilities outsmarts criminals and outclasses the police.

“The Murders in the Rue Morgue” and “The Mystery of Marie Rogêt,” the first works in the Dupin series, created a small sensation in the United States when they were first published. Following fast on these works was “The Gold Bug,” which, although not featuring Dupin, focused on analytical detection; it was so popular that it was immediately reprinted three times. “The Purloined Letter,” the third and final story in the Dupin series, has been the subject of much critical analysis.

BIOGRAPHY

Edgar Allan Poe was born in Boston, Massachusetts, on January 19, 1809. When his parents, David Poe, Jr., and Elizabeth Arnold Poe, indigent actors,

died when he was two years old, Poe was taken in by a wealthy tobacco exporter, John Allan. In 1826, Poe entered the University of Virginia but withdrew after less than a year because of debts Allan would not pay. After a brief term in the Army, Poe entered West Point Academy, argued further with Allan about financial support, and then purposely got himself discharged. In 1831, he moved to Baltimore, where he lived with his aunt, Maria Clemm, and her daughter Virginia.

After winning a short-story contest sponsored by a Philadelphia newspaper, Poe was given his first job as an editor on the *Southern Literary Messenger* in Richmond, Virginia. During his two-year tenure, he gained considerable public attention with his stories. With the end of that job, Poe, who had by this time both a new wife (his cousin Virginia) and his aunt to support, took his small family to Philadelphia, where he published some of his best-known works—*The Narrative of Arthur Gordon Pym* (1838), “Ligeia,” “The Fall of the House of Usher,” and “William Wilson.”

At this point, Poe discovered a new way to capitalize on his popularity as a critic, writer, and generally respected man of letters. He joined the lecture circuit, delivering talks on poetry and criticism in various American cities. Poe continued to present lectures on literature for the last five years of his life, with varying degrees of acclaim and success, but never with enough financial reward to make his life comfortable. Even the immediate sensation created by his poem “The Raven,” which was reprinted throughout the country and which made Poe an instant celebrity, still could not satisfy the need for enough funds to support his family.

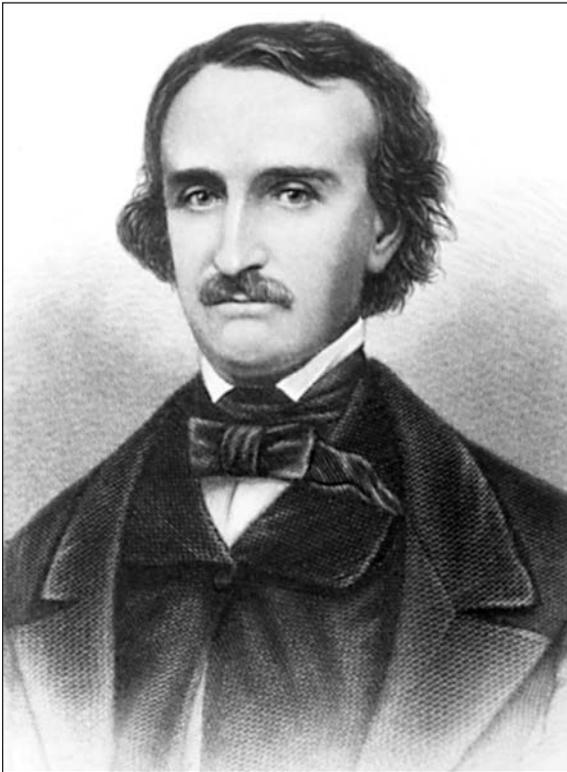

On a trip from Richmond to New York, Poe, a man who could not tolerate alcohol, stopped in Baltimore and began drinking. After he was missing for several days, he was found on the street, drunk and disheveled. Three days later, he died of what was diagnosed as delirium tremens.

ANALYSIS

Although Edgar Allan Poe is credited as the creator of the detective story and the character type known as

the amateur sleuth, C. Auguste Dupin and his ratiocinative ability were clearly influenced by other sources. Two probable sources are Voltaire's *Zadig: Ou, La Destinée, Histoire orientale* (1748; *Zadig: Or, The Book of Fate*, 1749) and François-Eugène Vidocq's *Mémoires de Vidocq, chef de la police de Sûreté jusqu'en 1827* (1828-1829; *Memoirs of Vidocq, Principal Agent of the French Police Until 1827*, 1828-1829). Poe mentions *Zadig* in "Hop-Frog" and thus most likely knew the story of *Zadig's* ability to deduce the description of the king's horse and the queen's dog by examining tracks on the ground and hair left on bushes. He also mentions Vidocq, the first real-life detective, in "The Murders of the Rue Morgue" as a "good guesser," but one who could not see clearly because he held the object of investigation too close.

Poe's creation of the ratiocinative story also derives from broader and more basic interests and sources. First, there was his interest in the aesthetic theory of Samuel Taylor Coleridge, heavily indebted to nineteenth century German Romanticism. In several of

Edgar Allan Poe. (Library of Congress)

Poe's most famous critical essays, such as his 1842 review of Nathaniel Hawthorne's *Twice-Told Tales* (1837) and his theoretical articles, "Philosophy of Composition" in 1846 and "The Poetic Principle" in 1848, Poe develops his own version of the theory of the artwork as a form in which every detail contributes to the overall effect. This organic aesthetic theory clearly influenced Poe's creation of the detective genre, in which every detail, even the most minor, may be a clue to the solution of the story's central mystery.

The development of the mystery and detective genre also reflected the influence of gothic fiction. The gothic novel, based on the concept of hidden sin and filled with mysterious and unexplained events, had, like the detective story, to move inexorably toward a denouement that would explain all the previous puzzles. The first gothic novel, Horace Walpole's *The Castle of Otranto* (1765), with its secret guilt and cryptic clues, was thus an early source of the detective story.

A third source was Poe's fascination with cryptograms, riddles, codes, and other conundrums and puzzles. In an article in a weekly magazine in 1839, he offered to solve any and all cryptograms submitted; in a follow-up article in 1841, he said that he had indeed solved most of them. Although Poe demonstrated his skill as a solver of puzzles in many magazine articles, the most famous fictional depiction of his skill as a cryptographer is his story "The Gold Bug."

"THE GOLD BUG"

William Legrand, the central character in "The Gold Bug," shares some characteristics with Poe's famous amateur sleuth, Dupin. Legrand is of an illustrious family, but because of financial misfortunes, he has been reduced to near poverty. Although he is of French ancestry from New Orleans, he lives alone on an island near Charleston, South Carolina. In addition, like Dupin, he alternates between melancholia and enthusiasm, which leads the narrator (also like the narrator in the Dupin stories) to suspect that he is the victim of a species of madness.

The basic premise of the story is that Legrand is figuratively bitten by the gold bug after discovering a piece of parchment on which he finds a cryptogram with directions to the buried treasure of the pirate Captain Kidd. As with the more influential Dupin stories,

“The Gold Bug” focuses less on action than on the explanation of the steps toward the solution of its mystery. To solve the puzzle of the cryptogram, Legrand demonstrates the essential qualities of the amateur detective: close attention to minute detail, extensive information about language and mathematics, far-reaching knowledge about his opponent (in this case Captain Kidd), and, most important, a perceptive intuition as well as a methodical reasoning ability.

Poe’s famous gothic stories of psychological obsession, such as “The Black Cat,” “The Tell-Tale Heart,” “The Fall of the House of Usher,” and “Ligeia,” seem at first glance quite different from his ratiocinative stories of detection. In many ways, however, they are very similar: Both types depend on some secret guilt that must be exposed; in both, the central character is an eccentric whose mind seems distant from the minds of ordinary men; and both types are elaborate puzzles filled with clues that must be tied together before the reader can understand their overall effect.

“THE OBLONG BOX”

“The Oblong Box” and “Thou Art the Man,” both written in 1844, are often cited as combining the gothic and the ratiocinative thrusts of Poe’s genius. The narrator of “The Oblong Box,” while on a packet-ship journey from Charleston, South Carolina, to New York City, becomes unusually curious about an oblong pine box that is kept in the state room of an old school acquaintance, Cornelius Wyatt. In the course of the story, the narrator uses deductive processes to arrive at the conclusion that Wyatt, an artist, is smuggling to New York a copy of Leonardo da Vinci’s “The Last Supper” done by a famous Florentine painter.

When a storm threatens to sink the ship, Wyatt ties himself to the mysterious box and, to the horror of the survivors, sinks into the sea with it. Not until a month after the event does the narrator learn that the box contained Wyatt’s wife embalmed in salt. Although earlier in the story the narrator prided himself on his superior acumen in guessing that the box contained a painting, at the conclusion he admits that his mistakes were the result of both his carelessness and his impulsiveness. The persistent deductive efforts of the narrator to explain the mystery of the oblong box, combined with the sense of horror that arises from the image of the

artist’s plunging to his death with the corpse of his beautiful young wife, qualifies this story, although a minor tale in the Poe canon, as a unique combination of the gothic and the ratiocinative.

“THOU ART THE MAN”

“Thou Art the Man,” although often characterized as a satire of small-town life and manners, is also an interesting but minor contribution to the genre. The story is told in an ironic tone by a narrator who proposes to account for the disappearance of Mr. Barnabus Shuttleworthy, one of the town’s wealthiest and most respected citizens. When Shuttleworthy’s nephew is accused of murdering his uncle, Charley Goodfellow, a close friend of Shuttleworthy, makes every effort to defend the young man. Every word he utters to exalt and support the suspected nephew, however, serves only to deepen the townspeople’s suspicion of him.

Throughout the story, Goodfellow is referred to as “Old Charley” and is praised as a man who is generous, open, frank, and honest. At the story’s conclusion, he receives a huge box supposedly containing wine promised him by the murdered man before his death. When the box is opened, however, the partially decomposed corpse of Shuttleworthy sits up in the box, points his finger at Goodfellow, and says, “Thou art the man!” Goodfellow, not surprisingly, confesses to the murder.

Although the basic ironies of Charley’s not being such a “good fellow” after all and of his efforts to have the nephew convicted even as he pretended to have him exonerated are central to the story’s plot, the final irony focuses on the means by which Goodfellow is made to confess. It is Goodfellow’s frankness and honesty that causes the narrator to distrust him from the beginning and thus find the corpse, stick a piece of whale bone down its throat to cause it to sit up in the box, and use ventriloquism to make it seem as if the corpse utters the words of the title. The tale introduces such typical detective-story conventions as the creation of false clues by the criminal and the discovery of the criminal as the least likely suspect.

“THE MURDERS IN THE RUE MORGUE”

It is in the C. Auguste Dupin stories, however, that Poe develops most of the conventions of the detective

story, devices that have been used by other writers ever since. The first of the three stories, “The Murders in the Rue Morgue,” is the most popular because it combines horrifying, seemingly inexplicable events with astonishing feats of deductive reasoning. The narrator, the forerunner of Dr. Watson of the Sherlock Holmes stories, meets Dupin in this story and very early recognizes that he has a double personality, for he is both wildly imaginative and coldly analytical. The reader’s first encounter with Dupin’s deductive ability takes place even before the murders occur, when he seems to read his companion’s mind by responding to something that the narrator had only been thinking. When Dupin explains the elaborate method by which he followed the narrator’s thought processes by noticing

small details and associating them, the reader has the beginning of a long history of fictional detectives taking great pleasure in recounting the means by which they solved a mystery.

Dupin’s knowledge of the brutal murder of a mother and daughter on the Rue Morgue is acquired by the same means that any ordinary citizen might learn of a murder—the newspapers. As was to become common in the amateur-sleuth genre, Dupin scorns the methods of the professional investigators as being insufficient. He argues that the police find the mystery insoluble for the very reason that it should be regarded as easy to solve, that is, its bizarre nature; thus, the facility with which Dupin solves the case is in direct proportion to its apparent insolubility by the police.

This first illustration of Auguste Dupin appeared in an English edition of Edgar Allan Poe’s works published in London in 1851. Here, Dupin listens to the prefect of police explaining the case of the missing Marie Rogêt.

The heart of the story focuses on Dupin's extended explanation of how he solved the crime rather than on the action of the crime itself. The points about the murder that stump the police—the contradiction of several neighbors who describe hearing a voice in several foreign languages, and the fact that there seems to be no possible means of entering or exiting the room where the murders took place—actually enable Dupin to master the case. He accounts for the foreign-sounding voice by deducing that the criminal must have been an animal; he explains the second point by following a mode of reasoning based on a process of elimination to determine that apparent impossibilities are in fact possible. When Dupin reveals that an escaped orangutan did the killing, the Paris prefect of police complains that Dupin should mind his own business. Dupin is nevertheless content to have beaten the prefect in his own realm; descendants of Dupin have been beating police inspectors ever since.

“THE MYSTERY OF MARIE ROGÊT”

“The Mystery of Marie Rogêt,” although it also focuses on Dupin's solving of a crime primarily from newspaper reports, is actually based on the murder of a young girl, Mary Cecilia Rogers, near New York City. Because the crime had not been solved when Poe wrote the story, he made use of the facts of the case to tell a story of the murder of a young Parisian girl, Marie Rogêt, as a means of demonstrating his superior deductive ability.

The story ostensibly begins two years after the events of “The Murders in the Rue Morgue,” when the prefect of police, having failed to solve the Marie Rogêt case himself, worries about his reputation and asks Dupin for help. Dupin's method is that of the classic armchair detective; he gathers all the copies of the newspapers that have accounts of the crime and sets about methodically examining each one. He declares the case more intricate than that of the Rue Morgue because, ironically, it seems so simple.

One of the elements of the story that makes it less popular than the other two Dupin tales is the extensive analysis of the newspaper articles in which Dupin engages—an analysis that makes the story read more like an article critical of newspaper techniques than a narrative story. In fact, what makes Poe able to propose a

solution to the crime is not so much his knowledge of crime as his knowledge of the conventions of newspaper writing. In a similar manner, it was his knowledge of the conventions of novel writing that made it possible for him to deduce the correct conclusion of Charles Dickens's novel *Barnaby Rudge: A Tale of the Riots of '80* (1841) the previous year when he had read only one or two of the first installments.

Another aspect of “The Mystery of Marie Rogêt” that reflects Dupin's deductive genius and that has been used by subsequent detective writers is his conviction that the usual error of the police is to pay too much attention to the immediate events while ignoring the peripheral evidence. Both experience and true philosophy, says Dupin, show that truth arises more often from the seemingly irrelevant than from the so-called strictly relevant. By this means, Dupin eliminates the various hypotheses for the crime proposed by the newspapers and proposes his own hypothesis, which is confirmed by the confession of the murderer.

Although “The Mystery of Marie Rogêt” contains some of the primary conventions that find their way into later detective stories, it is the least popular of the Dupin narratives not only because it contains much reasoning and exposition and very little narrative but also because it is so long and convoluted. Of the many experts of detective fiction who have commented on Poe's contribution to the genre, only Dorothy L. Sayers has praised “The Mystery of Marie Rogêt,” calling it a story especially for connoisseurs, a serious intellectual exercise rather than a sensational thriller such as “The Murders in the Rue Morgue.”

“THE PURLOINED LETTER”

Professional literary critics, however, if not professional detective writers, have singled out “The Purloined Letter” as the most brilliant of Poe's ratiocinative works. This time, the crime is much more subtle than murder, for it focuses on political intrigue and manipulation. Although the crime is quite simple—the theft of a letter from an exalted and noble personage—its effects are quite complex. The story depends on several ironies: First, the identity of the criminal is known, for he stole the letter in plain sight of the noble lady; second, the letter is a threat to the lady from whom he stole it only as long as he does nothing with

it; and third, the Paris Police cannot find the letter, even though they use the most sophisticated and exhaustive methods, precisely because, as Dupin deduces, it is in plain sight.

Also distinguishing the story from the other two is Dupin's extended discussion of the important relationship between the seemingly disparate talents of the mathematician and the poet. The minister who has stolen the letter is successful, says Dupin, for he is both a poet and a mathematician. In turn, Dupin's method of discovering the location of the letter is to take on the identity of a poet and mathematician, thus allowing him to identify with the mind of the criminal. The method follows the same principle used by a young boy Dupin knows of who is an expert at the game of "even and odd," a variation of the old game of holding an object behind one's back and asking someone to guess which hand holds the prize. The boy always wins, not because he is a good guesser but because he fashions the expression on his face to match the face of the one holding the object and then tries to see which thoughts correspond with that expression.

The various techniques of deduction developed by Poe in the Dupin stories are so familiar to readers of detective fiction that to read his stories is to be reminded that very few essential conventions of the genre have been invented since Poe. Indeed, with the publication of the Dupin stories, Poe truly can be said to have single-handedly brought the detective story into being.

JOYCE PORTER

Born: Marple, Cheshire, England; March 28, 1924

Died: On a flight to England from China; December 9, 1990

Types of plot: Police procedural; espionage; thriller; private investigator

PRINCIPAL SERIES

Inspector Wilfred Dover, 1964-1980

Eddie Brown, 1966-1971

Constance Morrison-Burke, 1970-1979

PRINCIPAL SERIES CHARACTERS

WILFRED DOVER, detective chief inspector of Scotland Yard, is a grotesque caricature of the yard stereotype. This inept detective is obese, stupid, and petty.

SERGEANT MACGREGOR, dapper and competent, serves as Dover's foil.

EDMUND "EDDIE" BROWN, a secret agent, is as much a threat to the British intelligence service as he is to Soviet intelligence. Ineffectual and unattractive, his efforts to penetrate Soviet security are laughable at best.

THE HONOURABLE CONSTANCE ETHEL MORRISON-BURKE, or the HON-CON, a private investigator, became a detective because nothing else satisfied her desire to be active. As a gentlewoman of independent

means, the Hon-Con has the time and money to pursue her hobby. Her tactlessness and incompetence, however, short-circuit her achievements.

MISS JONES is the Hon-Con's patient and long-suffering confidant.

CONTRIBUTION

Joyce Porter's ten Inspector Dover novels, four Eddie Brown novels, and five Morrison-Burke novels lampoon the genres of police procedural, international thriller, and private investigator. Although the books generally follow the rules of each genre, the main character in each series is a spoof of the usual hero. Porter delighted in ridiculing pompous human behavior, and she excelled at poking fun at various elements in society as well as at august public institutions. Porter's novels utilize straightforward crime/spy stories as their backdrop, but her humorous jabs at officiousness provide the reader with an alternative to the standard offerings of the genres.

BIOGRAPHY

Joyce Porter was born on March 28, 1924, in Marple, Cheshire, England, the daughter of Joshua Porter and Bessie Evelyn (née Earlam) Porter. She was edu-

cated at the High School for Girls in Macclesfield, Cheshire, and at King's College in London, where she received a bachelor of arts degree with honors in 1945. She served in the Women's Royal Air Force between 1949 and 1963, attaining the rank of flight officer. While in the air force, Porter learned Russian, as she had a special interest in Russian history, especially the czarist period. She toured the Soviet Union by car in 1964.

In 1963, Porter became a full-time writer. She once said that she "began writing in order to be able to retire from [the] Air Force," and that she continued to write "because it is easier than work." She later commented that she tried "to write books that will while away a couple of hours for the reader—and make as much money as possible for me." In her writing, she used outrageously humorous "heroes" who are the very antithesis of the protagonists of such crime and mystery novelists as Frederick Forsyth, Ian Fleming, or P. D. James. Porter's series characters are all unimaginative, bumbling, and unattractive people who, if they solve their cases, do so despite themselves, not because of their insight and abilities. In addition to her novels, Porter wrote many short stories for magazines such as *Ellery Queen's Mystery Magazine* and *Alfred Hitchcock's Mystery Magazine*. She died on a flight home from China in 1990.

ANALYSIS

The novels of Joyce Porter are humorous jabs at three of the most popular genres of modern fiction: the police procedural, the international thriller, and the private-investigator novel. In her work, the common thread is human behavior reduced to absurdity. Her heroes are ludicrous antitheses of what the reader has come to expect in these genres.

Porter's most infamous character is Wilfred Dover, detective chief inspector of Scotland Yard. Dover is described in the following fashion:

His six-foot-two frame was draped, none too elegantly, in seventeen and a quarter stone [241 pounds] of flabby flesh. . . . Round his thick, policeman's neck . . . a thin, cheap tie was knotted under the lowest of his double chins. . . . Dover's face . . . was large and flabby like the rest of him. Only the details—nose, mouth and eyes—

seemed out of scale. They were so tiny as to be almost lost in the wide expanse of flesh. . . . His hair was thin and black and he had a small black moustache of the type that the late Adolf Hitler did so much to depopularize.

DOVER THREE

In *Dover Three* (1965), when it is suggested that Dover be given a case, the assistant commissioner of New Scotland Yard says, "I thought I told you to get rid of that fat, stupid swine months ago!" "I've tried, sir," replies his subordinate unhappily, "but nobody'll have him." With a primary character such as this, the reader knows immediately that Scotland Yard's reputation is in dire straits.

Dover's career, as chronicled by Porter, is always set in wretched locales far from metropolitan London. New Scotland Yard wants Dover as far away as he can be sent. He is assigned missions no one else would want. Once on the scene of the crime, Dover invariably finds miserable weather and terrain. When unattractive characters and bizarre crimes are added to the plot, the reader is quite aware that little good can possibly come from such a situation. Throughout the series, Dover's assistant, Sergeant MacGregor, provides the obligatory straight character, but MacGregor's solid procedures are always sacrificed to Dover's animalistic behavior. Inevitably, Dover's bowels or personal pique interrupt reasoned efforts to solve crimes. While on a case, Dover meets characters who are driven by the same passions that drive him—greed, petty revenge, or hatred. He does usually solve his cases, though in unorthodox and malevolent fashion.

Porter frequently twists her endings to absurd degrees. Dover may solve a case but ignore justice, for example, because of his prejudices. In *Dover Three*, while far from home, Dover dawdles in solving a case until after his hated sister-in-law has finished her visit to his home, for he knows that an early resolution to the crime would result in another confrontation at home. He selects as his culprit an aggressive upper-class woman to whom he has taken an immediate and intense dislike. During his train trip home, the real culprit confesses to Dover and then commits suicide. Dover chooses to ignore the confession. In *Dover Goes to*

Pott (1968), Dover decides that an individual whom he despises must be the guilty party. As events transpire, the suspect is indeed found to be guilty, but Dover's handling of the case virtually ensures his going free.

DOVER ONE

Most of the characters in Porter's novels are easy-to-dislike caricatures. In *Dover One* (1964), it is not only the detective who is obnoxious but also the victim, whom the reader meets only through the descriptions by other characters in the novel. A less likable victim cannot be imagined: fat, ugly, promiscuous, stupid, and an extortionist. Yet Dover solves the case, in his usual unorthodox fashion. In a typical Porter twist, the victim is discovered dismembered in the murderer's freezer. In this first novel, Dover, through a mighty leap of the imagination, chooses a suspect who is actually guilty. Other Dover novels have the detective confronted with bizarre murder and mutilation cases; a simple, uncomplicated murder is not for Dover. Porter indulges herself in long digressions on Dover's unhygienic habits and internal disorders, evidently preferring such comic essays to tightly reasoned unravelings of crimes.

NEITHER A CANDLE NOR A PITCHFORK

Porter's other characters, while not as well known, are just as ludicrous. Secret Agent Eddie Brown is sent by the British intelligence service on assignments to dangerous foreign locales, but he is a foil and a dupe rather than a superspy. One comic scene in *Neither a Candle Nor a Pitchfork* (1969) has Eddie in female disguise warding off amorous advances by a lesbian Russian official. Later, Eddie's attempt to attack a prison—a scene that might have constituted the climax of a conventional spy novel—degenerates into a pathetic joke. Indeed, the Eddie Brown novels leave the reader believing that Soviet officialdom is roughly equivalent to English officialdom. Porter hopes that the reader will ask, if that be true, how many other parallels might be drawn.

Heroines are also given an opportunity to perform in Porter's novels. Her third series character is the Honourable Constance Ethel Morrison-Burke (the Hon-Con), a gentlewoman of independent means. She becomes a detective because she is bored, her boundless energy unsatisfied by "usual" feminine activities such as calisthenics. The Hon-Con is tactless, shortsighted,

and quite naïve. Although she is frequently foolish, she is shown to be not quite the fool that most people believe her to be. Her shortcomings, however, do leave her frustrated and unsatisfied.

Porter's statement that her work is designed to "while away a couple of hours for the reader" certainly defines her style. She did not intend for her work to be incisive or insightful. Rather, she made use of the simplest form of satire: caricature. She was not interested in character development, and her characters are little more than line drawings (fat and bumbling though they may be). Her plots are also simple, and the humor usually focuses on the overtly crude and grotesque rather than on subtleties. Thus, her work is ideal for those who wish to escape for a few hours. In this regard, Porter accomplished her stated purpose.

Colonel Braxton, 1926-1930

PRINCIPAL SERIES CHARACTERS

RANDOLPH MASON is an aristocratic New York City lawyer and omniscient, shadowy force. A recluse, he serves only clients who come to him as a last resort; they receive counsel that, taking advantage of legal loopholes, urges them to unethical if not criminal acts. Later, mellowing, he restricts his practice to unfortunate victims of the legal system.

UNCLE ABNER, a cattle rancher and outdoorsman on the old Virginia frontier, is a middle-aged, fatherly protector and wise philosopher. He involves himself directly in the resolution of rural crime and mystery. His analyses rest solidly on superior ratiocination, biblical ethics, and the law and spirit of the American constitution.

M. JONQUELLE, the préfet of police in Paris and an international cop, travels to London, Washington, D.C., and other locales to uncover acts of crime or espionage that imperil international security.

SIR HENRY MARQUIS, the chief of the Criminal Investigation Department at Scotland Yard, is a renowned criminologist and master of abstruse knowledge. He wins battles of wits with archcriminals whose espionage or criminal activities might otherwise have international consequences.

CAPTAIN WALKER, the chief of the United States Secret Service, as a youth pursued a life of crime. As chief, he records or resolves cases renowned because of the bizarre, unforeseen ends to which evil comes.

COLONEL BRAXTON is a mature Virginia lawyer whose country-town wisdom, gained from life and knowledge of the law, leads him successfully through courthouse dramas that unravel criminal acts.

CONTRIBUTION

Melville Davisson Post's crime and detective fiction followed basic conventions of the puzzle mystery. Like Edgar Allan Poe's C. Auguste Dupin and Arthur Conan Doyle's Sherlock Holmes, Post's series characters generally repudiate tough-guy violence in favor of detached, superior rationality to pierce the mystery and restore social order. Post wrote short fiction for a variety of popular magazines. Although often using the inflated language of melodrama, his stories nevertheless evoked horror and suspense and convincingly used surprise endings. Through the use of series characters, he sought to give novelistic continuity and organic form to published collections of stories, which first appeared separately in family magazines; most of his fiction underwent that transformation. A superlative entertainer, Post would have been quite comfortable writing scripts for presentation on radio, film, or television.

BIOGRAPHY

Melville Davisson Post was born on April 19, 1869, into a prosperous landed family that took pride in its participation in the American Revolution and the development of West Virginia. Post grew up knowing horses, cattle, the outdoors, frontier character, folklore, and traditional values. This knowledge provided him with literary matter and the youth's perspective he used in many of his narratives.

After completing a law degree at the University of West Virginia in 1892, Post started a short-lived career in law and politics; this activity gave him the knowledge of legal subtleties on which his first series depended. The success of his series encouraged him to move away from the law and to continue the development of series detective stories. He developed six different series protagonists between 1896 and 1930; during that time, his fiction appeared in such magazines as *Pearson's*, *The Saturday Evening Post*, *Metro-politan*, *Hearst's*, and *Ladies' Home Journal*.

Post and his wife, Ann, lived fashionably, enjoying the activities of resort life at Bar Harbor and Newport and their frequent European travels. Their lifestyle engendered the international perspective and flair for the exotic that appears in the Sir Henry Marquis and M. Jonquelle series, as well as the nostalgic return to the past of the West Virginia hill country in the Uncle Abner and Colonel Braxton series.

World War I saw the Posts return to live outside Clarksburg, West Virginia, in a house called The Chalet, built in the design of Swiss Alpine houses and furnished with pieces from their European travels. There, Post maintained a polo ground and ponies. After the death of his wife in 1919, Post traveled less but continued to write fiction. He died in Clarksburg on June 23, 1930, from injuries sustained in a fall from a horse.

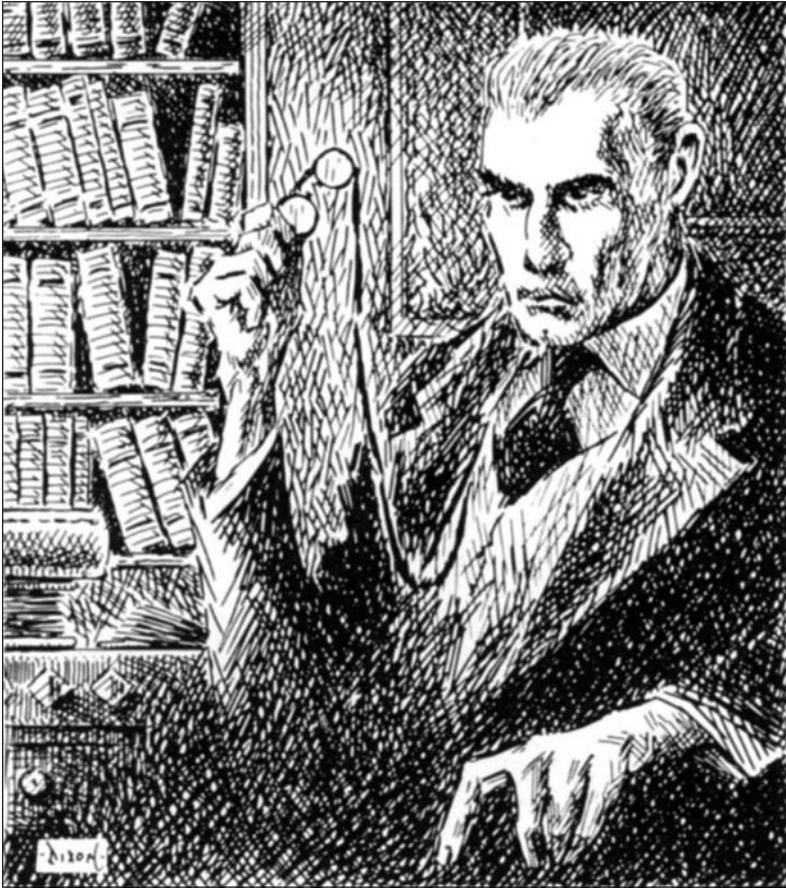

ANALYSIS

In the introduction to his first series collection, *The Strange Schemes of Randolph Mason* (1896), Melville Davisson Post established his fiction's fundamental characteristics. There he pointed out the writer's obligation as an entertaining "magician" to relieve the audience from the tedium of the commonplace. Post saw little contradiction between that charge and adherence to the puzzle-mystery convention as established by Poe and Doyle, for the puzzle is the universal paradigm of the human encounter with experience: "The human mind loves best the problem." Every new generation has a fresh experience of the puzzle of meaning lying beneath the surface.

Post found novelty variously. He adapted puzzle-mystery conventions to the new generation of American readers who, as he did, remembered the agrarian past and looked forward to the future. Often, the narrative point of view belongs to an adolescent male who seeks meaning by observing the mature male (the detective); Post's fiction often synthesizes the initiation story and the mystery plot. The author also sought novelty by finding ever more ingenious ways to move toward unsuspected and satisfying resolutions.

THE STRANGE SCHEMES OF RANDOLPH MASON

In *The Strange Schemes of Randolph Mason*, Post collected stories marked by novel changes on the

Post's unethical attorney, Randolph Mason.

puzzle-mystery conventions. The series character lives an aristocratic, solitary existence in private apartments, tended only by his man-of-all-work, Courtland Parks. Although Mason's grossness of feature may suggest (to those who do not know him) craftiness, cynicism, and even brutality, seen truly, it is a face of "unusual power"—of mind, not body, for Mason suffers from an enervating illness that makes him unfit for ordinary life and forces his withdrawal from the world (as Poe's Dupin and Doyle's Holmes are monkish intellectuals). Yet as a lawyer of extraordinary intellect, Mason's shadowy influence on New York City society is felt. All Post's series detectives are variations on such characters of remote mental power.

Further reflecting convention, Mason's relation to his man Parks is like that between the rationally superior detective and his inferior confidant. Parks becomes

the physical agency of Mason's mind; he communicates the lawyer's advice to clients and checks on the progress of events. Unlike Dupin's nameless confidant and Holmes's Watson, however, Parks is not of the same social class as Mason. Nor does he engage in familiarities with his master as Bunter does with Lord Peter Wimsey in Dorothy L. Sayers's detective fiction. Finally, he is not in the muscular mode of Rex Stout's Archie Goodwin, who with detective Nero Wolfe is a later variation on the mind-body division of labor.

Beyond these developments, Post served the principle of variety by introducing a shocking deviation in *The Strange Schemes of Randolph Mason*, for his Mason becomes the mastermind behind shady if not criminal conspiracies. As a preface, each story cites case law, with brief explanations, showing how justice may be evaded, and the stories

serve as dramatic illustrations. The author's justification for writing stories that seem to condone corruption of the law is artful and complex as well as (one suspects) an unsubtle defense of sensationalism. Post's own legal experience had shown him that moral law and statute law were not synonymous and that the war of life generated battles in the courts between equally bad men who corrupted the law in self-interest. It is therefore the writer's obligation, according to Post, to warn "the friends of law and order" through such instructive narratives as those in *The Strange Schemes of Randolph Mason*.

THE MAN OF LAST RESORT AND THE CORRECTOR OF DESTINIES

Despite Post's stated purpose, the Mason stories fail to rise above the flatness of stereotype and the turpitude of melodrama. The second Mason collection,

The Man of Last Resort: Or, The Clients of Randolph Mason (1897), continues in much the same vein as *The Strange Schemes of Randolph Mason*. In *The Corrector of Destinies* (1908), Post rehabilitates Mason. He recovers “from his attack of acute mania” and now works “to find within the law a means by which to even up and correct every manner of injustice.” Despite their weaknesses, the stories gained an audience for Post, encouraging him to write full time. The stories possess strengths: the persuasive evocation of terror and suspense and an economy of style that moves plot toward direct resolutions.

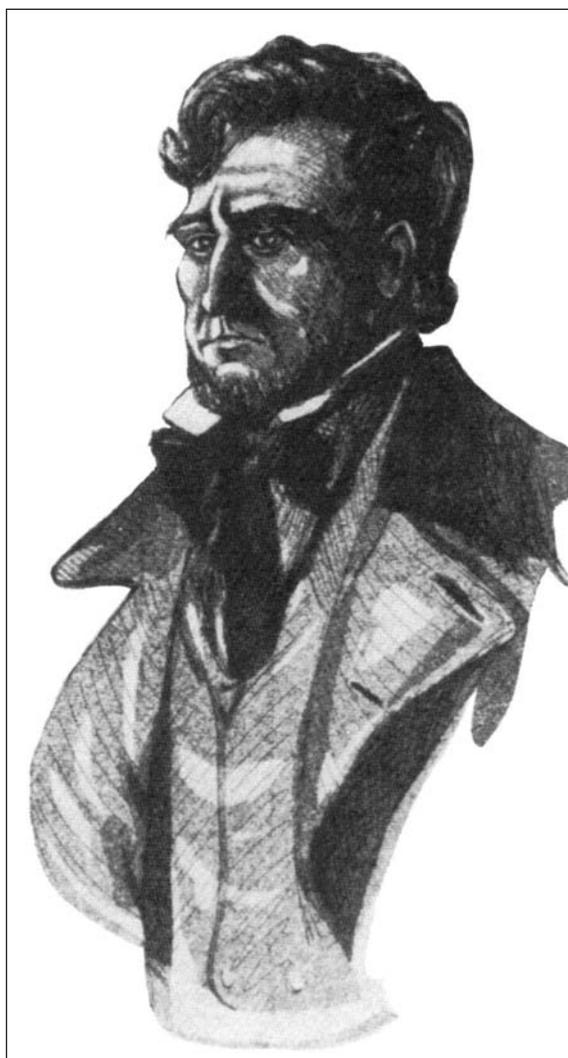

Ten years separated the last Mason collection and the first Uncle Abner collection. During the interim, Post wrote two novels about the West Virginia hill country that do not belong to the detective genre, *Dwellers in the Hills* (1901) and *The Gilded Chair* (1910); a novel of mystery fantasy, *The Nameless Thing* (1912); and short detective fiction for *The Saturday Evening Post*, *Metropolitan*, *Pictorial Review*, *Illustrated Sunday Magazine*, and *Redbook*. These stories were later collected and published as *Uncle Abner*; *Master of Mysteries* (1918).

UNCLE ABNER, MASTER OF MYSTERIES

As Charles A. Norton has shown, *Uncle Abner*; *Master of Mysteries* received critical praise on its publication and has continued to do so. The series represents Post’s most successful writing in the detective-fiction genre, for it unites themes and characters about which the writer felt deeply with tightly controlled and persuasive narrative techniques. Separately, the stories possess the inner vitality of this organic unity; together, they achieve the effect of novelistic continuity—the effect for which Post always worked when he collected his various short-fiction series into single volumes. Nowhere did he achieve that end so well as in *Uncle Abner*; *Master of Mysteries*.

A single narrative point of view helps unify the stories. The adolescent Martin observes and reports on the events in which his Uncle Abner (a self-designated detective) and his confidant Squire Randolph are central. In the boys’ adventure novel *Dwellers in the Hills*, Post had developed a similar character in its protagonist, Quiller. Because his older brother is bedridden, the child Quiller is given the task of herding cattle to

market to fulfill a contract, despite the forestalling violence of rival herdsmen. Quiller is knowledgeable about horses and cattle but feels threatened by the opaqueness of the natural and human worlds. He is attracted to the perception of physical nature as mystery (Post tellingly introduces the folklore of powerful creatures who control the forests and rivers) and is kept from knowledge of human nature because the adults of his world do not explain the tensions lying beneath the surface (rivalries between and within families over wealth, passion, and violence; the weakness of law on the frontier; the secrets of human sexuality).

Melville Davison Post's cattle rancher and amateur detective Uncle Abner of the antebellum South.

Like Quiller, young Martin of *Uncle Abner, Master of Mysteries* seeks understanding and lives in an anxiety born of ignorance. The physical positions Post assigns to Martin further suggest the character's fear and longing: He peeps from lofts and through windows and overhears from porches and behind hedgerows the deeds and words of Uncle Abner.

Although his character may derive from the superdetective of remote intellectual superiority, Abner's fullness of character comes from the way in which Post defines the cattleman-detective in the complex matrix of his culture. Abner believes in personal courage, the demystification of experience through common sense, the providential ordering of history, adherence to the Judeo-Christian ethic, and the progress of the American system toward justice. Post's success in showing rather than telling about Uncle Abner is largely a product of the narrative viewpoint; the boy Martin looks, listens, and records but does not explain beyond his understanding.

Yet the stories also benefit richly from the control of style. The writing is simple, direct, without Post's habitual excess of melodramatic language. Nevertheless, it is poetic and redolent of atmosphere, the product of complexly related, antithetical images: supernaturalism and naturalism, mystery and knowledge, terror and safety. The narratives move surely, economically from the firmly established snarl of complication to the snap of release.

The relation of ideal to real justice seems central to the detective's work. In the service of the ideal, he may sacrifice the real, as in "An Act of God," which tells of the revenge exacted by a circus performer whose daughter has been impregnated and abandoned by a cattle shipper named Blackford. The circus artist carries out Blackford's murder, making it seem accidental, and it is legally adjudged "an act of God." Seeing through the ruse, Uncle Abner confronts the performer and analyzes the crime. In view of Blackford's evil and the fact that the performer's granddaughter would be left alone and impoverished if he were charged, however, Abner chooses to leave the case in God's hands.

Nevertheless, Abner always works to unite the ideal with the real, as "The Wrong Hand" shows. Martin has been sent on an errand from which he is returning late

because his horse has broken a shoe. He meets Uncle Abner, on his own private mission; because of the deepening winter night and threatening weather, Abner takes his nephew in charge. They enter the house of a man named Gaul, widely known because of his hunchback and bitterness. One wife went mad; another was found by Abner's drovers "on a summer morning[,] swinging to the limb of a great elm that stood before the door, a bridle-rein knotted around her throat and her bare feet scattering the yellow pollen of the ragweed."

Post shades in details masterfully. The unnatural Gaul sits before the fireplace with a cane that has a gold piece in its head so his "fingers might be always on the thing he loved." The grotesque recognizes Martin's fear but reassures him by asserting that he has no wish to frighten children, that it was "Abner's God" who twisted his body. Gaul and Abner talk about the marketing of cattle, a seemingly ordinary conversation, but one in which the hunchback's hate, self-pity, paranoia, and greed are revealed. The storm grows more severe, the rain turning into "a kind of sleet that rattled on the window-glass like shot," while the wind "whooped and spat into the chimney." When the conversation turns to religion and Gaul begins to blaspheme, Abner tells Martin that he must go to sleep. The boy is wrapped in his uncle's greatcoat; feigning obedience, Martin watches and listens from his hiding place. He senses his uncle's grave intention.

A terrible death has recently occurred in Gaul's house. His brother was found dead, having apparently killed himself with a knife. Gaul, rather than the victim's own children, has received the inheritance. Having examined the body of evidence the judicial committee used to make the finding of suicide, Abner knows that Gaul has murdered his own brother.

In the subtle interrogation Martin overhears from the greatcoat, Uncle Abner seeks a confession from Gaul through innocent, circular, philosophical questioning. It is the pattern Post assigns to Uncle Abner in other of the series stories. Abner intends to right Gaul's injustice to his brother's children as well as see that the man is charged with murder. Outlining the clues, he comes at last to the fact that a bloody handprint on the dead brother's right hand came from a right hand, a clear impossibility, unless a murderous

second party was present. His resistance broken, Gaul confesses to the murder and agrees to sign over the deed of inheritance to his brother's children. At dawn, uncle and nephew ride away,

with the hunchback's promise that he would come that afternoon before a notary and acknowledge what he had signed; but he did not come—neither on that day nor on any day after that.

When Abner went to fetch him he found him swinging from his elm tree.

LATER WORKS

In some individual stories that followed this series, Post achieved again the superiority of the Uncle Abner stories, though never with consistency. One reason for his lack is that he did not often work again with the synthesis of boy's adventure, detective story, and regional history that sparked *Uncle Abner, Master of Mysteries*. In the magazine fiction and collections that followed, the author introduced four series detectives (Sir Henry Marquis, M. Jonquelle, Captain Walker, and Colonel Braxton) and continued to enjoy a success based on his control of suspenseful narrative. Yet all the detectives are really only one character: the intelligent, remote, resourceful, highly placed police official. The arena is national and international life. The detective works behind the scenes through disguise and secret conspiracy. In "The House by the Loch" (a Sir Henry Marquis story), Post achieved the richness of the Uncle Abner stories, largely by resorting again to a child narrator. In *Walker of the Secret Service* (1924), the opening six stories return to the point of view of a boy, a naïve narrator who recounts his abortive criminal career under the guidance of two failed train robbers. Seeking unity, Post makes an improbable biographical connection between the boy of these stories and the Captain Walker of the remainder. Despite such lapses, however, as an entertainer, Post rarely failed.

JEAN POTTS

Born: St. Paul, Nebraska; November 17, 1910

Died: New York, New York; November 10, 1999

Type of plot: Psychological

CONTRIBUTION

Between 1943 and 1975, Jean Potts published fifteen novels, fourteen of which are within the realm of mystery and detective fiction. Few of them even remotely resemble the classic whodunit. Potts started writing crime novels at a time when the general style of the genre was undergoing a transformation toward a more realistic approach. Instead of dealing with police procedure, courtroom trials, or private investigators, Potts found her brand of realism by focusing on a close-knit band of characters face to face with a murder—real, imaginary, or impending.

Curiously, the physical act of the crime itself and how it is committed is incidental to almost all the plots. More than one "mystery" unfolds without a murdered victim. Vital to the plots, on the other hand, is the psychology of the characters and their interactions. There is no omniscient narrator, no one point of view, no hero or villain. Several points of view, each one justifiable, are presented simultaneously. The denouement is almost a studied anticlimax. Any of the characters may end up guilty without eliciting the reader's surprise. In Potts's novels, both judgment and punishment come from within the guilty; the judicial system is given no role.

BIOGRAPHY

Jean Catherine Potts spent most of her early life in her home state, completing her education at Nebraska Wesleyan University in Lincoln, then starting her career as a journalist in Nebraska. The lure of freelance writing took her to New York, where she made her home. Little of her private life is known.

Potts's first novel was *Someone to Remember*, published by Westminster Press in Philadelphia in 1943. It was eleven years before her second novel, *Go, Lovely Rose* (1954), was published. A crime novel, *Go, Lovely Rose* won for her the Mystery Writers of America's Edgar Allan Poe Award in 1955. After 1954 she published a novel every year until 1958. Her mystery-writing career of twenty-one years yielded fourteen novels and three short stories published in magazines.

In June, 1988, admitting that her literary career "seems to have run out of steam," Potts said that her only output after 1975 was two stories in *Ellery Queen's Mystery Magazine*—"In the Absence of Proof" in July, 1985, and "Two on the Isle" in January, 1987. An English firm, Chivers Press, accepted two of her books, *Go, Lovely Rose* and *Home Is the Prisoner* (1960), for reprinting in 1988. Potts died in New York in 1999.

ANALYSIS

Go, Lovely Rose started Jean Potts's career as a mystery writer with an Edgar Allan Poe Award. It is, perhaps, the only novel in her corpus that has all the

ingredients of a conventional whodunit. A murder begins the plot, a range of suspects are introduced and brought together, and a police officer and detective are on the chase, taking statements, asking questions, and “going by the book of police procedure.” Still, even in this first effort, almost all the ideas and innovations that made her contribution to the genre so distinctive are present in embryonic form.

THE DIEHARD

Straying more than slightly from the rules in that first crime novel, Potts achieved that special voice writers strive for surprisingly early in her career. By the time her third crime novel, *The Diehard* (1956)—a murder mystery without an actual murder—was published, she had discarded even the pretense of following the prescribed rules that made a mystery novel in the eyes of purist readers and writers. The question in *The Diehard* is not who did it but who could have done it—and nobody does it. Thus, *The Diehard* constitutes an outworking of one of Potts’s theories on her genre: that the thought is the crime and that a murder committed in the mind alone often has consequences as serious as those of an actual killing. The intention or even the desire to do away with someone makes a character as culpable as the hand that fires a gun.

Like *The Diehard*, *Home Is the Prisoner* pursues another angle of the idea of a mystery without a murder to precipitate it. *The Man with the Cane* (1957) differs from the concept in a minor way: The victim is almost a total stranger who is introduced to most of the characters only after his murder. *The Evil Wish* (1962), another variation on the same theme, develops a concept that was casually introduced in *Go, Lovely Rose* and *The Diehard*—what Potts christened a “left-over murder.”

Other devices and motifs link the novels written between 1965 and 1975. Career connections replace the lifelong small-town bonds of the earlier plots. Anonymous parts of New York City or a strange resort environment become the backdrop, replacing the familiarity of a suburban hamlet where everybody knows everybody else. A faceless, impersonal voice of an unnamed detective replaces the identifiable “friendly neighborhood policeman,” though these official characters are equally unimportant to the real working of the plot.

There is murder committed toward the beginning of these later novels, and the murderer is almost invariably a woman with an obsessive, irrational love for her husband (*The Footsteps on the Stairs*, 1966, and *An Affair of the Heart*, 1970) or her son (*The Only Good Secretary*, 1965, and *The Troublemaker*, 1972).

All fourteen novels have some things in common. There is always a small community of people, with each individual inextricably tied to the crime in one way or another, each contributing to and being affected by the psychological anguish caused by the crime (regardless of whether it has been committed), each having to shoulder his or her share of the total guilt even as collectively they piece together fragmentary clues and pronounce judgment on the actual act. In itself, the act is not important, and neither is justice by law. Suicide, insanity, and a total indifference to any punishment the legal system can impose on them are the only way Potts’s criminals can react to the crimes they commit, because justice does not come down on them impersonally: It originates in the crime itself and in the very motive behind it.

Psychologically, the novels become progressively more complicated and introspective in both characterization and action. The private worlds within the minds of the people Potts creates become the real focus of the novels. It is the internal world of a character that causes the normally mundane external world of a community to disintegrate. Shorn of this psychological complexity, her plots would seem bare and inadequate. *Home Is the Prisoner*, for example, is the story of an ex-convict who returns home to avid speculation on the part of the people who have known him all of his life, while in *The Man with the Cane* the corpse of a stranger triggers the curiosity of a normally apathetic community. All physical acts of aggression are either catalyst or solution and fade into inconsequence. Physical violence, if there is any, is restricted to the crime, its gruesome details glossed, and sometimes a suicide in the end (also underplayed and generally out of sight), or as in several novels, a small fistfight at some point.

THE EVIL WISH

Mental violence, on the other hand, abounds, kept a malicious, malevolent secret under the gentlest or the

most sensible exterior. Potts points out, time and again, that even ordinary people with the most uneventful existences are capable of heinous crimes. Doll-like, docile women who chatter away inconsequentially throughout their sheltered lives—Lucy Knapp in *The Evil Wish*, Barbara in *The Man with the Cane*, Thelma Holm in *The Footsteps on the Stairs*—are found to possess hidden reserves of the most uncompromising determination and capacity for cruelty. Lovable, responsible men, pillars of small-town goodness, are driven to murder because of emotional pressure. Everybody, Potts seems to say, every face in the world, can harbor a criminal. Her novels' action and drama stem from the psychological complexities of the minds of her characters, all very human, very flawed, and totally credible. In one of her most intriguing psychological studies, *The Evil Wish*, two sisters wish their father dead and plan his murder meticulously, only to have their plans thwarted but their wish fulfilled when their father, Dr. Knapp, obligingly dies in an accident. The consciences of the sisters are then burdened with a "left-over murder," their guilt growing while the desire to see their plan through is left unsatisfied. They are killers without a crime to justify the guilt they feel, and the mental state resulting from this turmoil destroys their lives and eventually forces them to become each other's murderer.

Although her characters are trapped into facing the consequences they bring on themselves, Potts is not beyond playing occasional psychological games with her readers. Readers of *The Diehard*, for example, find themselves waiting almost impatiently for the unnatural death of Lew Morgan to occur, for they are privy to the information that all but one of the major characters are out to kill him. In the end, Lew dies in an accident caused, ironically, by the only person who wished him alive, and the reader is left burdened with the uncomfortable weight of an impossibly ambiguous truth: No one in the novel kills Lew Morgan, yet everyone does.

This kind of mental realism, this internalized action and characterization, became Potts's hallmark and is perhaps the most important factor in the literary success of her novels, lending them a several-layered, multifaceted psychological depth that is rare in crime fiction. Potts has the brilliant talent of revealing both appearance and reality with simple, economical

strokes. There are no extensive descriptions, explanations, or justifications, only the characters revealed through their own thought processes. There are no "good" or "bad" characters; rather, Potts's protagonists are fully fleshed-out human beings with weaknesses and strengths. Marcia Knapp in *The Evil Wish*, an otherwise intelligent and pragmatic woman, has a tendency toward alcoholism; Judge McVey (*Home Is the Prisoner*), an upright, honest man, is revealed to be a coward; Fern Villard (*The Only Good Secretary*), efficient and charming, is driven by pathological avarice.

Potts's characters indulge in trivial eccentricities, petty secrets and obsessions, gossiping, blackmailing, pathetic attempts to seem younger, lying—behavior that shows them to be less than wholesome but makes them wholly credible. Her novels are full of people who are simultaneously attractive and repulsive. The reader cannot help but understand them, think their thoughts with them, pity and forgive them; nevertheless, an emotional distance is always maintained between reader and character. There is never any question of self-identification or empathy with a Potts character on the part of the reader. Potts achieves this distance simply by presenting several points of view, with different characters picking up the telling of the tale at irregular intervals, sharing their personal points of view, introspections, and interactions. Each character has firm convictions and an individual set of questions and answers. The reader is thus involved with several different opinions and people and is forced to change his own mind several times. Eventually, a process of elimination leaves only two or three central characters whose accounts can be tentatively accepted—a far cry from a consistent, omniscient narrative voice presenting a single, authoritative version of an event.

Though each character in a Jean Potts novel is undeniably an individual, there is a limited range of types to which most of them conform. Her women fall for the most part under three categories. There is the matter-of-fact, likable, do-gooder type with a sensible head on her shoulders—Mary Walsh in *An Affair of the Heart*, Rachel Buckmaster or Myra Graves in *Go, Lovely Rose*, Margaret Robinson in *The Troublemaker*,

and “Hen” in *The Man with the Cane*. Then there are Barbara (*The Man with the Cane*), Lucy Knapp (*The Evil Wish*), and Thelma Holm (*The Footsteps on the Stairs*)—fragile, nervous, sheltered escapists who refuse to face reality and prefer to drown all ugliness in bright chatter. Finally, Potts creates worldlywise career women who can absorb and accept all aspects of life with the indifference that comes with jaded knowledge. Marcia in *The Evil Wish*, Fern in *The Only Good Secretary*, and Enid Baxter in *The Footsteps on the Stairs* can outdrink and outphilander any man.

The men, similarly, could be divided into three classifications, starting with responsible, upright, honest men such as Hugh in *Go, Lovely Rose*, “Mack” in *Home Is the Prisoner*, and Val Bryant in *The Man with the Cane*. Another type would be the charming, arrogant, superficial character who remains likable despite his blatant flaws—Gordon Llewellyn in *The Evil Wish*, Dr. Craig in *Go, Lovely Rose*, Kirk Banning in *An Affair of the Heart*, and Lew Morgan in *The Diehard*. Finally, there is the man who is a failure, despite unusual intelligence, because of a lack of motivation or a fondness for alcohol: Archie O’Brien in *The Only Good Secretary* and Martin Shipley and Vic Holm in *The Footsteps on the Stairs*.

Apart from these identifiable types, Potts liberally peppered her novels with colorful eccentrics such as Gladys Popejoy (*The Only Good Secretary*), who is sure that germs that spread “Diseases” are waiting to catch her unprepared in a bus or at the office, or the homosexual Teddy (*An Affair of the Heart*), who flutters around nervously and cannot resist malicious digs at others, even his friends.

Any one of these characters might be the victim and anyone the killer. They are all suspects and sleuths by turn. Their interactions make for remarkably lifelike unlikelihoods. Friendship and hostility between Potts’s characters are marked by the strange complexity of reality. Antagonists in a Potts novel often cannot help liking each other. Martin Shipley and Vic Holm understand each other instinctively, just as Marcia Knapp and Chuck Llewellyn do. Each can see the other’s unsavory side and identify with it. Suspicion and trust go hand in hand where these pairs are concerned, because though a bond of affection and concern ties them together they

can never give up the individual convictions that created the original antagonism.

The narrow, humdrum existences of Potts’s characters are inevitably and irreparably distorted by crimes of emotion, misdeeds motivated by an obsessive, misguided love for father, spouse, or child. Potts always focused on the elemental emotion of love, which, in her opinion, is more treacherous than any hatred or selfish need could be.

Potts’s awareness of love’s pitfalls creates a distinctive kind of crime fiction. In her novels, life does not simply return to normal after the crime is solved and justice served. The reason for that lies in the motivation for the crime and the deep emotions it stirs in each of the characters. Those who had wanted to kill but could not are racked by guilt. Even the relatively innocent will forever carry painful memories. As for the murderers, once they have accomplished the deed to which their tortured desires drove them, the only thing left to desire is death.

Types of plot: Master sleuth; psychological; thriller

PRINCIPAL SERIES

Special Agent Pendergast, 1995-

PRINCIPAL SERIES CHARACTERS

ALOYSIUS PENDERGAST is a mysterious Federal Bureau of Investigation (FBI) agent originally from New Orleans who suddenly appears on the scene knowing more than he should know and refusing to take no for an answer. Tall, extremely thin, but muscular, he has whitish blond hair, pale blue eyes, and an extremely pale complexion that make him easily noticed. He always wears well-tailored, black wool suits. His fund of general knowledge is no less than encyclopedic, and his ability to disguise himself is phenomenal. He possess an undeniable charisma that appeals to most of the characters with whom he comes in contact, but he is vulnerable and haunted by the mental and emotional instability that is his legacy from both sides of his family.

VINCENT D'AGOSTO is a dedicated police officer. A hard worker, he has total belief and faith in Pendergast, even though that faith costs him a relationship with a woman who is extremely important to him. Vin-

cent is middle-aged and is just getting back into shape after a period of letting himself go physically. For a while he left police work to write detective novels, but he is reestablishing himself in police work. Basically a good person, he is a good police officer and detective.

BILL SMITHBACK, a writer-journalist, is a perpetually loose cannon. If there is somewhere he should not be, he will be there. If there is a wrong time to approach a subject, Smithback will find it. He is brash, abrasive, and somewhat uncouth, but he still possess a kind of naïve charm. However, expensive Italian suits cannot make a silk purse of a sow's ear, and Smithback has a way to go before he becomes generally acceptable. He is, though, thoroughly dedicated and devoted to Pendergast. Smithback seems to be nearly killed every time he appears in a book.

CONTRIBUTION

Douglas Preston and Lincoln Child have written more than ten books as a team and are enjoying great success in the process. Even though they claim not to have seen each other face to face for ten years, their perfection of the collaboratory process is an inspiration to other aspiring collaborators, especially because each author also writes individually. Although these solo novels have some of the trademark action and suspense of the collaborations, there does not seem to be quite as much richness and layering as there is when the two minds are applied to a project. Preston has explained that phenomenon by saying that their

minds just happen to be “twisted” in the same way. That may be, but the two men still experience differences and disagreements while working on a project.

Preston and Child both bring ideas and suggestions for books to the table and collaborate on projects that appeal to both of them equally strongly. Preston’s *The Codex* (2004) and Child’s *Utopia* (2002) were both projects rejected by the other partner. After a thorough discussion of concepts, Child makes a chapter outline. Preston takes the outline and writes the book. Child edits and rewrites. Then, Preston takes that draft and works through it again. This is the pattern that the two of them have followed since the beginning of their partnership.

In the course of their collaboration, Preston and Child are creating a mythology based on character exchanges within their various novels. William Smithback, in addition to the Pendergast books, is also a character in *Thunderhead* (1999). A character in *The Ice Limit* (2000) also appears in *Book of the Dead* (2006). Interesting characters reappear from novel to novel in both series and nonseries novels. Like Special Agent Aloysius Pendergast, Preston and Child have a great fund of general knowledge and many special interests to draw on for their books. They can write with authority about many subjects and have practical experience in most areas of science and technology. This special knowledge results in the production of some outstanding techno-thrillers grounded in detective fiction. Working in the arena of classic imagery and plot, the two men are strongly influenced by Sir Arthur Conan Doyle, Charles Dickens, and Edgar Allan Poe.

BIOGRAPHY

Douglas J. Preston was born in Cambridge, Massachusetts, in 1956 and grew up in Wellesley. Douglas and his two brothers, Richard and David, lived a rough-and-tumble boy’s life, losing fingertips and teeth with joyous abandon and entertaining various friends and neighbors. Douglas attended Pomona College in Claremont, California, and studied a wide range of subjects before he eventually settled on a major in English literature. After graduation, Preston worked with the Museum of Natural History in New York City as editor, writer, and director of special events. He also free-

lanced, writing articles about the progress of the museum, and taught writing at Princeton.

Luckily, he gave in to an invitation to write about the museum in *Dinosaurs in the Attic: An Excursion into the American Museum of Natural History* (1985). The invitation to write was extended by a young editor at St. Martin’s Press named Lincoln Child. Preston took Child for a midnight tour of the museum, and that experience became the basis for *Relic* (1995). In 1986, Preston moved to Santa Fe, where after a period of time, he wrote *Cities of Gold: A Journey Across the American Southwest in Pursuit of Coronado* (1992) and became interested in the history and legends of the southwest. Preston later moved to the coast of Maine. He and his wife, Christine, have three children. Like Agent Pendergast, Preston claims kinship with a number of famous and infamous relatives.

Lincoln B. Child was born in Westport, Connecticut, in 1957. Although his family moved away before he reached his first birthday, he still regards it as his hometown. He acquired an interest in writing early on and majored in English in college. After graduation he secured a job as an editorial assistant at St. Martin’s Press, where he worked his way up to full editor. He worked on more than a hundred books and collected several anthologies of ghost tales that more or less established a horror division at the press. In 1987, Child left St. Martin’s and went to work doing highly technical computer jobs. After *Relic* was a success, he quit his job. He settled in New Jersey with his wife and daughter. A list of his interests would parallel those of Agent Pendergast—probably because Lincoln firmly believes in that bit of writer’s advice to write about what one knows.

ANALYSIS

Neither Douglas Preston nor Lincoln Child likes to categorize their work. They feel that literature is too “genrecized” already and that what is important is for them to enjoy what they write and try to introduce readers to new jobs, places, and disciplines. Their novels combine so many elements and influences that they are nearly impossible to classify.

In *Relic*, Preston and Child introduced the notion of a museum as a bizarre microcosm of the world at

large. Given the erudition of the New York Natural Museum of History, the nature of its exhibits, its labyrinthine passages, and its scientific equipment, the potential for a tale of horror and mad scientists as in the 1953 film *House of Wax* not only existed but also virtually begged to be brought to life. At the same time that Preston and Child were thinking about a museum mystery, a Holmesian figure presented himself to the authors in the person of Special Agent Aloysius Pendergast. According to Preston and Child, he sprang, Athena-like, fully formed into their minds. Within the Diogenes trilogy (*Brimstone*, 2004, *Dance of Death*, 2005, and *Book of the Dead*, 2006) there seems to be a Sherlock Holmes/Moriarty—Holmes/Mycroft reference at work. The rivalry between Special Agent Pendergast and his criminal brother Diogenes Pendergast is so intense that readers begin to think about their own familial relationships. Diogenes Pendergast is a totally evil literary character who reminds readers that, undoubtedly, several criminal masterminds like Diogenes have existed in real life.

Although the authors have suggested that *The Cabinet of Curiosities* (2002), a Pendergast novel, could be considered a nonseries novel, in actuality, it is *Still Life with Crows* (2003) that might fit in that category, as it takes place in the Midwest and away from New York and the museum. *Relic* and its successor, *Reliquary* (1997), are obviously related, a fact denoted by the titles: A reliquary is a place or thing designed to hold and protect relics, and what is a museum but a very large reliquary? In that sense, a cabinet of curiosities—holding a collection of rare and valuable things as it does—is also a reliquary. In some of the books, the museum is never far away from the consciousness of the characters, and in others the scene changes and becomes worldwide, offering the solution of one riddle while presenting the detective with another in the style of Dan Brown's books about ancient mysteries. The mysteries of Preston and Child are, however, not that ancient, even if they sometimes seem to be. Their books are immediate life-or-death mysteries on behalf of characters that readers have come to know and to like.

Preston and Child have developed complex plots in which they leave the actions of one character to begin

another chapter dealing with the progress of a different character whose actions seem to have nothing to do with the plot. In this way, the suspense is advanced, only to come to a jarring halt when a dead end appears or a promising lead fails to pay off. Nothing is ever simple in a Preston and Child book, and always, as the book develops, a psychological element begins to surface.

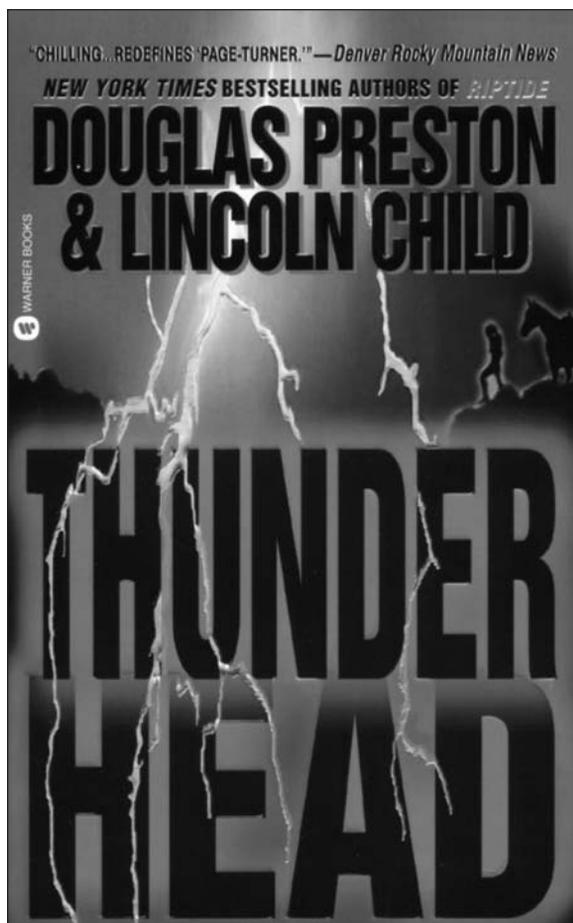

RELIC

Without a doubt, the major character of *Relic* is the museum, in all of its aspects: as a building, as an organization, as an institution. Shirley Jackson used the device of place as character to devastating advantage in *The Haunting of Hill House* (1959) and so have Preston and Child in *Relic*. From the first murder, the whole impetus of the book becomes an imperative to save the museum.

The coincidence of the emergence of a monster with the creation of the new Superstition exhibit is so stunning in its visual, emotional, and intellectual content and so technically cutting-edge in its presentation that it is literally calculated to shock museum patrons into reaching for their checkbooks to help fund the museum. In the course of touring the museum and seeing the behind-the-scenes work that goes into mounting new exhibits and keeping the institution meaningful and vital to a changing society, the readers also learn some unfortunate truths about the personalities involved. Even doctors of various sciences, the best and brightest of their kind, are not above cheap, petty competition for grants to back up or extend their own research interests, and in most cases, those research projects have less to do with improving the world than they do with advancing the career and reputation of the individual. To catch the monster, the combined talents of Smithback, Margo Green, Agent Pendergast, and Vincent D'Agosto are required. Although Pendergast plays a small role, he did capture some attention in this book, and D'Agosto and Smithback made their own impressions. Green returns to the museum in later books.

THE CABINET OF CURIOSITIES

The Cabinet of Curiosities, part of the Pendergast series, focuses on gruesome discoveries in the basement of a New York building that once housed a col-

lection of curiosities. In this work, Preston and Child unravel a bit more of the mystery surrounding the Pendergast family. It seems that Special Agent Pendergast is the family oddball, a lawman in a family in which criminal lunacy is prevalent. He entered his profession because of his need to combat his family, especially his younger brother, Diogenes.

In this novel, the demolition of an old building opens an underground charnel house: catacombs where the skeletons of numerous young people from the beginning of the twentieth century are found. Readers are reminded that the Museum of Natural History is also a charnel house: a place where the remains of both animal and human dead are kept and exhibited. The concepts of the museum, the charnel house, and the cabinet of curiosities all relate to the mysterious mansion on Riverside Drive, which houses a cabinet of curiosities,

but the cabinet is only one of many. Actually, the entire mansion is an extended cabinet of curiosities and a charnel house as well, entombing a living person in the house for nearly a hundred years. The extension of the museum metaphor throughout this work is a brilliant concept on the part of the authors.

THUNDERHEAD

In *Thunderhead*, a nonseries novel, Nora Kelly is leading an expedition in search for the origins of the Anasazi, and journalist Bill Smithback is traveling along to record her findings. In later novels, both of these characters are absorbed into the museum framework of the Pendergast series. Perhaps one of the most outstanding aspects of the novels of Preston and Child is the research that goes into their work. Preston has written several *New Yorker* articles on the subject and has followed some of the trails and passages that Kelly and Smithback travel in the work. Within the works of Preston and Child, there is almost always a breathtaking array of facts that are illumined by the imagination of these two men.

Stableford, Brian. "Introduction." In *Cyclopedia of Literary Places*, edited by Kent Rasmussen. Pasadena, Calif.: Salem Press, 2003. Stableford discusses purposes and uses of setting within literary works. Settings are especially important to the work of Preston and Child in that their settings nearly become characters. This introduction informs the reader of why the authors are so very setting-specific.

J. B. PRIESTLEY

Born: Bradford, Yorkshire, England; September 13, 1894

Died: Stratford-upon-Avon, Warwickshire, England; August 14, 1984

Also wrote as Peter Goldsmith

Types of plot: Amateur sleuth; espionage

CONTRIBUTION

J. B. Priestley's seven crime novels, including one written with Gerald Bullett, are, compared to the bulk of his published work, a minute part of the Priestley canon. Each of the novels exists independently of the others, and each is an unrepeated foray into crime fiction. The central characters are not detectives or professional police officers; they are medical doctors, artists, newspapermen, and trained professional people who are very good at their chosen work. Something piques their interest—a patient goes missing, a scientist disappears, an experiment is stolen—and they turn their obvious mental powers to the task. The books

themselves, as might be expected from one of the twentieth century's most prolific dramatists, read like scripts for stage and screen, and their visual impact is strong. Priestley's sly wit, his socialistic philosophy, and his stagecraft mark the novels and give them the easy progress of well-written works. At the same time, in all of his crime novels, Priestley takes a cold and dispassionate look at his society and finds it less than perfect.

BIOGRAPHY

John Boynton Priestley was born on September 13, 1894, in Bradford, Yorkshire, England, the son of a schoolmaster. He was educated in the Bradford schools and at Trinity College of the University of Cambridge. He served with the Duke of Wellington's and Devon regiments from 1914 to 1919. He was graduated from Trinity College with honors in English literature, political science, and modern history. He married Patricia Tempest, with whom he had two daughters, in 1919;

Mary Wyndham Lewis, with whom he had three more daughters and a son, in 1926; and Jacquetta Hawkes, the writer and his sometime collaborator, in 1953.

He began his writing career at sixteen, contributing articles to London and provincial newspapers. He went to London in 1922 and established himself as a reviewer, critic, and essayist; in addition, he published two or three books a year, including studies of the work of George Meredith and Thomas Love Peacock for the English Men of Letters series, a history of the English novel, and other works. By 1930, he had established a strong reputation both in England and the United States through his novels, including *Angel Pavement* (1930), which falls loosely into the category of crime fiction. His work during this period was a

mixture of personal history and social criticism.

In 1932, he wrote *Dangerous Corner*, a highly successful drama that launched him on a new career, one that occupied much of his time from then on. Among other activities, he served as the director of Mask Theatre in London; the United Kingdom delegate and chairman to the United Nations Educational, Scientific, and Cultural Organization's International Theater Conferences in Paris (1947) and Prague (1948); the chairman of the British Theatre Conferences; the president of the International Theatre Institute; and on the National Theatre Board. He was a regular contributor to *New Statesman* and broadcast uplifting commentaries for the British Broadcasting Corporation during World War II; these broadcasts were published

as *Britain Speaks* (1940) and *Postscripts* (1940) and earned for him the unofficial title “the voice of the common people of Great Britain.”

Priestley traveled extensively in the United States and spent two winters in Arizona. Despite his criticism—and he freely criticized everything—Priestley was fond of the United States and probably knew as much about its history and literature as did any modern English novelist.

Priestley was awarded the James Tait Black Memorial Prize in 1930, the Ellen Terry Award in 1948, and honorary degrees from the University of St. Andrews, the University of Birmingham, the University of Bradford, and Trinity College. He was awarded the Order of Merit in 1977. In 1978, he moved, appropriately, to Stratford-upon-Avon. He died on August 14, 1984, one month short of his ninetieth birthday.

ANALYSIS

J. B. Priestley’s early novel *Benighted* (1927), published in the United States as *The Old Dark House* (1928), was more of a gothic horror story than a detective story, and *I’ll Tell You Everything* (1932), written with Gerald Bullett, was an early spoof of the cloak-and-dagger tale then gaining in popularity. It was with his last three crime novels, *Saturn over the Water: An Account of His Adventures in London, South America, and Australia* by Tim Bedford, *Painter* (1961), *The Shapes of Sleep: A Topical Tale* (1962), and *Salt Is Leaving* (1966), that Priestley hit his peak as a detective-fiction writer.

SATURN OVER THE WATER

Saturn over the Water is a good book and much more of a mystery than the earlier novels. It owes something to Nevil Shute’s *On the Beach* (1957) and has delicious reflections of John Buchan’s *The Power-House* (1916), *The Thirty-nine Steps* (1915), and his neglected *The Courts of the Morning* (1929). Tim Bedford, a successful painter, promises his dying cousin Isabel Frame that he will find her estranged and missing husband, Joe, and tell him that she still loves him. It is a soap-opera opening to a nicely constructed and skillfully plotted novel of intrigue, travel, and involvement with a secret organization. This group is busily plotting to force the Northern Hemisphere to destroy itself through

biological and atomic warfare, leaving the cabal, whose sign is Saturn over the water, free to create a new and better world in their own image in South America, Australia, and Africa.

Bedford’s only clue to the whereabouts of the missing scientist, Joe Frame, is the hastily scribbled list of names, places, and things in his last letter, posted from Chile. He is intrigued by the mystery, especially when he identifies one of the names as that of another English scientist, Frank Semple. Semple had worked with Frame at the Arnaldos Institute in Peru and had returned home psychotic and had committed suicide. Bedford travels from London to New York, then to Peru, Chile, and Australia, each stop identifying more of Frame’s list and bringing him into contact with shadowy people who will ultimately play major roles in the solution of the mystery. Bedford, unknown to himself, is in reality a pawn in a power struggle, the catalyst the opponents of the cabal have needed to bring the global plot to an unsuccessful conclusion.

Similar to Richard Hannay’s foes in *The Thirty-nine Steps* and *The Power-House*, the opponents in *Saturn over the Water* are men with superhuman intellects, men capable of exerting powerful influence over lesser minds. Using the concept of the astrological changing of the ages, Priestley matches the Saturnians against those under the sign of Uranus, the peaceful ones.

As Bedford makes his journey, Priestley makes use of his stops to comment on the neo-Nazi mentality, the threat of communism, the misuse of technology, and the strange world of the arts. Although Priestley himself espoused Fabian socialism, he despised Marxist principles, instead identifying himself as anticonservative politically.

The characters here are not as exhaustively drawn as those in *Angel Pavement*, but the reader does get to know them well enough for their motivations to be acceptable, at least for the more realistic of them. Other characters, especially as the novel nears its end, seem fantastic: Mrs. Biro, the clairvoyant; Major Jorvis, the Australian police officer through whose form the Saturn superintellect works; and Pat Daily, an apparent drunken junk dealer who is in fact the Old Astrologer of the Mountain and the “force” representing the Uranian side of the new age. As the novel ends, the reader

is pleased to find that Tim Bedford and Rosalia Arnaldos, the granddaughter of the founder of the institute and the Saturn cabal, have married. She has inherited the institute and Arnaldos's vast fortune, and together they dedicate their resources to the betterment of humankind. Still, the reader is left with the uneasy feeling that although a battle has been won, the war is far from over.

THE SHAPES OF SLEEP

The Shapes of Sleep is considered by many to be Priestley's best work in the genre, although *Salt Is Leaving* has its champions. Ben Sterndale, a forty-two-year-old freelance journalist, is hired by a friend, an advertising executive, to locate and recover a mysterious piece of green paper that has been stolen. Sterndale has only a list of names of those who visited the office the day the paper disappeared with which to work. He begins his search, unaware of the import of the missing paper, which is part of an experiment in subliminal mind altering, designed for use not only in marketing but also, and more important for the story, in political propaganda.

Sterndale's search takes him to the Continent; in and out of the clutches of Eastern and Western espionage agents; through late-night forays in breaking and entering, into romantic trysts with secret agents; and on journeys by car, train, and boat to arrive somewhere and do something before someone else arrives and does something less pleasant. His role is that of an amateur James Bond, and he falls into and somehow escapes from one dangerous situation after another until everything falls into place. Priestley's usual concerns are present. He uses the book to poke fun at the deadly serious espionage services of both sides, at the ultrajingoism of people involved in that type of activity, at the social situations that give rise to "sides" competing for the minds of humankind, and at the powers that control the political machines on both sides of the Iron Curtain.

The Shapes of Sleep is a suspenseful, rapidly moving book with realistic action (so far as the secret services are concerned), enough danger to whet the reader's interest, and a surprise ending that justifies the novel's existence. The characters and their actions are presented in a typically strong Priestley dramatic form. It would make a fine film.

SALT IS LEAVING

Salt Is Leaving would also make a satisfactory film or even a stage play. Lionel Humphrey Salt ("Call me Salt when you're tired of doctoring me") has given up his medical practice in the depressed and depressing town of Birkden after seven years. He yearns to move on, to the south of France and then possibly to Africa or India, where he apparently lived for some time. He delays his departure out of concern for a patient, Noreen Wilks, who has been missing for three weeks. Salt's concern is centered on his interest in kidney diseases, Noreen's rare chronic nephritis, and her failure to renew the prescription needed to keep her alive. His search involves him with the world of Sir Arnold Donnington—the industrialist who owns United Fabrics and, through his company, the town of Birkden—and with Maggie Culworth, whose father has also disappeared. Maggie works in her father's bookstore in nearby Henton, her place of refuge after several years and a disastrous romance in London. All she knows is that her father took the 1:35 bus to Birkden and that a letter from a Peggy Pearson, written on stationery from the Lyceum Cinema in Birkden, has come to her father. Maggie goes to Birkden and meets Salt.

Because there is no obvious crime, the police are not eager to help Salt in his search for Noreen, who is described by Superintendent Hurst as "just another of these little fly-by-nights." As the story develops, the reader learns that Noreen knows Culworth; that Noreen has been having an affair with Sir Arnold's son, Derek; that Derek has accidentally killed himself while cleaning a gun at five in the morning; that Worsley Place, next to the United Fabrics Club, has been used as a romantic trysting place by Noreen and Derek; that Noreen is Culworth's child from a romance during World War II; that Sir Arnold is desperately trying to cover up everything that concerns his son; and that Culworth has suffered a concussion at Worsley Place and is under sedation at a private home. As the story progresses, the relationship between Salt and Maggie, at first an uneasy truce, begins to develop into a romance, culminating in their planning to leave together at the end to find whatever happiness the world has to offer elsewhere.

Two other characters contribute to prolonging the

mystery: Sir Arnold's daughter Erin, full of barbiturates, alcohol, and misplaced sexual drives, and Jill Frinton, a "hostess" at the United Fabrics Club. At the end, Salt, Maggie, her brother Alan, and Jill confront Sir Arnold with the truth, and the mystery is solved. Salt and company agree to keep silent about the truth in return for Sir Arnold's agreement to their terms.

The story is a good one and well written. The characters are believable and realistically motivated. Priestley here, as elsewhere, uses his novel as a means of looking askance at social problems and conditions he does not like. The high-handed industrialist who controls a town through his wealth and power is revealed in a most unfavorable light. The plight of those who must work under less than desirable conditions comes under scrutiny. Even those who seem to have some power within the structure are belittled, because they do nothing without the approval of Sir Arnold. The everyday lives of Salt's patients, mostly drawn from the lower and depressed side of Birkden, are given in such a way as to elicit sympathy.

Priestley's work in the detective-fiction genre is short on bulk, but his political theories and beliefs, his socialistic leanings, his practical but utopian ideals, are easily found in his novels. As a technician, Priestley is sharp, oriented toward the stageability of his product, and a careful constructor of plot and character. His novels read easily and command the respect and attention of the reader.

BIBLIOGRAPHY

Atkins, John. *J. B. Priestley: The Last of the Sages*.

New York: Riverrun Press, 1981. Describes Priestley's development as essayist, critic, novelist, dramatist, autobiographer, social commentator, historian, and travel writer. The book is most useful on the political, social, and economic background of the late 1920's and 1930's, the period of Priestley's first three mystery novels.

Brome, Vincent. *J. B. Priestley*. London: Hamish Hamilton, 1988. Brome offers an affectionate but candid portrait of the writer in public and private life.

Argues that the prolific writer has been denied his proper niche by critics who do not deal fairly with those who write for a wide, general audience.

Cook, Judith. *Priestley*. London: Bloomsbury, 1997.

Cook provides a biography of Priestley, examining

both his prose and dramatic works. Includes a bibliography and an index.

DeVitis, A. A., and Albert E. Kalson. *J. B. Priestley*.

Boston: Twayne, 1980. After a biographical chapter that includes a discussion of Priestley's time theories, the book divides into two sections, the first half dealing with Priestley as novelist, the second half dealing with Priestley as dramatist. All Priestley's works in the two genres are discussed, the more significant ones in some detail. Includes a chronology of the important events in Priestley's life and a useful bibliography.

Gray, Dulcie. *J. B. Priestley*. Stroud, Gloucestershire, England: Sutton, 2000. This volume in the Sutton Pocket Biographies series provides a concise look at Priestley's life and many works. Includes a bibliography.

Klein, Holger. *J. B. Priestley's Fiction*. New York: P. Lang, 2002. Massive, eight-hundred-page study of Priestley's entire fictional output, including all of his mystery novels. Bibliographic references and index.

BILL PRONZINI

Born: Petaluma, California; April 13, 1943

Also wrote as Russell Dancer; Robert Hart Davis; Jack Foxx; Romer Zane Grey; William Jeffrey; Rick Renault; Alex Saxon

Types of plot: Hard-boiled; private investigator

PRINCIPAL SERIES

Nameless Detective, 1969-

Carmody, 1970-

Quincannon and Carpenter, 1985-

PRINCIPAL SERIES CHARACTERS

THE NAMELESS DETECTIVE is a private eye who was with the San Francisco Police Department for fifteen years. About forty-seven years old at the start of the series, Nameless has aged through the years, and,

by 1988, is actively considering retirement. He is sloppy, moderately overweight, unmarried, and concerned both with his health and with being loved. By 2006, he is husband and father and mentor to two protégés. His real obsessions, however, are collecting pulp magazines and trying to make the world a better place.

LIEUTENANT "EB" EBERHARDT, a detective for the San Francisco Police Department at the outset of the series, is Nameless's closest friend and has appeared in all the series' novels and most of the stories. The two met as trainees at the police academy. Nameless turns to Eb for help, whether working on a case or working through a personal problem. Eb eventually joins Nameless as a partner in his agency after retiring from the police department.

CARMODY is an international dealer in “legal and extralegal services and material” who occasionally does detective work. An American, he lives in isolation on the Spanish island of Majorca. He is the flinty, silent type, with a good tan and green eyes; he smokes thin black cigars and drives a 911-T Porsche Targa.

JOHN FREDERICK QUINCANNON, a former Secret Service agent and reformed alcoholic, works as a detective in San Francisco of the 1890’s. He would like to form a sexual relationship with his partner, Sabina Carpenter, but she dodges his advances.

SABINA CARPENTER is a widow and a former Pinkerton Agency detective. Equal to Quincannon’s witty banter, she teams up with him to solve a variety of “impossible” crimes.

CONTRIBUTION

Bill Pronzini’s Nameless detective novels move the hard-boiled detective genre toward a new kind of authenticity. To the unsentimental realism of Dashiell Hammett, the descriptive power of Raymond Chandler, and the psychological depth of Ross Macdonald, all meant to transcend the artificial atmosphere of the traditional English detective story, Pronzini adds attention to everyday human problems—emotional as well as physical. Nameless struggles with health concerns of varying seriousness and also spends a modest but significant portion of his narrative seeking stable female companionship. He ages and on occasion gets depressed. In short, Nameless is revealed in a way that would be utterly foreign to a character such as Hammett’s Sam Spade or Chandler’s Philip Marlowe.

Pronzini also seeks heightened authenticity, largely shedding the tough-guy image associated with the hard-boiled genre. To be sure, Nameless is tough. He doggedly seeks the truth and unhesitatingly puts himself into risky situations. Nameless eschews violence and sarcasm, however, and he is willing, at least occasionally, to wear his heart on his sleeve. Indeed, Nameless does nothing to hide the fact that he cares about people and is generally sympathetic. He cultivates a good working relationship with the police and with few exceptions stays on the right side of the law. Pronzini also occasionally works in some of the banality and drudgery involved with real-life private investigation.

All this is mixed in with some of the more classic hard-boiled elements: twisting plots, sparsely furnished offices, feverish pace, compelling descriptions of California settings (though Nameless does occasionally leave the state, pursuing one case in Europe), and a hero so dedicated to his vocation that he will often go without sleep and will sometimes work without fee. In addition, the very namelessness of Pronzini’s detective harks back to Hammett’s Continental Op. It is, in fact, the blend of old with new that makes Pronzini’s series unique.

Pronzini does not merely build on the work of Hammett, Chandler, and Macdonald. Through Nameless’s love of the pulps, the reader is reminded that many fine writers have helped shape and promote the hard-boiled genre—a significant bibliographic contribution on Pronzini’s part.

Pronzini is also a widely read author of Westerns. As one of the industry’s busiest anthologists, Pronzini has promoted short-fiction writers in several genres. He has edited more than one hundred collections and written extensively about Westerns and crime fiction.

BIOGRAPHY

William John Pronzini was born on April 13, 1943, in Petaluma, a small town north of San Francisco, to Joseph Pronzini and Helen Gruder Pronzini. Joseph Pronzini was a farmworker. The younger of two children, Bill was reared in Petaluma, where he attended the local schools. He wrote his first novel at the age of twelve. In high school, he began collecting pulp magazines. It was at this point that Pronzini did his first professional writing, working as a reporter for the Petaluma *Argus Courier* from 1957 to 1960. After attending Santa Rosa Junior College for two years, Bill refused a journalism scholarship to Stanford University, choosing instead to become a freelance fiction writer. During the early years of his writing career, Bill supplemented his income by working at various times as a newsstand clerk, warehouseman, typist, salesperson, and civilian guard with the marshal’s office.

Pronzini married Laura Patricia Adolphson in May, 1965. The following year, he sold his first story, “You Don’t Know What It’s Like,” to the *Shell Scott Mys-*

tery Magazine. Pronzini was divorced in 1967. His writing career flourished, however, and he had short stories published in a variety of pulp magazines. One product of this period was his unnamed detective: *The Snatch*, published in 1971, was Pronzini's first novel featuring Nameless. Pronzini moved to Majorca in 1971. There he met Brunhilde Schier, whom he married in 1972. They lived in West Germany before moving to San Francisco in 1974. Their marriage ended, and in 1992 Pronzini married author Marcia Muller.

Pronzini has become one of the most prolific authors of his time, producing more than seventy-five novels and hundreds of stories in a variety of genres: detective, Western, and science fiction. In addition to those works published under his own name, Pronzini has written novels and short stories using the pseudonyms Jack Foxx, Alex Saxon, and Russell Dancer. He has also been a prolific collaborator, working with such authors as Barry N. Malzberg, Jeffrey M. Wallman, Michael Kurland, Collin Wilcox, and Marcia Muller. In addition to his writing, Pronzini has edited a number of books in the mystery, Western, and science-fiction fields.

Pronzini's quantitative achievements have been augmented by qualitative ones. Although he has yet to achieve the high literary acclaim accorded Hammett, Chandler, and Macdonald, he is greatly respected by his fellow writers of mysteries. His novels *The Stalker* (1971) and *A Wasteland of Strangers* (1997) were nominated for Edgar Awards, as were his short stories "Strangers in the Fog" and "Incident in a Neighborhood Tavern" and two nonfictional works, *Gun in Cheek: A Study of "Alternative: Crime Fiction"* (1982) and *1001 Midnights: The Aficionado's Guide to Mystery and Detective Fiction* (1986, with Marcia Muller). *A Wasteland of Strangers* was nominated for the best crime novel of 1997 by the International Association of Crime Writers. He received the Grand Prix de la Littérature Policière in 1989 for *Snowbound* (1974) and Shamus Awards from the Private Eye Writers of America for his novels *Hoodwink* (1981) and *Booby-trap* (1998) and his short story "Cat's Paw." The Private Eye Writers of America awarded Pronzini with the Eye, a lifetime achievement award, in 1987, and in 2005, he and Marcia Muller received a lifetime

achievement award from the Bouchercon World Mystery Convention.

ANALYSIS

Although Bill Pronzini has produced stories and novels at a truly enviable pace, both he and his critics have accorded the Nameless series a special status. First, it is clear that Pronzini identifies strongly with the Nameless detective. Indeed, this is one reason his hero has remained without a name. Second, the Nameless series has been recognized as marking the literary high point of Pronzini's career. It is this body of work for which Pronzini will probably be remembered, for the Nameless series has staying power derived both from its faithfulness to the well-hallowed tradition of the hard-boiled detective story and from its innovations and freshness within that tradition.

The hard-boiled detective story goes back to the 1920's, when Hammett, taking advantage of the flourishing trade in pulp magazines and the stylistic trends of the times, almost single-handedly established a new subgenre of popular fiction. Drawing on his experience as a Pinkerton's detective, Hammett brought a new realism and depth to crime fiction while holding to the constraints of the pulp market. These constraints dictated plenty of action and consummate directness of expression. The result was a hybrid literary form with elements of both high and low art—something roughly akin, both conceptually and chronologically, to the Marx brothers' *A Night at the Opera* (1935). The hard-boiled genre expanded quickly and profusely. As Pronzini and others have remarked, numerous authors, some well known, others relatively obscure, though often talented, went on to produce notable works within it. In addition, the genre was a natural for films and later for television. The action-oriented, economic prose and crisp dialogue of hard-boiled stories translated readily to both the large and the small screen, resulting in classic films such as *The Maltese Falcon* (1941) and popular television programs such as *Peter Gunn* (1958-1961), *The Rockford Files* (1974-1980), and *Spenser: For Hire* (1985-1988). In short, the hard-boiled detective became a significant mythic figure in American culture, one that, for all its very considerable international appeal, remains as distinctly American as jazz.

Why has the hard-boiled detective had so broad and lasting an appeal? This type of detective has been likened to a modern-day knight, defending the weak, seeking truth, and striving for justice in ways that legal authorities cannot or will not duplicate. Put another way, the hard-boiled detective is an independent agent who acts as he does because it is right, not for material gain or out of blind allegiance to a cause, and who is willing to face stiff opposition in the name of principle. The hard-boiled detective is a person of action, a doer, living up to the dictates of a demanding personal code; therefore, this type of detective must not only pass up wealth and other modern measures of "success" but also risk grave personal danger. It is this precarious existence that dictates that the detective be a loner; privation and danger are the crosses to bear and are not readily transferable to loved ones and other intimates.

THE NAMELESS DETECTIVE

Pronzini's Nameless series consciously carries on this tradition both stylistically and substantively. Using the genre's classic, first-person narrative, lean prose, and crisp dialogue, Pronzini portrays Nameless as being nearly everything the detective as modern-day knight is supposed to be. Nameless helps the weak, at times working without pay to do so. For example, in the early stories "It's a Lousy World" and "Death of a Nobody," Nameless takes up the causes of a former convict and a derelict, both of whom have been killed. There are no wealthy relatives footing the bill, thus no hope for a paycheck. Yet Nameless follows through, simply because he cares about the sanctity of every human life, not merely those for whom a fee can be collected. He also cares about the quality of each life, a characteristic that leads his friend Eb to call him a social worker. Beyond this universal compassion lies a hunger for truth in all of its complexity (as opposed to mere appearances) and for thoroughgoing justice (rather than the rough equivalent provided by law). To pursue these goals, Nameless must devote himself single-mindedly to his investigations, wading through a sea of lies, warding off threats, and ignoring weariness to the point of exhaustion. Nameless does all this and more in the name of a higher code, a modern form of chivalry aimed at making the world a better place in which to live.

Nevertheless, the Nameless series does more than simply pay homage to the hard-boiled genre; it adds a new twist or two to the tradition. Drawing on the model of Thomas B. Dewey's detective, "Mac," Pronzini has aimed for a new kind of authenticity, eschewing the more superficial and fantastic elements of the genre. Nameless starts off his literary existence middle-aged and paunchy, anything but the romanticized figure often presented, particularly in screen variations of the hard-boiled tradition. Nor is Nameless always wildly successful in his endeavors: He is sometimes mistaken about things and sometimes used.

In a more conspicuous break with the hard-boiled tradition, Nameless is far less private about the details of his life and his needs than are most of the classic hard-boiled characters. Nameless has a long-running, close friendship with a San Francisco cop named Eberhardt. He also has had two enduring relationships with women—first with Erica Coates, who turns down Nameless's proposal because of his line of work, and later with Kerry Wade, although a bad first marriage keeps Kerry from marrying Nameless. In addition, the reader is given details of Nameless's state of physical well-being that the Continental Op or Sam Spade would never have dreamed of sharing. These run the gamut from Nameless's bouts with heartburn to a tumor and the possibility of lung cancer. (It is the later that induces Nameless to quit smoking.)

In addition to these very human insights, Pronzini's hero is much less prone to play the tough guy. Nameless rarely breaks the law or engages in violence. Indeed, he almost always refuses to carry a gun, especially later in the series, and he throws the only gun he owns into the ocean in *Dragonfire* (1982).

Pronzini's quest for heightened authenticity (or what one pair of critics has called "unromanticized realism") has been additionally enhanced in three specific ways that deserve to be noted. First, by making Nameless a collector of pulp magazines and an expert on the hard-boiled genre in particular, Pronzini has not merely been autobiographical. He has also moved his hero one step away from the fictional world toward the world of the reader. The pulps are real. Though the stories in the pulps are fictional, these fictions are read and collected by real people. Nameless reads and col-

lects these works. Therefore, Nameless is (or, at least, seems) more real.

Second, Pronzini has preserved continuity between the stories and novels of the series, leaving situations hanging and having Nameless and Eb age somewhat realistically from work to work. Both characters have changing relationships with the opposite sex and both experience career shifts. Like everyone, Nameless and his friend must deal with the trials, tribulations, and occasional comforts of the human life-cycle.

Third, Pronzini twice has collaborated with other authors of detective fiction to produce works that provide mutual validation for the main characters involved. Nameless does not exist merely in the minds of Pronzini and his readers. He also cohabits San Francisco with Collin Wilcox's Lieutenant Frank Hastings and Marcia Muller's Sharon McCone. In something akin to the way governments extend or deny one another diplomatic recognition, these authors have brought their fictional characters closer to life through these collaborations, making them more authentic in the process. The result has been the creation of a unique character and series in the hard-boiled tradition as well as the emergence of a significant audience for Pronzini's Nameless stories and novels.

A final comment or two should be added regarding the anonymity of Pronzini's best-known character, particularly since it may seem difficult to find a connection between this aspect of Pronzini's series and his quest for authenticity. It could be argued that the reality of Pronzini's character is best preserved by not tying him down to a name that can easily be proved fictional. Yet Nameless apparently owes his condition to two factors largely separate from the quest for authenticity: serendipity and the close identification of Pronzini with his character.

Pronzini claims no profound goal in leaving his hero nameless—merely that no name suited the man: "Big, sort of sloppy Italian guy who guzzles beer, smokes too much and collects pulp magazines. What name fits a character like that? Sam Spadini, Philip Marlozzi?" Additionally, Pronzini admits that his character is autobiographical, reflecting his own perceptions and reactions:

Nameless and I are the same person; or, rather, he is an extrapolation of me. His view of life, his hang-ups and weaknesses, his pulp collecting hobby—all are essentially mine. . . . So, even though I can't use it, his name is Bill Pronzini.

Indeed, when Pronzini's hero is referred to in one of the sections of *Twospot* (1978), a collaborative effort with Collin Wilcox, he is called "Bill." Thus, while the situation does not handicap the series—some readers are even intrigued by it—the precise meaning of the hero's anonymity is unclear and possibly not very important. Indeed, it seems ironic to be told the details of Nameless's life, where he lives (the upstairs apartment of a Victorian house in Pacific Heights), whom he sees, how he amuses himself, and yet never learn his name. Whether this irony is intended is left unclear.

The Nameless Detective series is arguably the longest currently running series in the genre. Noted from the beginning for its signature tone of sadness, Pronzini's alter ego has aged along with him. By 2006's *Mourners*, Nameless has a wife named Kerry (who is holding somewhat aloof) and an adopted daughter, Emily. He has two junior associates, Tamara and Jake, with troubles of their own and no lack of clients.

In the mid-1980's, Pronzini allowed his love of the Western genre—he has edited dozens of Western anthologies and collections—to spill over into his mystery writing with the invention of two new series characters. John Quincannon and his partner (and unrequited love interest) Sarah Carpenter are detectives working in San Francisco of the 1890's. Chiefly they solve locked-room mysteries and other "impossible" crimes, although they do encounter the occasional six-gun or thrown punch. Though the series has not progressed very far, it has achieved critical acclaim. One critic wrote that the historical setting contains "some of the most elaborate landscapes since those of Arthur Morrison in the 1890's," adding of the Delta region of the Sacramento River east of San Francisco that "this watery region is marked as being peculiarly Pronzini's own. J. G. Ballard has suggested that delta regions represent the unconscious, a sort of living map of the interior landscape of part of the human mind." The story "Burgade's Crossing," for example, involves a

search of the landscape for the possible site of a pre-meditated murder, so that the setting itself almost acts as a character.

Whether this series will be developed to the extent of the Nameless Detective series remains to be seen. With or without a name, Pronzini's detective does achieve a significant level of authenticity and freshness. Joining the ranks of today's liberated men, Nameless is unafraid to cry or communicate his emotional needs, fears, and concerns. He is willing to confess his desire to be loved and to have at least a few close friends. Nameless provides an alternative to the tough-guy private eyes of old.

MANUEL PUIG**Juan Manuel Puig**

Born: General Villegas, Argentina; December 28, 1932

Died: Cuernavaca, Mexico; July 22, 1990

Type of plot: Psychological

CONTRIBUTION

Manuel Puig's contribution to the mystery and detective genre is limited to a single novel, *The Buenos Aires Affair: Novela policial* (1973; *The Buenos Aires Affair: A Detective Novel*, 1976). A member of the literary avant-garde as well as a pop novelist, Puig mixed high and low culture in his fiction and rejected the dismissal of popular literature, such as detective fiction, as subliterate.

Each of Puig's novels can be identified with one or more genres of popular writing: serial melodrama, sci-

ence fiction, screenplay, and detective fiction. His use of these various genres shifted between parody and emulation. *The Buenos Aires Affair*, for example, combines a playful attitude toward the conventions of the detective novel with an earnest desire to present a spectacle and to communicate directly with a mass audience. In adapting the detective novel to his use, Puig commented that it was the ideal form for his proposed theme of contained violence. Nevertheless, his use of the genre was decidedly self-critical and experimental in the manner of Jorge Luis Borges or Alain Robbe-Grillet.

BIOGRAPHY

Manuel Puig was born on December 28, 1932, in the small town of General Villegas in the Argentine

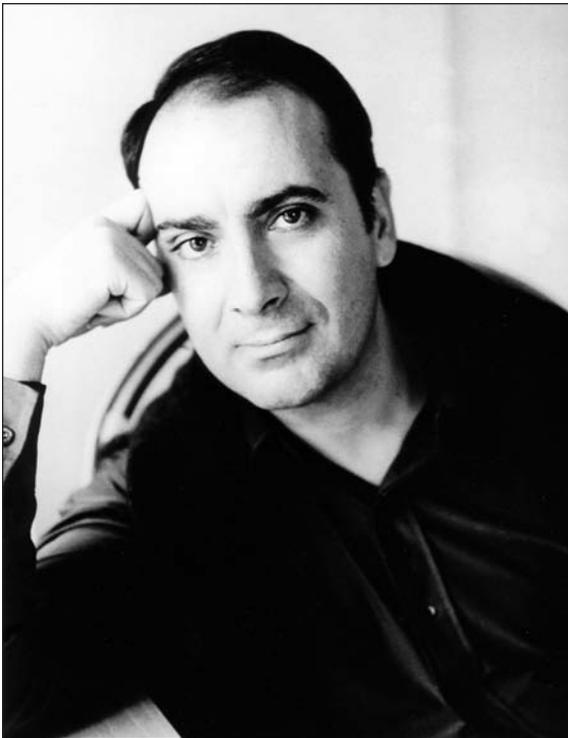

Pampas. According to his own account, the provincial elevation of machismo and authority made his daily existence extremely unpleasant in his youth, so that he sought escape by going to the movie theater. Puig's childhood immersion in the Hollywood superproductions of the 1930's and 1940's became a powerful influence in his life and work.

In 1951, Puig left the provinces to begin his studies at the university in Buenos Aires, expecting the big city to resemble Hollywood. Disappointed by reality, he left Argentina for Italy on a grant to study cinematography in 1956. In Italy he pursued his dream of working in the film industry, acting as an assistant director at Cinecittà in Rome until 1962. During this time, however, he became disillusioned with life on the set and began his first novel, *La traición de Rita Hayworth* (1968; *Betrayed by Rita Hayworth*, 1971), in part to express his disenchantment. As Puig later explained, that novel was an attempt to discover why he suddenly found himself at the age of thirty without a career or money and with the knowledge that his life's vocation was a sham. From that time onward, the be-

trayal of reality by illusion and the seduction of the individual by popular culture would be constant themes in his writing.

From 1964 until 1967, Puig worked as a clerk at Kennedy Airport in New York while he finished *Betrayed by Rita Hayworth*. Following its publication, he returned to Buenos Aires and began a second novel, *Boquitas pintadas* (1969; *Heartbreak Tango*, 1973). His return to his home country was short-lived. Following the banning in Argentina of his third novel, *The Buenos Aires Affair*, Puig spent three years in exile in Mexico and then returned to New York in 1976. At that time he published what is perhaps his best-known work, *El beso de la mujer araña* (1976; *Kiss of the Spider Woman*, 1979). He later collaborated with director Hector Babenco on a film adaptation that premiered in 1985. He remained in exile for the rest of his life. Puig continued to write novels, plays, and screenplays, and his work has been translated into fourteen languages.

In 1989, Puig moved to Cuernavaca, Mexico. The following summer he underwent emergency surgery for an inflamed gallbladder and died shortly afterward.

ANALYSIS

Manuel Puig was not, strictly speaking, a mystery and detective novelist. His modus operandi was consistently more or less to usurp some popular genre for each of his novels. In *Heartbreak Tango*, he used the serialized melodrama, in *Kiss of the Spider Woman*, the screenplay. Even as he plundered the artifacts of mass culture, Puig's attitude toward popular culture was deeply ironic. It is this obvious ambivalence that made him one of the most self-conscious of twentieth century writers.

THE BUENOS AIRES AFFAIR

Consequently, Puig's use of the police-novel format for *The Buenos Aires Affair*, his third novel, reflects a sincere interest in the genre yet simultaneously permits him to parody its conventions. The result is an interesting amalgamation of pop fiction and the avant-garde. In reviewing the novel for *The New York Times Book Review*, Robert Alter called it a "sustained bravura performance by a writer keenly conscious of how both the novel as a literary form and the kinds of peo-

ple who are its best subjects have been caught up in the clichés of popular culture.”

Puig initially chose to write the book as a detective novel because he had already selected the themes he wanted to treat—repressed sexuality and contained violence. He believed that the narrative structure typical of detective literature would facilitate his project. In fact, the conventions of detective writing were particularly well suited to his undertaking. First, the rules of the genre are very well defined. Puig had only to subtitle his book “detective novel” to activate an entire set of expectations in readers. Second, the detective novel appeals to those who read critically and enjoy filling in missing details and information. Puig’s narrative technique has always required such readers.

Puig’s critics have often compared his technique to the neorealism of the French New Novelists. Puig was generally quick to deny any literary influence and to insist that the cinema had a greater impact on his work. Specifically, he mentioned Alfred Hitchcock as a major influence on *The Buenos Aires Affair*. The majority of Puig’s novels are attempts to render in prose reality as it might be seen by a camera’s eye—that is, with distortions, omissions, and plenty of room for an audience to draw false conclusions. This coincides with the efforts of the New Novelists to record reality in an objective fashion, without commentary or interpretation in the text, much as a camera would. It is the same nonintrusive style of writing that French critic Roland Barthes has called “zero degree writing.” The technique in itself creates mystery, and Puig’s fiction has much in common with works by New Novelists Robbe-Grillet and Michel Butor that have been classified as detective fiction.

The classic detective story has well-defined rules of functioning. Generally, the whodunit begins with a crime, preferably a murder. The story, then, involves a detective’s reconstruction of the event from available clues to unmask the perpetrator of the crime. The text moves toward a solution while at the same time postponing that solution through a series of false leads and delays. It is this process of discovery, rather than the answer to the problem or the identity of the criminal, that forms the body of the book. The detective, not being omniscient, must piece together his solution

through careful observation of evidence found at the scene of the crime as well as from eyewitness accounts that are necessarily fragmented and sometimes unreliable. Puig’s fiction works in a similar manner, often requiring readers to supply connections and interpretations.

In *The Buenos Aires Affair*, Puig uses a variety of narrative techniques. There is no consistent narrative voice or point of view, and there is no detective other than the reader. Sometimes a dispassionate third-person narrator catalogs objects in a room, listing, for example, the sharpest object, the most expensive objects, metal objects, and the like. At other times, an omniscient narrator lays bare the hearts and minds of the characters, revealing their dreams and sexual fantasies. The novel is itself a process of investigation and a constant reminder of the ambiguity of life, the complexity of character, the ultimate inaccessibility of reality. This philosophy of fiction is central to Puig’s work and has its origins, for him, in film technique. The notion that some points of view are more privileged than others, just as some witnesses are more reliable than others, is also implicit in detective fiction.

As a master of the occluded narrative, Puig conceals and withholds information throughout the novel. In one chapter, he records one side (all that a casual observer would realistically hear) of a phone conversation in a police station, and he includes fragments of the newspaper articles the character is reading. He also offers a shorthand transcription of another telephone conversation. While the message of the transcription seems apparent, the missing words create ambiguity.

Thus, the importance of point of view is demonstrated: Reality is fragmented and open to interpretation. Reading a novel by Puig is essentially detective work. He presents information in a manner that requires readers to piece together the truth from the available clues, and this process often leads them to mistaken conclusions. Puig has used this technique consistently in his fiction. It also commonly occurs in detective fiction: In the process of discovering the solution to the problem, the readers and the detective pursue a number of false leads as they uncover the missing links that will allow all the clues to make sense. Puig, too, lures the readers into erroneous conclusions.

Clearly, in its very nature, the detective-story format lends itself to Puig's project. Its conventions are helpful to him; in fact, they provide a justification, more or less, for his customarily inventive method of telling a story. However, Puig goes beyond using the rules of the genre: He draws readers' attention to the fact that there are elaborate rules dictating how they read. By revealing to readers their own reading processes, Puig shows them how much they can be deceived by all manner of fictions. By the end of the novel, readers discover that the murder they thought they were witnessing at the start did not take place.
